

Notes

The climate change map shows the potential impacts that climate change may have on river flows and, subsequently, on flood events. Where model results in the study area, a change factor has been applied to the 1 in 100-year flows.

Flood Zone 2 is shown on the maps to give an indication of the impact of climate change where modelling output is not available.

Developers should assess the flood risk implications of climate change to development as part of a detailed Flood Risk Assessment.

Key Plan

Legend

- 100-year with 20% climate change
- Flood Zone 2
- Bassetlaw District Boundary

STRATEGIC FLOOD RISK ASSESSMENT LEVEL 1 APPENDIX C - CLIMATE CHANGE MAPPING
