nt	nt	
1	1	Option A.
1	2	I cannot agree or disagree until the location is disclosed. The Junction of Station road, Mattersey road, Great North road and Blythe road is already dangerous due to the lo Office) and Fish and Chip Shop and total lack of public or private parking areas, except the pub. This junction already has traffic lights and pedestrian crossings which obscu cause additional hazard at this junction.
1	3	Yes
1	4	REMOVED
1	-	REMOVED
1		REMOVED
2		Yes
2		No additional growth without major updating of facilities.
2		None Not supported
2		Not supported Option A
2	-	Stay around existing sites
2		Together at existing sites
3		Option A
-		Yes, though I'm worried by the "at least" statement. I'd be a lot happier if a firm number was committed to that had some enforcement behind it. Also, I think that any ne
3	2	existing buildings in the village. There are already too many new houses that are totally out of keeping with the village character.
2	2	Yes, as this would give about the right number of new houses. However, I would like to see the mix of house sizes and types in these developments to make a final call. Al
3	3	recently been started", the evidence is that there is only one being build and it's been going on a long time.
3	4	In line with existing infill, 408 and 409
3	5	I think that the map should indicate the village envelope for building as there are potential sites outside this that should be identified as so.
3		Yes.
4		Yes Worksop should be allowed to grow both in housing and employment growth.
4	-	Site 4 & W9- ideal as its size is ideal for a housing scheme and contained industrial/employment opportunities.
4	3	Site 4 & W9- ideal as its size is ideal for a housing scheme and contained industrial/employment opportunities.
4		Site 4 & W9- ideal as its size is ideal for a housing scheme and contained industrial/employment opportunities. The size of the site is big enough to show a serious commit
5		Yes, I deem the changes to be positive and good for the town.
5		Yes, I think the estates which have been built (Bracken Way) are neighbourly pleasing to the eye and bring in promising working families to the village I'd like to see all are to go ahead.
5	3	All
5	4	All, we need as much opportunity for employment as possible.
5	1	A mix would be good maybe a shopping complex restaurants something to bring people into the village.
5		None at this point.
5		Sites 23 and 61 is valued and used by many residents and we would like to keep this land as it is.
5		Option A.
5	9 10	Around existing sites, concerns of bringing down house prices. I would not want to pay the high rent and council tax in my area if a caravan would be allocated near us. I think it should be up to the travellers who wish to live in that area.
6		Yes employment and housing
6		Sites 187 and 197. Plumtree area
6		Good idea for employment. Could you try for leisure complex including outdoor crown green bowls, bigger swimming pool?
6	-	Yes, Tickhill Road near sewerage with houses on Baulk Lane- health hazard (Site 182).
7	1	Yes
	-

Responde	Comme	Answer
nt	nt	
7	2	HOUSING. If there are homeless people then they need housing, if people are overcrowded in their current accommodation because of relatives sharing then they need It is up to the Government, Local Authority and Building Industry to work together morally ensure this happens. All people seem to want is for the so called 'value' of the 'value' you still have to pay for another!!) However if additional private housing is built in Bassetlaw a percentage will be bought for investment and rented out, a further people upgrading, the majority will be bought by people from outside Bassetlaw . Many of the latter group will continue to work outside Bassetlaw and hence be commu vehicles to do so, the majority of the money they will spend locally will go to the now 'proposed with big fanfares' 4 large supermarkets, 2 medium Asda's 4 small Tesco's people at near minimum wages. Maybe we house just house those without! Bassetlaw DC have those figures.
7	3	EMPLOYMENT. Again if we have unemployment we need to eliminate it. If we are not proactive we will continue the trend of becoming a dormitory town for Nottinghar scraps provided by distribution and service sector employment. We need more employment in the community for residents to eliminate commuting. Those employed by the Local Authority to carry out what is possibly it's most impor reporting to the public on a regular basis, whatever the economic climate successful outcomes are the only ones acceptable!!
7	4	Living on the Ashes Park Avenue Estate is in general a pleasant and comfortable experience which I would be happy for others to share on Site 35 if it were developed in
7	5	However obvious access is currently only via the roundabout (which would require part-time traffic lights, and a pedestrian crossing in line with the bridle way)) entering cope with up to 700 new dwellings
7	6	Access via Montford Road is not feasible as it is not wide enough to carry more than traffic to Gateford Nursing Home and would require the removal of mature trees (w any development) along the bridle path to Owday Wood and Owday Lane
7		Access via the roundabout at the junction of Ashes Park and Edison Park Avenues is possible if a road is built through to the development site but it again would need to incorporate part time traffic lights and a pedestrian crossing. It would prove to be more acceptable to the community if these measures were carried out prior to the cor
7	X	Additionally there is a requirement for at least 15% affordable housing. This is absolutely fine, however why are these always hidden away in one place in the corner of a every sixth property built by each developer a Registered Provider property spread out over the site?
7		On the current development of Ashes Park Avenue there are 39 Registered Provider Properties parked in a corner, but amongst the remaining properties there are at lea population has had at least a 35% change over the last 10 years.
7	10	W1, W12, W13, W8, W6, 26, 45, 371 These areas have almost instant access to main roads and would have minimal effect on current housing
7		However should a major possibility come on the horizon W9 could be ideal but I am against mixed use as mainly disadvantaged residents are placed in these positions.
7	12	I do not support mixed sites, because they reduce the environmental quality of residents
7	13	The area indicated as Potential Protected Open Space along the length of Ashes Park and Edison Park Avenues between the existing developments is currently protected with empathy to the Old Gateford Conservation Area designated in 2009. It is a clean, fresh, green landscaped area occupied by a variety of shrubs and trees shielding from a Junior School built within the last 20 years. Hidden between the trees is a stream with 2 small ponds frequented by mallards, herons and moorhens. Young children fish older children on bikes use an area they call the ramps to hone their skills for BMX tracks. A football team trains at the goal posts area, Worksop Junior Harriers do extra walkers, hikers and joggers from within and outside the immediate estate enjoy it's amenity on a daily basis. It is a wildlife corridor. It is a pleasant place to live in, any de would be a disaster.
7	14	The young people of the new estates in Gateford continually bemoan the lack of facilities for them in the local area. During and since the Gateford builds no Section 106 Worksop. We trust that the same mistake will not be made in the future. Therefore I suggest when the DPD is Published in late 2012 it should include provision of monie suggested location is behind the tree line at mid point between the start and finish of site reference 28 & W6 on Gateford Road. I suggest this location because it is curre 200yards from any current housing. This being the case potential occupants of the surrounding land would be well aware of pre determined issues! I do not support mixe
7	15	Street Furniture is excessive and ugly, takes space, require holes in the ground and concrete to support it, attracts graffiti, gets in the way of mowing/requires striming, required expensive replacement/repair. I understand and agree with the need for traffic signing, site/road location signage etc. etc. However with some thought and plan so that road name signs can be attached to at about 4m above ground level could take up to 8 signs of the ground at one road junction. Utilisation of lampposts in other guide book changed before more development takes place!
7	16	I believe my opinion has been given within the above questions comments. However as a general rule I subscribe to housing being built in a pleasant environment away should be located near to main roads and hidden by landscaping

7	17	Option A: Spread between Worksop; Retford and Harworth Bircotes?
		Only sufficient sites should only be created to meet the requirements of law. They should not be in any position that would interfere with what could be considered as 'no
7	18	to occupy the site as long as strict criteria on the general maintenance of the sites is maintained. The sites should be distributed equally throughout Bassetlaw and strict p
		education.
7	19	Separate but adjacent sites
7	20	None identified.
8	1	Yes
8	2	Also why on earth are we looking to build on yet more greenfield sites - cant we be a bit more creative than just mindlessly filling fields and ruining the local environment
8	3	REMOVED
8	4	I would like to see area 30 developed as its currently derelict and dingy land.
8	5	Also areas 90,38,11,26,45,218,151.
8	6	Areas i would NOT LIKE to see developed are 9 and 35 - i am 110% against any housing development on these two sites!!
8	7	All employment sites i would prefer to see developed - create some jobs and the rest will follow!!!!
8	8	All mixed use sites except the plan that would replace Kilton Golf Course - Good location but not at the expense of the municipal golf course facility I'm afraid
8	9	All open spaces should be protected in my opinion
8	10	REMOVED
8	11	Yes it would be great to see some kind of pub/restaurant go on this site - give us some restaurants to stop us getting in our cars and spending our money elsewhere!!
8		Option A: Spread between Worksop; Retford and Harworth Bircotes?
8		REMOVED
8		REMOVED
8	15	Site 9- Having seen the "Site allocations - issues and options consultation" document on your website i wish to write to give my thoughts against the proposed housing site
-		issues to be considered: 1. I think building houses here would conflict with national and local Planning Policy by building on a greenfield site.
8		2. Any new houses would overshadow, overlook and cause loss of privacy to my property.
8		3. Increased traffic will be generated, access, road safety and parking problems would be caused to an already over busy area.
8		4. Loss of trees and hedgerows would be caused.
8		5. Loss of ecological habitats and landscapes - there are masses of wildlife living and thriving off the land in these areas.
8	20	6. It doesn't matter what design, appearance, layout, density and mass of buildings they come up with - they cannot substitute precious open space.
8		7. It will have a detrimental effect on the listed building "Manor Lodge" next to Lodge Farm with yet more cheap nasty houses blotting the landscape and ruining the build
8		8. the area is already overdeveloped and like a "rabbit warren".
8	23	9. Inadequate infrastructure to support the development - where are the extra schools and places of work/jobs for all these extra people?
8	24	10. This area (9) is a haven for walkers, both local and from further afield and yet more unsightly, cheap houses (which is what they will be) will be a blight on the landscap
-		living in the neighbouring properties and area.
8	25	11. I would welcome any opportunity to discuss this further. I am in favour of development for Worksop - By god do we need it! But it needs to be the right development a
		the way forward create jobs and stop people driving out of the area to spend their money and the rest will look after itself!!
9	1	Option A.
		Access in and out of the village by road should be by A57 road only. Crockett's hill is not an option!!!! Any access onto the A57 in or near the village, eg near the junction t
•	2	bend is not an option. Generally the A57 traffic situation in the village now and in the next 25 years is bad and will get worse. School traffic/congestion is already bad. The
9		in the village. The Toll bridge does not need any more traffic throughput at rush hours. The above plus flood risk i.e. cost to rate payers for emergency services as and whe
		risk i.e. cost to rate payers for emergency services as and when, is not acceptable. Conclusion - Dunham is not an appropriate place for property development.
9	3	I do not recollect seeing the 'residents questionnaire' maybe I missed it.
9	4	Any family facilities, eg. shops are non existent in Dunham
9	5	Together - will reduce traffic and pedestrian traffic between the two if separate.
10	1	Yes
10	2	Option A

nt	nt	
10	3	Yes, provided that present infrastructure is checked for purpose. I feel that the sewage treatment is not good enough even now and that a new unit should be built or the accommodate any extra housing.
10	4	Sites 178 and 590
10	5	Site 482 can be prone to flooding, Site 266 has narrow access to a busy road and also spans a public right of way.
10	6	Yes
10	7	Existing locations
10	8	Together
11	1	Site 4- Whilst I agree that you have to build houses and businesses around the areas, I would urge you to have a very detailed look at what is available around Worksop be of what is left of our greenbelt and especially the Kilton Golf course and the Amenities there which are great, adjoining this is the large recreation ground of course ? used used by lots of the residents for many things -not forgetting the Worksop Festival, this is the only area at this end of town available for local residents to access on to the the brown field site option with more urgency e.g. THE VESUVIUS SITE WHICH NEEDS URGENT MOVEMENT, WHICH IS IDEAL FOR DEVELOPMENT OF COURSE AS YOU KNO course area be a bad decision it would also be a fantastic BLOT on the scenery for anyone driving into the town from the A1 from Blyth and it would certainly make them created entry into Worksop on the main road from Blyth??? it would certainly fill them with enthusiasm. Another suggestion is that you use what will be the OLD TESCO S it are they? They will be too busy trying to sort out the coming traffic problems on their new roundabout on Carlton Road!! Especially when the crossing gates are down, we
11	2	1. From the A 1 at Five lane ends we have the Beautiful Clumber woodlands which is still reasonably nice coming into Worksop. 2. From Nottingham coming into Workso around Hannah park area still very nice. 3. From Sheffield we still have open space on entry again quite nice. Areas for consideration within Worksop for these project sho will become available soon b) Vesuvius site c) The old textile site at the end of High Hoe Road. 4. The proposal on Blyth road would make the biggest Blot on the Worksop estate on both sides of the road ?? and the total destruction of the ONLY open space on this side of town a fantastic amenity for this area of town - let alone the Golf cou driving into Worksop from Blyth to certainly question the sign ? Gateway the Dukeries -it would look more like a Gateway to the industrial estates. I would suggest that now many actual brown field sites we have available for industry first, before any green belt land is even considered. 5. Bassetlaw County Council has adopted a very for facilities since 2007 re improved recreational areas, what you are proposing of Blyth Road would be going against this policy and destroying one of the best recreational and aland should be utilised to its maximum potential re- industrialisation first.
11	3	I find it very worrying that the council do not have the knowledge or the will to control their own destiny Re-Worksop !! new housing development. Many houses are und it wants bringing up to date, The old textile factory site could be used to build on there which could improve the quality of the Manton area, you have allowed Tesco to bu for housing ? instead you will have a very interesting traffic problem ? Tesco didn't need a bigger site anyway ? the site they are on currently is bigger !! why could they n could be dual purpose housing and retail like in many other towns. Lets not forget that it is about the quality of life for people and not just willy- Nilly building projects tha when you enter it from many different routes, On the hill near the Colsterdale area is a sign that says welcome to the Dukeries - an area of outstanding beautiful countrys available green sites for kids and other activities is important, we have quite a nice area off Blyth road near the golf course !! a nice recreation ground which is very well us for miles which is needed for football clubs and many more activities and The Worksop Show each year and of course is adjoining the lovely Kilton Golf Course another at one point. Whilst i appreciate that we have to have houses I think you need a re-think and a very good look around the area (Yourselves) before anything is set down is developers should have any say in. It was yourselves who were voted in not developers.
12	1	Site 35- Anyone on the Ashes Park side of Worksop will tell you what a task(chose that word carefully) it is to exit either end of either Ashes Park Ave or Eddison Ave at perturbed the second roundabout at times with A60 traffic using the estate road as a rat run from the S60 to the A57 and vice versa. Any addition to that traffic would be a disaster. taken into account but does not explain HOW? The ideal solution for me would be to put in 2 link roads, one to the A57 at the Woodsetts junction/ A57 bypass/ Sheffield Doncaster road at its junction with Owday Lane end as this would also give you the opportunity to work on the bad bend at that point on Doncaster Road so kill 2 birds wir part of Ashes Park Ave or Eddison Ave from the new proposed estate (area 35). What are your thoughts on this?
12	2	My other concern is that like our part of Gateford with its designated open spaces the 800 developments proposed by the developer as to the 700 proposed by the council have somewhere to go and overdeveloping the area will just add to the complications, remember one average tree consumes 400 litres a day so plant some trees i place of is why we came here in the first place, we suffer the £1700 pounds a year council tax gladly so I can wake up in the morning to look out over ever changing fields and trees keep my grandchildren entertained. We can never stop development but at least we can try our best to get it right.

ne present one at Nornay upgraded to

before you and your colleagues destroy much ed by football teams across the area and is also ne footpaths there. I think you should look at IOW. Not only would development of the Golf n wonder why the local council in their wisdom O SITE for housing as they are not going to need n, watch this space.

ksop past the Lion Gates and the woodlands hould firstly include: a) The Old Tesco site that op landscape imaginable with an Industrial ourse - which in turn would provide anyone at more serious consultation takes place on focused strategic approach to play /sport areas in Worksop. 6. All the ex mining

inoccupied in the Manton area mainly because build on a site again that could have been used v not enlarge that one ?. The Vesuvius Site hat will also detract from the look of a town ryside - not-- welcome to the building site. the used and leads to countryside walks which go er facility which was mentioned in despatches n in stone and certainly not a decision that

peak traffic times with the queue right back to er. The information states that this has been eld A57/ roundabout and the other to the A60/ with one stone. This give NO connection to ANY

ncil's team is just greed. Groundwater has to e of the houses and some open green belt, this ees a never ending supply of wildlife also to

26	1	I have lived in this bungalow for over 20 years since my retirement from my career in the ambulance service. I bought this bungalow for the view to the open countryside rear so I could enjoy the benefit of the view. Building in the area 41 would be detrimental to the environment of the town and for many residents bordering 41. Taking a g agricultural land North of Retford that would not infringe on anyone and would be within walking distance of the large industrial sites, I feel as many residents feel that O accommodating housing developments when is it going to stop.
27	1	Should any development take place on this land I would like to see a preservation Order put on the mature trees and hedgerow that borders the main road access into Sh
27	2	Would prefer housing rather than industrial use - although I would like this to be not used at all. The open vista is pleasing to anyone knowing Shireoaks given the other si housing and industrial. Future development needs to consider logistical problems in size of the school and width of the roads entering the village. I do not wish that the vi village feel.
27	3	The plantation to be retained on this land rear to Claylands Avenue.
27	4	Would like to see the golf course retained as a green open space and any open space given the size of land earmarked for industrial and housing development.
27	5	Existing sites
27	6	Sites should be together
28		No I do not agree with the screening if the overall area is not identified by the infrastructure of the town and taking into account the new buildings that have taken place.
28	2	No I don't believe that there is a need for more houses in this town. Industrial sites have been allocated but no new industry has been bought in and it is not for the need
28		51, R7, 309, 6, 69, 27, 81, 512 & 37
28		51 & 27
29	1	As a lay-person with regards to the planning of large housing developments, I have no knowledge of other methods. I am sure that the council have adopted the best met accept that the criteria used is suitable as I don't know any different.
29	2	I acknowledge that all parts of the local area, and indeed, the national areas require housing growth. However, I do feel that the required amount of new housing build fo NOT be allocated additional housing above that which is already required. Tuxford is not large enough to cope with too many new residents. The road network and local f as it is now. Any additional housing will affect that anyway, so for that reason I don't think Tuxford needs more.
29	3	Looking at the map of Tuxford provided, it seems that the potential sites 121, 122 & 490 offer the best locations for additional housing. Whether they are all needed and questions. Perhaps all 3 sites used but reduced in size or just 2 of those sites used for building would be more suitable?
29	4	The sites mentioned above (121, 122 & 490) look to be in ideal locations. Not only do they appear to not affect existing residents too much, but they also benefit from the and out. That said, I think it would be ESSENTIAL to control the junction of Ashvale Road/Lincoln Road with traffic lights. These should work on a timer system during peak times. That junction will cause many problems if left as a Give Way junction. Likewise, the speed limit of 30mph needs to be extended up to this this junction.
29	5	Yes I do. The open spaces identified on the map should remain that way. They are need for schools and recreation, some of them are clearly of historical interest.
29	6	Option A
29	7	I don't really know what is best. It would seem to make more sense to expand existing sites rather than build new ones.
29	8	I have no personal preference.
29	9	I don't know of any.
30		423 within Mattersey, the Eastern side of this field regularly floods so would seem to be unsuitable for any kind of housing development.
31		Yes
31	2	Option A
31	3	I perhaps would just like to see natural development of current houses but understand the limitations. So I would accept up to 11 houses being built but would not want t dedicated area that fitted in with the village layout.
31	4	Ref 461 tagged on the end of the village on Leverton Road, following the current line of houses, matching up on both sides.
31	5	Need to be aware of flooding issues within the centre of the village. The school is currently full but places would have to be created if there were new houses built. This v and encourage or dictate, that all new homes would incur green energy as part of their plans.
31	6	Of course, they should, this is a village and huge development would change the whole structure and layout. The residents here want a village feel not a sprawling mass or and views, this is partly why they live here, the open aspect is a thing to treasure, thus the up in arms about the wind farm planning applications.
31	7	Thought we already had sufficient, but would go with existing sites.
31	8	Together, as probably already familiar to the travellers and would seem to be doubling up of amenities.
32	1	Option A
32	2	I agree with the above that 14 new houses between now and 2028 would be adequate for the village size and the amenities that we have at present. It would change the

Responde	1	Answer
nt	nt	
32	2	Reference no 442 this a large area but would be ideal for a small scale development of just 14 houses. The 14 houses that have been suggested could be built one by one much less of an intrusion or impact on the already rural area which we would like to keep we do not want to end up as an urban sprawl such as what has happened to Be
32	4	Number 346 this area is already being developed as up to today we as residents are not aware of any planning permission that has been applied for on this area of land. V building on but it looks as though the landowner knows more then us can you enlighten us as to why he is being allowed to prepare the site for building when we who live already been a clearing of mature trees, hedgerows and an inroad into the field from the road is well advanced. We object to this disruption without prior warning or con
32	5	Yes i do think they should be protected and suggest land off Brickenhole Lane from the property Westleigh to the next Detached house on the right hand side just before protected also as a Wildlife site as it supports a diversity of common mammals, Bird life and Fauna and Flora that is absent within the village. Also because we are surrour with regards to wildlife due to the intensive farming methods adapted today by farmers. The shooting fraternity also destroy game birds and anything else that flies over sanctuary in which to breed and survive without this the area would be devoid of any natural wildlife and each village should a haven/area or opportunity to nurture ther
32	6	I do not know of any sites suitable for this development within this area.
32	7	I do no know sufficient about this to comment.
32	8	I do not know of any sites within the village that could accommodate this development
33	1	We do not think out town need any more housing. Most new properties are standing vacant - its putting more strain on services. Retford us just a bottle neck. More mon safer. When the children are leaving Carr Hill school its a danger zone at the top of Tiln Lane. There should be a mini roundabout. Retford should be kept as an historic tov for the last two years, its still one of the highest in the country. Is this where money is going - to keep building houses?
33	2	We do not agree with number 533 on the map. As a resident on Durham Grove, we think it is very unfair of Mr John Lacey to try to get access to build new homes at the k enough land of his own to provide access. Some of the residents have disabilities and feel safe in the environment. Parking is also an issue. If large vehicles come down th single file traffic. With more wanting access it would be chaos.
33	3	The road is very narrow and when it rains water pools from one side of the road to the other as the drains don't take it away. This is a flood risk.
33	4	When it rains heavily the water stands across the width of the road, because the drains are slow to take it away and the road is extremely narrow with a blind corner. It is
33	5	In Retford there have been plenty of new houses built and half of them stand empty. What is the Council thinking? Why do we need all these houses to put strain on our
34	1	Yes we agree
34		Option A
34	3	We agree for at least 11 houses.
34	4	Yes. We think 33 houses are too many on site 247.
34	1	Would prefer to see site 248 developed in the future.
34		No.
34	7	Yes.
34 34	8 9	Can't comment. Not aware of existing sites. REMOVED
34		Not aware of any.
34	10	I would prefer to see development on sites 296, 345, 406, 407 and 477 as they front busy roads and face existing developments.
35	2	Access to the proposed development site 408 is not possible. The strip of land along Croft Way, bordering this site, is owned by a private individual who does not wish to of any other feasible access, site 408 is unsuitable for development.
36	1	Five affordable houses as the most. No community facilities for a shop, health service, doctor's surgery or post office. Road infrastructure not suitable for any more traffic
36		No, my view would not change.
36		484, 406, 477
36	4	Yes.
37	1	Not sure
37	2	Option A
37	3	There was only a 21.68% response rate from the questionnaires issued. Should residents have realised this figure was going to based on those results you may have had

		Yes definitely, I can't see how 19 houses can be built on that land that doesn't include flats or very small houses - not the right image for a village like Hayton, which rightly
37	4	that junction at the end would become dangerous.
37	5	161, 544, 545. Basically the smaller sites that would allow for individual dwellings rather than small developments.
37	6	Currently we have 3 public houses, when at any given time only 2 manage to prosper. The Boat would do better as a B&B. There still isn't a local shop, post office or cafe. F
37	7	Yes, although not much allocated to Hayton
37	8	REMOVED
37		Not at all
37	10	REMOVED
38	1	Yes but I think you should have added a master plan criteria about relationship of the site with existing built fabric of the village (many of the sites you consider developabl criteria should have been weighted so the scoring of sites against the criteria could be transparent and objective.
38	2	Option A
38	3	No, given that their is only local support for 12 houses in the plan period allocating new land for housing is not warranted, the 12 units will be provided by windfall develop barns and land within the village boundary which come forward for development when the property market recovers.
38	4	238 on the basis that is the smallest site which can be contained, to its' proximity to the sewerage pumping station, can be accessed from an existing road and does not co
38	5	It will be impossible to limit the number of houses on sites 239,464,and 237/236 if they were allocated. Developer will require additional units to fund the required access now in the Conservation area if allocated this site would totally undermine the integrity of the development boundary and subsequently the character of the village.
38	6	Yes
38	7	The land adjacent to Trent Port should be considered given that this suffers from illegal Traveller occupation and fly tipping.
38	8	I do not understand the requirements of the occupants so wouldn't presume advise.
39	1	Option A
39	2	I agree that 9 houses should be allocated in Blyth.
39	3	For minimum disruption to local residents, for nine houses it would be beneficial for sites 178 to be developed first. 178 has capacity for 20 houses so has room for further residential houses nearby so would have less of an effect on current residents.
39	4	Site 266 is a vital area for walkers and dog walkers. This is an area for people to use for family picnics and is a great space for children to play.
39		In and around existing sites. The site is already there so it would be less of an environmental impact to develop the existing site further.
39	6	Together. It makes more sense to have them this way due to the cost incurred by having them separate.
40	1	Yes, I believe the current criterion is appropriate.
40	2	Option A.
40	3	No, the flood risk combined with the poor road access on the A57 should really be considered as major constraints to any further development in central Dunham.
40	4	No.
40	5	I agree that the current open spaces within Dunham should be retained and I support their protection. Particularly the Green.
40	6	Existing sites.
41	1	Yes. I agree with the overall methodology.
41	2	Option A
41	3	No, now we have the Corner Farm permission for 19, there should be no further growth within the village. The villages infrastructure and school cannot take any further gr bypass. Plus the shop and pub have now closed. WE DO NOT SUPPORT ANY FUTURE HOUSING ALLOCATIONS IN THE VILLAGE.
41	4	No, now we have the Corner Farm permission for 19, there should be no further growth within the village. The villages infrastructure and school cannot take any further gr bypass. Plus the shop and pub have now closed. WE DO NOT SUPPORT ANY FUTURE HOUSING ALLOCATIONS IN THE VILLAGE.
41	5	The Corner Farm site as this now has planning permission. No others.
41	6	There has been recent flooding issues within the village, which your flooding maps do not highlight. In addition, the main through road in Clarborough is now too busy and
		also altering the existing character of Hayton in particular.
41	7	Yes, I think protecting open spaces within the village is a positive thing and I praise the Council for considering this.
41	8	I believe extending existing sites where there is already the correct infrastructure is the best option. If the Council has to look at other sites, then maybe redundant brownf

41	9	I think they should be provided together.
42	1	Option A
42	2	No. More housing needs to be built, including 50% low cost housing, at least double the number allocated.
42	3	No, that is an existing approval.
42	4	170 and 258
42	5	The need of a shop/post office. Perhaps assistance should be given to reopen the pub with these facilities added on. Hayton has no shop neither Welham.
42	6	The area occupied by the village hall and its surrounds designated as an open space.
42	7	Concentrated in or on extensions of existing sites
42	8	Together
43		I think that Criterion 4: Will the site result in the loss of best and most versatile agricultural land? should also encompass the criteria recognised by the SHLAA as listed be Chesterfield canal (within Hayton) and its position as a SSSI. If this is to be taken into account then there are 3 sites (161,160,170) that cannot be included in high capacity canal side and would not meet even initial screening parameters for suitability of the sites (see para 2.6).
43	2	Option A
43	3	Corner Farm already has preliminary planning permission for 21 houses. Firstly I strongly believe that 21 house on that site is wildly inappropriate and would result in insurproblems 12 -14 houses would be far more appropriate and would produce a more desirable development that would be more attractive to future house owners and in key we need another additional 12 houses on top of Corner Farm development within Hayton in the next 12 years then I would say no to dense development but linear development village would be acceptable even desirable and in this case I think the out-dated and frankly unworkable village envelope should be scrapped as a development screening to canal side is untenable and should be ruled out at the first opportunity.
43	4	Please see answer above to Q45. I restate that I am not opposed to the development of Corn Farm but at a lower density and would prefer that Corner Farm development additional local housing for the future.
43	5	None
43	6	Any high density development within Hayton is not what is wanted locally as the council officers can attest to following the substantial public turn out at our recent meeting that Hayton resident do not want significant development within the village this sentiment will somehow be ignored by the council planning dept when developers come for a such inappropriate planning applications. And I am sure that Bassetlaw does not want to end up in the same situation as Wakefield falling foul of a High Court Ruling.
43		Yes all the open spaces should remain protected they are vital to the well being and happiness of local residents.
43		Development of existing sites seems sensible if you spread the load you spread the distress for local residents.
43		REMOVED
43		I know of none.
44		Yes
44		Option A
44 44		No, 12 houses represent the maximum development between 2012-2028 the village has insufficient infra-structure for any development in excess of this. 238, is the most suitable option given its' proximity to the local sewerage plant and drainage infra-structure. Together with minimal loss of amenity to the residents of Top
44		Yes, these will be covered by a separate letter detailing the concerns of the residents on the south side of Low Street.
44		Yes
44	7	I do not believe that we need any further Traveller sites in the district.
44	8	Together.
45		Yes
45		Option A
45		There may be a need for a small number of houses suitable for the ageing population. This should be restricted to a MAXIMUM of 11 new houses, not "at least 11" as state
45		Site reference number 461 (Part of) This should be restricted to small scale development as close to the village amenities, (pub, Village Hall, Church) as possible.
45		Agree
45		Existing official sites only. Current agricultural land should be protected from use as camp sites.
45		Should be together in order to control the costs and limit the degradation of the local environment.
46		Yes
46		Option A

Responde	Comme	Answer
nt	nt	
46	4	I don't believe there is a requirement for further development
46	5	The village infrastructure (schools, sewage, broadband, power supply, gas etc.) needs to be updated and improved before any additional dwellings are considered!
46		As stated above. There is sufficient development underway within the village. As such space should be saved as open spaces.
46		No development
46	8	No further development
47	1	Option A
47	2	Due to the number of houses already for sale within the area that are not being sold, I do not think that more housing i required. The village does not have the facilities of
47	2	and people.
47	3	No I still think that the infrastructure would still be inadequate.
47		I do not want to see any of the sites developed at the moment.
47	5	The plot no 258 and 170 is used by the local community for recreational purposes and for watching nature and wildlife. If this was to be built on then a vast number of an where children can play quite safely away from traffic. Due to the roads not being joined then traffic has to go around via the main road. Drainage, school, lack of amenitie stops in the early evening.
47	6	I think that these plots in particular should be protected in the future for the above mentioned reasons. Also the fact that this end of Clarborough flooded 5 year ago caus this particular field is built on then it is more water that will have to be taken care of by an already inadequate drainage system. This will if not done correctly leave the rest
48	1	Don't know as we were not included in this. I was actually informed by someone of the meeting from a resident in Hayton.
48	2	Option A
48	3	I think if building is necessary i believe that a maximum of 12 houses should be built.
48	4	If 19 houses are built on corner farm i think that is enough for a small village and the facilities it has to offer.
48	5	Corner farm 171, as we are not losing the green countryside and disturbing wildlife. I think that the sites 258 and 170 are far too big. The village is not big enough and do these sites you are affecting the residents that already live here, i don't think consideration has been given to the children who live and play in the village and already atte going to be creating flooding issues, water already collects at the end of st johns drive, if the fields are built on, there will be no where for the water to drain (this will not from water damage).
48	6 1	Lack of amenities - A bus service that finishes at 6pm, a small village school, drainage and flooding, thought to wildlife and green areas where children can play and explor village puts the children who already reside here at danger.
48	7	Yes i do believe that 170 and 258 should be protected, this is beautiful land that hosts much wildlife. It is important for children to have areas of land where they can expl encouraging children to be environmentally friendly, i don't think building on any piece of green land available is encouraging them to appreciate and respect nature.
49	1	I cant comment either way, because the construct of the questions, the interpretation of responses and the degree of weight/impact assigned to responses by Planning provide the same 'reference framework' as they, I just live in Retford and see and experience the effect of 'planning'. For example, miss 'social/affordable housing' placement; be in no doubt, this category blights same proximity area simply because the occupants/owners have little or no pride/incentive/m Concentrating 'social housing' in one location will simply create a 'stay away ghetto' reputation.
49		No, I don't. Retford is a small market/agricultural town, that has attracted retirees and still does (migration from the south). That's its character. No amount of housing or sector) employment growth will change that.
49	3	1, 3, 7, 24, 37, 40, 41, 44, 46, 51, 52, 69, 309, 370, 488, 489, 511, 512, 571, 572, R6, R7.
49		259, R2
49	5	50% of 259/R2 should be Employment with 50% of 364 allocated as open space to provide a buffer between employment and housing. I believe that creating a large hous without any nearby employment, is not diversification.
49		Typically, twice each working day, there will be a large number of people leave the housing area by car with the attendant transport congestion, and then return to the housing area by car with the attendant transport congestion, and then return to the housing area by car with the attendant transport congestion, and then return to the housing area by car with the attendant transport congestion, and then return to the housing area by car with the attendant transport congestion, and then return to the housing the plan stands, 259/R2 will need additional public transport because its too far to walk to rail, into Retford town centre, or to any Retford industrial estates. My observat industrial estates is one of constant heavy lorry traffic at unsociable hours. At the moment, the buffer between these industrial estates and the housing is simply the road.
49	7	51/511/572/R6/R7 should be 70% housing and 20% employment, and 10% as a buffer between housing and employment (industrial estates).
49	8	There is nothing in the plan about a vision for Retford. I came to live in Retford because it has excellent Rail and A1 road access, it was a small market/agricultural town th the gem of open space in the centre called Kings Park, it has a good secondary school. Retford still reminds me of where Newark-on-Trent was 15 years ago. Newark has u London commuters (higher disposable income) and it shows when walking around Newark centre and driving through its suburbs. Retford cant survive on retirees, social retail/service jobs - an introverted approach. It needs a vision, an aspiration.

49	9	Yes, especially Kings Park. I'd also like to see the North Road and Babworth Road cemeteries designated as open space. They are as much an 'open space' asset as Kings P
49	10	Yes, possibly as lightly wooded open space communal play areas.
49	11	They cant be used for industrial because of the existing roads aren't 'big' enough.
49		Option A
49	-	REMOVED
49	14	I don't understand the difference between the two.
49 50		REMOVED Yes
50	2	Option A
50	3	Yes, I agree that there should be further housing in the future. I support future housing on site 228 or 483.
50	4	228 and/or 483.
50	5	I agree that open spaces should be protected as part of this process. Site 38/1 is regularly used and should be retained as a playing field.
50	6	Existing Sites.
50	7	Together where all the major infrastructure is located.
51	1	Yes
51	2	Option A
51	3	Yes, as this is a 15 year plan we need more homes to support our school, pub and post office.
51	4	462, 460 and 461 as they could be natural extensions to the village.
51	5	The centre of the village is prone to flooding issues.
51	6	I fully support the protection of the village play area (site 46/2) it is well used and should be retained.
51	7	Existing Sites, but new sites if there is no further capacity on existing ones.
51	8	Together - close to facilities.
52	1	I do not agree with the criteria in the Screening Methodology for the village of Elkesley.
52 52	2 3	Option A Yes, but only for first-time buyers (affordable and 2 bedroom bungalows for senior citizens
52	4	Yes, because Yew Tree Road cannot take anymore vehicles and for the safety of young children travelling to the new play area.
52	-	Site 248 or 249.
52		Para 2.5 (Page 10) Plot no. 247 is not brownfield but greenfield and is also outside of the development boundary. Para. 2.6, "Suitability of the Site", items 2, 4, 5, and 7 are Para. 2.9 (Page 11) Employment - Elkesley has no potential employment at all. Everyone who works will have to use their own transport. Para. 2.11, This is very true abou
52	Ŭ	How can Elkesley be classed as a Rural Service Centre? Para. 2.25 - 'A'. Para. 2.29 (Page 14) - 'A'. Para. 2.30 - Not on greenfield when we have brownfield available. Para. 2
	_	Elkesley shouldn't be classed as a Rural Service Centre 1) The pub may be closing; 2)We have no post office; 3)The local shop is only a convenience store and the residents
52	7	like a communal garden with seats, a bowling green and tennis courts on the greenfield site.
52	8	Yes.
52	9	No, we already have 20 social houses on Yew tree now.
52	10	Option A
52	11	The first part, yes - if it included 2-bed bungalows for downsizing. But only when the bridge over the A1 is completed.
52	12	No development of 33 properties should be built off Yew Tree Road, because the road from Yew Tree cannot take another estimated 82 vehicles per day
52		248 and 249
52		Only that we do not have a post office which makes this a serious problem for a lot of residents - i.e. OAPs
52	15	Yes, site 247 should be protected as a heritage site
52	16	Elkesley should not be classed as a Rural Service Centre because the local shop is only a convenience store; the school is just about full to capacity; we do not have a docto
	47	is very poor to and from Retford/Worksop - how do the residents with no transport get to Bassetlaw Hospital?

53	1	We feel we must stress our concerns and total opposition to any form of development at this location (Site 69, off Welham Road) either now or in the long term future. T a long period of time with natural regeneration of the flora and fauna and has buzzards, kestrels, sparrow hawks and barn owls hunting over the meadows. The land also k of kingfisher, heron, cormorant and water vole (an endangered species) are regularly seen. We feel that any form of development would be detrimental to the ecology of
53	2	Furthermore, we feel that more than ample development has already taken place and is still taking place in and around Retford with many of those developments not be infrastructure of Retford itself cannot sustain much more development in what are already built up areas.
54		Castle Hill, Grove Wood and Little Gringley. Highest elevated landscape seen from the east of Retford - much appreciated by individuals and groups of Ramblers and also b attracting tourism. This area is an important green wedge of land into the east of the town and is visually important to users of the canal towpath and for views from Leve
54	2	The land has a wealth of flora and fauna which is of benefit to the community and to the residents of Retford as a whole. The rough land is almost a nature reserve and, as should be protected. The undisturbed land attracts birds, e.g. barn Owls hunting for field voles, kestrels herons and many migrating birds in winter, plus occasional foxes, protected.
54	3	The land is lowlying, often damp and waterlogged, which would be likely to prove to be difficult to service for drainage, foul and surface water. Parts of the clay land flood development on Blackstope Lane and Chesterfield Drive and the severe floods a couple of years ago, when some residents had to move to other accommodation for over eastern end of Bracken Lane, Grove coach Road development.
54	4	Access to the site would need to be from the layby close to the Hop Pole public house and add to traffic with access onto the Welham Road at the detriment to and dange
54	1 5	Houses on Brixworth Way have mostly been built with small gardens to the rear and with current planning guidelines for higher density housing, would be likely to result i being overlooked by houses possibly much higher than theirs.
54	6	Further to my previous letter concerning the land at the rear of my house, in which I mentioned the low-lying, waterlogged, clay ground which floods after heavy rain and
54	7	My son has sent me a flood map from the EA in which it shows the land as the extent of severe flood - this after a neighbour had made enquiries from planning that it was 'extreme' is reaching high or the highest degree. Hardly low risk. As I said in my previous letter, surely the houses off Grove Lane have proved what can happen on low gro
55	1	Not familiar with this.
55	2	A
55	3	I would prefer no houses. The current amenities are already inadequate for the exiting population, e.g. school too small, no doctor's surgery, no facilities for teenagers.
55	4	No. The dwellings at Corner Farm could have been sympathetically developed as a social amenity/facility. A museum in honour of Revd Metcalfe would have been approp
55	5	Sites 453 and 296 should be protected open space or amenities for the whole village.
55	6	The questionnaire I saw promoted development of housing on sites 453 and 296. I feel this land at the heart of the village should be utilised as an area of social amenity si
55	7	Only an idiot would build houses on a playing field and a playground that had only recently been installed at vast cost. To build on open space would be irresponsible in the
55	8	Existing sites - potentially less disruption.
56		Yes.
56		Option B: Harworth and Bircotes
56	3	No. In my opinion enough houses have already been allowed in Ranskill adding not only extra traffic on the side roads, but also increased traffic through the village. If any at the very most.
56	4	Site 537. This site, in my opinion, would be in easy walking distance from local amenities, a bus stop, shop, public house and of course primary school and village park. A g either be from Station Road or access lane on to Mattersey Road.
57	1	No Comment
57		Option A
57		Yes
57		294 or parts of 438 and 468 alongside existing roads
57		Should be affordable housing in keeping with existing structures not like the school developments
57		Yes
57		Existing to afford families maintain links

		We wish to offer our support to the new proposed site at the village hall for the village hall for the village public house in preference to the approved site on Station road.
58		strongly to the site on Station Road on the grounds that the public house was never going to be built, but was just a rouse to acquire planning permission to open the land
		promoting this site for housing development as predicted.
	_	We disagree, on the grounds that Beckingham already has had in recent years 3 new building sites in the Station Road, Low street area. The Rotunda replaced by 9 houses
58	2	4 houses. At the present time 10 new houses are still for sale.
го	2	If development is to continue in the village, although at the present time, we can see no reason for this given the economic climate of the country at the moment, surely i
58	3	plots, to fill in, rather than a large built estate.
		When site 106, applied for planning permission, the clerk of the village Council did all the applications, at no point was the land owner mentioned. Now that planning has l
58	4	by the same people who championed the Public House to be built on Station Road, to now write to Bassetlaw saying we want the Public House to now be moved to the re
		championing that the public house field 106, should be considered for housing development of 63 houses.
58	5	If a public house is to be built on 106, I think it should be adopted by the village, and the rest of the land should be left for sheep grazing as it is now.
58	6	If we're not careful, future generations will not know what countryside is and village life will no longer exist. We will become a small town.
58		Enclosed my letters of objections which have lots of objections to building on plot 106. A fuel aviation line runs through this field underground.
58	8	I think that sites 106, 101, 451 should be protected from future development. If these larger sites were built on it would put lots of added pressure on the school, play gro
58	9	There are very few facilities in Beckingham for the under 5s and even older children.
58	10	The cycle track is now closed. If more houses are to be built, give Beckingham the facilities to go with them.
		The site is very close to an extremely busy road junction at Station Road leading to Old Trent Road. The amount of added traffic to a public house would greatly add to a contract of the station of the
58	1 11	movements per day at present, this figure is EXCLUSIVE to Agricultural traffic movements which are considerable. There are bus stops on both sides of the road at this bus
		morning and afternoon. It is obvious therefore that if permitted it would be to the detriment of road safety and would conflict with THE BASSETLAW LOCAL PLAN POLICY 5
		that goes down Station Road need to return to the busy Station Road junction.
58	12	It is well known that Public Houses are frequently areas of civil disturbance i.e. NOISE, ARGUMENTS BETWEEN INTOXICATED CUSTOMERS LEADING TO FIGHTS AND VANDA
		ALCOHOL IS DETRIMENTAL TO HEALTH AND LEADS TO MEDICAL PROBLEMS WHICH ARE DIFFICULT AND EXPENSIVE TO TREAT.
58	13	Village and Town Public Houses are closing at the rate of 30+ per week, so how could it be justifiable to build another in this economic climate?
58	14	Over the last few years, one public house in a neighbouring village has been demolished, and another has closed. The village public house in Beckingham, before it closed
		serve under age persons and drugs were also available.
59	1	I feel the site suggested for the pub would be better as it would be easier to access from the main road and would fit better into the surroundings better. We do need a pu
<u> </u>		suggested.
60		We feel the first site for the pub would be preferable as it has better access from the main road for passing trade and fits in better.
		We are pleased to hear that approval has been given for a public house/restaurant to be built in Beckingham. However, we are writing to express our disapproval of this approval ask the Council responsible to the original request for the public house to be built on a site close to the utilized ball and request on the original request for the public house. This site
61	1	would ask the Council reconsiders the original request for the public house to be built on a site close to the village hall and roundabout on the edge of the village. This site
ļ		and would be more accessible to villages. The considerable work carried out to the village hall over recent years has given the village a vibrant social area and it surely mal house/restaurant within the same area.
61		The Willow Works
61		Option B
10		Are you meaning 6 new houses or 6 new housing developments. We would rather no new housing until current vacant properties have been taken up. However, 6 new ho
61	4	new housing developments.
61	5	496 and 497
61		Should not be used for either PH or housing developments
61	7	Yes, definitely. Including village green not shown on plan as potential open space
61		Keep in existing sites - More economic sense
61	9	Together
62		Yes.
62	2	I agree that Tuxford should see extra housing in the future.
62		Sites 123, 122, 117
		Sites 490, 121, 115, 124 and 130 should not be developed due to these being considered unsustainable and the infrastructure is not adequate enough. Site 490 is also curr
62	4	from any built development.
62	5	I agree that the villages central open space should be protected.

nt	nt	
62	6	Option A
63	1	Yes.
63	2	Option A.
63	3	I agree that at least five new homes should be built in Gamston over the next five years.
63	4	Site 410 should have the opportunity to be redeveloped.
63	5	Gamston does have major access issues from the main road into Retford. In addition, there are flooding and drainage issues off Rectory Road from the River Idle.
63	6	I agree that the open spaces should be protected from future development.
63	7	I agree that this site should be developed, but the listed building should be retained on site.
63	8	Existing sites.
64	1	Yes. The methodology does consider a number of appropriate issues.
64	2	Option A
64	3	No, I disagree, planning permission has been given for Corner Farm and this would effectively allocate the 12 houses suggested by residents in March. I believe the village does not need any further
64	4	The redevelopment of Corner Farm more than accommodates the 12 houses stated in question 1.
64	5	Sites 170 and 258 have significant drainage, flooding and access issues and any future growth would increase these problems.
64	6	Flooding on sites 170 and 258 should be considered as since 2007, the sites have flooded at least 4 times. In addition, the new school is full to capacity and would not support any future housing.
64	7	All open spaces should be protected.
64	8	No new sites in Clarborough Hayton please.
64	9	Together.
65	1	Yes, this seems appropriate.
65	2	Option A
65	3	Yes, I believe that the village should see new housing to sustain the current shop, school and public house.
65	4	Site 483 would be considered an appropriate site to accommodate future development growth.
65	5	The village playing field should be protected.
66	1	Definitely no more allocation of housing than is planned.
66		69, 6, 3, 27, 370, 511, 46, 309 and 41
66	3	51 R7
66	4	As with all potential housing sites, the road system at present is inadequate. If houses were built at 37-512 the Tiln Lane is inadequate to support any more traffic. Especially at the junction with Mo
66	5	If houses were built at 1, 40, 41 and 52 it would cause an immediate bottleneck into town. Either at the junction of High Street and Goosemoor Lane (bridge) or where Ordsall Road meets Babwort Road and Tiln Lane is no a major road used by heavy traffic which avoids the Bridge at Welham Road.
66	6	Ordsall could do with a road link south – to link up with London Road. And/or an upgrade of West Hill Road out of Ordsall if brown sites are developed.
66	7	A new road is needed from London Road south to link with Clarborough south.
66	8	REMOVED
66	9	Yes I do.
66	10	Areas 1/78, 1/25 and 1/77 should be developed as nature reserves possibly.
66	11	Area 1/81 could be developed into a visitors/picnic area.
66	12	Area 1/79 could be ideal for nature conservation area alongside the river.
66	13	Areas 1/21, 1/22 and 1/23 could be developed as a sports area, children's activities, skate park.
67	1	Yes
67	2	Option A - Spread between Retford, Worksop and Harworth
67	3	I agree that land should be allocated for about 12 Houses, These should all be affordable 2 and 3 bedroomed properties on sizable plots of land.
67	4	The future development should be on sites 236 and 237
67	5	The green open spaces shown on the map should all be protected. I also think that the area round st Helens churchyard in South Wheatley should be protected as open space.

ge does not need any further housing.

68		We would, however, like to object to the inclusion of the area of land which we believe is shown as area 69 for potential residential development on your plan. This area Brixworth Way and is on the opposite side of the Chesterfield Canal. We are unable to comment on other areas for the reason there is difficulty reading the plan. Our reas This area is an important green wedge of land into the east of the town and is visually important to users of the canal towpath and for views from Leverton Road
68	2	The land has a significant wealth of flora and fauna which is of benefit to the community and to the residents of Retford as a whole
68	3	The land is low lying, often damp and waterlogged, which would be likely to prove to be difficult to service for drainage, both foul and surface water
68	4	Access to the site would need to be from the layby close to the Hop Pole public house and add to the traffic with access onto the Welham Road at the detriment to and th
69	5	Houses on Brixworth Way have mostly been built with very small gardens to the rear and with current planning guidelines for higher density housing, would be likely to re
68	5	Way being overlooked by houses possibly much higher than theirs
68	6	However, I am pleased to see the Council have placed importance on open space in the document. Open space can be defined as land left open for public use or land most
00	0	left as open space for its importance for its flora and fauna.
		My first objection was regarding the green wedge. I have now seen the
		Council's policy document and I see the policy is to restrict development which
68		would have an adverse effect on the amenity of the Chesterfield Canal and the
		River Idle. This is the situation in this case and as such the site should be
		rejected
		The land does have a wealth of flora and fauna. These include Newts,
		protected under European law, certain Owls and Voles protected under British
		law. Also I understand there are snakes on the land but I have been unable to
		confirm if there are Adders which are also protected under British law. Further
		investigations are required by the Wildlife Trust on this point. In addition to these,
68		there is an abundance of other species on the land, some of which may also be
		protected. I have also had a conversation with someone with knowledge of flora
		who has said they have not looked on the land but have viewed from a distance
		and he considers the appearance of the land to be correct for a certain type of
		orchid which is also protected by law. There are strong reasons here to reject this
		site. The land is low lying and I have now seen the plan showing a fair
		proportion of the land is in extreme danger of flooding. All of the land is low lying
68		and is often waterlogged. If developed the problem of flooding or waterlogging
		would be made worse on the land or passed onto other areas of land, of which,
		some may already be developed. Another strong reason to reject this site
		I see from the plan the number of hoses possible is rather high compared
		with some other areas of land, which does indicate a high density of
68		development. This will significantly affect the amount of traffic onto Welham Road
		with a significant increase in traffic dangers. Another strong reason to reject this
		site.
		The point mentioned about density in 4 above will also have a significant
		effect on residents of Brixworth Way as houses in Brixworth Way all have small
		rear gardens and high density in modern planning terms tends to mean three
68	1 11 1	storey housing and sometimes flats, possibly even higher. This would have a
		significant effect on the amenities of residents of Brixworth Way and as such is
		another strong reason to reject this site.
69	1	With a lot of elderly people in the village they will require postal information about any potential changes to give them a voice as the majority are not on the internet.
69	2	Option A

ea is to the south of all of the properties on easons for objection to this area are as follows.

	_	I disagree it would have too greater impact on the community especially if there are lots of children as the village is very isolated with nothing for them to do. I believe 2 is
69	3	of our quiet, close nit community of which many are very old.
		I would prefer the house to be built opposite the church site 398 and 399 not on any of the other sites. Building in Cuckney site 303 opposite the old people bungalows wil
69	4	garden would be very easily accessed if there were houses, there threatening our safety and privacy. Noise levels would increase greatly as the village is very quiet if undes
		fearful to walk around the village
69	5	There is only one shop and there are very few buses in the village. School cars park all the way up the road morning and night on school days and house access will be very
69	6	Yes. 303 it was allotments and will be again. Parking on Creswell Road with school traffic will make it even more dangerous.
69		REMOVED
69		Not Sure
69	9	None
70	1	No more houses on stilts
70	2	No more mobile homes
70	3	Home Farm was allocated in the past for houses, why not now? Upper Row is out of the flood line, build more houses there.
71	1	Significant impact on wildlife habitat. The proposal for housing would have serious consequences for wildlife
71	2	Significant visual impact in an area of outstanding character. I object to the proposal due to the size, nature, and location of this project, with its significant effects in terms
71	3	Probability of noise pollution. The potential impacts this would have on the environment
71	4	Flooding. The proposal for dwellings is in a flood plain and on a site that has regularly flooded in the past and that may be expected to suffer more severe flooding in the fu
72	1	Not sure
72	2	Option A
72	3	You say "at least 12 houses" but fail to say the maximum number. What is the maximum number as this is vital information, without which the question can not be answer
72	4	Yes, more traffic, more school places required, entry and exit on a dangerous corner by Clarborough Hill
72	5	Depending on the "at least 12" question the Corner Farm site is better, but NOT both sites.
72	6	Yes, the field / area at the end of Broad Gorse should be protected.
72	7	I think existing sites should be used and enhanced.
72	8	Together, as this is an efficient way of delivering services when money is so short.
72	9	None
73	1	The screening methodology is too shallow and does not take into account the whole issue of development - for example there is no mention of local amenities - shops, sch
/5	-	development on existing facilities
73	2	Option A
73	3	As there has been outline planning granted for 21 dwellings on Lanes Corner Farm then this should conclude and fill the entire allocation for Hayton/Clarborough
73	4	No - If the total allocation for Hayton/Clarborough is 12 AND the Corner Farm proposal is accepted then that should be the total.
73	5	None
73	6	I would like to see any proposals for improvement in roads/infrastructure and amenities that would improve the area before adding more housing.
73	7	Agree
73		
73	9	Together so they can be better policed
73	10	None
74	1	The concerns that I have for any future development of any significant size in Clarborough and Hayton are how the village school would be able to cope with any more chil with the corridor even having to be used as a classroom.
74	2	Site 179/258: My other main concern is the major development proposed at Celery Meadows (170, 258) for a possible 93 houses, and the access roads and junctions to th
/4	2	vehicles that this size of development would generate.
74	3	Option A
74	4	If this application is included at this stage for a proposed 19 houses surely these will for fill the councils target of 12 houses within Clarborough and Hayton. Therefore no fu

74	5	171 and 544
74	6	The road infrastructure in Clarborough is a major problem area and any development should incorporate these issues.
74		REMOVED
75		Yes
75		Option A
75	3	No. Blyth is a quiet rural village and any new development would impact on facilities, traffic and noise. It is already a very busy through road for traffic and more housing of contribute to the loss of the village life and environment. This is why we moved here two years ago. Additional concerns are the loss in the value of properties.
75	4	Site 214 - This is further away from any current houses which would have a lesser impact. In addition, the fields would provide a 'buffer' for noise. However, if other sites r is a threat of over population on residents from Retford Road
75	5	Site 213 - This is easier access to the main roads therefore less impact on already busy B roads which are already seen as a risk to children and the local school. In addition nine houses would add little change to the environment.
75	6	Retford Road is already a concern regarding traffic safety and noise from the A1. Blyth is not a highly populated area which is why it is many people's choice to locate here could be lost with further housing developments. The impact on extending the school site could also impact on surrounding properties.
75	7	Yes! They are part and parcel of the village and by losing these spaces it will create a town environment which is not what the residents of Blyth want. If we'd have wanted Worksop!!
75	8	They should be kept to existing sites which already cater for these communities. Again, the impact would be huge in new locations.
75	9	Not sure.
75	10	No.
76	1	Yes
76	2	Option A
76	3	Yes
76	4	No
76	5	Site 296 and Site 453. Site 345
76	6	No
76	7	Both sites require protection from any future development
76	8	Yes current sites have spare capacity and can be further developed to meet future requirements
76	9	Together
76	10	None
77	1	I have concerns that the screening process may not be fully transparent post-decision. I would like reassurance that all decisions are subject to transparency, including the application, to all decisions regarding potential development sites.
77	2	Option A
77	3	I am supportive of residential development for permanent residents. I would be keen to ensure that whatever quantum of additional housing is agreed that a strong propo families and first time buyers.
77		I live directly opposite the proposed site. I am not opposed to the proposed development even though this will no doubt lead to disruption and increased traffic for a perio the previous lack of action by the Council to ensure an alternative route for Heavy Goods vehicles down The Smeath and this additional construction traffic is not going to padditional risk.
77	5	Site 544 - this would provide greater continuity of residential housing across both sides of Main Street, Hayton
77	6	Not that I would wish to raise
77	7	478 & 541 should be protected this is an open field that provides residents with a view of Hayton Church. In my opinion this should be protected.
77	8	I believe that traveller sites should be developed from existing sites, and not developed from new locations. Existing locations already have an infrastructure that can be fu use them. There is also the issue of public engagement and the transparency of Council Plans for such sites. Are traveller sites being considered for the Clarborough and Ha considered by the Council then I believe that you be much more open and engage the Public in separate and distinct consultation. Piggybacking what most residents would focussed consultation onto a consultation about permanent residential housing development is potentially miss-judged at best.
77	9	Together. Infrastructure development provides the opportunity to meet the needs of both groups. Also travellers who migrate from one site to another may leave the site investment (cleaning/removal of waste/etc) if peer pressure from other residential travellers is present.

ng development would contribute to this plus

		The Site 41 in Ordsall behind Glen Eagles Way. The residents bought their bungalows because of the views it is a terrible thought to build most people are older and have bought their homes to
83	1	Plus, no one would buy our bungalows. There is lots of land going out the 2 miles towards Elkesley and also to the right of the A1 towards Ranby, please have respect for older people.
83		REMOVED
83	3	REMOVED
83	4	The current Southern Boundary to Retford is well defined and provides a consistent and appealing entrance to the town and this would be lost by these development
83	5	is important to maintain a distinctive boundary between the urban area and the open agricultural land and the current town limit doers precisely that
83	6	In addition there will be a significant loss of amenity'
83	7	which the local infrastructure will not cope with and occupants of the new housing would have to drive a significant distance for shops, schools, doctors and other facilities.
83	8	There are more appropriate areas of land within the existing Retford town boundaries for housing
83	9	I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.
84	1	The land is on Limestone and provides an absolute stable and sound base for foundations and footings.
84	2	There is no flooding or water logging on any part of the site.
84	3	The mine workings at Shireoaks Colliery have long since stopped and any evidence of subsidence was about 35 years ago.
84	4	Due to its elevated position, the natural fall of the site makes towards the existing sewer main near highgrounds industrial estate.
84	5	There are two defined points of entry to the area, which would call for no demolition of property or resetting of existing boundaries. A third point of entry may be through the farmstead.
84	6	The site is in a good location and offers excellent facilities for residents
84	7	A larger village would benefit local trades such as the shop, post office, chinese takeaway and two public houses.
84	8	Any additional housing would be a shopping destination for the Sainsbury super store and would perform the important role of ensuring the future needs of residents
84	9	The area to the south has been given over to natural woodland regeneration to provide a wildlife corridor between Lady Lee Nature Reserve (SSSI) and woodlands to the rear of Highgrounds In
0.4	40	concessionary right to enter has been agreed. This agreement is set for a period of 15 years.
84	10	Haggonfields Primary School and nursery would benefit from the extra intake of children that more housing would generate.
84	11	Public transport services run into Rhodesia every half hour therefore a re-route could be done without any problem.
84	12	The good shape of the area lends itself to a layout of housing to suit varying needs.
84	13	The area is naturally bounded by the village itself and the lane to Mansfield Road.
84	14	The area of land has no power supplies above or below ground. It has no footpaths or rights of way on it except for the footpath to Highgrounds Industrial Estate. The Council and Severn Trent
0.4	45	inspect and maintain the existing sewer.

91	1	Option A.
91	2	No, I do not agree that any more land should be allocated for any further housing development in Ranskill. My main general reasons and opinions are as follows:- 1. The
91	3	2. Development of any size and Ranskill would be in danger of becoming a "small town".
91	4	3. The infrastructure of the village is adequate as it presently stands. Further development would therefore put greater burden on the infrastructure.
91	5	4. More traffic would be generated. This would impact on access and egress through the village together with safety issues.
91	6	5. The loss of agricultural land together with its ecological environment which once developed and built on is lost forever. This is a rural farming village not a town.
91	7	6. Further development would not therefore enhance the aesthetics of the village.
91	8	7. Finally, on a personal note any development on proposed site number 234 and the residents of Arundel Drive, myself included, would loose their privacy and be overle
91	9	None
91	10	No. I believe I have covered my main points in Question 105
91	11	I confirm that I believe the open spaces identified on the map provided should be protected.
91	12	Yes
91	13	If the system the Council currently operates works I believe it should remain.
91	14	None
92		We feel that there is very little need for additional housing development in Retford as there are already several building developments underway, a constant stream of o employment opportunities within the town and surrounding areas since the larger works have closed down. At present the highway system in and around town struggles
92	2	The areas with good road access should be developed first, if required for housing - i.e. site nos. 1, 3, 27, 37, 41, 52, 512.
92	3	51 and R7 would be best for employment
92	4	It is worth noting that the eastern side of Retford is on clay, therefore more susceptible to flooding, whereas the western side is on sand which is more free-draining and buildings.
92	5	As many green spaces as possible should be preserved.
92	6	I would like to see any additional growth situated as near as possible to employment opportunities, wherever they may be.
92	7	Also sites nos. 6 and 69, possibly, though not ones through estates.
93	1	As a member of the third generation of a Beckingham family, I have seen Beckingham develop from a RURAL village to a DORMITORY village. Further development, whet
35	1	again, so as a dormitory village with affordable housing it would assist and sustain the village school, playschool and other village activities etc.
93	2	Site 451- This particular site already benefits from nearby services, access, mains and sewerage.
93	3	Site references 496 - There is historical interest in this area, an ancient fish pond/moat is recorded on a village map in 1736.
93	4	Site references 497 - There is historical interest in this area, an ancient fish pond/moat is recorded on a village map in 1736.
93	5	Site 106- The proposed site for a Public House was originally planned on land nearer the village hall/roundabout, which was certainly a more acceptable area.
93	6	Site 107- Development on this site certainly would not enhance the entrance to our village. It would create a view of over-development.
93	7	Site 106 - Certainly no to this question. A potential development of any kind shouldn't be considered for reasons stated previously. Development would cause further tra
93	8	The village green (near the Post Office) hasn't been identified as a potential protected open space - this, I feel, is an area that needs it. The other identified areas should l
93	9	Extent existing sites.
93	10	Also, the aviation fuel pipeline from Misterton into Lincolnshire passes through this proposed area of development. It has always been my understanding that development
33	10	permitted.
94	1	REMOVED
94	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
94	3	I believe that your statistics were taken as a mean when there was no box to tick for 0 (zero) build. The overwhelming response of the village is for no new development
34	3	There are already 7 new dwellings with recently acquired or pending planning permission - well above the 4 dwellings allocated through this consultation
94	4	Site 281, 536
		The utilities in this village are already under capacity, with more and more issues with drainage, road/pathway improvements. Any development would need to see sign
94	5	utilities. Affordable housing was accepted as a whole for small cottage style in keeping with the village for buyers wanting to get to village life - not social housing, how c

94	8	No, Daneshill is not being fully utilised so why provide more? Perhaps there is a requirement in other areas of the district
94	9	Together, more financially viable
95	1	Yes.
95	2	Option A.
95	3	I agree, but I would support further growth if it meant the village could see some low cost housing for young people.
95	4	410 and 577 no sites on the main road due to the traffic problems.
95	5	The village has a lack of services and now no village hall.
95	6	All open spaces should be protected.
95	7	Yes, but sympathetically not just a large modern housing estate.
96	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
96	2	No i feel villages are being overtaken once it as started by development which causes more crime and traffic
96	3	None
96		There is plenty of land already been built on going to ruin which could be used
96		Land in the villages standing idle could be used for the village i.e. sports /football pitch or play area for children
96		There is already a site at Daneshill which is standing idle which could be developed and council controlled
96	7	Together on existing sites and council controlled
96		Daneshill
97	1	Not well enough informed to comment.
97	2	Option A.
97	3	I thought the feedback was for 10 houses. Other than infill the houses should be restricted to one area , see below
97		I have no access to the site ref number as I cannot find the map on the web site. However I consider the site to the West of North rd to be an absolute no . Good productiv needed in future. All the other sites have disadvantages and should not be considered for this limited scale development. The obvious site in Ranskill is the waste ground ly Bluebell court and the police house. The owners should be located via the land registry and approached. There is reason to believe they may be willing sellers. I am surprise
97	5	The village park & school playing field should be protected OTHER THAN the existing proposal for a Community Centre.
97	6	Existing sites
97	7	REMOVED
98	1	Yes
		I believe the town should be allocated more housing growth as it will generate more interest in the growing area. With the need for additional housing becoming more pre
98	2	provide a substantial level of allocations for which developers can bring new and exciting schemes to the area. Such schemes offer existing residents and also new resident
		though a range of affordable and no. of bedroom properties.
98		The shireoaks site next to the canal (site reference 561) would strongly suit housing development. The current industrial buildings are deteriorating and given the canalside attractive and offer great scenery and views down the canal. A housing scheme would prove hugely popular for residents and enhance the canalside Shireoaks area.
98	4	Option A
99	1	I don't know enough about the criteria to comment.
99	2	Option A
00	3	No new dwellings. The sewerage/drainage in the village is inadequate. I live in Church Lane and have had to clear the drains three times since June due to my next door ne
99	5	bathroom and toilet to the property.
00	Δ	Application has already been granted for Corner Farm. Presumably when this goes ahead there will be no need for an additional 12 houses. Where will the access/exit road
99	4	the new houses are occupied you will be building an extension to Clarbourgh School as it is already full to capacity!!
99	5	None
99	6	The sewerage/drainage in the village is inadequate.
99	7	Yes the sites should be protected.
99	8	REMOVED

now could this be developed? tive agricultural land will be desperately I lying to the west of the North Rd between rised this has not been done! prevalent than ever before, it is important to ents an opportunity to move to the town side position, a housing scheme would be very neighbour's extension which provides an extra oad be for the development. Presumably when

100		Yes
100		Option A
100	3	Yes, I believe that the village should see some new housing for younger and older people.
100		Sites 228 and 483.
100		All open spaces should be kept.
100	1	Existing sites
101	1	I don't feel the screening takes into account the services, such as schools, shops and open spaces in the area. It doesn't appear to look in sufficient detail at the impact the roads in the vicinity.
101	2	I believe that brownfield sites should be used first before greenfield land is built on. There have been/are currently being built large numbers of new housing - which deve selling e.g. the houses on the bridon site. The houses built recently along Albert Road also show what can happen as many were not bought and have had to be rented eit
101	3	46, 309, 7, 3, 511, 370, 27 would seem to be most suitable considering existing local services and access routes.
101	4	I feel very strongly that the proposals to build such a huge number of houses in South Ordsall would have a hugely detrimental affect on the area. The existing roads are u
101	4	gritted at all in winter) and the narrow road leading down to the A1 is dangerous already.
101	5	Yes - too many are already being lost
101	6	There is a need for playing fields and a play ground for young children in Ordsall - similar to that found in Hallcroft (see q13 above)
101	7	Option A
101	8	Existing sites
101	9	There will be a huge need for shops, more buses and a playground (Ordsall currently has 1 very small and vandalised play area off Grange Road. The current facilities are a investment.
101	10	Need a new school
102	1	I would like to object to the plans for future development for the building of houses in Clarborough at plots 258 and 170, my objections are as follows: 1 Land is liable to fl
102	2	Against sites 170/258 because: 2 Drainage on Broad Gores is already very poor.
102	3	Against sites 170/258 because: 3 Land is been used by farm to grow vital crops.
102	4	Against sites 170/258 because: 4 The tree on the land has a barn owl nest which is a protected species also lots of other wildlife are in the field.
102	5	Against sites 170/258 because: 5 No amenities in village.
102	6	Against sites 170/258 because: 6 Traffic already very busy in village and during the bad weather earlier this year roads in village were impassable for days and a number of
102	7	Against sites 170/258 because: 7 No jobs in village.
102	8	Against sites 170/258 because: 8 Very poor public transport.
102	9	Against sites 170/258 because: 9 School bus to Retford in morning is standing room only.
102	10	Against sites 170/258 because: 10 No medical facility
102	11	Against sites 170/258 because: 11 Very poor Broadband coverage
102		Against sites 170/258 because: 12 Traffic on A620 very busy with lorries travelling to Power Station also High vehicles on Smeath Lane already a big problem exiting estate
102	13	Against sites 170/258 because: 13 Not enough capacity within local Schools.
102	14	Against sites 170/258 because: 14 Connecting two parts of Broad Gores will create a rat run for traffic on already narrow roads.
102	15	Against sites 170/258 because: 15 Construction work will have a detrimental affect on the senior citizens bungalows directly adjacent.
103	1	We disagree. The 68 houses currently being built are more than sufficient (already increasing village housing by nearly 20%) in terms of infrastructure, traffic and the gene
103	2	No additional sites should be developed.
103	3	Site 134- greenfield area should be protected and should never be developed. Overshadowing, overlooking and loss of privacy. Existing buildings could be renovated but coutlook of current buildings is maintained. Ingle Nook cottage completely faces this site and the existing buildings from the main garden boundary. Any development wou of the cottage and most of its windows. To fully appreciate this you would need to view the site within the cottage or garden.
103	4	We agree that the open places identified on the map and all other green spaces in the village should be protected from any future development proposals.

108	6	None, bearing in mind 20 have been granted.
108	7	This was agreed based on the assumption by almost all residents I have spoken to that Corner Farm would be the preferred development. Planning was approved prior to
	/	misled. I do not believe we should have any further building as we want to preserve out village.
108	8	The village cannot really stand more development as there is already as strain on the drainage and roads. There are no village amenities.
108	9	Yes
108	10	I think it would be sensible to concentrate and improve existing sites.
108	11	REMOVED
108	12	I do not know of any.
109		Planning is granted. No further development should be allowed.
109		None otherwise we will lose our village atmosphere. We will have problems with traffic which will add to the problems we already have each year with flooding near my p
110		Disagree. Road and lanes are already busy with traffic. More buildings will bring more problems.
110		Portland Place - roads very narrow, cars, lorries, vans etc. To open up the cul-de-sac could be an accident waiting to happen.
110		REMOVED
110		No playing facilities for children, other than on roads etc.
110		Nowhere for youths to go but hang about the streets.
110		Bungalow on Portland Place empty for years. Seven new properties already built in the village.
110		Sewerage system. The one already in use wouldn't cope.
110		A million empty houses in the country should be dealt with first.
110	9	Street lighting - what it must have cost the tax payers for all lamps in and around the village to have stickers on every lamp, letting burglars aware, we have gone back to t
		display these adverts! Come on: waste not, want not.
111	1	I agree with the figure of 12 new houses. If planning permission has already been granted for 15 new houses in Hayton, why was planning permission granted for a further total of 31 houses.
		19 new houses on the Corner Farm site seems to be far too many for the size of the site in view of the following: 1) It does not fit in with the general aspect of open plann
111	2	Hayton - incompatibility with neighbouring properties.
111	3	This corner is already very dangerous. Another serious accident on Sunday 4 December is further proof of this. Vehicles from another 19 houses would make this situation
111	4	Infill sites for small developments should be used - i.e. 1 to 4 properties.
111	5	Density of new properties should be a serious consideration to ensure they fit in with the open aspect of the village of Hayton. Bungalows rather than houses etc.
111	6	Fit into existing estates where space is available - i.e. in Clarborough, around Celery Meadows (site 170 and part of 258).
111	7	High voltage power lines and pylons cut across the village of Hayton. These particularly affect sites 541 and 478. Previous studies recommend that new housing should not
111	/	cancer, particularly in newborn babies. Reference Sheffield.
111	8	14 dwellings on site 541 would be far too many and would not blend in with neighbouring properties that are mainly bungalows.
111	9	Dwellings on site 541 would overshadow and overlook the three bungalows on Rectory Grounds, causing lack/loss of privacy. They would also cut out light, particularly in
111	10	Yes.
111	11	Concentrate on existing sites.
111	12	Yes
112	1	What is Screening Methodology? I've no idea.
112	2	No. There are too many houses being built for the sewage to service. Bassetlaw Council ignore what locals say, saying it is a Severn Trent problem, who do nothing.
112	3	Also, walk around the village and see how many houses are up for sale. So don't build more until there is demand.
112	4	Option A
112	5	None
112	6	The only suitable site for a Public House is next to the village hall. Unfortunately Bassetlaw Planners thought differently to Beckingham villagers.
112	7	Site 496 overlooks our cemetery so no building should be allowed so that it remains a quiet and sacred place.
112	8	As a land owner why was I not invited to put land forward? I have land running up to development.
113	1	I disagree. No house should be allocated - in accordance with the Parish Plan.

to the meeting on 24 November. We have been / property. o the old days. NCC must have paid someone to ner 19 houses on Corner Farm? This now gives a nning and space given to other properties in on even worse. not be built on such sites due to the high risk of in winter when the sun is low.

113	3	Sutton cum Lound is a small rural village and this should be maintained - it is large enough as it stands.
114		Why build more Gypsy sites when Daneshill Travellers Site has got 16 plots?
114		Why don't the Council spend money on Daneshill Travellers Site, Lound, Retford?
114		Why look for other Gypsy sites to build when we have Daneshill which needs money spending on it?
114		Daneshill Travellers site is used for transit pitches and residential.
114		Daneshill Travellers Site needs no planning as it is already built. Just need the Council to spend money on the site.
114		REMOVED
		I am writing to you to state my objection to the proposed development for housing on the area known as No 69 on the Core Strategy document, proposed by BDC. My mai
115	1	natural floodplain for the chesterfield canal and surface water runoff.
		2) The plot is also home to a vast array of wildlife including a family of protected barn owls, kestrels, heron and various other wild fowl, which has obviously found a consta
115		mice, insects and such like.
115	3	The train line that intersect plot 69 would also be a major disadvantage to any prospective buyers to any property built within such close proximity.
445		Any site access would create a traffic grid lock entering or exiting via the Hop Pole layby. This road is already under a lot of pressure being a major through road between G
115	4	peak traffic hours.
115	5	I bought my property partly because of the stunning views of Leverton Woods and the peace and tranquillity of the canal passing right by the end of my garden.
115	6	I feel any building or development work on plot 69 would devalue my property significantly
115	7	Have a huge ecological impact on the area and the countless families who enjoy and admire what i believe to be an outstanding area of beauty.
116	1	I have lived on Brixworth Way for 18 years and bought this house partly because of its position and that the land to the rear of my property I believed to be green belt land
116	2	As I have seen over the years some serious flooding of this land I cannot understand why someone wants to build on this land, as surely drainage would be very difficult.
116	3	Who would want to live at the side of a raised railway line that cannot be screened to reduce the noise or the land raised above the railway line?
	_	Access to this additional housing would mean an increase in traffic leaving and joining Welham Road at a poor visibility spot, so the speed limit would have to be reduced.
116	4	for lorries too high to get under the low bridge to turn around.
116	5	There is considerable rare wildlife in this area that would also be affected by the proposed building on this land.
116	6	I consider that if this planning was agreed it would overlook us and reduce the value of my property. I will be seeking compensation if this goes ahead.
117	1	Increased traffic (safety concerns)
117	2	Increase in noise
117	3	Busy access routes
117		Pressures on the local school due to increased numbers of people living in the area
117	5	The detrimental effect on living conditions and the environment
117	6	A substantial decrease in the amount of green land within the area.
		My main concern is that any additional housing will generate more traffic on an already very busy road. Road safety must be a serious consideration because on the narroy
118	1	the pavement causing pedestrians to walk in the road. This is a safety problem.
		The Society considers that in selecting sites for development the aim should be to achieve a compact urban form where most people will have easy access to town centre f
119	1	around the town rather than being all in one place. It should be where it will cause least traffic problems, where local facilities (schools, shops, etc.) have spare capacity an
		problems. It should avoid the most attractive or productive land.
119	2	Sites 364, 41, 1, 52 and 40 - This would be a suitable general location for some of the required houses although the suggested sites here far exceed what is needed.
119		Site 259 - is an unsuitable location for employment generating development as Ordsall is a primarily a housing area and commercial traffic should not be encouraged here.
119		Site 71- This small site is next to the railway and very noisy. It is not a suitable place for housing but would be suitable for employment generating development.
		Site 70 -Access to this elevated site is through the station approach. It would provide a poor residential environment due to train noise, and houses would detract from the
119	5	should be reserved in case more land is needed for station related parking.
119	6	Site 10 - This is the last of the Thrumpton Lane industrial sites. Most of the longstanding employment sites in Retford have been lost to housing and the remaining land sui
		avoid Retford becoming even more a dormitory town. This site should not be developed for housing but should be kept for employment creating development.
		Sites 27, 3, 370, 511, 488 and 489 - This may be a suitable general location for some of the required houses although the suggested sites far exceed what is needed. How

Responde	-	Answer
nt	nt	
119	8	Site 342 - This site had planning permission in the past and an application is current. It would be a suitable site for housing.
119	9	Sites 6 and 69 - Site 6 is a logical extension up to the canal of the built up area and suitable for housing. The canal is the logical boundary here and Site 69 would be the first
119	10	Sites 7, 46, 309 and 533 - This may be a suitable general location for some of the required houses although the suggested sites far exceed what is needed.
119	11	Sites 37 and 512 - Site 37 is a suitable general location for some of the required houses although it exceeds what is needed. Site 512 and the land to the west of it forming area excessively and should not be developed.
119	12	Site 51/R7 - The west side of North Road is a suitable location for some of the required houses although the suggested site far exceeds what is needed. This is the most su development as it has good road access. The land north of Randall Way is readily developable for employment, and land to the west of North Road, beyond any housing a employment. To soften the appearance of new buildings at this entrance to the town, the land owner should be encouraged to establish tree planting belts along North R
119	13	Site 1/70 - Part of the land proposed as protected open space at Jubilee Road is allotments. The remainder is neglected and semi-wild. Although it has some recreational open space. The allotments should remain as protected open space, but the rest of the site should be allocated for housing with a policy restricting the scale of building ar landscaped and equipped small park as part of the development. This is a good, accessible housing site. Its development would reduce the need to build on peripheral far allotments here should be protected as there is scope for some development on the rest of the site. Even if it is decided not to promote building here during the lifetime of protected as open space as this would needlessly restrict the ability to allow development at some time in the future
119	14	Bellmoor Quarry - Land at the entrance to the processing plant site should be allocated for employment creating development. Some of it is so allocated in the Bassetlaw extended up to the nature reserve to the south. When the quarry eventually ceases operation, the processing plant site could accommodate a further employment estate
119	15	Sites 24 and 44 - Land here is close to the town centre, neglected and unsightly. It could make a good housing site but access is poor and there is a flooding problem. It is own, could be developed. However if they were combined with adjoining land to the north, there may be potential for residential development on a scale sufficient to fur produce an alternative access from Leverton Road. This possibility could be reflected in an 'opportunity site' larger than suggested in the consultation document.
119	1 16	Additional sites to be considered. The Society considers that the following sites all warrant designation as protected open space. They are significant area which contribute enjoyment of local people. 1. The Retford cemetery 2. Land occupied by the Retford Tennis Club 3. The Hallcroft Fisheries site, and land between it and site 1/79.
119	17	Designation of the Hallcroft Fisheries site should not, however, be applied so as to restrict the operation of fishing and caravanning activities there.
119	1	This site is also low and has flooding problems. It is not, generally, suitable for housing.
119	19	However, the core strategy refers to scope for a marina in Retford and this is the obvious place for one. If the drainage problems can be overcome, Site 69 would be a suit the provision of a marina is accompanied by some housing.
119	20	Sites 46 and 309 are believed to be affected by restrictive covenants which may effectively prevent development.
120		Option A
120	2	Disagree - There has been an extensive build already agreed in the village on the former detention centre site. This in itself will change the dynamics of the village already need for an any additional houses and the proposed additional 8 houses on this site would completely change the character of Finkell Street.
120	3	No other sites - the former detention centre build fulfils the village requirement for new builds
120	4	Finkell Street has no pavements and many children walk along the road - both for the park and returning home from school. In addition the lighting is poor with minimal s concerns with the additional traffic that would result from an additional 8 houses. The traffic would not be just from the owners cars - but from visitors / deliveries etc. In result during the construction - it would be very unsafe for any pedestrians - both young and old.
120		This plot should be protected from ANY future developments - it has a special character for the village and for the immediate area. There is no requirement for any addition the safety issues the plot is part of a farm and this area is a rural farming community and should be kept for future generations to enjoy. What would be acceptable is the maintain the character of the site.
120		REMOVED
120		Not at all in this village/ area : This should not be considered for Gringley on the Hill.

121		Disagree. The significant development on the former detention centre site will already expand the village population by more than 25 %. This must surely be an adequate where few local services are available and the road infrastructure within the village is poor and has very few pedestrian footpaths. Children in particular are already at risk routes such as Finkell Street which has no footpath but is the main pedestrian access to the playing field.
121		I believe both represent significant risks to pedestrians and other motorists due to the narrowness of the roads onto which they will give access, and the lack of footpaths, road. As mentioned above, Finkell Street is the main route for children on foot and bicycles travelling to the village playing field. As a resident of this street I see children a the park this road every single day, and they would be put at great risk by 10-20 additional vehicles accessing new housing on Finkell Street.
121	5	Lack of proper road planning within the village is an issue, and will become far more acute when the additional traffic caused by new homes on the detention centre site a no cycle paths.
121	6	Yes, and I would add further open spaces which are currently used for livestock, as these fields within the village form a vital part of its character.
121		In and around existing sites because local service providers such as schools and health centres are already serving these sites.
121		Don't know
122		Yes
122		Option A
122	1	Yes I agree
122		238
122		All should be kept
123	1	I generally agree with the screening methodology.
123		However I do think there needs to be more inclusion of landowners in making suggestions for potential uses for their land and also more consultation. The consultation in a fairly narrow time frame which meant that a number of people who commute for work were unable to attend the meetings.
123	3	The questionnaire process which seems now to have informed this process could also have been communicated better (through workshops or information sessions) to ac better response rate and to encourage the community to be more proactively involved in village design.
123	4	In terms of Criterion 1 Is the local community supportive of the development of this site, I would advise that caution is exercised particularly in villages to ensure that obje considerations rather than other factors.
123	5	I do not agree that only 10% of the housing target should be allocated to Rural Service Centres as indicated in question 35 above.
123		Over a fifteen year period I believe there should be substantial development in the village, perhaps doubling its size ie an additional 500 plus houses. I believe that the key facilities such as the school to ensure there are additional places and also addition of other village services to support a growing population. For example the Village needs centre and more permanent post office.
123	7	I believe there should be a wide range of housing including the full spectrum of first time buyer affordable housing to family homes and retirement friendly accommodatic
123	8	I think that further housing investment could only benefit the village in giving access to wider funding for other facilities and services.
123	9	I do not have any particular objection to development on any of the sites identified providing transport systems and facilities are improved to support any development (v
123	10	Sites 522, 523 and 524 if all sites are developed together they would allow for a development within the village boundary but without overdevelopment of the centre of the developed together it would be possible to allow for road widening to ensure safe access. Given the size of the sites involved the site could also include a sports, recreatio members of the village. The sites are essentially outside the conservation area or on it's boundary and as such would be ideal for development.
123	11	Site 508 - is already surrounded by housing and could easily be linked into existing services and into the existing road network. The land is not usable for high grade agricu increasingly is being used as an area for local householders to illegally dump their garden waste. The field has never been used for any form of recreational activity formal the public to use the area in any way. It is hard to see why this area should be saved as open space for villagers who have built houses on their own gardens (as such indicated of the public to use the area in any way. It is hard to see why this area should be saved as open space for villagers who have built houses on their own gardens (as such indicated of the public to use the area in any way. It is hard to see why this area should be saved as open space for villagers who have built houses on their own gardens (as such indicated of the public to use the area in any way. It is hard to see why this area should be saved as open space for villagers who have built houses on their own gardens (as such indicated of the public to use the area in any way. It is hard to see why this area should be saved as open space for villagers who have built houses on their own gardens (as such indicated of the public to use the area in any way. It is hard to see why this area should be saved as open space for villagers who have built houses on the saved as the public to use the area in any way.
123	12	Sites 109, 110 and 526 - again taken as a collection of sites these are usefully located at the edge of the village where the council have already developed affordable housi development of 41 houses. Development of these areas of land for a mixture of both housing and recreation uses is a good option. Use of these sites would allow for road Lane which would improve road safety for the new development being considered. (At present Mark Lane is narrow, has no pavements or street lighting and as such on da for pedestrians particularly if the volume of traffic increases with the new development on the former poultry site.

123	13	Site 525 - would suggest that this area could be developed for the school. Rather than housing it could perhaps house additional classrooms or a small pre school or to crea Alternatively it could be used to improve access and facilities to the nearby bowling club.
123	14	Having reviewed the questionnaire and the Village Design Statement I would comment as follows. I think that the village would benefit from a variation from the brick and New architectural styles could be respectful of the village without having to attempt to copy old styles. I am particularly interested in eco housing and earth sheltered hous where the buildings compliment the natural environment and include sustainable energy sources. The village would also benefit from the inclusion of renewable energy pr wind turbines. A large amount of land has now been put forward within the village and additional areas not considered appropriate for housing may be useful sites to allow
123	15	I think that further investment in the local school is essential to ensure that there is sufficient school places for new families moving to the area. A larger pre school or nurs
123	16	In terms of sports and recreation facilities the village would benefit from more centrally located sports and recreation facilities or from having a Village Hall with on site fac with lighting would be useful to allow for year round activities. I would suggest that one of the sites identified could provide an opportunity to establish a central recreation Hall could be converted for another community use (eg Nursery/ crèche, Pre school). With careful design a new centre perhaps housing a cafe or community shop could also
123	17	Overall my preference for future development would be for areas within the areas (as identified above) be developed in preference to further building of houses on garder
123	18	Areas regularly used by the Village Hall Committee for recreational purposes should be considered for open space protection.
123	19	I agree that the school land and playing field land should remain protected open space. (16/2, 16/6, 16/5, 16/4)
123	20	In addition to these areas there are fields which are used during village events such as May Day and Apple Day, unless this practice now ends I would suggest that these sho
123	21	I do not consider that 508 (16/3), Old Hall Lane should be required to be retained as open space. The area is private land and has never been used for formal or informal re member of the public. Since the end of bulky refuge collection there appears to have been an increase in people dumping garden waste on the site placing an unfair burde the field has also deteriorated as a result of stone being stolen from it over the years. I also consider that given recent granting of planning permissions for land on Farm La field and on the site opposite it) it would be unfair to insist on the Old Hall Lane field being retained as open space unless the Council should wish to acquire it for that purp
123		I think that there should be a dual approach to development for Gypsy and Traveller development with extension of existing sites for long term accommodation to allow to accommodate extended family groupings plus new sites identified for short term transit stop off sites. Transit sites could be relatively small and spread out to ensure that services during their stay without over whelming areas where there is inadequate service provision for any increase in population.
123	23	I think that consultation with the Traveller community directly is the best way to identify the most appropriate pitch provision. My personal view would be for there to be a pitches which require different levels of facility provision. Residential pitches would need to be near to areas with capacity for long term school places and medical care for
123	24	Due to recent comments from some members of the East Markham community I sadly do not feel that Gypsies and Travellers would be able to live safely in this communit
124	1	I call for site 533 to be removed from BDC LDF for the following reasons: 1. There is no available access to the site.
124	2	2. There is a significant problem with flooding on Durham Grove which would be exacerbated by any development on this site. I refer to your correspondence with Nott's C problem, which has not yet been solved. The dyke shown is no longer used for drainage.
124	3	3. Dunham Grove is extremely narrow and large vehicles have to reverse in to it because they are unable to turn around. Residents' parking also hinders traffic.
124	4	4. The existing foul water sewer is sinking and blockages have occurred because it cannot cope with existing input loading.
124	5	5. The size of the site is insignificant compared to others identified and will make no appreciable contribution to the housing market.
124	6	6. The site is too close to the racetrack for which permission was only recently given.
124	7	7. Granting permission for this site will open the way to further development on adjacent land.
124	8	8. The owner of the land has recently purchased a bungalow at the end of the grove - to give access to the site (?). This would destroy the aesthetic appeal of Dunham Grov
124	9	I am lodging a protest against all three sites being included as they are prime agricultural land which, in the context of the world food shortage and the present economic c production.
124	10	I also notice that the sites are outside the borough of Retford boundary and the development envelope previously agreed. This was to prevent encroachment in to the gree
124		Any development on the sites earmarked would lead to significant traffic problems on Tiln Lane, especially at the junction with Moorgate and around Carr Hill school. This being experienced by residents parking and the large number of HGVs which use the road. Pedestrians are already at great risk when walking on this road.

124	12	The character of this area as a peaceful, orderly edge of town/countryside dwelling area will completely change for the worse, especially for the many elderly residents in
124	13	It seems to me that what is required in Retford is more jobs, not houses. Especially for young people.
124	14	Travelling around the district it seems to me that development around Harworth and Bircotes would be more advantageous, especially with many brownfield sites and go estates for job creation.
125	1	Site 4/W9 - Proposed development is not sustainable.
125	2	Site 4/W9 - Access/infrastructure - access from the south (M1) east and west (M1) can only come via town centre or bypass/Retford Road. The number of cars and lorries development would require would swamp the existing road system.
125	3	Site 4/W9 - The development would also run up to or cover several existing public rights of way which currently run through open countryside and would henceforth run t
125	4	Site 4/W9 - There is currently no provision for any recreational, educational or commercial activities on this site, again raising issues about traffic volume.
125		Site 4/W9 - The rights of way (e.g. Thievesdale Lane bridleway) are currently tree lined with hedgerows - these would be threatened or destroyed.
125	6	Site 9 - Would run up to one side of existing right of way and would require removal of trees/hedges on the current western boundary of the built up area. The setting is a would be compromised.
125		Site 35 - Gateford estate at present suffers from traffic/access issues (e.g. at either end of Ashes Park Ave) - new development would double the size of the estate (and the via these two points.
125	8	Site 35 - The proposed new development would also enclose the existing bridleway which runs north towards Audley Lane, obscuring the current open views of fields and hedgerows.
125	9	Site 153 and 587 - Development here for houses and leisure is an excellent idea, as long as the existing rights of way - National Cycle Route 6 and paths over the pit top - a
125	10	Site 30 - Development up to existing bridleway which runs towards Mansfield Road would put the existing character of the countryside at risk, as well as trees and hedger
125	11	Site 30 - The Lady Lea Quarry (Notts Wildlife Trust) Nature Reserve is already a focus of anti-social behaviour and fly tipping. Easier access would only exacerbate this issue
125	12	Sites 195/343/W8 and site 45 - Cut off old road (hedge lined on one side) would be surrounded by these two sides. This is a valuable access route (via the cut off road at SI A57) for walkers and cyclists from the northern end of Worksop to Shireoaks, the canal and surrounding countryside - would this access be preserved or enhanced? e.g. by kerbs?
125	13	Site 30 - This area of calcareous grassland (old limestone quarry tips) is a locally and nationally endangered wildlife habitat, supporting plants and flowers not found on ma this entirely.
126	1 1	No, I do not agree that enough land should be allocated in Ranskill for at least 14 houses. Indeed, your own Site Allocations Issues and Options document suggests that onl My view is that Ranskill should have an allocation of no higher than 5 houses. My reasons are:
126	2	Since 2006 Ranskill has experienced house building expansion which far exceeds any other village in Bassetlaw (with the exception of North Leverton). The number of hou of all houses built in Rural Service Centres.
126		Further house building in Ranskill is contentious in the light of recent substantial expansion of the village. The response rate to your questionnaire (39%) is the highest in B number of other villages are rather more relaxed about possible building development, perhaps because previous expansion has been much more limited.
126	4	Approximately two thirds of all those responding to your questionnaire requested no further building beyond infill. The figure in question is the second highest in Bassetlay The allocation to those villages reflects residents' wishes and these villages have provisionally allocated only 4 and 5 houses respectively.
126		the existing provision of affordable housing in Ranskill is already the fourth highest of Bassetlaw Rural Service Centres (11% of housing allocated to A1 Housing). There is al this housing in the village.
126	6	Although windfall infill within the settlement boundary does not fall within your calculations note should be taken of the likely construction of properties within the scope lock-up garages near the park. This is predictable, likely to be affordable and built on a brownfield site.
126	7	Taking account of the above data I would suggest that the allocation be set at the same level as in the case of the other two villages (Sutton and Gamston) which show, like further housing. This equates to an allocation of 5.
126	I X I	If there is felt to be a need to expand the village I suggest site 537 and I suggest that any development of this site be considered late in the timeframe that you are conside impact on the character of the village.
126	9	It has no impact on good quality agricultural land elsewhere on the periphery of the village.
126	10	It is a site you have described as wasteland. Although not brownfield it has the same character. The preference by residents to avoid greenfield development was made ve
126	11	It is a site which directly mirrors the existing approved development (Persimmon Homes) both in location and character of likely future housing.
126	12	The site offers the potential for further expansion in the future, thereby avoiding ad hoc developments around the village.

nt 129	nt 13	Site 214 - Low wires from pylons dangerous						
129		Site 214 - Low wires from pylons dangerous. Site 214 - Access from site not suitable.						
129	14	Consider the school and the Doctors for the extra capacity.						
129		Consider the school and the Doctors for the extra capacity.						
129		Any more housing in Blyth is not suitable - do not spoil a rural village.						
129		When considering if or not to grant planning permission is this going to end up an American sub-prime situation?						
129	10	I refer to the current consultation process regarding the above. This issue was again discussed at the November meeting of the Parish Councils and I have been asked to confirm						
130	1	concerned with the Parish, the Council wishes to support the proposals for the development envisaged at Langold Park and does not wish to support the designation of any otl						
130	1	time.						
131	1	With the current developments and required allocations for Retford I would not be in favour of further allocations.						
131	2	I would prefer sights 3-27-370-511 for development for housing.						
131	3	I would prefer sights 51-R7 for development for employment in the future.						
131	4 5	I do not support the idea of mixed sites, but sites 51-R7 are a continued of the current developments in the area.						
131	5	I would like to bring to your attention that sites 40-52-1-41-364 are used for a variety of crops over the year, the government is pushing for the country to purchase locally sour						
131		Site 41 appears to have high water course as the field floods regularly.						
131	7	Also sites 259-R2-364 have produced several historical artefacts as displayed in the local Museum.						
131	8	I feel that the further development of sites 41-364-1-52-40-259-R2 would be to demanding on the local community i.e. the school has a limited capacity, the village has nothing						
		their leisure time, limited public support.						
131	9	I do agree with protecting the green sites. The area covered by 41-364-259-R2 have many rights of way which are walked extensively by the public. Again, the government is en						
		exercise, if these sites are developed it would restrict the enjoyment of the public.						
131	10	I would not like to see sites 24-44 developed due to the possibility of flooding.						
131	11	The current Southern Boundary to Retford is well defined and provides a consistent and appealing entrance to the town and this would be lost by these developments.						
131	12	It is important to maintain a distinctive boundary between the urban area and the open agricultural land and the current town limit doers precisely that.						
131		There will be a significant loss of amenity						
131		The local infrastructure will not cope with and occupants of the new housing would have to drive a significant distance for shops, schools, doctors and other facilities.						
131	15	There are more appropriate areas of land within the existing Retford town boundaries for housing.						
131	16	I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.						
132	1	I don't wish to see any new houses in Beckingham.						
132	2	The village has already been split with all the recent new builds						
132	3	The sewers are inadequate, with recent major problems along Low Street						
132	4	Many houses are available and for sale.						
132	5	None						
132	6	A public house is not needed. Wake up and see all the current pub closures.						
132	7	In my view, all the proposed sites should be protected - stop spoiling or village and start listening to what the majority of people really want, or is this just another paper exerci						
132	8	REMOVED						
133	1	Taking note of the enclosed plan, I think plots 246-248-249 are no go sites.						
133	2	249 is too large for a small village						
133	3	246 is putting too much traffic on to Yew Tree Road, plus only one entry/exit no other if required by emergency vehicles.						
133	4	248 would be equal to half the existing size of the village at present.						
133	5	247 would fulfil the governments requirements for the foreseeable future.						
134	1	Yes						
134	2	Option A						
134	3	Yes, but only 6 (too much building has already taken place recently and infrastructure already under stress).						
134	4	Site 451 - to prevent overcrowding existing properties and maintain a village, would feel for existing and new residents.						
134	5	Yes, the site must be kept for a pub only. As dictated by the planning appeal officers.

	6	burden. I consider site 451 to be the most suitable site for development.							
134	7	Yes, all open spaces should be protected.							
134	8	By developing and improving existing sites, access to the school and health checks on a regular basis has a better change for those who are in residence on them.							
134	9	Separate transit sites are probably better, due to the nature of the equipment (plant) of the showmen and travellers.							
134	10	Sorry - No.							
135		Option A							
135	2	No more building in Beckingham							
135		See Above							
135	4	Pub is the centre point in the village - we have too many new properties that do not suit the village.							
135		No.							
135		REMOVED							
135		REMOVED							
136	1	We agree with the screening methodology							
136	2	Current housing appears more than adequate as there are unsold new build properties already in the town. I agree that there should be an effort to provide more employing the state of the							
		areas. If housing is allowed to grow more than industry, Retford would risk becoming a dormitory town.							
136		Areas 10, 70, 71 and 342 should be developed for housing in the first instance, and over and above greenfield sites.							
136		Sites 51 and R7 should be developed for employment as they are close to the already existing Hallcroft industrial estate, and the Randell Way complex.							
136	1 5 1	We support sites 51 and R7 as mixed use. There is already housing adjoining the south-east edge of the site, and extended housing development would therefore be easier							
		would leave sufficient space for a sizable industrial area providing much-needed local employment.							
136	6	There are issue with potential development sites 37, 512 and probably the Longholme Farm development area 533,7,46,309 to the north of Retford, east of the river: Traf							
		traffic along Tiln Lane is a major concern. Large and heavy lorries already have to use Tiln Lane as an access to Gainsborough due to the low bridge at Welham.							
136	7	Road Safety - this is a major issue already because Carr Hill School is located on Tiln Lane. The school run traffic causes severe congestion, and the mixture of school childr be a lethal combination.							
136		Parking provision - is very limited along Tiln Lane and any increase in traffic would compound the problem.							
130		At other times, vehicles regularly exceed the speed limit along Tiln Lane, especially going out of Retford towards Clarborough. The 30mph limit would have to be extended							
136	9	(and it would still be ignored).							
		Trees and Hedgerows - There could be a loss of trees and hedgerows along the south-west border of area 37. This is the boundary between Bolham Manor and Bolham La							
136		hedgerow. This area supports wildlife species such as owls (Tawny and Little), and is a corridor for several species of bat. We have regularly monitored the bats with our he							
		pippestrelle, (common and soprano) and Daubenton's.							
		Infrastructure - At present, there is inadequate infrastructure in the north-east area of Retford to support any large-scale housing developments. There are only two small							
		Moorgate which would be insufficient to support the potential growth in population of this area. Most people wood therefore have to use their cars to shop in Retford itse							
136	11	major parking issues in the town. The junction of Moorgate and Tiln Lane already causes delays, and the increase in traffic would only make the problem worse. It may wel							
		junction.							
		Flood Risk - The land identified as site 37 slopes down from north-west to south-east. During heavy rains, the runoff coming from the southeastern border of site 37. Bolha							
136	12	Environment Agency Flood Maps. Any increase in housing could cause an increased risk of flooding as there will be no soak facility of the existing field. Flooding could even							
		onto Bolham Lane and the houses beneath this ridge.							
136	13	Stability of ground: the sandstone escarpment beneath area 37 already has some vae systems in it, and may building work above these systems could result in subsidence,							
130	13	sandstone cliff itself.							
136	14	Green space should always be considered as a premium asset in any urban development and therefore as many as possible should be protected.							
136	15	Only as a last resort should the open spaces be developed as housing/employment areas. Enhancement as recreational/leisure area should take priority.							
137		Yes							
137		No

137		The drains back up in prolonged heavy rain, extra houses would make it worse.						
137		51 and R7 if split as shown on enclosed map.						
137		259 and R2 if better access to A1 could be achieved.						
137		512 and 37 have access to Moorgate Hill junction problems, apart from that no objection.						
137		Yes						
137	10	No, the more open spaces the better.						
137		Option A						
137		Existing sites, to keep the mess they create in one space and not spread all over our area.						
137	13	No firm opinion						
137	14	None known						
138	1	Agree, if need can be proved						
138	2	yes, 19 and 12						
138	3	160 and 161						
138	4	Yes, most certainly						
138	5	Around existing sites to lesson the impact on residents						
138	6	Together, same reason as above.						
138	7	No comment						
139	1	Screening methodology appears to be through and sound						
139	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?						
139	3	Four is a very conservative figure and will not create a negative impact on the character of the village.						
139	4	The sites most suitable for a small development are those adjoining an existing road where new houses would essentially to infill						
139	5	Suggest 274 or the fringes of 275 and 452 which adjoin Town Street and Lound New Road.						
139	6	As indicated in response to Q114, small-scale development can be achieved by 'infill' adjoining an existing road or by developing a 'brownfield' site if agricultural buildings						
139	0	spaces should be retained within the confines of the village for grazing horses, small holdings or similar usage.						
139	7	Existing sites - if that is practical and feasible. Alternatively, sites adjoining the A1 or other similar locations if required.						
140	1	I would not like to see additional growth in Carlton or Langold on the scale shown on the map. We have had new developments in Carlton on the old school site off Long L						
140	1	bottom of Rotherham Baulk in recent years. This has grown the size of our village.						
140	2	I understand a few houses are to be built at North House Farm on the green, but I have not objection to this as buildings are already there and it is better to have houses t						
	-	Also the numbers of houses proposed is only 5 (If i understand your map correctly) and this would not impact our village.						
140	3	I also do not object to the development at Firbeck Colliery as the area has become a dumping ground and is frankly a mess. It would be better to have the area redevelope						
	<u> </u>	However, this development is a large one and will bring many more people to our area. I feel this will be enough.						
		Carlton and Langold are villages and too much expansion would stop them being so. Also looking at the proposed potential housing areas on the map Carlton would nearly						
140	4	half. How is this going to impact on the village schools which could not cope with this much growth. Are we to have a new school built or expand the existing ones?						
		Also I am concerned about traffic through the village. People heading for the motorways would use Rotherham Baulk and Owday Lane. These are essentially country roads						
140		there are the village services such as the Doctor's Surgery, could they accept so many new people, the buses through our village which are overcrowded most of the time						
140	6	Also if these potential housing areas are built, Carlton and Langold would cease to be the villages they are today. Most people live in a village because they want to live in						
		much expansion would spoil our villages.						
140		The green spaces we have in Carlton that are used as play areas for children should be protected as we do not have enough of them.						
140		Too much expansion would grow our villages so they would become more like a town.						
141		Yes - I agree						
141		Option B - Worksop						
141		Yes - I agree						
141		Area 281 - Poor road access elsewhere						
141		No						
141	6	Yes -from a visual point of view - the village currently has a rural feel and any infill would increase 'urbanism'.

141	7	Additionally, road access to most of the sites would pose difficulties from a safety point of view.
141	8	Existing sites should be developed wherever possible - generally lower cost and less public outcry.
141	9	Some sites on cost and despoilment grounds.
141	10	None known.
142	1	In section 11.2 the table shows that the existing space pitch capacity, as of 196 July 2011, was 38 pitches. In section 11.3 the need assessment made back in December 200 pitches of 43 in the future. I don't quite understand these figures because almost six years after the assessment was made, there is still a good deal of space capacity on expertence.
142	2	As stated above, I cannot see the need for more sites. However, if there is, I think and extra pitches arise by encouraging existing sites or building others near to them. Exter effective solution mainly because of the provision of shared services and the time and money spent in looking for new sites that comply with the appropriate legislation.
142	3	I think that transient and residential sites should be located together because it must be easier for the Council to control and administer fewer sites. The opportunity for co electric and water.
143	1	Option A
143	2	Yes
143	3	303 first choice, 398 second choice
143	4	Flooding regularly occurs on Budby Road at the junction with Old Mill Lane.
143	5	Yes
143		On and around existing sites
143		REMOVED
144	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
144	2	Disagree with any new developments as a) it spoils the character of the village
144		b) Increased traffic on all roads
144		c) Brownfield sites should be used first.
144		d) Less green space in the village
144		e) Limited bus service operates through the village
144		None Known.
144		Village has no football/sports areas or play ground for youngsters
144		Earmarked sites should be protected from any building development
144		Gypsy/Traveller sites should be concentrated on existing sites. More facilities could be provided on those sites
144		As above (answer to question 122)
144	12	No
		The methodology appears to be reasonable although I would have preferred to see all existing development within the settlement over the past 5 years included in the over
145	1	during that period. Some villages have had minimal growth others have seen rather more. Beckingham falls within the latter category experiencing 33 new builds including
		planning for a further 7 and yet 40 properties remain for sale in the village.
145	2	Option A, providing sustainable employment is available to support significant growth.
145	3	As illustrated in Q1 there exists planning permission for a further 7 homes, five of which are on one plot. I would suggest this meets the overall wish of the parish to see on
		not therefore, support any further land allocation for building with the exception of site 101.
145	4	In considering the map of Beckingham I do not support any new site allocations within the actual village itself. The character of the village has been seriously eroded by po
		dense somewhat unattractive developments that detract from the rural scene.
145	5	In particular, Low Street contains many old and historic properties and I would be pleased to see some consideration being given to listing some of the area together with
		High Street. Conservation status is one way of assisting future developments to be aesthetically pleasing.

2005 showed there would be a shortfall in existing sites.
Extending the site would be the most cost
r cost saving measures also exist e.g. supplies of
overall plan to reflect cignificant changes
overall plan to reflect significant changes ing 17 low cost properties. Currently, there is
on average only 6 new properties built. I do
poor planning decisions in the 1960's allowing

145	8	The green and The Spinney ought to have protected status, both are within the control of the Parish Council. Similarly, I would suggest that the whole site adjacent to site given protected status to ensure the density of the village is not further increased.
	9	I have considerable working experience with Gypsies and Travellers. I have found that generally they do not wish to be integrated within communities. Rather, they prefer travelling distance of school and facilities. I am unaware what research has been done by BDC to ascertain if further sites are required but if work has been carried out to s to settle in the Parish then I would suggest that the site adjacent to the Trent Port Pub be investigated. I understand that this is privately owned by a person in London. From of this land for temporary sites and for the dumping of garden detritus. I believe the Police may be investigating the unauthorised use of the land, but it might be suitable for with attendant wash houses. I am sure that BDC would wish to consult with the gypsy and traveller liaison workers and gypsy council to establish what they prefer rather t would be unfortunate if sites were built that are then unused as has happened in neighbouring Lincolnshire.
145		I do not therefore, support any further land allocation for building with the exception of site 101. This could, providing road traffic hazards are eliminated and new drainag development of housing and overall improve an industrial site.
146	1	I agree with and commend you on the scope of your screening criteria
146	2	With consultation out to 20 proposed Rural Service Centres the consideration of redistribution to more urban centres is premature.
146	3	I agree with the proposed RSC distribution and believe that the 14 additional houses allocated to Walkeringham can be accommodated within the capacity of the pumped
146	4	I am surprised to see sites 51/1, 51/2 and 51/3 on the Walkeringham map listed as potential protected open spaces since Walkeringham 26 village envelope map, circulate Children's playground. The playing field and the primary school, together with the Church yard and the Cemetery, as protected open space. If they are not currently protected open space of the second states of the second states
146	5 1	With two exceptions, the proposals for development are disproportionate to the size of the village. Implementation of the proposals in full would totally alter the characte additions to the pumped sewage disposal system.
146	6	My comments on individual proposals are as follows: site 438 - The lower part of the site adjacent to North Moor Road is subject to flooding in severe weather events.
146	7	Site 294 - The lower part of the site adjacent to High Street, is likely to be subject to flooding in severe weather events. Any road from the site to High Street would require
146	- X I	Sites 293 and 438 - It would be desirable to avoid any egress from site 293 on to the sharp bend in the A161 ROAD. If development of site 293 and/or site 438 entailed egre that road should be reduced from 40mph to 30 mph to facilitate road safety.
146		Site 366 - Unless the adjacent section of Bird croft Lane was widened from a single carriageway any egress from this site would have to be to the A161 Beckingham Road.
146		Sites 437, 438, 442 and 445 - If all of these sites were developed the character of the village would be altered due to the potentially large numbers of houses proposed.
146		Site 442 - Access to this site would be difficult. The potential agree to the A161 would be on a bend with restricted sight lines.
146	12	Site 445 - As shown on the Walkeringham 26 sheet, the section of this field which is adjacent to the Moor Drain is subject to flooding. Incidentally, the indication of the floo parallel to the railway towards the sewage works is incorrect. The railway line is in a cutting at this point and the sewage works are on higher ground. Should the sewage w Walkeringham, including the whole of the Fox Covert development, would be under water to first floor level.
146	13	My comments are related to site 481 which is within the Walkeringham boundary. The existing development sites at Fox Covert in Walkeringham and the Newalls site in N railway bridge on Fox Covert Lane and have unrestricted vehicular access.
146		Should site 481 and one or more of the Misterton sites 87, 201 and 202 be fully developed, vehicular access would be restricted by the low bridge on Fox Covert Lane and sites were developed fully, with over 500 additional houses, it is probable that the unrestricted access road, Gravel Holes Lane, would require a major upgrade to take the

158	1	I agree that there should be land allocated for at least 13 new houses.
158	2	No, my view would not change considering the 9 dwellings recently started, and the 5 proposed affordable houses.
150	2	I would like plot 296 to be developed in the future. It would provide sensitive and appropriate infill to the village. Also the development would be in character, similar to p
158	3	enhanced the village.
159	1	We would agree that enough land should be allocated for at least 14 new homes up until 2028.
159	2	Walkeringham is a substantial settlement which provides a good level of services and facilities supporting some everyday needs. Allowing for some small-scale developme
		community.
159		The village would be able to support such growth in relation to its current infrastructure.
159		Any design for future housing should reflect the nature of the village.
159	1 5	Site 547 should be considered for development in the future as it provides an opportunity to access an underused area of land to create a sympathetic development with
		into the open countryside.
159	6	A development on this site could be spaciously designed, compatible with its surroundings and meet the plot character of this particular area.
159	7	In terms of it suitability for housing the site is in walking distance of the village services and facilities including school, post office, village hall, church, playing field, public h
159	8	The impact on and benefit to the community would be availability to Bassetlaw District Council in achieving the housing target for the Rural Service Centres. Site 349 and p
		for consideration together with site 547.
159		The allocation of these sites would only require minor realignment of the settlement boundary without harming the visual character of the village or countryside.
159		We would like to make the District Council aware of a fuel pipeline at the site reference 442 crossing the site northwards from station road to the fuel depot on the A161.
159		We take the view that open space site reference 51/2 and 51/3 should be protected from any future development proposals as these sites are vital to the local communit
160		Yes
160		Option A: Spread between Worksop; Retford and Harworth Bircotes?
160		Disagree - at least 25 more properties and some for first time buyers
160 160		The split indicated on map No
160		Yes
160	_	REMOVED
160		Separate - static and transit would not mix
160		None
161	-	Firstly, the Council does not believe that Tuxford should be allocated more housing growth above that already required. (Question 26)
		Secondly, the Council believes that all the areas of open space identified on the map in the consultation document should be protected from any future development. The
161		open space in the centre of the Burleigh Court development, which is not shown on the map, should also be protected. The Council is puzzled by the inclusion of two areas
		space on the map as these are actually areas of pavement! (Question 29)
		Thirdly, the Council has considered each site in turn and would like to make the following specific comments on the identified sites:
161	3	115 – the Council has previously commented that the 'availability conclusion cost factors' in the SHLAA report should be the same as those for 121 regarding noise from the same as those for 121 regarding noise from the same as
161	1 4	The Council has two major concerns about the development on these sites on Lincoln Road. First, intensive development would destroy the rural aspect of the valley; second the sites next to the beck. This site should only be considered for a limited amount of housing development.
161	-	This site should not be considered for housing – it is too big, too far from the town centre and would encourage the town to sprawl outwards.
161		It is considered that this site is suitable but would be better earmarked for small commercial/industrial growth.
161		The Council considers this site to be suitable for housing
161	-	The Council does not consider these sites suitable for housing. Building on them would destroy the view from the South across to the Windmill.
161	-	114, 492 & 495 – The Council considers these sites to be suitable for housing
161		490 – The Council considers this site to be suitable for housing and at least partial industrial development as site 122 above.
161	-	493 – The Council does not consider this site to be suitable for housing. It is considered too close to the junction of Ashvale Road to provide safe access or egress to prope

nt	nt	
163	12	I Don't know of any land available
164	1	Option A
164	2	No houses should be allowed in the village
164		No
164	4	Would not like development, but if so, on sites 246 and 247 as they are on a bus route, school and shop.
164	5	Elkesley does not have the infrastructure to support a big housing development
164	6	Yes, sites 248 and 249 should be protected from housing
164	7	REMOVED
164	8	REMOVED
164	9	REMOVED
165	1	The population of Retford will increase by over 50% from 21,000 to 32-33,000. Nearly 4,000 extra school places will have to be found. There will be nearly 4,00 extra cars.
165	2	In consequence, the character of the town will be massively altered.
165	3	Local infrastructure will be seriously stressed
165	4	Traffic levels will increase overall by some 50%
165	5	There will be substantial loss of amenity and wildlife habitat from development of greenfields.
166	1	I accept that 4 new houses should be built provided they are affordable to first time buyers and/or meet a social need.
166	2	Site 282, not 2 houses but 4 single occupancy units designed to look like 2 houses
166	3	Sites 274,299,276,452,275 houses to be built on any one of these sites would a) overload the village roads and increase the hazard of several bends.
166	4	b) There is inadequate infrastructure to support these sites
		c) Postwar development in Sutton took away 25 + acres of productive farm land (one acre = 4 allotment large enough to support a family's need for vegetables for one ye
166	5	are all good food processing land. The world population is increasing, as is the UK population. At present, the UK is 55% self sufficient in food compared with 90% in the w
100	5	3rd world countries, they will want to use more of their own produce and not export it. Therefore the UK will need to become more self sufficient than it is today. Farm la
		generations.
166		d) Developing these sites would mean loss of landscapes, ecological sites, trees, hedgerows, and open spaces which are psychosocial refreshing.
166		e) There is no work in the village so people coming to live on these sites would have to commute, thus increasing traffic problems and pollution.
166	8	f) I know of no overcrowded families in Sutton and a number of houses are already for sale in the village.
167	1	We disagree, the 68 homes being built are more than sufficient (already increasing village housing by nearly 20%) in terms of infrastructure, traffic and general rural chara
167		No additional sites should be developed
167		With reference to site 134, the greenfield area should be protected and should never be developed.
167	4	We agree that the open places identified on the map and all other green spaces in the village should be protected from any future development proposals.
168	1	Accepting that 'screening methodology' criteria are those criterion 1 to 9 in stage 2 identifying sites - Yes. However, this 'traffic light system' of scoring potential sites in E
100	2	potential constraints discovered in stage 1.
168	2	Option A, it is considered that Elkesley today does not fulfil enough of the criteria to be a RSC. I have not seen the feedback from Elkesley residents. On current demand, taking into account village infrastructure, and with several new houses not selling, it is not belie
168	3	development other than minor infill plots of less than 11 houses.
168		No, this open greenfield site is in the heart of the village (site 247) and as such should be protected as a community asset.
168	4 5	If housing must be considered on this site, it should be limited and look to making provisions for leisure amenities such as a bowling green and/or a tennis court.
168	-	Sites 246 and 248
100	0	List of village assets: The post office is now closed and it is unclear if one will reopen, the village pub is up for sale, it is hoped that this remain a pub again, but it is unclear
169	7	sale in the village. Several are long term offers. Let properties are also show to move. It is evident that Elkesley is not seen as a desirable location, as a result of several fac
168		of houses would not appear attractive.
		Due to a reduction in village 'assets', a limited infrastructure and poor public transport facilities to local services such as hospitals, doctor's surgeries and shopping it is not
168	8	classed as a RSC.
		In addition, it is believed that site 247 should also be protected as previously stated. In addition, this site, as noted in the SHLAA report is greenfield, is a site of potential a

168	11	Together - site services/facilities provide for both.
169	1	I do not agree to more new dwellings before any further development commences in the rural village of Blyth. Couldn't existing boarded up dwellings be refurbished within
169	2	If 9 dwellings were built, I suggest plot 178, 590 or 266 purely because access onto Retford Road or Bawtry Road would be preferable to access on Spital Road (no. 214, 21 the village, I fell building anymore houses closer to the exit would be unsafe.
169	3	Look at refurbishing existing houses before new builds. Please consider traffic issues, the village does not have any facilities other than a village shop and poor bus services
169	л	When considering suggested plots in the village, please consider which plots are currently farmed and which are wasteland. Over the Bassetlaw area. Please consider if the areas available before farmland is bought.
169		With regard to the 38 gypsy and traveller plots I would suggest you extend existing sites.
170		There is enough traffic on Ollerton Road now and most traffic that uses that road now disregards the 30mph speed limit. It's a straight road waiting to have an accident, ar
170	1	means more cars.
170	2	I am totally apposed to these houses being built.
171	1 1	Any additional housing would, I feel, take that 'village' feeling away from Blyth. If this happens, it will be a real shame. I realise that housing is an issue in all parts of the could be a seal shame. I realise that housing is an issue in all parts of the could be a seal shame.
-/-		Langold, Carlton, Worksop and Retford all possess enough areas for housing and provide the necessary amenities to cater for this increase of population.
		No, why Blyth? The ripple effect on all aspects of the village would be massive: the shop has just had a huge rebuild, but should these plans go ahead, it would be totally in
171		of money and time. The school is a successful village school and its current building would not support an increase such as the one proposed. The roads an parking are a m
		would you address this?
171	3	I believe that areas closer to the towns of Retford and Worksop, would be more appropriate for new housing.
172	1	I live at the end of Bigsby Road, Retford overlooking the Idle Valley. I understand that it is proposed to build over 700 houses on the fields facing us, and obviously I would
		will certainly affect the value of my house
172	2	it will remove an area of varied wildlife. To disfigure the real beauty of this valley which is such an asset to the town with residential housing would be a tragedy.
172	3	The traffic situation where Bigsby Road joins Tiln Lane is already chaotic with huge HGV's, school traffic as well as local traffic. To still add more from this development wo
		unwise.
172	4	Surely at the present time, Retford has a surfeit of empty housing remaining unsold. They remain unsold because of the lack of jobs and industry in the area which is unlike
172		The Council would need to supply services such as school, benefits etc
		It is with grave concern that I have examined the proposed building sites within Ordsall and adjoining land, particularly sites 42 and 53 - around 1200 houses with 5% empl
173		gypsy and traveller sites. Apart from destroying the character of Ordsall, I am so concerned that the roads in Ordsall are at a maximum capacity for traffic at present and ca development.
173	· · · ·	Ordsall High Street is very difficult to negotiate (especially at night) due to the width of the road and parked cars. The 5 arches bridge at the bottom of the high street is also
175	2	times, and its structure was not meant to accommodate the volume of traffic now expected of it.
173	3	The whole ethos of this beautiful rural area is being eroded.
173	4	West Hill/ordsall Road, leading up to the mini roundabout junction with the Worksop Road is a terribly busy road at the moment, and would be horrendous with the addition of the second se
173		If people then decided to use the road through Eaton village as an alternative route, then the village would be destroyed - it is already being busy at peak times.
173	6	Eaton is a very attractive village, with the true characteristics of a farming village, complete with, a church, old school house and bridge with the River Idle flowing through
173		Ordsall infant and primary school would not be able to accommodate the children from such a large housing project, it is already adding numbers from the new Bridon pro
173		It is very distressing to see the lovely fields and open spaces which surround Ordsall being destroyed by extensive housing projects -de valuing existing houses, next to the Ordsall Destroyed.
173	10	The current Southern Boundary to Retford is well defined and provides a consistent and appealing entrance to the town and this would be lost by these developments.
173	11	It is important to maintain a distinctive boundary between the urban area and the open agricultural land and the current town limit doers precisely that.
173	12	There will be a significant loss of amenity
173	13	The local infrastructure will not cope with and occupants of the new housing would have to drive a significant distance for shops, schools, doctors and other facilities.
173	14	There are more appropriate areas of land within the existing Retford town boundaries for housing.
173	15	I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.
174	1	Objection to building on plot 69 opposite to the rear of Brixworth Way Retford.
		We bought our house in 1988 because of the fact it was not overlooked and also my views over Leverton Hill and Grove Wood.

174	2	On the land in question there is a wealth of flora and fauna which is enjoyed by all. We are able to watch barn owls, sparrowhalks, kestrels and kingfishers along with all the
174	3	protected voles. We cannot envisage any building taking place between the heavy goods railway line and the canal for many reasons.
174	4	The very close proximity of houses alongside the railway line - surely this is a health and safety issue.
174	5	Access required would lead to more traffic on Welham Road, and the already congested Moorgate Hill.
174	6	The land is low lying and often water logged which would prove to be difficult to service for drainage foul and service water.
174	7	We consider this proposal along with all our neighbours to be very unreasonable and would ask that this potential site to be removed from the plan.
175	1	Enclosed is a DVD of water to the rear of St Stephens Road and St Helens Road as opposition to the field being developed. This field often has lying water to the lowest
176	1	Yes, I do agree with the criteria in the screening methodology
176		The site shown on the map which I would prefer to be developed for housing is site 114. As the owner of the site since 1989, I feel developing site 114 would be a 'roundir would mirror the development on the opposite side of the main road. Site 114 is not prone to flooding, has good access to the south east corner of the plot and is classed Ministry of Agriculture and Fishery. If site 114 could be developed for family housing, with a good design and appropriate materials, i feel this would enhance the visual ap
176	3	I think the open spaces identified on the map should be protected from any future development proposals.
177	1	I agree with the community assets (Ranskill)
177	2	Parking close to the shop/post office (which there used to be on the corner of Station Road until the Council - misleadingly, in my opinion, commandeered as pedestrian o
177	2	Bearing in mind the dictionary definition of 'village' and the lack of parking mentioned above, 14 houses may be reasonable. To extend too far would be changing the who
177	3	public transport is limited would increase traffic accordingly too.
177	4	REMOVED
177	5	The smaller sites 516 remains within the current village envelope.
178	1	I agree that enough land should be allocated within Hayton for a modest number of houses between 12 and 30.
178	2	If the potential development of Corner Farm goes ahead with around 20 houses, then I would consider this forms the greater part of what Hayton could absorb. A few oth there, but my greatest concern is that of sewage disposal. It is a regular occurrence in Hayton that when heavy rain falls, the main sewer overflows. This affects a good nur Severn Trent. The sewage system in Hayton is pumped but the main sewer has been compromised by subsidence and under capacity. The problem must be addressed bef added to the locality. It should be noted that amenities in Clarborough/Hayton area are minimal. The Clarborough school is already operating at full capacity and there are
178	3	Sites 542, 544 front onto Main Street and could be utilised. Sites 160 and 161 could stand modest development but it is clear that they impinge onto the Chesterfield Cana
178		Broadband speeds are pathetic in Hayton. If an increase in population could bring and influence onto the improvement of this facility it would be welcome.
178	5	It is absolutely essential that the open spaces marked for Hayton are preserved.
178	6	I think any new gypsy and traveller sites should be extensions to, or kept local to existing sites where integration with local communities is already established.
178	7	I do not why any distinction is made on this topic.
179	1	Please find my views on the planning subjects you are considering between now and 2028. We need jobs for our young people in the area which is almost impossible at th grandsons. 2 granddaughters have left the area after unit, one has gone to London. The other is 150 miles with down the A1. still the have to travel a good distance into w Newcastle, my eldest grandson now 26 years of age has been in and out of jobs since leaving unit at Sheffield, as has my second grandson. They also have moved south an My youngest grandson is the only one still in Worksop (age 22 years). He works part time in Worksop, though he also has travelled to Mansfield. He is hoping to go abroad going for them here" after all having a good education. My 2 sons-in-law both work locally, though they have had to travel long distances in the past neither jobs are safe. Worksop, their overheads are enormous including rates which are ridiculously high. My eldest daughter and her husband moved away years ago. My husband and I moved business many years ago. Am sorry to say Worksop has gone down considerably since we came in the early 1960s.
179		Regarding homes they are enough sprouting up like weeds. We are now surrounded. No bigger than pocket handkerchiefs all crammed together,
179		Regarding gypsy plots that is a definitely a no go area. That is the last thing the planners should be considering.
179	4	If you want to spend the money put aside for the, you should consider spending it on a new bus station. It is years and ears ago was considered and put on hold. Travelling wall, with long faces, shivering in the cold, looking as if they are the next people to be shot.
180	1	I agree to 9 houses being built in Blyth if they are affordable and not more executive homes which we have plenty of. Do not want the floodgates opening to more as infra

180	3	Please look at other sites available in Bassetlaw, in other towns. Blyth only has one shop and a limited bus service. Refurbishing existing boarded up premises ? Do you look
101		or not? With regard to gypsy and traveller plots, please extend existing sites.
181		With respect to Elkesley - No.
181	2	The churchyard and surrounding land is not seen as a community asset;
181		Elkesley does not have a bowling green or tennis court, but this would be desirable.
181	4	The village public house is up for sale, hopefully as a public house but is not guaranteed.
181	5	The village post office is now defunct and is not guaranteed an alternative will be provided. In conclusion, Elkesley's assets have been severely eroded and as such it is beliet to remain being accessed as a Burel Service Centre, especially with the limited public transport convice is considered.
		to remain being assessed as a Rural Service Centre, especially with the limited public transport service is considered.
181	6	Site 247 this open area in the heart of the village should be seen as a paramount asset to the village community. This site, used as a village green, incorporating leisure acti would be well received.
		This site is greenfield, outside the village development envelope, a site with potential heritage and archaeological interest. As such it should be a site protected from develo
181	7	asset.
182	1	Sport England therefore supports the site allocations document, particularly the protection of open spaces and the allocation of new open spaces, which are proposed as p
102	2	Criterion 8 is supported, however, as a statutory consultee with regard to the protection of playing fields Sport England would suggest that the criterion is expanded to incl
182	2	(paragraphs 10 and 15) and the Bassetlaw Open Space Study (2010) and Playing pitch Strategy(2010).
182	3	You will also be aware of the Sport England Playing Field Policy 'A Sporting Future for the Playing Fields of England' which States; "Sport England will oppose the granting of which would lead to the loss of, or would prejudice the use of, all or any part of a playing field, or land last used as a playing field or allocated for use as a playing field in an in the judgement of Sport England, one of the Specific circumstances [Exceptions] applies." E1) A documented assessment of current and future needs has demonstrated to tachment. E2) The proposed development is ancillary to the main use of a site for playing fields. E3) The development affects only land incapable of forming, or forming p to be lost would be replaced by a playing field of equivalent or better quality and of equivalent or greater quantity in a suitable location. E5) The proposed development is would outweigh the harm caused by the loss of a playing field. Reason; Development which would lead to the loss of all or part of a playing field, or which would prejudice because it would permanently reduce the opportunities for participation in sporting activities. Government planning policy and the policies of Sport England have recognise social an economic well-being of the country. This policy will be an important consideration regarding the question raised after each section (e.g. Question 6) which deals v
183	1	Broadly speaking, yes, I agree with the criteria
183	2	It is difficult to predict what growth may happen in Retford so I do not want to comment on numbers of houses required but I do believe that there is insufficient industry is employers, people are forced to travel to other towns for work. I would like to see greater emphasis placed on the industrial or mixed use site. Attracting employers to Ret industrial sites serviced and ready to start building work, no employer is going to take this town seriously. If industry is not catered for and housing is allowed to grow the t central shopping zone will become further weakened. I do however, support the need to direct the main thrust of expanding industrial development in Bassetlaw to the Ha Retford have a little bit too).
183	3	As stated above, my preference would be for mixed use sites like 51/R7 and 259/R3.
183	4	Same answer as question 10.
183	5	As you are asking
183	6	My understanding is that it is national and local planning policy to try to create housing which is accessible for people working in local industry, there is no industry within v has many more sites much closer to the existing (and proposed) industrial locations in Retford. The site is obviously greenbelt it has never had previous industrial or housin would be in conflict with national and local planning policy. This site (and 37, 512, 7, 46, 309, 6, 69) are filling in the greenbelt between the town of Retford and the villages allowed to take place now the reduced gap will become more attractive to developers and in time we will lose more villages as they become absorbed into the town.
183	7	Houses built on this site at the density suggested would certainly overlook properties in both Durham Grove and Palmer Road.
		Durham Grove is inadequate to take any more traffic, the bend in the road is too tight and the visibility round it is very poor, all the residents are aware of this and consequences of the second
183	8	calls on several occasions where people have been travelling round it too fast (but still less than the speed limit) and we have ended up nose to nose.

183	9	This land is used as a paddock for the racehorse stables. During this time I have lived here I have seen rabbits, hares, hedgehogs, foxes, pheasant and deer (muntjac and ro the paddock. My garden is adjacent to this paddock and I have seen many garden birds including redwings and waxwings. I also get frogs, roads and newts in my garden, I baddock. For a managed landscape this is quite a varied ecological habitat. My neighbour rings and records wild birds and uses his garden for trapping species, I'm sure he and. The landscape is at the top of a hill overlooking the villages of Clarborough, Hayton, Clayworth and Gringley.			
183	10	loorgate House is a grade 2 listed farmhouse, the map in Retford library from about the turn of the last century shows a tree lined access track to the house, which passe he setting of the listed building is to be preserved then surely this site forms part of the surroundings in which it is experienced. PPS5 (HE9.1) says substantial harm to or le arden should be wholly exceptional. I agree that the harm to the building could not be said to be substantial and that the grounds around Moorgate House are not classed eritage asset can be avoided it should be). I suspect that the Council had insufficient evidence base to include (or exclude) the land around Moorgate House from its Histo n the Heritage At Risk Register? Should it be? Why changes what is a current valid use? The owner has never tried to sell this land, in fact he has successfully applied for p aning track on the land.			
183	11	e SHLAA for this site talks of using SUDs measures to attenuate storm water flows of the site but the highway drain in Durham Grove is vastly overloaded and the road f as highway authority have asked Bassetlaw DC Engineers (contact Ian Davies) to do something about this flooding but without spending more than NCC can afford (ups ention is made of foul drainage in the SHLAA, I believe that it would be impossible to drain foul sewage from the site without an off site sewer. The properties on Durhar be systems to their rear gardens. Site 533 could not gravitate into these systems and would require a pumping station as these drains are very shallow.			
183	12	Housing built at this site would have a visual impact on the view of Retford from the villages of Clarborough, Hayton, Clayworth and Gringley and the roads and footpaths			
183	13	think it is important that the open spaces in all towns are kept and if possible expanded; the open spaces improve the quality of life for all the towns residents.			
183	14	Iy answer to question 14 should mean that I want all open space to remain open but realise that this is impossible, it would be too great a cost to bear for the local reside rivate ownership should be allowed to be redeveloped unless the Council had compelling reasons to resist the redevelopment.			
183	15	On no account allow the villages to be static, growth is crucial to their survival the whole 10% must be allocated. The type of housing must be affordable for the young peo			
183	16	These sites should be spread around the District to keep them small.			
183	17	I don't know enough about this subject, do transit and residential travellers want to mix? Do residential pitch sites give the travellers who want to settle the means to o			
183	18	I don't know of any			
184	1	We agree that limited development of houses should be accepted within Hayton up to a max of 12 properties.			
184	2	I think that the development of Corner Farm should be allowed up to the max of 19 houses which would include the 12 mentioned in question 45.			
184	3	The following areas should be excluded from the development plan for the following reasons: loss of ecological habitats and landscape, inadequate infrastructure to support			
		generation, access and road safety. Site numbers 161, 160 and 173.			
184	4	Any future development should be centred around existing sites. As it would appear that not all of the current capacity has been taken up, which would suggest that there			
105	1	in this area. I do not believe the town should be allocated more bousing above that what is already required. The proposed figure is manageable and deliverable.			
185	1	I do not believe the town should be allocated more housing above that what is already required. The proposed figure is manageable and deliverable. The sites I would like to be developed are: site 4/w9 option 4, site 39/w10, site 28/w6, site 195/w8 and site 153 and on the main Worksop map sites 35,8,26,371,151,218,			
185	2	the sites are next to existing new build and this gives continuity. Other sites may enhance the area, as the land is derelict.			
185	3	The sites I would like to be developed are: w12,w1,w13,w6,w8. The reason I give is, they are next to existing industrial sites and again, this gives continuity, ease of accessive for future potential employers who can witness big industrial areas.			
185	4	No, other than 39/w10 and 28/w6 for reasons stated above.			
185	5	The sites should be protected and new sites acquired. Retford has Kings Park, Retford is half the size of Worksop. Worksop will grow at a faster rate, it should have a pa would attract people to buy the new houses, which in turn attract large employers.			
185	6	Around existing sites, if possible, as this gives a stable environment.			
185		Provided together, if possible, as this gives maximum benefit for their way of life.			
185		For a sense of balance - Option A.

Responde	-	Answer			
nt	nt				
186	2	proposed housing development takes place in these sites, together with sites 37 and 512, a massive increase in traffic along the access roads of Tiln Lane, Bigsby Road ar			
186		ven if the maximum allocation of housing is not reached, the congestion, delay and potential danger on these roads, and roads linking to them like Park Lane, The Drive a Jality of life for all.			
186	4	An increase in demand and provision for school places locally would put more traffic, both vehicular and pedestrian, on already busy roads at rush hour times.			
186	5	The added and permanent problem of heavy lorry traffic having to be directed along Tiln Lane to avoid the low bridge near Clarborough cannot be disregarded in this analy			
186	6	Clearly the impact during the building process would be very detrimental, even though I accept that this would be temporary. Nevertheless, add that to the long term effe services like drainage, and traffic congestion, and we have a depressing downgrading of the local environment and quality of life.			
186		A theme of recent developments in Retford - and indeed nationally - is the disruption of local drainage systems by concreting over natural permeable land, and the conseq land in sites 7,46 and 309 be a worrying example of this phenomenon, and a danger in planned housing development in these areas?			
186		I understand that residents of The Drive have a covenant restricting development on the field in front of their houses, namely site 46. I am suppressed therefore to find the as one where developers, local landowners or others have promoted its potential development. Does this not clash with those covenants, even if some residents waive the complications and difficulties in progressing the development of this site?			
186		I think a more radical approach to any developments would work better, namely to not tack on new building to the present boundaries of Retford, but go further out. If we are insufficient brownfield sites within Retford, then why not take the opportunity to build where traffic and services would not be congested, and where employment transition highways such as the A1 without moving through Retford.			
186	10	Methodology ok			
186	11	m not convinced about the additional growth planning, in light of the current projected stagnation in growth locally and nationally.			
186	12	m not happy with the 'tacking on' of new developments to Retford, since most would involve pressure on road networks and other services. If these are deemed greenfi ral areas?			
186	13	I support the protection of open spaces shown and I would add more areas to that, especially around the perimeter of Retford.			
186	14	Option A			
186	15	The total number of houses to be planned and built is 577 and the advantages of having those on a limited number of mixed sites (i.e. housing alongside employment) are nfrastructure, less travel and more opportunity for the provision of new schools, surgeries and shops, rather than a piecemeal dotting around and using and overloading e			
186	16	The best locations for such focused sites would be in the southwest and northwest of Retford (sites 259, R2, 51, R7) and some/all of sites 364 and 41. I think they could ac ndustry.			
186		They would allow access to the major trunk roads around the town, especially the A1, without work time traffic clogging up Retford's roads.			
186	18	By contrast, building on the current greenfield sites to the northwest of Retford, sites 46, 309, 7, 6, 533, would present a number of problems that I think make them very			
186	19	Traffic in this area, to work, schools and shops, would massively increase the pressure at key times along key feeder roads on to Tiln Lane and Moorgate, with congestion,			
186	20	The fields in this area are not that well drained - indeed one field in sites 46/309 is still called Pond Field. Concreting and building on them would present and increased flo			
186	21	Residents of The Drive have covenants on the field in front of their houses - part of sites 46/309 - preventing building. Your map showing these sites as having the agreeme seem to be contradicted by these covenants.			
187	1	Flooding in 2007 was the main problem around our area Cavendish Road, bottom of Grove Coach Road, St Helens Road, also others areas flooding were, Trent Street, Blac			
187	2	High water levels on the 20th January 2008 (please see enclosed photo's) These photos were taken from our upstairs window which shows flooding of the field at the bott proposed plan as number 370.			
187	3	Bracken Lane schools near capacity and their playing field is flooded many times a year.			
187		Also with hundreds of vehicles using the estate roads, problems would occur entering London Road, even more so at school times with the extra school traffic.			
188	1 1	We the undersigned residents of Brixworth Way wish to register our strongest objections to the possible development of the land area marked No69 on the Core Strategy Council.			
188	2	This plot is the area between (1) Raised Railway Line. (2) Leverton Road. (3) Chesterfield Canal. (4) Welham Road.			
188	3	This land is very low lying and after any rain visually waterlogged, it provides a natural habitat for the many animals and birds of which there is an abundance, i.e. Protecte Kingfishers Sparrow hawks, Curlews, Kestrels, and many other smaller birds. In addition there are the Protected Water Voles. As well as Bats and countless numbers of smaller birds of

191		prownfield sites should be developed for housing before developing the edge of town and beyond the borough boundary				
191	9	y poor drainage systems in place now (very bad problems during the floods of 2007). Extra housing will not improve the system, only make it worse.				
191	10	Highway safety. One child already lost outside Carr Hill School.				
191	11	Extra traffic congestion during and after the development				
191		Countryside and trees lost, loss of privacy				
191	13	I wish to object to the above proposals for plans to develop 231 houses on the north side of Badgers Chase, Retford				
191	14	The existing Highway Infrastructure will not be able to cope with the increased traffic. HGV's have to use this route to avoid the low bridge at Welham. Their numbers are i				
		congestion along Tiln Lane at school time, leading to safety issues for road users and school children.				
191		Good agricultural land will be lost if these sites are used. Brownfield sites should be used before agricultural land is developed.				
191	16	The character of this part of Retford will be changed, for the worse, by the proposed development.				
192	1	I am writing to raise my objections to the e-designation of the land north of Retford specifically plots 533, 7, 46 and 309 on your consultation paper.				
192	2	To allow this land to be re-designated is criminal when Retford already has an abundance of new builds not selling and a great deal of land already designated for building				
192	3	Any development of this land would totally alter the character of the existing area and impact badly on local wildlife				
192	4	The access to these proposed development areas is not suitable for any extra housing let alone the numbers been considered. Tiln Lane in particular is already much too h				
172	-	and HGVs using it constantly. To consider allowing even more vehicles such development would mean is ludicrous.				
192	5	The land parcel 533 is of particular interest to myself and I can see no sensible way of giving access to this if building was planned as Durham Grove is far from suitable for				
172	5	this is the proposed access.				
192	6	Also to allow building of houses would be totally out of keeping with any properties currently on Durham Grove or Palmer Road.				
192	7	Also I note the proposals involve building outside the borough boundary and existing development envelope and I can see no reason for this given land is still available wit				
		It is with great concern that we note the considered planning and building areas in Ordsall particularly the areas off Southgate, High Street, and the Meadowlands develop				
193		town are some of the rare agricultural land that can be enjoyed by the general public with the footpaths giving those who appreciate stunning views and access to wildlife				
		and toads and partridges.				
193	2	This area over recent years has seen a large number of new developments without the benefit of employment, improvement to roads. local amenities, services such as Po				
	2	to what a larger number of vehicles and wheelie bins can do to an area that is already stretched to capacity.				
		The other aspect of the proposed building is that this area suffers from a large amount of anti-social behaviour particularity from the 10 plus age bracket with these young				
193		around the streets abusing property both public and private declaring that they are minors and then disappearing into the rat run of alleyways and thorough fares that are				
		private and social housing.				
	4	The fields should be used for the production of food or green fuel not more houses that are going to create social problems that the area will never recover from. The Retf

193	7	This town has already wasted 1.5 million pounds on the revamping of the market square which if it was going to be of any value to the town should have been free short to of town allowing access to all areas. The market should be integrated with the shopping areas giving a complete shopping experience which was enjoyed when the work to incentives for smaller retail outlets to survive offering a different shopping experience from a High Street that is filled with more of the same. The greater good of areas like profit of a few without thought or consequence of the social requirements needed for these areas to survive and to work in a harmonious manner. A further thought woul inside one of the larger empty retail outlets allowing potential new small businesses a chance to start up as a new enterprise.			
193	8				
193	9	rder to get from these sites into Retford Town Centre residents are likely avel along High Street (which is predominantly single width due to existing treet parking) and then turn onto Goosemoor Lane. The bridge on semoor Lane is narrow and has poor pedestrian facilities. This bridge is suitable to accommodate a significant number of additional vehicles (or estrians) generated by additional housing sites. Additionally, due to the ow width of the bridge, vehicles passing in opposite directions often have op as there is insufficient room to pass. Additional housing would lead to tional congestion on and near to the bridge.			
193	10	e development of these sites is likely to result in additional traffic movements through Eaton village (to get to the A638). This village has a single width bridge, limited pe rough the village is inappropriate for significantly increased traffic flows			
193	11 1	ccess to the north (onto the A620) is along West Hill Road I Ordsall Road and passes Ordsall Primary School. At the beginning and end of the school day a significant amou ngle-file traffic on West Hill Road. Additional housing would lead to greater congestion at peak times.			
193	12 1	Access from the proposal sites to the south (to the A 1) is along a winding rural road which does not get gritted by Nottinghamshire County Council. For the reasons stated not suitable for significantly more cars associated with large-scale residential development, or large commercial vehicles associated with mixed uses			
193		etford currently has a reputation as a small market town and this attracts visitors to the area. The principal route into the town from the south is along London Road (the sible from London Road as they are elevated. New housing development on these sites will detrimentally affect the character of this side of Retford (especially from London Road) into the open countryside			
193	14	The proposed sites are the home to a wide selection of wildlife -including some endangered species. The list includes: Skylarks -breed, feed and live on the sites. NB The skylark population has decreased by approximately 50%. The RSPB are very interested in these sites. Lapwings. Finches. Tits. Barn Owl (flight path) Bats -the Bat Conservation Society are very interested in this habitat. Foxes. Hawks. Kestrels. Heron. Stork (occasional visitor). Hedgehogs. Hundreds of bees. + a wide selection of butterflies, insects and other birds.			
193		The sites are well used by walkers, runners, children and young people playing, dog walkers, the elderly, triathletes etc. Additionally, people visit from outside the area to e designated public footpaths across the sites.			
193	16	For the reasons stated above, it is considered that the proposal sites located to the south of Ordsall are unsuitable for large-scale housing or mixed use development and the are located elsewhere in Retford.			
194		I don't believe Retford will have the infrastructure -in particular employment opportunity and schooling -to support the amount of housing development already identified increase should be made.			
194	2	It makes more sense to me that potential sites nearest the town's centre are prioritised for development; namely sites 10, 70, 71 & 342. Following these locations, 488, 48 access to the town centre than the sites further afield.

200	3	Therefore, assuming the government and local councils are serious about these issues as compared to the demands of 'big business', any new development should give pr		
		With this in mind it should be obvious that the Ordsall and Welham areas are the WORST places for such building since the roads, (Ordsall High Street and 5 Arches Bridge,		
200	4	Road, Welham Road, Tiln Lane etc. simply cannot cope with more traffic. Further, any road development would be extremely difficult and costly. They are already dangers		
200	-	senior citizens bungalows, churches and care homes. This apart from the obvious increased environmental pollution.		
200	5	The two districts where major roads already exist and infrastructure (g development would be easiest is on the North Road and the Grove Road areas where there is easier		
200	6	Yes, new business and employment is important for Retford but that will not be made easier by destroying the nature of the town and district. by 'crowding out' and event		
200	Ŭ	attractive to prospective residents and business.		
200	7	Finally, who are going to buy these houses? Very little affordable housing for first time buyers has been built in the last few years.		
200	8	What about all the empty sites and 'brown' sites in the town??		
200	9	The current Southern Boundary to Retford is well defined and provides a consistent and appealing entrance to the town and this would be lost by these developments.		
200	10	It is important to maintain a distinctive boundary between the urban area and the open agricultural land and the current town limit doers precisely that.		
200	11	There will be a significant loss of amenity		
200	12	The local infrastructure will not cope with and occupants of the new housing would have to drive a significant distance for shops, schools, doctors and other facilities.		
200	13	There are more appropriate areas of land within the existing Retford town boundaries for housing.		
200	14	I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.		
201	1	I have been resident at the above address for several years and feel I must write to demonstrate my opposition to the planned development of good agricultural land as or

203	4	Our main objection to the site of both proposed developments is that they have extremely poor road access. The old Gainsborough road, which is currently being used by vehicles, is really only of a sufficient standard to cope with existing traffic. Even with one car families. These new developments would generate over 1000 extra vehicles g per household, the generation of traffic down Tiln Lane in the peak hours of the day will Visibly lead to the need to install traffic lights at the brow of the hill of the A 620, we suggested traffic will be disabled from entering into the main road and there is the potential for serious accidents on the hill where the sight line is not particularly good ar site vehicles, the installation of a traffic light at this point prior to building will be essential.			
203	5	In Lane also has a Primary school upon it. This faces directly onto the road and many parents stop in the vicinity. A zebra crossing and beacon light will be needed to enab bad in safety to the large number of homes on the other side, when traffic flow increases.			
203	6	Tiln Lane has no direct access into Botham Lane, which would give another exit onto the A 620. It is highly unlikely that people will use the exit onto the A620, because the are very bad and there is no sweep of the bend to enable traffic to merge into fast moving traffic on this main road			
203	7	There is every likelihood that the occupants of the 900 houses north of Durham Grove would try to access Tiln Lane by using Bigsby Road. The occupants of all side roads o entering into Bigsby Road in order to reach Tiln Lane, unless there is traffic calming on Bigsby Road and stop signs upon it to enable those in side roads to have the right of			
203	8	th the building of such a big estate, conditions should be placed upon any developers. It is suggested that there should be within the heart of the 900 estate a small shop portunities. This would help to reduce traffic from the estate for short journeys to access a supermarket for, say, bread and milk. Also in this area, there should be provid d glass, because the town disposal area is a considerable way from the proposed site. It should also be a condition that a playground for the younger children and an adv ele track, should be provided for late juniors and early teens. This area could also do with a meeting room for family events and for older people and mothers with toddle ufficient finance to enable these road access considerations and general considerations to be dealt with within the planning process, the proposals should not go ahead.			
204		I am alarmed to hear that there is a proposal to identify land in the Tiln Lane area north of Badgers Chase, Durham Grove, Palmer Road, Bigsby Road and Park Lane as potential sites that could be allocated for future housing developments. I refer to site allocation numbers 46,309,7, 533,6,512,37, and 69			
204	2	I fail to see the sense in spoiling the beautiful countryside in this area and using up agricultural land, especially when there are large areas of land within the boundary of Retford such as the old school sites that can be developed.			
204	3	At the moment the area is a pleasant and relatively peaceful place in which to live. I fear that a development of this size will destroy the quality of life currently enjoyed by			
204	4	Tiln Lane is quite a narrow road and I think that the increased volume of traffic would cause considerable congestion and be a hazard to pedestrians, particularly to childre			
204	5	Furthermore most people, who commute to work from Retford, will exit the town from the other side to access the large towns and cities where work can be obtained (Sr etc.). So situating a development in the Tiln Lane area would cause congestion in the centre of Retford which is already a nightmare at rush-hour times.			
205	1	Site 256 poses great access problem: top of Limes Avenue being on bends and narrow. Thee is already traffic flow problems along Portland Terrace and planned infill on ol all over the border in Bolsover DC, still a problem for Nether Langwith residents			
205		Still 252 would seem least objectionable if there has to be new housing. The historic Fairfield should be left green			
205	3	Open spaces identified should be protected			
205		Nether Langwith is a well balanced community and should be left so			
206 206	1 2	Option A Yes			
206	2	Any of the sites but only allowing 2 or 3 houses per site because of the access problems.			
206	4	Will potential residents want to move into a village with a threat of a proposed wind farm development			
207	1	I'm writing to object to the proposed new developments in the above areas over the next few years. We moved to Bigsby Road 10 years ago because it was a tranquil area where we walk our dogs daily. If the new development proposals get approval it will alter the character of the area turning the country side around our property into anoth			
207	2	The developments will increase traffic congestion and increase danger to road users and pedestrians. 600 new houses will increase daily traffic movement by 2400 times p and the current road infrastructure is unsuitable for this increase in traffic movement.

207		Why can't exist brown field sites be developed for housing before extending into green field sites which are at the edge of town and beyond the borough boundary			
207	4	The areas are currently good agricultural land that will be lost with these developments.			
207	5	I object strongly to these new development proposals and urge you our council who should be working on behalf on the community to reconsider these proposals			
208	1	We write to you regarding the above reference. We feel we must strongly object to such a drastic redevelopment of the area in which we live for the following reasons.			
		My wife and I have been residents and local business owners over the last 23 years, although i was born and raised here. We recently purchased our property in Durham G			
208	2	of its privacy and peaceful outlook something to look forward to in our retirement.			
208	3	We would have expected to have been consulted as residents prior to the production of the proposal something that never happened			
208	4	development on this scale would completely alter the character and charm of the area taking it from a peaceful and pleasant place to live to nothing less than congested			
208	5	ir current road infrastructure could not cope with the level of traffic that this development would add. Tiln Lane is already a busy road with it being a route for articulated uated there. Traffic is in my opinion currently an issue with vehicles speeding up and down the road at busy peak times causing danger to school children and pedestrians thing but danger congestion and strain on the surrounding roads as well as them being used as returns and cut-thought's.			
208	6	This would also involve building outside of the existing development envelope as well as outside the borough boundary causing a loss of good agricultural land. It can only s developed for housing first before a development of this nature and scale be even considered.			
208		addition to this it would impact on our community, neighbours and friends causing the loss natural light into our properties, most of us would be overshadowed. Excess r e extra traffic up and down the roads, it would be like living in the middle of the busy town centre. Adding to these trees would be cut down and lost and this can never b			
208	8	I hope our objections are taken very seriously as we feel no good can come from the proposed development			
209	1	Yes			
209	2	Option A, Spread between Worksop; Retford and Harworth Bircotes			
209	3	Yes, I agree that at least 14 new homes should be built, but would support more if we could have some more village facilities.			
209	4	Site 228 would be the best site for housing			
209	5	The village would like some tennis courts and a bowling green			
209		The New Play area on site 230 should be protected			
210		Spread between Worksop; Retford and Harworth Bircotes			
210		Hayton and Clarborough are capable of absorbing 12 more houses			
210		No, the comment in Q45 is with an acceptance that some development is likely to go ahead at Corner Farm			
210		Site 544 and 545 if Hayton is selected for development			
210		No			
210	6	I am strongly in favour of the open space designated in Hayton being retained as such			
210	7	Such sites should be concentrated around existing sites. Presumably providing new/additional facilities on existing sites will be more cost effective than a new site development of the second s			
		associated with these sites should not be spread further than necessary.			
211		Option A: Spread between Worksop; Retford and Harworth Bircotes?.			
211		No further development in Sutton is required. This should be allocated to the towns rather than the villages.			
211		None No further development is wanted in Sutton			
211	4 5	Yes, No further development is wanted in Sutton Yes, No further development is wanted in Sutton			
211 211	-	We already have a half empty site at Daneshill			
211		REMOVED			
211	/ 1	Yes			
212	-	Option A. Spread between Worksop; Retford and Harworth Bircotes			
212	3	Yes, I agree. However, I think there should be more than 14 over an 18 period. I think up to 30 new homes would not harm the village character.			
212	-	294 and 468

218	2	ption A: Spread between Worksop; Retford and Harworth Bircotes?			
218	3	Yes, i would not object to more.			
218	4	164 and 165.			
218	5	Flooding and drainage issues along main street.			
218	6	Yes, these should be protected			
219	1	We would like to voice our objections about the proposed plans to join both ends of Broad gores approximately 90 homes on the land in-between. The sewers struggle tre We have to use drain rods every month just to keep things flowing smoothly. This obviously shows the sewers are not large enough to cope. e local school is full at presen			
219	2	The school itself is in a poor position in the village and the parking is very difficult and also troublesome for the residents of hill view crescent. More houses more children			
219	3	The village has had traffic problems for many years and with the increase in housing, no local amenities and no space ~in the local school will in turn increase the traffic a			
219	4	The proposed building plan itself would create a high volume of lorries and machinery and if the two ends of broadgores were to be joined together this would turn a quie			
219	5	At present children on the cul-de-sac are safe to ride their bikes and play with their friends without the fear of getting run over!			
219	6	Also the noise pollution this would create is a major concern. I am not the only resident who works shifts, and if the proposed plans were passed this would have a major i			
219	7	In winter the roads around the village are not gritted. The main A620 was gritted but this left Big Lane barely usable for about 4 weeks in 2010. I dread to think what more going to do, as most of the houses in Big Lane do not have large front gardens, if a lorry was to slide where do you think it would end up			
219	8	The bus service is poor, we have no shop, post office, medical facilities, so again a car would be necessary for most families to access these facilities in Retford. Older child the Comprehensive schools in Retford, this will increase the passenger numbers on these buses which are already congested due to the limited services already in place!			
219	9	When we bought our house and moved to a quiet village we paid more for that privilege and by allowing the proposed building plans to go through I know for a fact it will everyone else on Broadgores, so I do not believe that the proposals has been thought through thoroughly enough or other locations looked at in detail.			
219	10	I hope and pray that Bassetlaw District Council look more closely at the effects that this will have on the community of Clarborough and listen to what we have to say. We beautiful village just to line the pockets of some greedy building contractor! After living in this area for over 30 years I KNOW there are lots of areas which would be more Implore you to rethink your plans.			
220	1	I have seen the plan published by the Trader & Guardian on 17th November and would like to comment on the areas marked as Potential Housing that border Bracken Lai links Five Fields Lane with Grove Road			
220	2	At least some of these sites have been the subject of planning applications in recent years and all have been rejected, as far as I am aware, because of the increased risk of flooding at these and neighbouring sites, including Grove Lane in particular.			
220	3	During the floods of July 2007, I think it was, the drainage channel that runs under Bracken Lane beside NO.50 was feeding water onto the road through the pipe that runs from the gutter outside No. 48. The water level was only about an inch below the front doors. The level was only prevented from rising by the water flowing onto, and flooding, the fields bordering Bracken Lane.			
220	4	In conclusion, I feel that any development that increases the rate at which rain water enters the (natural) drainage channel from the east of Grove Road, under Grove Coa to be strongly opposed.

Responde	1	Answer
nt	nt	
221		Our Client has some concerns in relation to the Site Assessment Criteria that is to be used in identifying sites for the preferred options stage under Stage Two of the Si the Allocations Screening Methodology Section. The first of these concerns relates to Criterion 1, which asks whether or the local community is supportive of the development of the site. Council's economic objectives. This criterion appears to suggest that the development of any site for housing would not lead to the delivery of economic development opportunities. Whilst our Client agrees that housing in itself is not defined as 'economic development' under Planning Policy Statement 4: 'Planning for Sustainable Economic Growth' (PPS4), it should be recognised that housing is often needed to support the delivery of economic development elsewhere.
221	3	Our Client disagrees with the scoring outcomes in relation to Groundwater Source Protection Zones (SPZs) - Paragraph 2.35 of the SAIO states that: "It is important to note that housing and employment development do not present equal potential for pollution of ground water, as housing is not generally considered by the Environment Agency as a polluting activity, whereas some employment uses present a higher risk. To reflect this, the proposed use of a site will also inform how it is assessed against this criterion," Whilst this paragraph recognises that housing is not viewed as a polluting activity and that the proposed use of a site will be taken into consideration in the scoring of a site under this criterion, the grades shown do not reflect this and merely seek to score sites depending on the SPZ they fall within. Our Client recommends that the grading system is altered to recognise the type of development proposed as follows:
221	4	Our Client notes that this criterion draws heavily on the Bassetlaw Landscape Character Assessment (BLCA) of August 2009. It is considered that the scoring system is too the BLCA. The scoring system is based on which Landscape Character Zone (LCZ) sites fall within, with sites in a 'create' LCZ scoring 'green', those in a 'restore or reinforce LCZ scoring 'red'. Our Client notes that there are many more LCZs defined in the BLCA. How does the Council propose to deal with sites that are within the 'conserve and 2.12 In addition, the scoring system does not take account of the capacity of sites to accommodate development, taking into account such factors as tree cover and topo determine the score in relation to this criterion than blind reliance on the BLCA. Furthermore, the BLCA notes that in the 'conserve' LCZ for example, landscape actions sh distinctive features and features in good condition" but does not specifically prevent development from occurring in these areas. Our Client considers that factors such as the scoring of sites in relation to this criterion.
221	5	577 dwellings. Our Client believes that the residual requirement for Retford is higher than the is as the number of deliverable dwellings from sites with planning permission three sites with planning permission the council's supply of housing in Retford. These applications are as detailed in Table 2.1 below
221	6	Our Client also notes that sites 65 and 66 lie within Flood Zone 2. Given the need to direct development towards areas of the lowest flood risk (i.e. Flood Zone 1 sites) un Statement 25: Development and Flood Risk (PPS25), it is questionable whether these sites could be brought forward in the short term and therefore be classed as deliver (see Section 3.0 of this Report for details).
221	7	Our Client notes that there is an allocated site included within the Council's deliverable supply of housing (Ref: 77) for 226 dwellings. This site was also referred to as Site note that an outline application has now been submitted which is currently being determined. The description refers to "up to 226 dwellings", however the planning supply of housing. This means there is a potential shortfall of at least 48 dwellings.
221	8	Taking the above into account, the total deliverable housing supply for Retford should be reduced by 147 dwellings (99 from the lapsed/refused permissions and 48 from believes that the residual housing requirement for Retford should be 724 dwellings in total (577 plus 147 reduction in existing supply).
221	9	Whilst our Client is happy with the overall level of housing proposed to be accommodated in Retford, there are concerns in relation to the calculation of the residual hou 2.13 to 2.17 inclusive above), such that there is a need to identify more land for housing through the Site Allocations DPD than is currently being proposed

221	10	This Site is detached from the settlement of Retford and would thus rely on Site 52 to be developed first in order to avoid sporadic development in the countryside (please paragraphs 3,16 to 3,17 below), In addition, Site 1 is reliant on Site 52 as access is problematic from Ollerton Road, such that access would need to be either through Site 5 works delivered through a S278 Agreement.
221	11	Given the size of Sites 1, 40 and 52, the proposed timescales for their development as set out in the SHLAA and the current state of the market, our Client considers that it within the plan period, Therefore at present, Site 1 cannot be considered to be deliverable under the tests set out at paragraph 54 of PPS3 as it is not suitable nor available
221	12	4 Notwithstanding the above, we note that there are a number of constraints associated with the site that have the potential to affect the dwelling capacity of the site, Th Flood Zones 2 and 3 in the east of the site; An area of archaeological interest in the central third of the site; and The need to provide appropriate infrastructure (roads and public open space) as part of any development.
221	13	It is noted that the nature and extent of the area of archaeological interest has not been defined in the SHLAA, Whilst public open space could be provided in this area, ou adequate account of the flood risk areas or the quantum of roads that would be required to access what is a large site, Given these constraints, we would suggest that app developable (6,79ha), which would yield approximately 204 dwellings, rather than the 233 suggested in the SHLAA, 3,6 For the reasons set out above, our Client does not believe that Site 1 is suitable for housing development at the present time and should not therefore be pursued as a DPD, Site 3 -London Road
221	14	Our Client believes that Site 3 is not suitable for development due to the access constraints associated with it. The SHLAA rightly notes that visibility is problematic due to the level change from the road to the site could pose problems in achieving the requisite visibility splays
221	15	The SHLAA also notes that "a number of access points suggest good phasing opportunities through a consortium of builders when the market picks up': It is not clear what however we note that the only other potential access would be from Grove Coach Road, through Site 370 (please refer to our comments on Site 370 below), Grove Coach to support housing development of any scale at present. Furthermore, our Client notes that a 'consortium of builders' that could overcome these issues is by no means gu
221	16	The SHLAA also notes that "a number of access points suggest good phasing opportunities through a consortium of builders when the market picks up': It is not clear what however we note that the only other potential access would be from Grove Coach Road, through Site 370 (please refer to our comments on Site 370 below), Grove Coach to support housing development of any scale at present. Furthermore, our Client notes that a 'consortium of builders' that could overcome these issues is by no means gu
221	17	the west of the site. Has any provision been made for their relocation? Furthermore, the loss of the nurseries would result in a loss of jobs in this part of Retford
221	18	The site is also within a Conservation Area, which would restrict the capacity of the site in any event, due to the need to retain trees and preserve views to Grove Park thro therefore believes that a capacity of 267 dwellings (based on 30 dwellings per hectare) is too high and suggests that approximately 178 dwellings (based on 20 dwellings p would be more appropriate, should the site be allocated for development. Notwithstanding our comments on capacity above, our Client believes that the access constrain should not be allocated for housing development through the Site Allocations DPD. Site 40 -Southfield
221	19	Site 40 is also reliant on the development of Site 52 for access, such that it would be developed after that site, if it were to be allocated. The site also falls partly within Flo provide internal roads and public open space, such that site capacity is affected. It is noted that the SHLAA bases the site capacity on 90% of the gross site area. However, a area is more appropriate, given the constraints noted above. On this basis, we believe that a site capacity of 119 dwellings is more realistic than 143.
221	20	In addition, our Client disagrees that the Site could be completed within 3 years of its allocation. Due to the access constraint, it is unlikely that this site will be developed I developable in 6-10 years. Furthermore, there are lead-in times to consider in obtaining planning permission and discharging conditions, which for a large site such as this work commences on site. Therefore it is unlikely that houses will begin to be delivered on this site before 10 years after the adoption of the Site Allocations DPD, should t

nt	nt	
221	21	This site is subject to significant constraints that will affect the potential capacity of the site: namely an area of archaeological interest in the north western corner and hig only will the power lines affect capacity, they are also likely to impact upon the viability of developing the site due to the costs associated with relocating the llkV and 33k
221	22	As a result, our Client believes that the suggested capacity of 166 dwellings, based upon 80% net developable area is too high when taking all requirements; including clea layout and public open space into account. Our Client suggests that 70% net developable area is more realistic, which yields a dwelling capacity of 145 dwellings based on
221	23	This site is considered to be suitable for development in the SHLAA. Whilst our Client would tend to agree with the principle of development here, it is also noted that this and 40 as explained above. Our Client notes that access is proposed to be taken from Lansdown Drive, which has stubs at its eastern end to allow for access into Site 52. V development of Site 52, our Clients doubt that Lansdown Drive (a residential street) is capable of serving Sites 1 and 40 as well. It is therefore maintained that Sites 1 and in the Site Allocations DPD.
221	24	In addition, our Client believes that the site capacity in marginally too high, being based upon a net developable area of 80%. 75% net developable area is a more widely u large sites such as this, such that the site capacity is more likely to be approximately 222 dwellings, should it be considered appropriate to allocate this site.
221	25	It is noted that a significant proportion of this site falls into Flood Zone 2, such that a sequential test would be required to demonstrate that it is sequentially preferable. O preferable sites available that are capable of accommodating Retford's housing requirement (including their site at Tiln Lane -Site 37), such that this site should not be allo
221	26	Our Client also notes that access to the site would need to be taken from Welham Road (the A620) where highways improvements may be required to accommodate the with highways improvements on a busy road, such as Welham Road, could be prohibitive to development
221	27	Even if the site were to be allocated for development, our Client suggests that the flood risk issue will limit capacity of the site to around 75% of the gross site area, such t approximately 95 dwellings (30 dwellings per hectare on 3.17ha).
221	28	21 This site is significantly constrained by the proposed access from Grove Coach Road, which is narrow and therefore unsuitable as a means of access to Site 370. Conside Grove Coach Road in order to bring it up to an acceptable standard and this is likely to be costly.
221	29	The development of this site is required in order to facilitate the development of Site 3, which would significantly add to the need to improve Grove Coach Road. Our Clier Coach Road could be improved to enable Site 3 to be developed such that we maintain that Site 3 should not be allocated through the Site Allocations DPD
221	30	The development of this site is also constrained by access considerations. The SHLAA notes that improvements would be needed to Bracken Way to enable development or narrow, with development on just one side at present to the west of the site
221	31	There is also a bridge over a brook in the north-western corner, which could prove difficult to widen to allow development here, given the location of existing properties. Grove Coach Road, but this too is constrained as noted in relation to Sites 3 and 370 above.
221	32	Our Client's land at Tiln Lane, Retford is identified as Site 37 in the SAIO. The maximum potential capacity listed for this site on Figure 5.1 of the SAIO is 154 dwellings. You Masterplan Report (June 2011) has already been submitted to the Council to demonstrate the development potential of this site. This Report, which showed a reduced sit Site under Site 37, demonstrated a site capacity of approximately 200 dwellings. Our Client considers therefore that Site 37 could accommodate more than 200 dwellings. off' development in this area could also be allocated as a future phase of housing development, thereby increasing the dwelling capacity further. 4.3 The remainder of this assessment of the sustainability and delivery of Site 37. The site is located approximately 1 mile to the north of Retford town centre and is therefore within walking distant In addition, the site is located in close proximity to an existing bus route, with stops within easy walking distance. Retford also has a key railway station on the east coast r Edinburgh, Hull, Leeds and Sheffield, making Retford a desirable commuter town
221	33	The site is located approximately 1 mile to the north of Retford town centre and is therefore within walking distance (20 minutes) of the facilities located there. In addition existing bus route, with stops within easy walking distance. Retford also has a key railway station on the east coast mainline, providing services to London, Edinburgh, Hull desirable commuter town.
221	34	The site is also within easy access of a number of schools with capacity as well as a number of doctor's surgeries and dental practices. There are also a range of employme centre and other locations.
221	35	There are few constraints associated with the site, being largely flat and having no landscape features of intrinsic value within it (with the exception of boundary vegetation
221	36	The site is classified as Grade 3 agricultural land on the Agricultural Land Classification maps. It is noted that the majority of land adjoining the urban area of Retford is eith that there are not any other sites of lower agricultural value than this site.

223	2	I think location 35 is unsuitable as this is some of the only 'natural' open space remaining in Gateford. In addition, the existing housing developments at Gateford are alrea and local amenities.
223	3	Site location 4/W9 is an area of Worksop that I believe would benefit greater from redevelopment, as the mixed use capability of this site offers greater potential to creat residents.
223	4	W4/9
223	5	Option 3 - greater bias towards employment land
223	6	Yes - although I am not sure exactly what criteria you use to determine which open space should be protected. Sites 35, 28 and W6 for instance are some of the only rema housing developer at the request of the council) areas of land surrounding the already vast Gateford estates, which are regularly used (more so than the potential protect protect this farmland and develop the areas of Worksop that are in need of development, so that residents can continue to enjoy some of the natural beauty of the area?
223	7	Option A
223	8	I am writing to express my concern over planned use of site 35 for additional housing. Firstly, in my view, planned to build further housing in the Worksop area in light of defy logic. The housing market in Worksop has stagnated in the past few years, with supply (particularly of 3,4 & 5 bedroom houses in the Gateford area following the excert Ladywalk/Kingfisher Walk areas) far outstripping demand. Further development of the area (i.e. through the development of site 35) would exaggerate this problem more house prices for existing residents
223	9	The only possible reason that I can think of for even contemplating further housing development in this area at the current time is to raise additional revenue for the Cour Government imposed cutbacks/austerity measures.
223		In my view, Worksop and the surrounding areas would benefit more at the present time from the development of 'brown field' sites i.e. sites that are in need of developm needed jobs for existing residents. Further housing development would merely continue to swell the local population and push the local infrastructure, which is already at capacity, to breaking point.
223	11	In addition, given the number of sites in Worksop and the surrounding areas that are in need of development, why choose to build additional housing on some of the only land needs to be protected, more so that The odd areas of grass left behind by housing developers, such that some of the natural beauty of the area will remain for future regularly use the bridleway along the side of site 35 for recreational purposes.
223	1 1 1	Further housing development in this area would also increase the level of traffic, making the already busy roads even busier (the junction from Ashes Park Avenue onto Ga increasing noise, pollution levels and endangering the safety of children pedestrians and cyclists
223	13	Only in the past few years have I have noticed wildlife start to return to the Ashes Park area, following a huge expanse of farmland being decimated by housing developme with its proximity to Owday Woods, and being some of the only remaining natural agricultural land in Gateford, being developed into housing and having the same detrime I trust you will factor my concerns into your development plans.
223	14	It has been brought to my attention that the farmland immediately to the East of the bridleway edging site 35 was approved by the Bassetlaw planning committee in 2009 conservation area'). The map showing site 35 in the consultation document appears to include land that encroaches on to this conservation area. Whilst this may not in its site 35 that do not fall within the conservation area, it must be noted that any development on site 35, particularly towards the eastern side of the site immediately adjace have a detrimental effect on the protected land and local wildlife.
224	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
224	2	Disagree, I believe UP TO 6 homes should be built are the residents wishes.
224	3	The sites to be considered for development are sites 105,203,497.
224	4	Sites numbered 101,107,& 496 should not be considered because of their close proximity to busy highways and the adverse effect traffic noise would have on the quality of
224	5	The planning permission should not be protected. If a public house is to be built it should be located near to sites 6/4 & 6/7as previously applied for by the parish council.
224		Site 106 should not be considered for development. It is outside the envelope of the village.
224	7	It is a significant open space abutting the settlement used for agricultural purposes.
224	8	There is at least one underground fuel-oil pipeline of strategic importance crossing this site. I believe that it serves a number of military establishments and I am not sure i vested interest in the pipeline are included in the planning process. You will know the answer to that, and I trust you will look into it.

224	0	Have the Environmental Agency conducted a "water cycle study"? The number of houses completed in the recent past coupled with the number of houses under construction
224	9	have been given suggests that such a survey should be carried out.
224	10	REFERENCE Q35. I suggest that ALL BROWN FIELD SITES ARE DEVELOPED BEFORE ANY GREENFIELD SITES ARE CONSIDERED.
224	11	All open spaces should be protected.
224	12	Yes I do, for the following reasons. Presumably these sites were chosen because they offered the best opportunity for the residents to follow their chosen way of life. The
		expansion of these facilities.
224	14	These should be provided together. The cultural needs of the travelling people occupying the transit pitches are more likely to be understood by the occupants of the adjoint of the adjoi
		the rest of society. This will reduce the potential for conflict and unrest within the general community.
224		I know of no suitable land.
225		No comments
225		Option A: Spread between Worksop; Retford and Harworth Bircotes?
225	2	No - There is sufficient out line planning permission already granted for additional housing development within the village. Also there doesn't seem to be a demonstrable d
225		put a extra strain on utilities/services (i.e. schools, parking, water, elec)
225 225	4 5	No - view is as above for question 66.
225	5	Preference is none of the sites. If there is a genuine need for housing then this should be infill areas (453,296) I believe that site 491 has now been removed from the allocated list. If this is so can this be confirmed? If not we would oppose this site being developed as it is a green be
225	6	(bats, barn owls etc).
225	7	yes - they should be protected.
225	8	In existing sites if there is a need. There is already spare capacity on existing sites, these should be used.
225	9	As per current arrangements.
226	1	No
226	2	I believe location 35 is unsuitable as an area for new housing.
226	3	Option A
		I would like to express my objection against the potential development of up to 700 new houses on the fields to the side of Gateford Hill Nursing Home, site 35 in the docu
226	4	Shireoaks (618 houses) being added to the estate. The affects to an already large estate would be: significantly increased traffic jams exiting & entering the estate
226		many more cars causing danger to our children
226		strain on schools & services
226		worse traffic jams at local shops
226		ruined views & privacy for many homeowners
226		construction road damage & years of mess
226		destruction of versatile and currently farmed agricultural land
226 226		destruction of beautiful countryside detrimental effects on Owday & Whipman woods, Owday Plantation (site of importance for Nature Conservation)
226		lost bridleway/footpath hedgerows
226		lost beautiful land frequented by many walkers daily
226		increased pollution
		I do not agree with Criteria 4, allowing housing to be built on agricultural land. Nor do I agree that grade 3 should be built on no matter if it is grade 3a or 3b. Only grade 4 a
226	16	absolute outside, and as per my first statement I do not think any agricultural land should be built on.
226		No
226		I strongly believe site 35 is unsuitable for development.
226		Yes
227	1	Yes
227	2	Option A
227	3	Land should be allocated in Elkesley for 11 new houses, but no more than 11 new houses.
227	4	Yes 33 new houses in the village will change the rural nature here, the reason for moving into Elkesley for many is the Rural nature of this village.

227	6	Mains Gas is not available in Elkesley, considering the spiralling nature of heating oil prices, new developments without mains gas should not be considered.
227	7	Yes open spaces should be protected for the enjoyment of all that use them, rural villages should be protected from greedy developers.
227	8	No new space should be allocated.
227	9	Together
227	10	Under no circumstances should 244 be developed.
228	1	Yes I agree
228	2	I believe the 4% housing growth for Carlton-in-Lindrick & Langold is sufficient to cover the next 16 years.
228	3	Site number 174 would be my first choice as access to this land looks quite good
228	4	My second choice is site number 219 for the same reason.
228	5	The enjoyment of living in our property. If new houses are built close by this could be a detrimental factor for many people, I know new houses are required for future gro
220	6	I do believe open spaces should be protected. I can however only comment on the open farm land adjacent to where I live on Shire Close. This is a very pleasant peaceful
228	6	and we would not want to see this lost to any form of development.
228	7	Option B: Focused in just one of the above towns?
228	8	Gypsy and Traveller sites should probably remain in and around there currant locations this would help them to stay in close contact.
228	9	I see no reason why they should not be together, it must be better for everyone concerned.
229	1	No issues on the screening.
229	2	However, I would like to object formally to the use of 41 & 364 as housing.
229	3	This is a open field and does not require housing.
229		Any new properties as a new development in that area will overlook my property, possibly overshadow my property.
229		It will cause additional noise, disturbance or other problems that means that you cannot enjoy my property in the same way that I currently can. It is extremely quiet whe
229	6	Also I object on the grounds of privacy. At the moment I have no-one overlooking my property at the back and would object to houses overlooking me.
229	7	Natural environment - that area has a lot of animals and open fields that gain birds and wildlife and I object that their habit will be lost.
229	8	Increase of traffic - I object that there will be more traffic going down the Ordsall and Ollerton Road if more houses are built.
229	9	I do not think Retford needs any further housing. Employment growth is important but I believe there are plenty of housing available in Retford. I have checked the housing
	_	plenty of properties that have been available for several months that are not selling.
229		I have no objection to the following sites: 51, 37, 512, 533, 7, 46, 309, 6, 69, 342, 10, 70, 71 and 336
229		R7
229	12	R7 - Good links to Doncaster and close to A1 via Blyth. Good for employment and housing.
229	13	The Tiln Lane around needs to have a new road and new housing in that area would bring a new road as infrastructure and would solve a lot of problems as this needs to be
		with housing issues and road problems all in one go.
229		As mention above I would like to formally object to any planned housing on 41, 364 especially. I also object to 40, 52 & 1 for the reasons listed above in section 1.
229	15	I think that the areas that should be protected are Kings Park, the area in Hallcroft and Ordsall.
229		Children's play areas are important.
229		There does appear to be many blank fields in the Retford area.
229		The area in Hallcroft as much as it is a good play area it is vast and not all that space is needed.
229	19	The area at the bottom of Ordsall Road 1/81 across the road from that area should be made available for housing as well.
229	20	I think it is more important for sites to be redeveloped rather than fields and green spaces be used for new housing.
229	21	Option A Existing sites. The surrent sites spuse as problems or yony little problems. At the meeting lattended as one know where the sites were surrently located. This is clearly id
229		Existing sites. The current sites cause no problems or very little problems. At the meeting I attended no-one knew where the sites were currently located. This is clearly id upgraded for the Gypsy and Traveller groups.
229		No opinion.
229		No opinion.
229		The current Southern Boundary to Retford is well defined and provides a consistent and appealing entrance to the town and this would be lost by these developments.
229		It is important to maintain a distinctive boundary between the urban area and the open agricultural land and the current town limit doers precisely that.
229		There will be a significant loss of amenity
229	28	The local infrastructure will not cope with and occupants of the new housing would have to drive a significant distance for shops, schools, doctors and other facilities.

229	29	There are more appropriate areas of land within the existing Retford town boundaries for housing.
229	30	I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.
230	1	Yes I agree
230	2	Option A.
		I would like to see the minimum amount of housing in the village and if housing is created it should fit in with the existing brickwork - using reclaimed bricks and roofing ti
230	3	of several different housing types (bungalows, detached and all using different materials) which can spoil the look of the village and it needs to be preserved for time to co
		for social housing.
230	4	410 - as this is currently an existing site. I would prefer not to develop any other land unless it is converting a building or barn which is already falling down and built.
230	5	Traffic congestion to gams ton is terrible - the mph should be readdress to a 30 mph zone.
230		Access to gas and the mains can be an issue this is why i prefer to develop existing sites as they will already have these amenities.
230		It would be good to have some additional recreational facilities in the area - tennis courts or perhaps a football pitch for the children etc where there is an honesty box wh
250	,	at site 410 where they may already exist???
230	8	Limited development should be on site 410. I would like to see this for small number of housing but not for social housing and to keep the character of the listed building a
230		Could this area be used for the community (ie) tennis and badminton clubs.
230	10	I would like to see it developed for limited housing or to become another private school.
230	11	Depends upon how large the existing location is. I think it is best to keep them in the same area as long as they do not get too large.
230	12	Together as it is better to contain in one area. However we have had issues with gypsy and traveller thefts in the area and criminal damage to our property so i would pref
230	13	None.
231	1	Yes, we agree.
231	2	Option B: Focused in just one of the above towns?
231	3	Yes, however we think there should also be new affordable homes for younger people in the village.
231	4	Site 220 is the most appropriate site for the new homes to go on.
231	5	Traffic on Retford road is bad during the morning school drop off.
231	6	Yes, all green spaces should be protected.
231	÷	Around existing sites.
231	1	No Comment
231		None
232	1	Yes, I agree with the methodology
232	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
232	3	I believe more than 14 should be allowed on site 228 as this will help support our school and shop.
232		228 is the most appropriate site, but 483 would be my second choice.
232		Site 230 now have a play area on and permission for a village bowling green.
232	6	Yes, these should be protected.
232		Existing sites.
232		None
232 233	9 1	None Yes.
233	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
233	3	I believe over an 18 year period the village could see more than 14 new houses.
233		sites 468 and 437 are best suited for housing development
233		sites 294 and 286 flood and have issues with access and heritage. Any building development on these would impact negatively to the village.
233	6	I agree that the open spaces should be protected.
233		No comment
234		Option A: Spread between Worksop; Retford and Harworth Bircotes?
234	3	I believe that 6 new houses is more than enough for Beckingham to absorb, and I also believe that "one offs" should be included in the calculations.
234	3	י שבויביב נומר שוניש ווסעצבי וא ווסרב נומו בווסעצו וסו שבנגווצומוו נס משסוש, מועד מוסט שבווביב נומר טווב טווז אוטעוע שבוונועעבע וו נווב נמונעומנוטווז.

234		Site 101, this is the quietist side of the by-pass and would be least affected by road noise.(prevailing winds are westerly).
234		The Public House should never have been sited on 106.
234	6	The original site opposite site 107 should have been granted.
234	7	I would therefore like to see site 106 in its entirety become open space for the enjoyment of everyone.
224	•	Land drainage pipes, and oil-pipelines are underground in this field and considering the problems with land drainage we have had in recent years; (a solution costing £140
234	8	should be given to these issues when considering planning applications.
234	9	Make site 106 an open space.
234	10	No new sites please.
234	11	No new sites please.
235	1	This is a village, not a town. There are still many secondhand houses as yet to sale.
235	2	This is enough housing for Hayton. No pubs, no shops, and school full in Clarborough and few buses.
235	3	The sites 478 and 541 have an electricity pylon and a much used walk way through farm entrance.
235	4	REMOVED
235	5	No
236	1	We wish to comment on the suitability of sites 7, 46, 309 and 533. There is already a traffic problem with HGVs and school traffic along Tiln Lane and at the end of Tiln Lan
236	2	The other road access to the town is via Longholme Road/Welham Road. Either, or both, the above would become even more dangerous if development took place on any
236	3	Although this area is probably the highest point of the town, there is an on going drainage problem which has probably occurred as a result of:
236	4	a) the developments which have taken place on almost every available site in this area; and
236	5	b) the type of subsoil which becomes saturated and therefore does not allow water to drain away.
237	1	The Corner Farm site will have need of considerable modification of the junction at the bottom of Clarborough Hill because of all the extra cars and delivery vehicles involv
237	4	Smeath Lane will also cause problems at the Tiln Lane/Moorgate Junction as well as creating further hazards for the school traffic.
237	2	Presumably any builder would have to make a significant contribution to the costs of the above, thus making the idea of affordable housing a pipe dream. Unless the oft d
237		The location of my house, overlooking the Broad Gores site, will lay me open to a charge of nimbyism but my main objection is that during wet weather the field is a quage 4" of water and took 5 months to dry out.
237	. 4 .	The drains on my road could not cope and water ran down my drive, into the front of my house, to be met by water cascading down my back garden and into the rear of t
		exacerbate this problem as a drain that was installed many years ago cannot cope.
238	1	I disagree that land should be allocated, in Blyth, for nine new houses. To support this I submit: a) that there are many houses that have been for sale for lengthy periods v
238		b) of recent new developments some remain unsold (again after lengthy periods);
238		c)the village infrastructure cannot support additional numbers.
238		590 & 517 - difficult to be subjective when no information is provided detailing the standard of property to be developed.
238		Existing sites (Gypsy and Traveller) should be developed.
238	6	e.g. the one close to Daneshill Lakes should be refurbished and utilised.
239	1	I am writing to put forward my objections regarding the building of residential site no 1, 40 and 52 of the Bassetlaw development map. 1) It will increase traffic flow throug also it will increase traffic on the adjoining roads through Ordsall which are treacherous enough.
239	2	2) There is a bridleway that runs directly through this area and this will have to remain which will spoil the walks of the countryside and we know there is not much countr
239	3	3) The wildlife will suffer because they will have no where to wander freely. We see many birds, ducks, foxes, hedgehogs and other wild creatures on the fields.
239	4	I live on St Andrews Way directly opposite the bridleway. There is no path through onto our road, but numerous people still cut across our land and climb over the fence b proper way through, so this will encourage more young people who gather on the path for drinking, riding motorcycles up and down. If these houses are built this will only
239	5	I feel we have enough housing being built at the moment in Retford and Ordsall. I feel we need more industry and shops to be encouraged in the town and create more we encourage people into Retford for shopping, eating etc.
240		In my opinion, giving residents questionnaires to fill in will result in a low response. I think greater consultation and clear guidelines should be given before any decisions ca

240		Why should we be given a say to this question?
240		No. I think the attraction of the village would be greatly reduced with additional housing.
240	4	None, see above.
240	5	No. I think the attraction of the village would be greatly reduced with additional housing.
240	6	Yes, they should be protected.
240	7	REMOVED
240	8	See 121.
240	9	See 121.
241	1	I am concerned about site nos. 7, 46 and 309 I would like to raise objections for the following reasons: 1) The area highlighted is prime greenbelt which currently enjoys willows and there are many hedgerows which would obviously disappear and with them the habitat of various species.
241	2	There are public footpaths enjoyed by the local community which would also be lost.
241		We would lose the privacy which we currently enjoy in living down a private road. The residents on the Drive do have covenants preventing building in the areas 46 and 30
241	3	time and effort in the planning department on areas that could not be built on.
241	4	The increased amount of traffic generated by building 899 houses, in an area that currently struggles with heavy traffic, particularly by Carr Hill School and Tiln Lane begga infrastructure in the community to cope with such a large number of houses in this area. Can you imagine the number of school places and medical facilities required for s
241	5	I believe there is a particular problem with flooding at the bottom of areas 46 and 309. I am not sure whether it is the water table or the drainage, but the area floods very
241	6	It is hard to imagine with the current glut of housing in the Retford area and the lack of jobs and industry which is unlikely to change why the council would want to build e already some 1500 houses built from 2006, or to be built, including housing on old school sites. Why ruin the landscape and environment with additional housing which is future.
241	7	There has been a lot of publicity lately on the number of flats/houses that are empty. It appears in Bassetlaw nearly 4% of homes are empty yet the council wants to build environment.
241	8	Finally, if the council decide that extra housing is required and all brownfield sites have been utilised, then it appears from the development plan there are areas which are development on sites 46 and 309, for example the land at the end of Ordsall, no's 1, 52, 41, 48 and 364. These would provide ample housing to fulfil your requirements an motorways than development of areas 7, 46 and 309, which would significantly increase traffic congestion through Retford in trying to get to the motorway network.
241	9	I believe it would be preferable to provide mixed use sites thus creating employment and housing and the sites identified in the consultation document would in fact provious of these areas being on the side of Retford to provide access to the motorway network without the need to increase congestion in the town
241	10	I also think that if the extra housing is built in a location where extra facilities can be built at the same time, this would prove more beneficial than having lots of smaller simore facilities being required than if the extra housing was in one or two locations.
242		Land north of Badgers Chase, Durham Grove, Palmer Road, Bigsby Road and Park Lane, Retford. I have note the proposals and make objections, principally on the basis that inadequate to cope with the additional traffic that will inevitably be generated. One of the things that would help alleviate some of this additional traffic would be the buil all of Clarborough as well, thus taking even more traffic away from Tiln Lane. I trust that the sewerage systems etc. will be suitably upgraded.
243	1	I live at the Drive and have just become aware of various areas that seem to be zoned for housing. The particular areas I am concerned about are no's 7, 46 and 309 which built on these areas. I would like to raise my objections for the following reasons:
243	2	1) The area highlighted is prime greenbelt which currently enjoys wildlife habitat with a large area covered by willows and there are many hedgerows which would obviou various species.
243		2) There are public footpaths enjoyed by the local community which would also be lost.
243	4	3) We would lose the privacy which we currently enjoy in living down a private road. The residents on the Drive do have covenants preventing building in the areas 46 and spending time and effort in the planning department on areas that could not be built on. 4) The increased amount of traffic generated by building 899 houses, in an area t particularly by Carr Hill School and Tiln Lane beggars belief. I do not believe we have sufficient infrastructure in the community to cope with such a large number of houses school places and medical facilities required for such a large development?

245	11	1) Low Street Frontage: This location fronts what is the main through road for the village. Would development of this site lead to an increase in traffic at the already busie intersection with Top Street, which is already a blind corner for drivers and where the road appears narrower? Also, being between existing buildings would this be agains residents in not wanting to 'infill'?
245	12	On the link road, although this location does not have the same traffic issue as point 1 (above) and also seem to fit within the Wheatley residents' wish to only allow small behind development of sites 236 and 238 on the basis of localising disruption to the village, maximising the infrastructure improvement costs and its proximity to Gainsbo
245	13	Site 464 - I consider this to be the least desirable site given both the limited access to it (through narrow routes), that any housing on here would be immediately behind a privacy to the rear of existing houses on both Eastfield and Top Pasture Lane and it would effectively constitute infill.
245	14	I note that reference has been made to provision of affordable housing within the results of the residents' questionnaire but as it appears (according to point 10.93 of the affordable housing completions in N&S Wheatley over the last five years, has enough weight been given to this?
245	15	If there is a requirement for affordable housing, depending on the alternatives, I believe it could be accommodated within the area of sites 236 to 238.
245	16	Yes, I agree with the current 7 green sites as shown on the Wheatley plan should be retained as they provide attractive open areas within the village and especially those a numbered 36/3, 36/4, 36/6, 36/7, which are a valuable amenity.
246	1	Site references 206, 358, 359.
246	2	yes.
247	1	I have lived in the village for years and very much consider myself part of the local community. Some years ago, following announcement of its imminent closure, my office and set up the village store. This has been hard work, not least in setting it up in the first place, yet has proved extremely rewarding from a local village perspective. the opinion that, moving forward, our village will rely on new housing development to sustain existing local village services and facilities which are extremely important to (12) of new housing proposed for the village in your consultation document.
247	2	Owing to the size of the village, I would be in favour of the 12 new houses being provided via a number of smaller sites and can confirm that this view is shared by a numb office and shop. I note from the plan in the consultation document that there are a number of possible sites put forward for new housing. Given that we only need to accord shown seem much too large and could erode the special character of the village, particularly if developed for a significant number of houses.
247	3	I am therefore particularly supportive of site no 236 and consider this to represent a logical small extension to the existing village boundary.
247	4	I am also aware that the owner of this site has also been in discussions with the adjacent owner of 'Whitegates' with a view to joining their two parcels of land. The two parcels of land. The two parcels and largely within the existing built form. If brought forward together, I feel these two sites could provide the opportunity to contribute towards meeting the with little impact on the character of the area and minimal disturbance to existing residents. If this site is indeed brought forward as an extended part of site no. 236, I wo allocation to accommodate some of this settlement's new housing development.
248	1	As victims of the 2007 floods we are somewhat taken aback to find that land around our area is to be considered for potential building sites. After the floods we were proproblem of excessive water in the drainage dyke at the bottom of our garden. We would point out that NOTHING has been done as promised – namely that the dyke wou down and also a holding tank further up the dyke. Not only did we have problems with the vast amount of water but also with the sewerage system. Many times during the unable to use toilet facilities and had to resort to buying a chemical toilet. The culvert under Bracken Lane is totally inadequate and the pumping station also on Bracken Lanowing both surface water and sewerage to back up into the drains thereby rendering the toilets, washing facilities and washing machine unable to be used. We are enc flood water affecting our property and hope you will take this information and evidence into account when making your decisions.
249	1	I have recently learnt of your decision to permit development of over 1000 homes in the area just north of Park Lane. My initial reaction is quite negative as this equates t Retford border and into the surrounding agricultural land.
249		This would completely damage the nature of the area and although I was aware of some long term development possibilities in this area there has been no public consulta announcement what is of such a mammoth site.
249		It could be that your presentation was just to initial such public debate but its presentation in the press seemed to indicate it was to happen. If that were so the road traffi the A620 at the top of Moorgate Hill are alarming. This junction is difficult new and serving another 1000+ homes presents an alarming situation.
249		I walked around Cornwall Road, Bigsby Road, Tiln Land and Richmond Road around Christmas and there were about 10 houses currently up for sale so there seems adequa not moving quickly.
249	5	Possibly one more development like Badgers Chase or Corn Hill Way is all the neighbourhood (and the economy) can sustain.
249	6	I myself am registered blind and am writing using electronic magnifier help. I could not read clearly the press map showing exactly the boundaries of the proposed develop can see exactly from the source that is proposed. I may then be able to give you further comment about the area in which I have lived, at this address, since 1964.

250	1	It all depends on what type of housing and there the houses are built. Hayton has a large variety of houses and bungalows and a building development could alter the look rural village, the same could be said of Clarborough. Other than that planned Corner Farm development, I do not think and large scale development in either village would
250	2	On the original questionnaire sent out, the Corner Farm development had not been passed. I feel it is wrong to state that now that the development of Corner Farm has be in the future planning, so we are faced with a further development. if the Corner Farm development goes ahead with 19 or more properties, I feel no further housing sche developments should be passed for Hayton and Clarborough.
250	3	After the Corner farm development, I do not think there should be any further development in Hayton or Clarborough. I think it would be wrong for people to earmark dev particular village they have suggested housing should be built and (B) A building plot or land should not be suggested if the plot is not near their own property. This then m choice of a particular plot as far as possible from their own property.
250	4	A new development could seriously affect the diverse wildlife that exists in and around the villages. Wild deer live between Lecture Room Bridge (sites ref 173) and Narrov wood (site ref 478 and 544). Kingfishers live in the banks alongside the canal (site ref 182, 258, 173, 160 and 161). The hedgerows surrounding many of the plots are home Great Tits, Greenfinches, Chaffinches, Wrens etc and there are cuckoos and woodpeckers in the villages. Rabbits, Hares, Pheasants, Squirrels and many other forms of wild
250	5	Drainage could be a major issue. Nearly all the highlighted developments are to the east of Main Street in Hayton and Clarborough. These properties would probably be be Street. Both Clarborough and Hayton have sewage pumping stations to deal with current properties that are to the East of Main Street. A new pumping station would need East of Main Street. This may cause problems at Hayton sewage treatment works. Flow balancing may be required at the works if more flow and pump stations are added flooding is an issue to the East of Main Street and the other parts of both villages. The issue will not improve as cuts in maintenance means ditching and diking is no longer been the reason for a number of flooding issues in both villages.
250	6	Public transport in the village is poor with and does not exist after 18:00 hours. A car is a necessity as all people who work need to travel outside villages.
250	7	Clarborough village school could not cope with further developments as it is already full to capacity. Hayton, Welham and Clayworth do not have schools and use the school both village halls.
250	8	Overhead power lines cross the fields (site ref 478 and 541) as well as a public footpath. Many other public footpaths pass through the various potential housing plots.
250	9	All open greenfield spaces should be protected from development. There are many brown field sites and other derelict sites which could be developed before looking at th
250	10	Existing gypsy sites should be assessed to see if they can be enlarged keeping the sites concentrated around existing sites.
250	11	I think it would be better to keep these pitches to an existing site.
250	12	I do not know of any land for Gypsy and Traveller sites.
250	13	Prior to purchasing our property 5 years ago, we checked with the Bassetlaw planning office, that the land to the rear of the property & also to the front (site ref 478 & 54 was designated for greenbelt & could be used only for agricultural purposes. We then went ahead with the purchase, after these assurances were given. Surely, Bassetlaw designated areas & change them to development sites.
251	1	I have been a resident at the above address for 24 years. I feel I must write to show my opposition to the planned development of good agricultural I and as outlines in you in your planning documents identified as plots 533, 512, 309, 154, 77, 70, 46, 37 and 7
251		Loss of good agricultural land
251	-	All Brownfield sites should be developed for housing before developing the edge of town and beyond the borough boundary
251	4	The proposal involved building outside the current borough boundary
251	5	Additional traffic congestion and danger to pedestrians and road users on Tiln Lane and surrounding roads
251	6	The development would change the character of the area
251		No consultation with residents prior to production of proposal
251	8	The present road infrastructure is unsuitable for further development
251	9	The proposal involves building outside the existing development envelope
252	1	Proposed developments to the North of Badgers Close, Durham Grove, Palmer Road, Bigsby Road and Park Lane. I would like to object to the above possible development of the area and I believe that character of the market town of Retford. Do we need it to be larger?
252		Further more I think the extra traffic would have serious safety implications for road users and pedestrians, especially at school times when Tiln Lane outside the school is parked cars with parents picking up children and residents trying to get home.
252		
252	3	I believe there are also doubts about the validity of the proposals due to lack of consultation, outside existing development envelope, outside borough boundary etc.

ok and feel if the very attractive and pleasant Ild be of benefit to any of the residents.

254	4	Area 266 contains a public footpath, when we bought 50 Retford Road we were told that 266 could not be developed because the access to Retford Road would be unacc
254	5	Yes
254	6	Existing sites because infrastructure already exists.
254	7	Together to save expense of additional infrastructure
255	1	do not produce any concerns
255	2	This is prime agricultural land which is vital for the future economy of the country as imported food soars in price and the availability reduces.
255	3	There are mature hedgerows supporting an abundance of wildlife
255	4	There are no recreational areas within the vicinity
255	5	Most of these areas lie in a dip at the foot of a watershed and are frequently subjected to flooding. The drainage dykes and pumping station cannot always cope with the
255	c	Schools services and employment facilities are all on the other side of the town thus increasing the traffic flow through the centre of the town. This is at a time when we s
255	6	services and employment to be within walking distance. The only school in the area is a junior school which is already oversubscribed.
255	7	Access to the A638 (London Road) is at present via Grove Coach Road which is already problematic due to restricted width and parked vehicles. The alternative is via Brack
255	/	located.
255	8	Alternative access via Plot 3 would be too close to the restricted view of the railway bridge to be viable.
255	9	There are already many properties for sale in the area and the addition of houses on plots 27, 488 and 489 would probably create an oversupply situation.
255	10	There is already a shortage of work places within Retford thus causing residents to travel many miles to work. The cost of travel in terms of finance and the environment v
	10	We should therefore consider redressing this problem before considering new housing schemes.
256	1	They should be in one place, as the location is known. There is plenty of space to extend. (Daneshill)
256	2	They should be together for the same reasons as in the last question.
256	3	No houses should be built in Sutton Village, because the council are not using the present ones correctly.
256	4	a) Problem people are being dumped on us to get them out of town. This is not right on us or them, as there are few busses, also a three hour gap in the middle of the day
		there shopping. In town they have cheaper busses or can walk.
256	5	b) Younger people are being put into bungalows and flats that were intended for the elderly of this village.
256	6	c) the houses get sold, and you have to build more, if you sell any should be with a twenty five year lease, so the council does not lose its stock.
256	7	If we have to be lumbered with the four, it should have a clause that they are for children of existing Sutton villages only.
257	1	I have been resident at the above address for 24 years. I feel I must write to show my opposition to the planned development of good agricultural land as outlined in your
		your planning documents.
257	2	Loss of good agricultural land
257	3	All brownfield sites should be developed for housing before developing the edge of town and beyond the borough boundary.

257	7	No consultation with residents prior to production of proposal
257	8	The present road infrastructure is unsuitable for further development
257	9	The proposal involves building outside the existing development envelope
258	1 1	My family are concerned about the above proposal to build homes, travellers site and industrial sites on the fields around Retford. We feel we must state that we strongly grounds: The fields in our area cause flooding to homes on our road
258	2	At present access to these fields is totally unsuitable for heavy building traffic
258	3	The present road (Grove Coach) could not cope with a further increase of traffic that more homes would bring. In addition to this type of traffic problem, it is impossible to an accident on the A1
258	4	With an increase in homes and families the present school would not be able to accommodate many more children
258	5	With an increase in the population that these homes would bring, We feel that it would be a greater burden on the doctors and dentists. At present waiting times to see e
258	6	At present there is little opportunity for the people of Retford to get employment
258	7	In understand that a previous survey carried out 15 years ago pointed out that the sewage system would not cope with any further increase, unless you want to dig up the
258	8	I would also like to ask if the council considered the questionnaires they helped to base some of their findings (THE WHOLE TEN OF THEM) was emphasised in intended to did not know about the present proposals. Not until we see it highlighted in the Trader and Retford Times. In addition to the above as the powers to be ever carried out a Council homes that are vacant, industrial sites that have empty of derelict buildings. Also new housing estates that have empty homes, because people cannot afford ther that it will be far more difficult for the first time buyer.
259	1	There have been more than 6 houses built since the survey and most not been sold. No more houses should be built as the village is plenty big enough for the few facilitie
259	2	No more sites should be developed as the village is already over developed. It is a rural community and should stay that way.
259	3	Planning permission should never have been given for the public house. It should have been allowed to be built on plot 107 as at least it might then attract passing trade. never be passed because of all the heavy goods vehicle and very large agricultural machinery that constantly use the road. You only have to see how much congestion is c road, especially the vans that are causing chaos at the moment which park on the junction with Low Street.
259		Why are 6/1, 6/2 and 6/5 protected areas? As far as I am aware they are they are not used for any specific purpose.
259		Surely plots 105, 106 and 203 are just as important. Do these just belong to land owners who are out to make a fast buck?
259		It the Council wants all these new developments in our village are we going to get a doctor's surgery, library, fast food outlets, butchers, swimming pool, supermarket etc.
260	1	With so many houses empty in our area, why build on farm land etc. it makes no sense financially and ecologically so no.
260		No Cuckney is a lovely quiet village.
260		Traffic accidents are already a problem at the cross roads.
260		Why use farmland it makes no sense? Financially or ecologically!
260	5	Recommendation zero new dwellings
260	6	Use empty dwellings in area, refurbish
261	1	I am writing to inform you that I have a covenant on the fields OS78 and OS104 situated to the east of my property and would not like any buildings to be erected on then in 1960. I understand that other residents in The Drive have similar covenants.
261	2	Site 78 containing 3a.23p or thereabouts of grassland was then called or known as 'Pond Field' in the conveyance between Miss M A J Hurst and George Fredrick Baines da severe weather I have seen standing water in the field and, if built upon, it would, in my opinion, become a flood plain. My house is said to be situated 53 feet above sea le the water table is only 2 feet below the surface. The pond is at a lower level than my garage.
261	3	In addition I have a covenant which states - forever hereafter to keep clear and un-built upon so much of the field Ordinance Survey Number 78 as is situate to the East of whole of field Ordnance Survey 104 shown in the plan. The purchaser for himself, his successors in title and assigns to the intent and so as to bind etc This covenant was 1960 but was registered on the 24th October 1978 as a new regeneration.
262	1	I am very concerned to hear of the proposed development of potential housing on areas of prime green belt land around Retford – particularly areas 46, 309, 37, 512 and planned.
262	2	This is an area of natural beauty – a significant wildlife habitat with hedgerows and public footpaths enjoyed by walkers and much of the local community.
262	3	The traffic in the Tiln Lane/Moorgate junction/ Bigsby Road would be vastly increased. It currently is already struggling to cope with huge HGV's Carr Hill School traffic and

Responde	Comme	Answer
nt	nt	
262	4	We already have a glut of for sale/to let housing in the Retford Area – I do not believe there is a call for such huge numbers of extra housing – there is no extra industry or
262	5	The character of the town will change
262	6	Local infrastructure will be seriously stressed
262	7	Traffic levels will be horrendous
262	8	Schools and doctor's surgeries will be oversubscribed
262	9	An area of natural beauty and wildlife habitat will be lost forever
263	1	As a long term resident of the above address I am co concerned at the proposal to build a large number of houses on land between the two roads of Broad Gores.
263	2	My main worry is the extra amount of traffic this will bring to what was once a quiet cul-de-sac. Since the development on St John drive the volume has increased consider corner from Big Lane and it is surprising we haven't hand any serious accidents.
263	3	In addition to the extra traffic there is also a problem parking. Most houses here have at least one car and several have two or three, some of which are inevitably parked
		is quite difficult to negotiate a path through at times especially if a lorry is parked.
264	1	I would like to appeal against the proposed housing development around Palmer Road, Bigsby Road and Park Lane area.
264	2	The safety if School Children walking to and from school.
264		The traffic would at least treble causing danger to existing cars parked outside their home.
264		Extra traffic means more noise and fumes spoiling a quiet location
264	5	The development would ruin existing walking areas of one of the last green areas used by a number of rambling clubs and dog walkers
264	6	This green area where trees were grown for use at power stations instead of coal to stop the greenhouse gases
265	1	You are misleading the public when you say 'at least 12 new houses' the original questionnaire resulted in the residents expressing the strong view of 'an average of 12 ho housing'.
265	2	It is my view, if corner Farm Development were not under consideration then small infill developments comprising 3 houses shared across most of the potential sites show
265	3	However all the issues for consideration outlined on P135 must be considered in particular: overshadowing, overlooking or loss of privacy. Design, appearance, layout, der infrastructure to support the development. impact on public visual amenity.
265	4	It must be recorded that the Corner Farm Development of 19 new houses which would ALL be in Hayton equates to an increase of 15% over Hayton's current housing stoc rural balance of the village.
265		Considerable damage was done to the rural nature of Clarborough when major housing development took place a few years ago.
265	6	In view of the potential Corner Farm development, it is my view that Clarborough/Hayton allocation is fulfilled. As detailed below in 'Observations', BDC ignored the advice planning permission for 19 houses. Should this development move to a full planning application, then BDC criteria for assessment should be strictly enforced and the views
265	7	See above
		It can be debated ad nauseam whether there is a requirement in Bassetlaw for 6000 new houses especially when it is a recorded fact that there are substantial quantities of
265	8	District. These should be given priority over new houses on either brownfield or greenfield sites.
		Though the efforts of BDC and other bodies to attract employment are to be applauded, it would seem the high emphasis on new housing is misplaced. No one especially a
265	9	understood that unless 'UK Ltd' produces products which the world wants to buy, hence creating sound and sustained employment, then new housing simply is a luxury th
		short term fix for the building industry and does nothing for our trade imbalance with the world.
265	10	Open space sites should be protected from any development as they are public assets.
265		New Gypsy and Traveller capacity should remain within the existing sites.
265	12	They should remain together as this would likely to be a more economic solution should they be separated.
265	13	No
265	14	It must be emphasised that a high majority of the responses to the questionnaire by Clarborough/Hayton wanted no new housing at all.
205	15	However, it seemed from Bassetlaw calculations that on average the community could absorb additional new housing of 12 units favouring 3 bed properties of semi or det
265		the next 5-7 years on either brownfield sites or as infills adjacent to existing properties.
205	10	In simple terms, should corner farm development proceed, then Clarborough/Hayton has more than fulfilled its allocation and no further development should be consider
265	16	corner farm allocation from any new proposed allocations.
266		I strongly object to the proposed housing development on land north of Retford, Reasons being;
266	2	The development will alter the character of the area.

266	3	Loss of good agricultural land
266	4	Additional traffic
266	5	Highway safety
266		Loss of trees
267	1	Yes it is very well thought through and fair.
267	2	Bassetlaw Council have always preferred Worksop for Employment and Residential Development and I believe this has had an adverse effect on the town of Retford. We a together with executive style residential sites. Retford has a many assets and these need exploiting. We are only 1 and a half hours from London by train, we have a Moto countryside and heritage sites on our doorstep, our schools have greatly improved, people want to live and work in Retford - Retford is a lovely place to live but we need Employment and Residential Sites, no more flats required! Ordsall appears to have been over developed already due to its distance from the town centre, and that of courting
267		Site 46 and 309 are very attractive sites for Residential Development. Access to Schools and Employment points to the North side of Retford as being ideal for future deve
267		Site 7 looks a little large and is agricultural land, and a possible nature conservation site, with public footpaths crossing it.
267		Sites 37 and 512 although situated in the right quarter of Retford will only impact on the problems that already exist on Tiln Lane.
267		Sites 46 and 309 would have a minimal adverse affect to the current area and are compatible with the existing area.
267	7	Sites 51 and R7 do fit in with the current scheme in Retford but any other large industrial sites would require a major rethink of the roads. The option of completely chang Welham and its bridges to the West would open up the North East corner of Retford to both Employment and Residential use and a new junior school.
267	8	Site R7 to the west of North Road would have a huge impact on the already busy North Road, a small residential extension to the estate of houses already institute should lights or a mini roundabout must be installed at the Primary Care Centre to alleviate the already dangerous situation when leaving the centre.
267	9	Site R2 has no access that is suitable.
267	10	Option A
267	11	Definitely concentrated around existing sites. To have Gypsy sites scattered around the district would be detrimental to Bassetlaw.
267	12	These should be provided together so as to alleviate any conflict that may come from differentiating transit and residential travellers.
268	1	Unsure
268		No I think there are enough houses in Worksop already as in that current supply outstrips demand - looking at the number of houses available for sale. Also it is difficult to increased deposit lenders require for new build homes and the majority of potential homeowners do not have large deposits. Therefore I foresee large numbers of empty turn cause other issues.
268	3	I think location 35 is unsuitable.
268	4	I would be in favour of the employment sites but not on location 35 as it is a rural location near residential properties.
268	5	I do not support mixed use sites.
268	6	Yes
268	7	None
268	8	Land for employment only and any location not near residential homes or which would destroy woods, hedgerows, public footpaths/ bridleways.
268	9	Option A
268	10	No
268	11	Together
268	12	None
269	1	On the whole yes
269	2	Although I disagree with the division of the grades between amber and red in Criterion 4, loss of agricultural land. Criterion 3a has been discounted due to the information considered only amber. I would expect that this would mean more agricultural land being included in the LDF rather than excluded. If any land deemed grade 3 was to be o work needed to determine if it was 3a or 3 b should then be done, and the PPS be followed.
269	3	All towns need to grow their economies, however this needs to be balanced with their 'ambience'. Retford is a rural market town, and so any expansion in housing provision being deleterious to its raison d'être I would say half of what is proposed, i.e. 250 houses would be sufficient.
269	4	Sites; 27, 70, 10, 342, 6, and 71 would add up to around 250 homes and not greatly extend into current agricultural land.
269	5	44 and 24
269		I do not agree that the 51/571/572/R7 site should be considered mixed or designated as a whole. I would support development on the East side of the north road adjacer source of employment opportunities. On the west side of the North Road some expansion of the North Road estate could be contemplated but only to bring it in line with the north road.

269	7	I don't agree that site 41, 53 and 364 should be considered for either housing or employment as this is extending the town into agricultural land.
269	8	As you can tell I am very keen on maintaining the rural approaches to our lovely market town. I work in Sheffield and delight in returning to my home town and telling my a small town where you are able to walk 10 minutes either way and be either accessing its shops and amenities, or out in the countryside enjoying views of fields and occa like that proposed for housing around Tiln Lane (512&37), end of Bigsby road and Park Lane (533, 7, 46 & 309) as well as those in the south or Retford and Ordsall, would green belt that the whole character of the town would be altered. Not to mention the overloading of such problematic road junctions such as Tiln Lane/Moorgate, Ordsall, at Ordsall.
269	9	Yes, well maintained open spaces in any town are vital to community health and cohesion
269	10	No
269	11	Option A
269	12	Existing sites, as these have in principle gained acceptance and therefor it would be less controversial than creating a new site.
269	13	Don't know
269	14	None known
270	1	I think location 35 is completely unsuitable for further housing development. Additional housing will take away the countryside feel of Gateford Park. Up to 700 new hous already busy estate
270	2	Option A
270	3	In response to the above document I would like to record my opposition to any building on site number 35. This land must be protected as an important amenity for the e
270	4	In particular I wish to strongly object to the development of any additional houses at site 35 for the following reasons. A) A great loss of amenity. It would have a detrimer visual and physical enjoyment of this rich landscape, which is a mixture of ancient hedgerows, copses and woodland. The rich mosaic of habitants for animal and birds would be a loss of open walkways and bridleways which many people enjoy – both is a most of the second second second second second second second be a loss of open walkways and bridleways which many people enjoy – both is a most of the second
270	5	B) Urban sprawl and extension of the town boundary. Current housing already extends to the existing Worksop town boundary. Development of site 35 will extend beyon and Carlton in Lindrick. Additional housing will lead to too much density in an area that has sufficient housing.
270	6	C) A loss of nature conservation. The effect on Owday and Whipman Woods and Owday Plantation, which is a Site of Importance for Nature Conservation would be catast
270	7	D) There is an opportunity cost for our children's education. There will be less chance to learn the importance of the natural by having pertinent exposure to this environm them understand that beyond the urban sprawl there are farms, wild animals and birds to observe and understand. Here, they have it on their doorstep and are exposed t environment and they can see the land farmed and the crops grow. This areas must be preserved for our community.
270	8	E) Safety Issues. There will be increased danger from traffic. The number of cars would increase dramatically. At present residents and visitors use this land and take their they are safe.
270	9	F) More congestion and pollution. At present our local shops are busy and are utilised well by the local community. More housing will most certainly lead to local congesti large supermarkets from this site on foot and this would then lead to increased traffic to and from the town. There will also be extra noise and pollution from the increase
270	10	G) Loss of agriculture and employment. Currently this land is agricultural and productive and it supports the employment of land workers.
270	11	H) Infrastructure and Services. Increased density of housing and population will put a strain on local infrastructure and resources, for example doctors, dentists and other sewerage will have to be provided and significantly upgraded again leading to destruction of the environment.
271	1	No building of any kind on Section 35.
271		No further development for houses is required as there is no demand for new build houses as there are already 96 properties for sale within only one mile of my post code for a long time. Some as long as 3 to 4 years. In addition it is difficult to obtain mortgages for new build houses due to the increased levels of deposit that lenders now req sell 700 houses especially in this climate.
271	3	Location 35 is unsuitable.
271	4	Any as long as it is not near to houses.
271	5	None. No mixed use sites.
271	6	Yes
271	7	Yes, Building on section 35 will destroy hedgerows and trees having an impact on wildlife.
271	8	It will also create a significant amount of traffic generation causing serious congestion to the residential roads in this area, especially at rush hour times. It takes 10 to 15 n junction at Ashes Park on to Gateford Road at the moment.
271	9	There will also be increased pollution, destruction of beautiful countryside and construction road damage.

271	10	If this question relates to our feedback given, I feel feedback from residents in this area is imperative as it is the residents of this area that this property development will
271		as the environment and wildlife.
271	11	Option A
271		No
271	13	No transit near to housing. Too much congestion and pollution.
271		None
272	1	Don't understand the question.
272	2	I think the housing is ample in Worksop and the area can't sustain another large housing project. We do not have the public services, schools, etc. to support more reside
		unbearable on certain estates, especially entering and exiting the estate where I live.
272		I think location 35 is totally unsuitable for numerous reasons.
272	4	I have no opinion in relation to this.
272	5	I have no opinion in relation to this.
272		Yes
272		I feel that Bassetlaw council have not publicised this enough and the only reason I found out about it was by chance. These proposed sites will have a massive impact on lo
272		council should have been sent to all local residents who it may effect.
272 272		Option A The sites should be in and around existing sites and not in new locations
272		The sites should be in and around existing sites and not in new locations. Don't know what it means
272		None
272		Yes
275		No, in the current global financial climate I do not believe there is a need for more housing. There are plenty of houses for sale in a wide range of price brackets that are no
273	2	surplus and devalue property and the area.
273		Worksop needs more local employment but I doubt it will come.
273	4	I strongly disagree with the 2 largest sites - No 4 and 35. They are of incredible size compared to existing developments and I think the negative impact of sites of this size
273	5	Site No 35 in Gateford will place a massive stress on local infrastructure. Peak time traffic is a long-standing problem.
273	6	The schools are already failing to accommodate the current population.
273	7	Part of the beauty of this area is its rural feel and wildlife which will be completely removed by such an expansive development.
273	8	Yes, they should be protected. They add to the attractiveness of the area.
273	9	Option A
274	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
274	2	I agree that the village of Misson would be able to accommodate a maximum of 18 new properties provided they were to be located within the existing village boundary.
274	2	Site ref: 480 Misson Mill site would be the preferred option for new build as it is a brownfield site and would not impose any current boundary restrictions, services such a
		place and the site readily up for sale for development.
274	4	The location of this site would allow access into the village without increasing traffic through the remainder of the village. The amount of traffic through the village is very in the
		school and village green boarder the main road through Misson and this is the only area local children have access to.
274		Areas highlighted as potential housing which is currently green belt land and outside of the original village boundary ref: 504 / 505 / 506 / 383 should be protected from fu
		alternative within the village, it has never been built on and holds no current infrastructure for housing.
274	6	I believe Gypsy and traveller sites should be concentrated in existing sites, again it comes down to the small infrastructure of the village, also the report states that the Gy
275		fully allocated, therefore provision should be sufficient without providing more pitches in a small village.
275		Yes, we agree that sufficient land should be allocated within Walkeringham to accommodate all housing needs, including specialist provision (see attached statement).
275	2	Site 445 offers scope to accommodate the sensibly managed growth of Walkeringham in a manner which benefits the village (see attached statement).
275	3	Criterion 1: At this early stage, no consultation has taken place with the community in relation to the site or any proposals for its development. However, in examining opt housing, consideration has been given to the priorities and needs of the residents of Walkeringham as identified within Site Allocations and Options Consultation Paper. The a scheme is developed that meets as many of these aspirations as possible and therefore, as illustrated in the Development Framework we are able to include resources su play area, as well as a mix of housing that responds to locally-identified need, such as bungalows and sheltered accommodation for older people in addition to family hous

275	4	Criterion 2: As set out within the Site Appraisal in section 2, the existing use on the site is agriculture and therefore Greenfield. There are no issues or costs related to reme users In relation to neighbouring land uses, as set out within Section 2, sites on both sides of the proposed housing site are in residential use. Therefore this would be com
275	5	Criterion 3: Whilst it is not proposed to deliver uses other than residential on the site at this stage, the inclusion of housing units targeted at older people could also lead to future of a care home on the site. If this were to take place, then a number of jobs would be created as a result. (AMBER)
275		Criterion 4: As illustrated in section 2 of this report, the site is currently in use as Grade 3 agricultural land. Whilst its development would result in the loss of this site for ag hinterland is also classified as Grade 3 agricultural land and therefore alternative sites may be available nearby of an equal quality. (AMBER)
275	7	Criterion 5: The Environment Agency does not identify any Groundwater Protection Zones within Walkeringham. (AMBER)
275		Criterion 6: Please see Section 3 which contains a detailed consideration of the local landscape features through the Landscape Value and Impact Assessment which includ landscape Character Assessment. The outcomes of this assessment reveal not only that the site is within a 'create' Landscape Character Zone, but also that its proposed de proactively apply the policy. (GREEN)
275	1 9	Criterion 7: The Development Framework set out in Section 4 outlines the detailed consideration undertaken in preparing an indicative layout for the site. It reflects local p to utilise materials that are sympathetic to the character of the village. This approach will ensure that the built character is reinforced. (GREEN)
275	10	Criterion 8: The Bassetlaw District Council Green infrastructure Study, May 2010 illustrates that there are no formally identified Green infrastructure features on or close to Whilst the River Trent and Chesterfield Canal corridors pass the village to the east, west and north, these do not directly pass through. There is a minor node also to the we direct relationship to the site which is to the south east. Whilst the Green infrastructure Plan does not formally identify any specific features within Walkeringham, this doe infrastructure is defined as: "networks of multi-functional open space, at all scales" and may include: Woodland; Watercourses; Playing fields; Nature reserves; Cemeteries landscaping. Walkeringham is characterised not only by its built form but also by the areas of open space that are located across the village. Whilst not always accessible to important feature of the local environment. The proposed development concept suggests a scheme that recognises the importance of the green character of the site and a green environment in a form that relates both to the existing development on Station Road as well as a new public or design of the scheme incorporates a looped footpath around the open space to maximise its accessibility and to encourage both existing and new residents of Walkeringha
275	11	Criterion 9: The Bassetlaw District Council Strategic Housing Land Availability Assessment, October 2011 considers the site to be developable. It states that the site is suital the SHLAA states that the site is achievable with market factors being supportive of sites of this size and no exceptional cost factors likely to be incurred when developing to notes that the site may be available subject to it being either allocated for housing development or being granted planning permission -there are no land ownership constructs with the Council to deliver housing on the site within the appropriate timescale. Specific matters to be considered at a detailed design stage, should the site be allocated for that highway requirements can be met. In addition, issues relating to the site's surroundings that are a factor to consider in its development are noted as: Land to the west archaeological interest; One local listed building (heritage asset) has been identified to the southwest of the site. (GREEN)
275	12	Site is characterised by mature trees which are an important characteristic of the village. The development of this site could result in the loss of these important landscape
275		In addition the site is located in a prominent position and can be viewed when approaching the village from the west.
275	14	Site forms part of the setting of a listed building and therefore its development could have adverse effects on this relationship. As you enter the village from the south, the building and its grounds. Therefore to develop this site could affect this attractive local view.
275	15	The southern route into Walkeringham has a strong rural character influenced by the landscape beyond. To develop in this location could change the character of this loca
275	16	The site contains many mature trees which are protected, therefore the actual developable area may be smaller than it appears on the SHLAA map.
275	17	Topography of the area, particularly when approaching from the A161 along Baulk Road means that the site is highly visible from the highway.
275		Site is isolated and not adjacent to any of the existing built form.
275		Plot is surrounded by buildings so any design and layout will need to be carefully undertaken to minimise overlooking issues if the site were to be developed.
275 275		Potential access point mat need to pass by a historic building. Local concerns over traffic particularly around school opening/closing times. Main access if the site were developed would be opposite the school and may therefore have
275		Area badly affected by flooding in 2007.
275		Previously expressed local opposition.
275	24	Site is only large enough to deliver part of the proposed allocation. The site is located in the outskirts of the collage on the southern approach. This route is characterised by the rural character beyond the village with views toward the chur
275	25	at a higher density on the site would have a significant impact on these characteristics.

275		Site is in a prominent location at the gateway to the village when approaching the south.
275	28	May be issues with access onto the A161.
275	29	Site is away from the main built form of the village.
275	30	Access from the A161 may be difficult.
275	31	The site is surrounded by open countryside and is visible from the public footpath to the north of the village. Long views outwards towards the open countryside form the
275	32	The northern side of North Moor Road is characterised by lower density development which is punctuated with views through the housing to the countryside beyond.
275	33	Area badly affected by flooding in 2007
275	34	Part of the site surrounded by open countryside
275	35	Site is visible from the public footpath to the north of the village and also when approaching the site from North Moor Road
275	36	Area badly affected by flooding in 2007
275	37	Access from the A161 would be via an already difficult junction. Access via Station Road is to the area of the village where densities are lower and it is not possible to deve
275	38	Site is located on a view corridor out of the village to the open countryside beyond.
275	39	site is only large enough to deliver part of the proposed allocation.
275	40 1	The proposed development would deliver not only an appropriate amount of development in terms of numbers; it would also provide a number of broader, locally identif suitable for both families and older people; Public open space incorporating an equipped children's' play area; Sheltered housing for older people within warden controlled
275	41	In addition, the proposed development would deliver additional benefits, which include: On-site affordable housing; Buildings which are designed to a high environmental Homes level 5; Sympathetically designed buildings which retain the rural feel of the village and reflect local materials and character.
275	47	Finally, when considering alternative sites within the village, this plot on the south of Station Road appears to be the only opportunity to deliver Walkeringham's future ho unconstrained site to an exceptional standard without compromising the character of the village. It also offers an opportunity for significant wider benefits for the local co
276	1	I wish to lodge my objections to the building of housing, or any other building, on potential housing site reference 7 in Retford as per page 38, fig 5.1, in the report dated Options Consultation. My objection is based on the below points.
276	2	Traffic down Bigsby road is already down to a single lane due to all the parked cars on the road, extra traffic down this road would cause a big increase in the risk of an acc going to and from the school.
276	3	The junction of Tiln Lane and the A620 would become even busier and cause more trouble down Tiln Lane which is already considering a Traffic Calming project, this deve to this
276	4	Loss of willow trees and hedges which currently support a lot of nature due to its protective area away from traffic and other hazards and its close proximity to water.
276	5	The land is currently commercially active producing Willow generating income for a local producer, and thus bringing in income to Retford
276	6	The local school would struggle to admit extra students without a negative impact on the service they provide. There are other newer schools around Retford which woul
276	7	There are plenty of Brown field areas in and around Retford which could be developed rather than changing the current local Planning Policy boundaries.
276		There is a risk that building on this site would create a new risk of flooding area as a nearby area is already at risk of flooding and changing this landscape to tarmac from t together and absorb the water, would create an increase in the amount of surface water around.
277	1	I think location 35 is unsuitable due to significant increase in traffic entering the Gateford area, many more cars means danger to children
277	2	Strain on schools and services
277	3	More traffic at local shops
277	4	Ruined views and privacy for many home owners
277	5	Construction road damage
277	6	Years of mess
277		Destruction of valuable agricultural land.
277	8	If the proposed development of site 35 went ahead I would move out of the area.
278	1	Yes, we agree with the methodology
278		Option A

Responde	-	Answer
nt	nt	
280	16	We are concerned that the building on the area already planned for housing comprising the former colliery yard (Costhorpe Industrial Estate) may have a negative impact This makes it all the more important to protect this area
280	17	In support of the need to encourage biodiversity in this particular area we quote from the Nottinghamshire County Council Biodiversity website that the County's 'biodiver what it was in the recent past. The percentage of the county designated as Sites of Special Scientific Interest is significantly lower than both national and regional averages
280	18	In Nottinghamshire as a whole we have lost 97% of flower rich meadows since the 1930's and 90% of healthcare since the 1920's
280	19	As a partner of the Nottinghamshire Biodiversity Action Group, Bassetlaw District Council has a responsibility to deliver actions for biodiversity features of local importance
280	20	It is well established that a key to sustaining and increasing biodiversity is to create interconnected corridors of woodland and pasture that can support a wide range of wil around Langold Lake and the pit tip as Open Space would be a very valuable step in maintaining a wildlife corridor.
280	21	Spread between Worksop; Retford and Harworth Bircotes
281	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
281	2	No, this was based on Corner Farm being the recognised developed area.
281	3	No new dwellings should be allocated as there has been enough development of the village over recent years.
281	4	The village already floods in two areas every time we have heavy rain as the drainage system cannot cope.
281	5	We do not want any additional traffic coming through the village. answered above - permission to build was granted prior to the consultation meeting which incidentally w before many of the residents attended It was not stated anywhere that the presentation would be at 3 30 and we could not get there until 5 pm in any case. It should hav enough forms to hand out - many people had to request or travel to Worksop for the forms which should not have had to happen
281	6	No sites
281	7	Existing sites would be most sensible
281	8	Don't know
281	9	Don't know of any land
282	1	Yes
282	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
282	3	Yes, some for older people too.
282	4	228 is the best site for housing
282	5	All should be protected
283	1	I would like to raise my objection to the proposed potential future Developments of the sites adjacent to Bracken Lane, Grove Coach Road and Cavendish Road. Potential I as identified in the Bassetlaw District Local Development Framework, Site allocations, Issues and Options Consultation Document.
283	2	I believe that the sites listed above would be unsuitable for future development for a number of reasons, these being. Traffic generation, access and road safety:- Access o and Bracken Lane is currently problematic with the current amount of traffic this would only get worse with the increased development. With the difficulty exiting on to Lo Bracken Lane and Grove Coach Road to Grove Lane all single vehicle width and hence unsuitable for the increased amount of traffic.
283	3	Risk of Flooding:- During the recent floods of 2007 a number of properties in the area suffered from flooding. This was due to the amount of surface water draining from the and the risks to adjacent properties by acting as a buffer for the water to collect before being drained away. Development of this site would require the site to be raise developments from flooding thus greatly increasing the risk to existing properties adjacent to the sites.
283	4	Inadequate infrastructure:- The proposed sites are situated at the very edge of the town so are some distance from local amenities. The nearest convenience stores, to the and the main shopping centre of Retford some 1.5 miles. This once again will lead to an unsafe amount of traffic using the local roads. The local school for the area, Bracker is currently over subscribed and would not be able to accommodate a large influx of additional children
283	5	Density, layout and design of proposed development:- The existing properties in the surrounding area adjacent to the proposed sites are all detached properties with amp than the 30 houses per acre proposed. This would be totally out of keeping with the surrounding area
283	6	Loss of Trees or Hedgerows The proposed sites are surrounded with hedgerow that is home to many species of bird's, animals and insects. Any future development of the area.

Responde	Comme	Answer
nt	nt	
283	7	I'm writing in response to your letter dated 17th January 2012, regards the proposed future development sites 3, 370, 511, 488 and 489. My property is indeed adjacent to totally unsuitable for further development for the following reasons. a) a. Road safety, traffic generation and difficulty of access. The hazardous access to London Road fro already very difficult with the current volume of traffic. Additional housing and the consequential increase in the traffic seeking to enter London Road would exacerbate t using Bracken Lane and Grove Coach Road to access Retford via Grove Lane. These lanes are all single vehicle width and hence unsuitable for the increased amount of trafwalking to and from Bracken Lane School. Any increase in traffic would pose a greater danger to these children.
283	8	b) Risk of flooding. During the recent floods of 2007 a number of properties in the area were flooded by surface water draining from the adjacent hills. At that time the sit 511 reduced the risks to adjacent properties by acting as a buffer zone, allowing water to collect in the fields before slowly draining away. Any development of these two s with a significant amount of hard surface which would increase the amount of surface run off both in speed and quantity thereby placing adjacent properties at greater rist protect the new properties would also greatly increase the risk to existing properties adjacent to the sites.
283	9	Inadequate infrastructure. The proposed sites are situated at the very edge of Retford and are therefore at some distance from local amenities. From the proposed develo convenience store and some one and a half miles to the main shopping and commercial area in the town centre. The proposal to build affordable housing so far from shop dangerous increase of pedestrian and motorised traffic on narrow local roads.
283	10	The local school for the area, Bracken Lane Primary School is currently over subscribed and would not be able to accommodate the large influx of additional children whicl generate.
283	11	c) Density, layout and design of proposed development. Existing properties in the area adjacent to the proposed sites are all detached properties with ample parking. The 30 houses per acre proposed which would make the new development totally out of keeping with its surroundings.
283	12	d) Loss of Trees or Hedgerows. The proposed sites are surrounded by hedgerows which are home to many species of birds, animals and insects. Any future development of the area.
284	1	I am writing to raise my concerns over the plans to build new housing in Clarborough on two sites listed as 170 and 258 in the Bassetlaw district local development framew
284	2	I have been a resident on the road adjoining these two sites for over forty years (since the development was built) and have seen traffic through the village dramatically in particular concern with the main road into Retford regularly being blocked by trucks failing to follow the approved route and becoming trapped at the low railway bridge
284	3	Local amenities are now almost non existent in the village. The local shop, post office and petrol station have all closed, meaning a trip of three miles into Retford for any of those without transport as the bus services outside of those for school children are very sparse.
284	4	During the snow of winter 2010 I was trapped in my home for three weeks as the side roads in Clarborough received no clearance or gritting. Your plans would mean that the main thoroughfare to and from the new development.
284	5	Telephone services to the village are poor with low quality lines and some of the slowest broadband services in the country. Increasing the number of homes using the ser
284	6	In recent years the infant and primary school have been amalgamated into one smaller establishment. This school is presently at full capacity. Increasing the number of ho increasing the number of children requiring schooling.
284	7	Site 170 Your own document states that this area is a Site of Special Scientific Interest. It is also a flood plain. Building here not only would mean that homes were in dange adjoining areas would be affected, increasing their own risk of flood damage. Your document also states that there is open countryside to the West, but does not mention there (Site 258). What your document does not say is that this site is designated as a Site of importance for Nature Conservation (although is does mention this in the info that should be flagged as these sites have legal protection.
284	8	Site 258 Again this is a Site of Special Scientific Interest and an area of flood risk. Building here not only risks flooding of the homes, but increases the risk of adjoining prop
284	9	Your document states that the site has 'good access'. I am amazed that you could consider access via a small lane at either end as good for this amount of properties
284	10	The document states that the area is wasteland with previous use unknown. As it has been rented out to a local farmer as a field for growing crops by the council for over

	-	needed on such a large scale or that the current infrastructure could cope with it
285	7	Ordsall is already very heavy with traffic first thing in the morning and whenever an accident occurs on the A1, which appears to be happening more regularly, then Ordsal
200	1	traffic is inevitably diverted through the village.
286	1	Option A. 14 new houses
286 286	2	224 - 234 (part of), 537
286		Yes
286		REMOVED
286		REMOVED
286	7	Site 156 - already refused on the following: Overshadowing, overlooking or loss of privacy
286	8	Traffic generation
286	9	Loss of trees or hedgerows
286	10	Mass of buildings
286	11	Impact on private rights of way
286	12	Capacity of private drains
286	13	Site 516 - Private house and garden (spoil area) and access on to a very busy road (corner)
286	14	Site 157 - Private house and poor access, outside the village envelope.
287	1	Yes, I believe that sites 37 and 512 should be protected from further development.
287	2	Initial concerns include the preservation of wildlife, especially barn owls. These being protected species, are currently in habitation in plots 37 and 512.
287	3	Concern for the loss of privacy and hedgerows.
287	4	The inadequate infrastructure to support both sites for potential housing.
287	5	Traffic generation and road safety - already a deep concern that Sheath Road and Tiln Lane are currently overused by HGVs, the increase in traffic would compromise road
207	5	children attending the local school.
287	6	Flood risk for residents on Bolham Lane.
287	7	Concerned about the appearance of modern housing developments in such a rural part of Retford.
288	1	I think that before any specific judgement is made on any future development it has to be put before the people of Blyth to decide.
288	2	Option A
288	3	I disagree with the amount of land being proposed in Blyth and think any development in future should take place in the existing development boundary.
288	4	As no proposed sites come within the development boundary the answer has got to be no development unless it is limited to within the boundary.
288	5	Some, or parts of the proposed sites, apart from being outside the development boundary are within the area of the floodplain that has over recent years been under thre services would be a considerable issue.
		services would be a considerable issue. Also, there is the closeness of the A1 trunk road to all the proposed sites, bar one, maybe two. This road, at some point in the future, is going to need upgrading from a for
288	6	compulsory purchased a few years ago for this purpose but then was resold as the idea was shelved. But?
288	7	I think all open spaces should be protected, I don't think there is enough open space.
288	8	I suggest one of the proposed sites (possibly 213) become a proper football field with changing facilities and parking.
288	9	Tricky question. How many pitches, site at Daneshill Rd could be extended, we're talking oil and water here.
289	1	I would like to see this plot developed (Site 114)

295	7	Option A: Spread between Worksop; Retford and Harworth Bircotes?							
295	8	Extend existing sites to develop community for gypsy and traveller children.							
295	9	No opinion.							
296	1	Having studied the proposals that have been put forward for the Local Development Framework, we feel strongly that sites 37 and 512 off Tiln Lane are not suitable for ho reasons: Historically this has always been agricultural land, indeed a greenfield site, and the adjacent land mirrors this, a large building development in this area would seri infrastructure.							
296	2	There are already serious concerns with the access and egress of vehicles on to Tiln Lane and the amount of heavy goods traffic that use this route close by Carr Hill prima Smeath Lane has been a blackspot for many years and local residents, supported by County and District Councillors, have long campaigned to reduce the amount of traffic							
296	3	Bolham Lane that abuts site 37 provides a much used pedestrian route and walkway for pupils to the Elizabethan School at Hallcroft - it is not suitable for increased traffic subsidence due to its close proximity to the River Idle and floodplain. This area historically used to be willow beds. In the past there has been a severe runoff of water on t is proposed. If building were allowed this would only increase as there would be a much reduced intake of water in to the land due to the hard surfacing.							
296	4	The main sewage pipe from hayton and Clarborough runs directly across the proposed site, down onto Bolham Lane pumping station and over many years has caused sigr Severn Trent. A major development on these sites would require a much increased capacity which the present system would be unlikely to accommodate.							
296	1 5	A mains water pipe runs along Bolham Lane up into the field along the boundary of site 37, abutting our property. Again, there has been major pressure and burst problen Anglian water can confirm, along with flooding this has contributed to the road's subsidence.							
296	6	A mains electricity supply also runs across site 37 from badgers Chase to a transformer on the boundary of the proposed site.							
296	7	The land on and adjacent to the proposed sites has extremely poor drainage and is liable to flooding, as seen with the severe runoff of water onto Bolham Lane in 2010.							
296	8	wildlife corridor runs through Retford along the River Idle, including site 37. It continues on to the Idle Valley Nature Reserve and SSSI.							
296	9	There would appear to be significant lack of infrastructure, services, highways and schools within the area to support the proposed levels of growth.							
296	10	We would strongly urge the planning department to look closely at any proposed development on these two greenfield sites that could impact so heavily on the local area							
297	1	Palmer road - There are serious concerns regarding the increase of traffic, particularly as we see considerable congestion twice a day around Carr Hill school and any inc arriving at or leaving the school. We already see heavy lorries using Tiln Lane to avoid the low bridges at Welham. Traffic backs up along Tiln Lane so far it blocks access really want to add a potential 1000 cars to this congestion?							
297	2	It cannot be right to develop land outside the borough boundary before using up the brownfield land.							
297	3	This development would have a serious detrimental impact on this area , changing the whole character of this part of Retford.							
297	4	With reference to criterion 4, There is clearly considerable impact on agricultural land is respect of sites 1, 46, 309, 37 and 512.							
297	5	These sites are also likely to affect the character of the area which is a quiet residential area (ref criterion 6)							
297	6	Reference is made to local road access and access to the wider road network. I have serious concerns for the above sites having an impact on the roads in this area particul congested and blocks access to and from Bigsby Road and Elmwood Close.							
297		Also there is a Primary school in the area and I have concerns over the safety of the children. Several hundred extra cars would be using these roads where we already hav Welham.							
298		At the present time I believe Clarborough/Hayton should be considered as dormitory villages with very little requirement for additional development.							
298	2	The current application at Corner Farm is in excess of the proposed 12 properties for the area and it should be noted that underground services at the lowest part of Hayton normal times and create flooding to properties in adverse weather occurrences.							
298	3	There are already a number of planning applications lodged for individual development in Hayton, with potential for further infill properties to follow over the coming yea							
298	4	The area is sadly lacking in facilities with the closure of shop and Post Office in Clarborough, and very little opportunity for employment in the close vicinity. If affordable h population to the area.							
298	5	Likewise the schooling facilities will need to be increased if a younger population is eventually attracted.							
298	6	As an alternative to the development of Corner Farm, maybe thought should be given to the development of Celery Fields, Clarborough, which has the advantage of vehic Broad Gores, giving distinctly safer movement of traffic without the complex problems that will be created at Corner Farm.							
299	1	We object in the strongest possible terms to the Council plans to develop sites 7, 46, 309 and 533 on the grounds of: No consultation with residents prior to the production completely alter the character of the area.							
299	2	Loss of habitat for wildlife, birds of prey, deer, foxes, rabbits, pheasant, partridge and many other small birds.							
299	3	Loss of trees; willow which is harvested and many other trees which surround the site.

299	4	Loss of good agricultural land.						
299	5	This is a quiet residential area. The development will completely alter and destroy the area.						
299	6	There will be a huge increase in traffic. Tiln Road is an already busy road. Lorries have to use this road to avoid the low bridge at Welham and would be turned in to an acc massively increasing traffic.						
299	7	Traffic would also increase to dangerously high levels along Palmer Road into Cornwall Road, onto Bigsby Road or Park Lane and Longholme Road, to Welham Road to avo						
299	8	The danger to road users and pedestrians would be immense.						
299	9	The already stretched services (Fire, Police, Hospitals/GPs) would not be able to cope The funding needed to increase these services would be massive.						
299		The proposed areas involve building outside the existing development envelope/the borough boundary.						
299		All brownfield sites should be developed for housing before developing the edge of town and beyond the borough boundary.						
300		We agree that enough land should be made available for 12 new dwellings.						
300		Our view would not change even though sites for 12 new dwellings would be met within this application for 19 dwellings.						
300		We feel that future developments could be considered on sites 170 & 258.						
300	4	Whilst we would not be opposed to further development on site 541 we are at a loss to see how this area could be considered for 14 dwellings.						
300	5	The site length between existing plots is approximately 120 yards which would show that plot width would be approx. 9 yards and the depth is 50 yards. From this we feel that should be considered for this location is four, if the existing access to the field is to be maintained.						
300	6	Whilst you have made it clear in the document under 'What issues cannot normally be considered', that impact on private rights of way will not be considered when grant experience over the past 40 years of having a dwelling with access on to a private drive, that this needs to be considered form a point of view of future maintenance responses on the authority needs to make this quite clear that in doing so the recipient must maintain the drive in front of their property to a defined standard.						
300	7	We feel that the open spaces identified on the plan should be protected from any future development.						
300	8	In connection with this we query why site 478, which covers a large open field and the Old Vicarage with possible development of two properties is not divided up into an smaller development site for the two properties, which for access reasons we assume would be on ground currently part of the Old Vicarage grounds.						
300	9	We think that new Gypsy/Traveller sites should be concentrated around existing locations to reduce the impact that these have on the area.						
300	10	We feel that these sites should be provided together for the same reason as given above.						
300	11	We are not aware of any sites in our area that would be suitable for development for this purpose.						
300	12	Looking at the section 'What issues cannot normally be considered', we feel that it is unreasonable to not enter 'Loss of value of your own property' and that when grantin be given to maintaining the character of the village and that many people have put quite an investment into their properties. One example of this would be to grant planni This could only be achieved by allowing the development of a 2/3 storey terrace, which would be completely out of keeping with the character of the village. One think you of planning permission is your duty to ensure that the proposed building is sympathetic to its surroundings.						
301	1	I am writing to object to the proposals for development of fields to the north of Badgers Chase and to the north east of Palmer Road, either side of Tiln Lane on the north s						
301	2	My objection is mainly based on the change this would have on the character of the area in which I have lived since July 2000. We specifically bought our house because it time was designated as green belt and therefore not eligible for future building.						
301	3	Changing these agricultural fields into development areas would add great strain onto the existing infrastructure, specifically surface water drainage of the area along Tiln						
301	4	Also the fields to the rear of our property are at a higher elevation than our property and would therefore lead to us being overlooked and overshadowed by any new bu						
301	5	It is my belief that there are many existing brownfield sites around the area that should be considered before the irrevocable loss of green belt land around the periphery of this land would be an abuse of the town's environment and character.						
301	6	Traffic congestion along Tiln Lane						
I am writing in respect of the proposed development of houses north of Badgers Chase, Retford and north of Palmer Road		I am writing in respect of the proposed development of houses north of Badgers Chase, Retford and north of Palmer Road, Retford. I have lived for the past 15 years on Ca

nt	nt							
302	3	Tiln Road is already and extremely busy road. Vehicles regularly drive at great speed along this road, even during school hours. The road is constantly used by HGV also services Carr Hill Primary School. During peak times of the school opening and closing the traffic situation is utter chaos. parents park their vehicles on both si and drivers' rage of vision. My own feelings are that an accident is waiting to happen on that stretch of road. i believe the new developments will also have to, at a augment the problem of traffic congestion in the area. With that in mind, traffic safety issues are my main concern. A child has recently been knocked down and k been made to Tiln Lane since this tragic accident. Do we really need to increase traffic in this area as this obviously runs the risk of such a tragic accident happenin						
302	4	Being a resident of the area and a car driver, during peak times it is almost impossible to get off Tiln Lane and onto Moorgate due to the amount of traffic already using th traffic. Increasing the amount of traffic can only increase the chances of an accident occurring and increase the frustrations already encountered by local residents who us						
302	5 1	The are suggested for the proposed developments is open countryside. How can we consider using such beautiful areas which are wildlife havens when so much within the development.						
302	6	I live within a stone's throw of the grassed area on Carr Hill Way. This grassed area was purpose built for the children on my estate to use. An increasing amount of children them are not even connected to the estate but they congregate on this grassed area and in effect, take over it. This creates a number of issues, an increase in antisocial be live on the estate not feeling safe to go and play on this area. An increase in the vicinity's population will, in my opinion, have a negative effect on the above mentioned ar children, teenagers who could and would use it seems only likely to make things worse for the residents of Carr Hill Way and the estate within which it sits.						
303	1	I am writing to voice my objections to the development of the around Badger's Chase etc. These are wonderfully quiet areas of good agricultural land and lovely views.						
303	2	I believe these areas should be left as agricultural land and the emphasis should be placed on developing brownfield sites. Building on this land would completely destroy t						
303	3	There are, after all, two old school sites which could be developed and exist within the town residential envelopes.						
303	4	Building in the Tiln Lane area would also considerably increase road traffic. Tiln Lane is already a busy road, which has difficulty in coping with heavy lorries that are div risk of accident to children at Carr Hill School.						
303	5	Indeed, I would imagine that Carr Hill School would struggle to accommodate more children. The whole road infrastructure of the areas not suitable for further developme						
303		Then there is the economic argument. Who is going to buy these houses? There are already enough houses for sale in this area, nobody is buying.						
304		I am writing to object to the proposals for development of fields to the north of Badgers Chase and to the north east of Palmer Road, either side of Tiln Lane on the north s						
304	2	My objection is mainly based on the change this would have on the character of the area in which I have lived since July 2000. We specifically bought our house because it time was designated as green belt and therefore not eligible for future building.						
304		Changing these agricultural fields into development areas would add great strain onto the existing infrastructure, specifically surface water drainage of the area along Tiln						
304		Also the fields to the rear of our property are at a higher elevation than our property and would therefore lead to us being overlooked and overshadowed by any new build						
304	5 1	It is my belief that there are many existing brownfield sites around the area that should be considered before the irrevocable loss of green belt land around the periphery of this land would be an abuse of the town's environment and character.						
305	1	We write in response to the Council's LDF to raise objections and concerns about the proposed development adjacent to our property on Park Lane, Retford. Sites 7, 46, 3						
305	2	Firstly we would like to point our the adverse effect any such development will have on the residential amenity of neighbours, by reason of noise, disturbance, overlooking						
305		The proposal will provide an unacceptably high density/overdevelopment of sites, especially if it involves the loss of garden/farmland or the open aspect of the n						
305	4	We understand residents of The Drive have a covenant restricting development on the field in front of their houses (site 46) and would be interested to know how or development without the backing of the remaining residents for the covenant to be removed?						
305	5 1	Part of this site and the adjacent sites 7 and 309 are classed as being within flood zones 1 and 2, with site 309 being identified as a SSSI and site 46 being formerly identified consideration as there are much more favourable sites for development. Indeed your own recommendations are that if plans were to incorporate these areas there may l						
305	6	The land in question is, in the main, open farmland, something that we are rapidly becoming short of in Retford and the surrounding villages, due to continued developm effect it will have on the character of this particular area is extremely detrimental.						
		The loss of existing views form neighbouring properties would adversely affect the residential amenity of neighbouring owners.						

void the low bridge at Welham. The same road the road which obviously limits the road width stage make use of Tiln Road. This will only on Tiln Lane. No noticeable improvements have n.

305	8	Any development would adversely affect highway safety and the convenience of road users. Tiln Road is extremely dangerous and indeed in your own feedback from Retfor concern was raised on several occasions about the 'need to improve HGV traffic flow on Tiln Lane', ' traffic calming on Tiln Lane' and 'Tiln Lane cannot cope with the amoun development on such a massive scale no amount of measures will improve road safety due to the increased flow of traffic the development will generate. We have already vehicles over 12'6" have to use Tiln Road due to the low bridge at Welham and this causes congestion at the junction with Moorgate Hill on a continual basis and this is con by parents of pupils at Carr Hill School. Any proposed development would exacerbate the existing problems of which neither can be remedied without either diverting HGV Bawtry, to the north (all roads between are restricted to non-HGV only) or closing down Carr Hill School, which raises the question "Where do you propose the children of educated?". The cost implications of a proposed 'Welham Bypass' are unimaginable in this current economic climate, let alone the detriment this would cause to the surro							
305		here are numerous sites that could and indeed have been redeveloped within Retford Town, without new developments that would increase the boundaries of Retford a eighbourhood, indeed the whole aspect of this historic market town. Oakdale Homes are currently developing land off Thrumpton Lane, housing has already been approv arker's Nurseries), Bridon Place is being developed, there are sites on North Road (formerly St Giles School), proposals for redeveloping the former King Edward School sit ormer Court House in Retford and further development of the Rector's Gate site in Hallcroft.							
305	10	It would surely be more sensible to develop closer to major roads such as the A1 where traffic would not become so congested and not have to move through Retford whi							
306	1	As residents of Palmer Road, we strongly object to the proposed development of houses on land bordering Palmer Road etc.							
306		This is good agricultural land, full of wildlife, deer, badgers, foxes, rabbits and loads of trees of interest to wild birds etc.							
306		It will completely alter and destroy a quiet residential area.							
306		New houses are not selling in the Retford area, there are many been empty for years.							
306	5 There is no work in this area now and factories are closing, moving out. Where are jobs coming from for new houses?								
306	6	Traffic increase will put more traffic on a very busy road - Tiln Lane. Lager lorries use Tiln Lane to avoid the low bridge at Welham. There is a primary school on this road with the second							
		users and pedestrians. Its busy enough.							
306		Services such as Police, Fire, Ambulance, hospitals, GPs etc. would not be able to cope. Where is the money coming from for extra facilities?							
306 306		It is hard enough getting out of Tiln Lane or Longholme Road at peak times now. More traffic would make it very dangerous.							
306		Houses that are empty now should be filled before new ones are built. Money should be given to people to be able to purchase homes for first-time buyers, not put into more new homes on greenbelt land.							
307	10	I would like to object against the plans because the access in the traffic will be triple and the roads aren't built for anymore.							
307	_	Also the trees in this area make it one of the greenest still left in Retford. Protect the environment.							
308		We would like to comment on possible building plans for site no. 520, land north of Carlton-in-Lindrick. Current use is agricultural land. We are totally opposed for all the r							
309	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?							
309	2	with reference to the meeting held at the village hall, no one was in favour of any further development or expansion. we, as a community are fully stretched with local am crowded school, and have no requirement for extra development. surely the multiple properties for sale could easily fill this niche. why build more and put a further strain							
309	3	as far as i was made aware corner farm development has been granted for 21 dwellings?							
309	4	further development is neither required nor sustainable.							
309	5	i consider the street lighting switch off to be incredibly dangerous and inconvenient. as a shift worker entering and leaving the village at all hours i find visibility ridiculous ny car. i also worry for my wife's safety in ecliptically conditions							
309	6	secondly we are continually bombarded with over laden scrap metal merchants raiding our drives, gardens and yards. with the added bonus of zero street lighting surely i escalates into fully fledged burglaries?							
309	7	all sites should be protected. redundant factory sites/former school grounds provide a more suitable alternative.							
309		REMOVED							
309	9	again why the requirement? it is their lifestyle choice.

214		I think location 35 is unsuitable because the local school does not have the capacity for more children and it has no room to expand. Also there are no play facilities on the							
311	1	number of extra cars this development may bring would exacerbate the present difficulties on getting out of the estate.							
311	2	believe sites 26,45,371,151 and 218 would be far more preferable for housing in the future as they could tie in with the proposed mixed sites close by.							
311	3	Deption A							
312	1	A local referendum and significantly more advertising about what your plans are and why							
312	2	ou must be absolutely kidding unless you can build a first floor in the sky which directs all traffic out of Worksop then you need to look after what you have got first.							
312	3	None							
312	4	At this time and certainly for the next 10 years none, look after what you have got first.							
312	5	None							
312	6	Absolutely 1 zillion per cent they should							
312	7	There is already a significant influx of people entering into Worksop which is not doing the town any favours there are already many thinking of leaving and the ones that							
312	8	My above comments should be suffice.							
312	9	Option B: Focused in just one of the above towns							
312	10	REMOVED							
312	11	Not sure							
312	12	Nottingham							
	42	This development will encroach on the dividing land between Worksop and Carlton in Lindrick and Wallingwells. This will only further contribute to the 'urban sprawl' and							
312	13	further.							
312	14	The area proposed in productive agricultural land farming wheat and oilseed rape, agricultural land provides employment which will be lost as a result of this development							
312	15	The area proposed is bordered by Owday Wood/Rough Piece and Owday Plantation which are sites of importance for nature conservation. The woodland is at present unt will cause significant disturbance to these valuable woodlands. The area 'Gateford Hill Park' which includes Dog kennel Plantation is a mature landscaped area.							
312	16	The public footpath/bridleway entering the area from Montford Road and stretching to Owday plantation is boarded by beautiful old trees and hedgerow which are impor environment. This bridleway is used by many walkers daily from the estate and many visiting recreational users.							
312	17	The loss of this countryside amenity would be detrimental to the entire area. This land is of the same importance to us, and the wildlife as Dog kennel Planation.							
312	18	Our 'local' shops which are sites off the estate are already busy. Additional housing will only cause increased pressure on these already busy and dangerous road junctions. The main amenities e.g. supermarkets, shops, doctors and dentist are all situated in the town especially when Tesco moves. Access to the town is only practical by car and Congestion in and out of town will only increase therefore as a result of this development.							
312	19	The junction between Ashes Park Avenue and Gateford Road is already dangerous due to heavy traffic levels. The increase in traffic levels on the estate will generally redu							
312	20	This development will require detailed consideration as to the provision of schools and nurseries as we feel our schools are already too or over capacity.							
313	1	I think location 35 is unsuitable							
313	2	Option A							
314	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?							
314	2	no i strongly disagree with the above as i think our village is over-populated as it is with local school being overcrowded. I for one don't want to see my village turned into a							
314	3	we currently do not have a local shop and only have one public house							
314	4	I also know for a fact that the proposed development site already has problematic drainage and therefore any extra properties would add to this problem.							
314	5	NO							
314	6	None we are over-developed as it is.							
314	7	We would be concerned about the extra traffic coming down smeath "LANE" as it is already very heavily trafficked with L.G.V.s and local traffic. also as we live on sme through our village after dark which leads me onto the fact that we have our street lights turned off around midnight. As a driver that works unsocial hours i know how parked cars if i have to turn my full beam off, (i feel it is an accident waiting to happen).

315		definitely more employment because so many people leave Worksop each day to go to work.							
315	2	I think location 35 is unsuitable because there is inadequate facilities for children on the estate at present - such as swings and roundabouts without going off the estate.							
	-	Access on and off the estate is dreadful and dangerous. For those people who drive to the M1 north the A57 is jammed at most times. I find it amazing that anyone who had any training in planning would have							
315	3	allowed the estate to grow as it has already without addressing the above problems let alone consider to increase the population and problems further.							
315	4	There should be more employment in the areas of high unemployment							
315	5	I believe housing and industrial sites should be kept separate							
315	6	Yes I do we want this area to remain open and a place for leisure							
315	7	People move here because of it's proximity to some lovely rural areas but with motorway access. Don't spoil it.							
315	8	Option A: Spread between Worksop; Retford and Harworth Bircotes?							
315	9	Around existing sites because that's where they have their families and roots							
315	10	together - so their communities can remain together							
316	1	Yes							
316	2	Definitely more employment growth to address unemployment levels before considering housing growth							
316	3	Site 35 does not have suitable infrastructure							
316	4	W1, W12, W13							
316	5	Broadband service in the town needs to be improved before adding further housing to the network.							
316	6	Hospital should definitely be maintained to cover the expansion							
316	7	Yes - Restaurants near the railway station with housing behind and then wildlife space behind.							
316	8	Option A: Spread between Worksop; Retford and Harworth Bircotes?							
317	1	Insufficient consideration has been given to the transport infrastructure in Worksop especially around the Gateford/Shireoaks area. There needs to significant investment in the road system before further large s							
517		house building takes place.							
317	2	More industrial development is required. Currently large numbers of people commute to work in Sheffield area causing congestion. Better rail links required or commuters							
		I believe that site 35 is unsuitable road system around Gateford is insufficient for current population there is significant congestion at peak times. There are only 2 exits from Gateford (Ashes Park Ave). Additional							
317		construction of hundreds of houses would cause more congestion and road hazard. What proposals are there to address this issue,) t would destroy woodland and public footpaths as well as efficient farm land at							
		time of increasing food prices and potential future shortages							
317		Brownfield sites (old colliery sites etc.) and areas closer to the by pass							
317	5	I have insufficient knowledge in this area							
317	6	The open spaces on site 35 should be protected especially the woodlands.							
317	7	The infrastructure of Worksop is insufficient to support significant housing development. Perhaps sites closer to the Al should be considered first given that most people will be commuting to Sheffield/Nottinghar							
		areas.							
317	8	Single Use							
317	9	Option A: Spread between Worksop; Retford and Harworth Bircotes							
317		Existing sites							
317 317	11	I have insufficient knowledge of council responsibilities.							
517	12	None							
317	13	The development will encroach on the dividing land and open space between Worksop, Wallingwells and Carlton-in-Lindrick contributing to urban sprawl and destroying public open space.							
317	14	The area is productive agricultural land which is required for food production at a time of concern about future food production. This could also adversely impact upon the employment of agricultural workers an contractors.							
317	1 15	Site 35 is bordered by Owday wood, Rough Piece and Owday Plantation which are sites of impOrlance for nature conservation. The woodland is currently untouched by housing but significant disturbance would o							
		to these valuable woodlands by large scale housing development. The area known as Dog kennel Plantation and Gateford Hill is matured landscaped area and would also be lost to this proposed development							
		The public footpath and bridleway (and access road to the Nursing Home) that runs along Montford road and through the woodlands is bordered by a number of beautiful old trees that would be destroyed by the							
317	16	development (even if preservation orders were placed on them). The loss of these woodlands, trees and open space would have a detrimental impact upon the environment, the wildlife and public that live in the							
		area							
24-	47	A development of 700 houses would place adverse pressure on the sewerage ad drainage systems for the area. There is already a significant problem with drainage overflow from the drains that run parallel/adjac							
317	17	to St Mark's close which frequently overflow and flood in heavy rain.

Responde		Answer								
nt	nt									
317	18	The case for the need for an additional 700 houses on site 35 and in the Worksop area has not been proven as there is insufficient economic and industrial development in developments								
317	19	The local shops and amenities are sited off the main Gateford estates and area ready busy to point of reaching capacity. Additional housing, especially of this scale, will plan nadequate road system around Gateford/Gateford Road area. The junctions onto Gateford Road from Ashes Park Avenue and Lady Walk are already congested and hazard development would place a dangerous strain on these and the Edison Park/Carlton Road junctions. Given that the majority of those living on the proposed site 35 develop real issue to those of us that live here. The main roads in the area are also poorly suited to an increase in traffic commuting to the Sheffield/Doncaster/Nottingham areas. tself from Ashes Park Avenue are small estate roads not suitable for such a huge increase in traffic. These traffic issues would have a detrimental impact on the environme walking to school or out playing								
317	20	The capacity of schools, nurseries and other services in the area has been reached and would require further investment.								
318	1	I think location 35 is unsuitable for development in the future								
318	2	Option A								
319	1	I think location 35 is unsuitable for housing development in the future								
319	2	Option A								
320	1	Not really. There seems to be no consideration that existing brownfield sites in the area would be much more suitable and less damaging to the environment than new gree								
320	2	I believe Gateford in particular is already highly populated and the estate around Ashes Park Avenue. Is already at its maximum size regarding access in and out of the esta only at the moment								
320	3	Location 35 is totally unsuitable								
320	4	The estate access restrictions to 2 points only is already causing traffic problems. 700 new houses would almost double the problem								
320	5	This development would also destroy the public footpath thought the fields and through to Owdy lane. This public footpath has been in place for decades is in a very people								
320	6	The development completely denies any access to the countryside enjoyed for many years. Access cannot be made any other ways as the land of the nursing home a private land								
320	7	The greenfield location is beautiful and adds completely to the large estate already in place. The estate has a very nice accompanying countryside location								
320	8	Option A								
320	9	Absolutely not, after the problems caused a few years ago when the land off Ashes Park Avenue								
320	10	Controlled sites away from estate developments. They do not need to be close together								
320	11	I wish to object strongly to the development of any additional houses at site 35 for the following reasons: A) Extension of town boundary and urban sprawl. The current Ga town boundary. Development on site 35 will, therefore extend beyond the boundary and there is a concern that Worksop will eventually consume Wallingwells and contir Lindrick.								
320	12	B) Loss of amenity for children, residents and visitors. The proposed site is bordered by Owday Wood/Rough Piece and Owday Plantation, which are sites of importance fo present untouched by housing. Development on site 35 will cause significant disturbance to these valuable woodlands.								
320	13	The public footpath/bridleway entering the area from Monford Road and stretching to Owday plantation is bordered by beautiful tree and hedgerows, which are importan The bridleway and footpaths are used daily by many walkers, both from the estate and also by visiting recreational users.								
320	14	Development on this would result in a loss of amenity for local residents and would be detrimental to the entire area.

324		Existing ones								
324		Fogether								
325	1	Yes.								
325	2	Option A								
325	3	164 and 165 make sense to grow.								
325	4	Yes at least.								
325	5	Upgrade in the play area would be nice.								
325	6	Existing sites.								
325		Together								
326		Option A								
326	2	I do not consider that there is any need for further housing in Gamston as existing houses are often on the market for a long period of time before they are sold.								
326		14 out of 22 people (63.6%) stated in the Gamston Future Development Questionnaire ("Development Questionnaire") that no further housing was required.								
326	4	If new housing is required for Gamston then brown field sites should be used before existing green field sites. The majority of respondents to the Development Questionn								
		brown field sites and not development of existing green field sites.								
326	5	The obvious site to develop would be Site 410, the site of the former Bramcote Lorne School which could easily accommodate five new houses and which already has built								
		site would also be well away from existing housing.								
326	6	The next best site to develop would be Site 412/413 although this site is a green field site. However, this site is on the east side of the Great North Road and further away interfere with aviating properties then Sites 577 on 524.								
226		interfere with existing properties than Sites 577 or 534.								
326 326		Site 577 should not be being developed for the following reasons: 1) This site is an existing green field site and is in the conservation area. 2) This site is very close to existing housing including my own house. My living room windows are only around 12 feet away from the border of this site.								
520		 Any new housing on this site would overlook my property, block out light from my windows and interfere with the view from my living room/dining room and bedroom 								
326	9	privacy and interfere with my quiet enjoyment of my property. It would also devalue my property.								
		4) There would be major problems accessing any new houses built on this site as it can only be accessed by a narrow lane next to the old persons bungalows and which is a								
326	10	me.								
226	11									
326	11	5) Any new housing would be out of character with the other houses nearby which are large detached houses with large gardens. This would also affect the character and								
		The Council needs to introduce a 30mph speed limit through the village for the following reasons: a) The A638 through Gamston is a very dangerous road. It is basically tw								
326	12	the middle. Therefore, many cars, lorries and motorcycles approach the bend at 60mph or higher, brake at the last moment, and then accelerate from the bend as quickly								
		with motorcyclists who use this piece of road as a racetrack.								
		b) The fact that vehicles approach the bend on the A638 in Gamston at great speed from both directions often means that vehicles are in the centre of road when they dri								
326	13	an accident occurring on the bend. A young man from Tuxford was killed in a head on collision on the bend due to a car driving at great speed from the Retford direction.								
		c) The chance of an accident happening on the A638 is also increased by the fact that (travelling from the Retford direction) there are two right turns. The first right turn is								
326	14	second right turn is into Gamston village just before the bend. I always feel very uncomfortable about using the right turn into Gamston village because I consider that the								
┟────┤		vehicle travelling at great speed from Retford, or by a vehicle cornering at high speed from the Tuxford direction.								
326	15	d) There are young children who live in Gamston or who attend the local school. They have to cross the road to reach the school. This fact alone justifies a 30mph speed li								
		travelling south into Gamston to warn them that there is a school in the village around the bend and so they need to slow down.								
326 326	16 17	Why do other similar small villages in North Nottinghamshire (or Nottinghamshire as a county) have speed limits but there are no speed limits for Gamston?								
326	17	I understand the parish council in Gamston are prepared to make a financial contribution to the cost of imposing speed limits in Gamston. Yes								
520	10	The obvious site to develop would be Site 410, the site of the former Bramcote Lorne School which could easily accommodate five new houses and which already has built								
326	19	site would also be well away from existing housing.								
		It would also be well away from existing housing. It would be nice to see this site developed rather than the old Bramcote Lorne School being boarded up or knocked down. If housing is built on this site then it would also								
326	20	used by the rest of the village such as a village hall, park/playing field and even sports facilities such as tennis courts.

328	1	I am not aware for the need for more housing to become available.							
328	2	I do believe that the town should have a shopping centre & an entertainment park like Centretainment in Sheffield.							
328	3	I know that location 35 unsuitable for various reasons.							
328	4	Locations W13, 195, 343 & W8							
328 328		28, W6 & Gateford Residential Nursing Home, The Lawn, The Rookery, Gateford Hall Farm, California Farm, & Ashes Wood should all be protected.							
328	0 7	Now I remember that this government said we will become a greener country & what is being proposed is totally against this.							
328	-	I do not believe that we need more housing in Worksop, it is a nice town as it already is. We should be protecting what we have. (Greenery & nature).							
328		Option A							
	10	No Together so that people will see the advantages as well as disadvantages.							
329	1	Yes, it all seems fairly reasonable.							
329		Option A							
329	3	I do not agree.							
329		These are rural villages - new housing on this scale will neither complement or enhance particularly in Hayton where individual properties give the village its distinct character.							
329		There would be extra traffic on already dangerous and over burdened roads.							
329		Development would result in loss of hedgerows & habitats and the green infrastructure of the villages would be adversely affected.							
329	7	Furthermore, there is insufficient drainage & sewerage capacity - both villages have suffered severe flooding problems in recent years.							
329	8	No, my view would not change, though if there had to be development it would be preferable on the edge of the village as per Corner Farm.							
329	9	I would not like to see any site developed on this scale.							
329	10	No							
329	11	Yes, I agree that these open spaces identified on the map should be protected.							
329	12	I think that any new sites should be concentrated in and around existing sites because the necessary services and facilities are already in place.							
329	13	These should be provided together as their requirements are very similar in that both require a 'pitch', safe vehicular access to roads, appropriate landscaping of the area etc.							
329	14	No							
330	1	Option A							
330	2	There should be no more houses in the villages.							
330		The plots indicated are all outside the previously established building lines in conflict with previous planning policy.							
330	4	Many properties will be overlooked & lose their privacy							
330	5	Extra traffic would be generated on village roads which are already very busy particularly on Smeath Lane where road safety is already a major concern due to all the heavy lorries.							
330		Road safety is also a concern around Hillview Crescent where children are walking to and from school.							
330	7	Infrastructure will be inadequate to support further development particularly drainage.							
330	8	The housing densities proposed are inappropriate in these village settings.							
330	9	If the application is granted it purely reinforces our arguments that no further developments should be permitted.

330	16	Yes
330	17	Yes - the amenities and infrastructure for such sites are already in place and extending them would create less disruption than developing new sites.
330	18	Together as the amenities and infrastructure for such sites are already in place and extending them would create less disruption than developing new sites.
331	1	I am a resident in Clarborough and wish to express my views on the proposed building plans for Clarborough and Hayton. I do not agree with the houses that are being proterrible impact on the village for many reasons.
331	2	Firstly, the traffic flow. The suggestions for Site Reference 170 and 258 on the housing plan will connect the two ends of Broad Gores. This will produce a through road wh sacs. Both Smeath Lane, Big Lane and both ends of Broad Gores are very narrow roads which are unsuitable to increased traffic flows. In addition any contractor traffic cextremely dangerous if not impossible. The access from Smeath Lane and Big Lane onto the A620 can already be hazardous, especially at peak times. With the 30mph sp right out of Big Lane towards Retford, especially, is already a dangerous procedure due to the short sight lines along the A620 towards the village centre.
331	3	In times of snow (eg December 2010) local roads are not gritted by local councils. This left Smeath Lane, Broad Gores and Gill Green Walk in a dangerous condition for abo vehicles, mostly carefully, negotiated snow, ice and ruts. Increased traffic flow would make an accident inevitable. I know the weather conditions also had the same effect having gritters.
331		The land concerned is liable to flooding during heavy rainfall and little has been done to alleviate this since the most recent floods which affected a number of areas of the facilities in the village, especially on the western side of Main Street, ie in the area where the largest concentration of housing is suggested and there is already some concerted the water supply.
331	5	The Primary School is currently full, additional housing and families could lead to serious overcrowding. There is currently a serious problem with parking in the vicinity of t school day. Any further numbers in the school will only make this worse.
331		The overall road provision in the village is too small for much extra traffic. The A620 is already a very busy road with many large vehicles exceeding the 30mph speed limit Welham corner are well known as HGV drivers continue to ignore warning signs for the low bridge. Tiln Lane - Smeath Lane is the only route which allows high sided HGV' Gainsborough as it avoids the low railway bridge in Clarborough, despite it being an unclassified country lane. There are a large number of these travelling the road in each section is the road wide enough to allow two HGV's to pass and this with care. Much of Smeath Lane does not allow passing and vehicles have to use the road verges. Or these vehicles overturning into ditches. It is therefore, a dangerous road.
331	7	As vehicles enter the village from Retford along Smeath Lane there have to cross a "humped back" canal bridge. Many do this at some speed despite the one way nature v immediately come into residential housing where cars are turning in order to enter Broad Gores or private drives. Putting nearly 100 houses onto Site References 170 and movement at the junction between Smeath lane and Broad Gores which will increase the dangers of road transport.
331	8	There is no shop, post office, leisure facilities or medical facility in the village. This in turn would generate extra traffic through the village and on the roads into Retford. The Indeed, in recent months several jobs have been lost due to the closure of the shop and the Kings Arms public house. If the planning application for Corner House Farm (c Hill, Site Reference 171) is successful, then even more jobs are likely to be lost.
331	9	The timing of buses means that anyone wishing to make even a short visit to Retford and carry out business there (eg a visit to the post office) faces a 2-3 hour round trip.
331	10	For any resident without their own transport, including teenagers, there is no opportunity to access any event in Retford in the late afternoon and evening. The use of persthrough and into and out of the village.
331		REMOVED
331	12	The junction at the top of Smeath Lane/Corner Farm and the bottom of Clarborough Hill is a danger with the amount of traffic flow now, not to mention the poor visibility hill. Only last month there was a serious accident at this junction where all 3 emergency services where called to overturned vehicles.
332		I am writing to express my concern for the plan to build 93 houses on sites 170 and 258 the end of Broad gores Clarborough and the impact it will have on the lovely quiet
332	2	Clarborough is a small village with a population of approx 500 people i believe and this development potentially could increase the population by half again maybe more !! objecting to this development and hope that you will give them some consideration

Reference	number	
Responde	Comme	Answer
nt	nt	
332	3	Firstly i am a governor at (No Suggestions) school which at present is almost fully subscribed, we have a number of concerns over child safety due to the parking and acceregularly tracks back onto main street at school times causing congestion and a danger to children leaving school as traffic passes through the village. There is also not a su although we are in the process of making a path from the village hall so that parents can park there if the school was to expand further in the future then this would not be dangerous parking is an accident waiting to happen for someone's child and steps are being taken where possible to prevent this. I feel that due to the location of the school location is not an option and although you could argue that residents on this new development are within walking distance you cant prevent them dropping there children etc.
332	4	Secondly traffic in the village is a constant problem increasing the population further would add to congestion/traffic in a village not created for a greater capacity !!
332	5	Thirdly the drainage and sewage on St johns /Broad gores is very poor with many residents suffering from blocked drains on a regular basis adding more houses would sur
332	6	Fourthly the water supply to Broad gores / St johns is also poor with leaks and poor pressure and extra houses would add to this further etc.
332	7	Fifthly and one of the important issues is the recent flooding of a number of houses in the village when the beck overflowed the beck runs around the sites and flooding vector the land soaks up the rain water turning it into a partially concreted area would just add to more water to fill the beck putting residents at risk.
332	8	Also traffic would become a factor on broadgores with the two parts joining making it a cut through from smeath lane avoiding main street at busy times etc during the sr barely passible for a number of weeks if such a large number of houses were to be reached from this one road then this would need to be considered. Both broad gores a large volume of traffic with a number of regularly parked cars causing problems at busy times already without increased traffic flows!!!
332	9	For anyone joining the village the public transport network is poor with only a limited bus service there is no longer a shop or post office only one public house and no job residents would like to keep it this way, I moved here with my family for that reason and don't want to see it spoilt due to overcrowding!! The parish council suggested the maximum capacity the village could cope with and i believe planning has already been granted on corner farm for more than this number already !!
333	1	I do not agree to the 12 houses that are proposed to be built as from the feedback from the questionnaires. After attending the Parish Council meeting last month I was i Corner Farm, at the bottom of the hill. As I believe this is already going ahead no matter what, I certainly do not want to see more houses built on plots of land in Clarbor
333		Primary School - The Primary School is currently full, additional housing and families could lead to serious overcrowding. There is currently a serious problem with parking and end of the school day. Any further numbers in the school will only make this worse.
333		Sewage - There is a history of poor sewage facilities in the village, especially on the western side of Main Street, ie in the area where the largest concentration of housing
333		Water Supply - There is already some concern on St John's Drive about the quality of the water supply.
333		Broadband - The village is so far from the telephone exchange in Retford that much online provision is not available in the village or speeds are too low for meaningful int you are likely to get either a programme which stops every few minutes to load the next section or a message saying there is not enough bandwidth to load anything at al concern.
333	6	Flooding - The land concerned is liable to flooding during heavy rainfall and little has been done to alleviate this since the most recent floods which affected a number of a
333	7	Jobs - There is no provision for jobs in the village. Indeed, in recent months several jobs have been lost due to the closure of the shop and the Kings Arms public house. If Farm (on the corner of Main Street and Clarborough Hill, Site Reference 171) is successful, then even more jobs are likely to be lost.
333		Traffic Flow -The suggestions for Site Reference 170 and 258 on the housing plan will connect the two ends of Broad Gores. This will produce a through road which chang Both Big Lane and both ends of Broad Gores are very narrow roads which are unsuitable to increased traffic flows. In addition any contractor traffic during a construction impossible.
333	9	The access from Big Lane onto the A620 can already be hazardous, especially at peak times. With the 30mph speed limit, and much does not, turning right out of Big Lane dangerous procedure due to the short sight lines along the A620 towards the village centre.
333	10	In times of snow (eg December 2010) local roads are not gritted by local councils. This left Big Lane in a dangerous condition for about 4 weeks, with many near misses as ice and ruts. Increased traffic flow would make an accident inevitable.
333	11	Public Transport - Buses into Retford are Monday to Friday: hourly service between 0724 and 1428 hours; Saturday: as above plus one extra bus at 1658 hours; Sunday: n Friday: hourly service between 0930 and 1430 hours, then 1555 and 1750 hours; Saturday: as above; Sunday: no service. The timing of buses means that anyone wishing t carry out business there (eg a visit to the post office) faces a 2-3 hour round trip.
333	12	For any resident without their own transport, including teenagers, there is no opportunity to access any event in Retford in the late afternoon and evening. The use of pe through and into and out of the village.

333	13	Village traffic - The overall road provision in the village is too small for much extra traffic. The A620 is already a very busy road with many large vehicles exceeding the 30 dangers of Welham corner are well known as HGV drivers continue to ignore warning signs for the low bridge.
333	14	Tiln Lane - Smeath Lane is the only route which allows high sided HGV's up to 40t to travel from Retford to Gainsborough as it avoids the low railway bridge in Clarborough lane. There are a large number of these travelling the road in each direction every day. Only in the Tiln Lane section is the road wide enough to allow two HGV's to pass a not allow passing and vehicles have to use the road verges. Over the years this has resulted in a number of these vehicles overturning into ditches. It is therefore, a dange Retford along Smeath Lane there have to cross a "humped back" canal bridge. Many do this at some speed despite the one way nature which their size imposes on the br residential housing where cars are turning in order to enter Broad Gores or private drives. Putting nearly 100 houses onto Site References 170 and 258 will create much m between Smeath lane and Broad Gores which will increase the dangers of road transport.
333	15	Facilities - There is no shop, post office, leisure facilities or medical facility in the village. This in turn would generate extra traffic through the village and on the roads into
333	16	REMOVED
333	17	The junction at the top of Smeath Lane/Corner Farm and the bottom of Clarborough Hill is a danger with the amount of traffic flow now, not to mention the poor visibility hill. Only last month there was a serious accident at this junction where all 3 emergency services where called to overturned vehicles.
334	1	I do not agree to the 12 houses that are proposed to be built as from the feedback from the questionnaires. After attending the Parish Council meeting last month I was ir Corner Farm, at the bottom of the hill. As I believe this is already going ahead no matter what, I certainly do not want to see more houses built on plots of land in Clarbord
334		Primary School - The Primary School is currently full, additional housing and families could lead to serious overcrowding. There is currently a serious problem with parking and end of the school day. Any further numbers in the school will only make this worse.
334	3	Sewage - There is a history of poor sewage facilities in the village, especially on the western side of Main Street, ie in the area where the largest concentration of housing i
334	4	Water Supply - There is already some concern on St John's Drive about the quality of the water supply.
334	5	Broadband - The village is so far from the telephone exchange in Retford that much online provision is not available in the village or speeds are too low for meaningful inter you are likely to get either a programme which stops every few minutes to load the next section or a message saying there is not enough bandwidth to load anything at all concern.
334	6	Flooding - The land concerned is liable to flooding during heavy rainfall and little has been done to alleviate this since the most recent floods which affected a number of a
334	7	Jobs - There is no provision for jobs in the village. Indeed, in recent months several jobs have been lost due to the closure of the shop and the Kings Arms public house. If Farm (on the corner of Main Street and Clarborough Hill, Site Reference 171) is successful, then even more jobs are likely to be lost.
334		Traffic Flow -The suggestions for Site Reference 170 and 258 on the housing plan will connect the two ends of Broad Gores. This will produce a through road which change Both Big Lane and both ends of Broad Gores are very narrow roads which are unsuitable to increased traffic flows. In addition any contractor traffic during a construction impossible.
334	9	The access from Big Lane onto the A620 can already be hazardous, especially at peak times. With the 30mph speed limit, and much does not, turning right out of Big Lane dangerous procedure due to the short sight lines along the A620 towards the village centre.
334	10 1	In times of snow (eg December 2010) local roads are not gritted by local councils. This left Big Lane in a dangerous condition for about 4 weeks, with many near misses as ice and ruts. Increased traffic flow would make an accident inevitable.
334		Public Transport - Buses into Retford are Monday to Friday: hourly service between 0724 and 1428 hours; Saturday: as above plus one extra bus at 1658 hours; Sunday: no Friday: hourly service between 0930 and 1430 hours, then 1555 and 1750 hours; Saturday: as above; Sunday: no service. The timing of buses means that anyone wishing to carry out business there (eg a visit to the post office) faces a 2-3 hour round trip.
334	12	For any resident without their own transport, including teenagers, there is no opportunity to access any event in Retford in the late afternoon and evening. The use of per through and into and out of the village.
334	13	Village traffic - The overall road provision in the village is too small for much extra traffic. The A620 is already a very busy road with many large vehicles exceeding the 30r dangers of Welham corner are well known as HGV drivers continue to ignore warning signs for the low bridge.

335		Yes
335		Option A: Spread between Worksop; Retford and Harworth Bircotes?
335	3	I believe the village should see between 10-15 over 18 years.
335 335		410 and 577 are the most suitable sites for building All should be protected
335		Yes, this is currently standing vacant and needs developing for housing or employment
336		The Parish Council have asked me to write formally to you outlining their position with regard to achieving planning consents for a public house and restaurant within our has been achieved for the Station Rd site. This was only after appeal and with some opposition. The original site identified previously and refused both by you and on apper with least disruption to our community (site number 102 close to the Village Hall). The Council have already conducted a survey of the community and ascertained the nee site proved well supported as documentation at the time would confirm. I hold various letters written to The Council since your consultation event urging them to secure, restaurant and mindful of these requests and The Parish Councils aspirations to achieve the community's wishes, we would ask that you note our request in your final doc
336	2	Multi or Individual applications should be incorporated within any total number allocated.
336	3	The Council has initiated the commencement meeting to prepare and adopt a Village Design Statement.
336	4	The Councils submissions for Green spaces already submitted.
336	5	The Community/Council submissions for the site of a Public House already submitted.
336		The Parish Council consider that the survey result of the community on further housing should be noted.
336	7	The Parish Council have elected 3 Councillors and Clerk to attend BDC meetings on 18 and 25th January 2012 with places confirmed.
337 337	1 2	They all seem fair to me and seem to cover most aspects The amount of housing allocated up to 2028 seems low I would have thought that a percentage nearer 30% would be favourable.
337		But we do need to make sure the infrastructure can cope - i.e. the inner ring road gets totally clogged up from London Road round to Moorgage. Could an outer ring road town be considered - going across Welham Road (over the railway near Leverton Road) then across Tiln Lane to hit the Great North Road just north of Hallcroft. That wou Lane because of the low bridges and keep all the lorries going to Gainsborough etc. out of town - or would that just be ridiculously expensive?
337	4	By the way, the housing we need are family type housing plus some over 55s units. We do not need any more flats - the ones in the town centre are sitting empty.
337	5 1	It seems to me that the sites off to the south west are rather stuck out on a limb and the Ordsall area generally seems to be just a sprawl that is getting further and further Retford.
337	6	I would think it would be better to use more obvious infill areas such as 489, 488 and particular the areas to the north east of town 46, 309.
337	7	The area to the north east of town is very accessible to the town centre and hasn't grown outwards from the centre to the extent that has happened to the other sides of
337	8	The site on the North Road seems to me to be the most favourable as the main road links are easy. However a roundabout may be needed on the North Road to ease acce
337	9	The site to the south west at Ordsall seems to be cut off from the rest of town and would cause more problems on the narrow roads through Ordsall.
337	10	Although I appreciate the ease of getting to the A1 from site R2 but that would be near Elkesley and there are enough problems with getting on and off the A1 in that area
337	11	See my answer to Q11 above
337	12	It would make sense to build housing on the infill areas so as to keep a sensibly shaped envelope without bits sticking out on a limb.
337	13	There seem to be a reasonable number of open spaces but not enough that we can afford to lose any so they should be kept back from development

337	14	Option A
337	15	I think they should be concentrated around existing sites. I believe there are four in Bassetlaw and understand that there is space around them for some expansion.
337	16	I think they should be together.
337	17	Sorry not sure
338	1	We have strong reservations regarding Criterion 1 of the Site Assessment Criteria which looks to question if the local community is supportive of the development of poter that such an approach appears in theory to be in line with the emerging localism agenda of the Government we consider in practice this is fraught with difficulty and is like We welcome the Council's indication in paragraph 2.23 that benefits to the local community may be highlighted, but don't consider that this has been carried forward into criterion which appears to be exclusively based on local opinion. We believe that some sites will not gain support from the local community but will still offer strong comm light system would probably score a red. The nature of and reason fo considered to ensure it is not just the most vocal and active members of local communities that have their views heard as part of the allocations consultation. In our opinio community support more effectively in some settlements than in others. In villages for instance a greater proportion of residents are likely to give an objective opinion on supplemented by the views of the Parish Council. In larger towns with no Parish or Town Council in existence objective broader views are less likely to be expressed and co directly affected by the development of particular sites. we consider that 'local community support should be deleted as a specific Criterion. Therefore when assessing William Davis interests against the Site Assessment Criteria included Criterion 1.
338	2	William Davis Ltd also have concerns regarding the scoring system for Criterion 6, which considers the impact on Landscape Character. The traffic light system scores the si zone within the Bassetlaw Landscape Character Assessment, but it is not clear on how sites would score if they fall within two separate character zones. For example a site Reinforce zone, and it is unclear whether such a site would score as a red or amber in the traffic light system. This issue needs further consideration or more guidance to h
338	3	William Davis Ltd control this site under option and have continuously promoted the site for allocation in the Bassetlaw LDF. The most up to date SHLAA found the site to I that subject to a successful planning application the site could be delivered for housing within 5 years. This stance is supported by our continued promotion of the site in p commitment to building up an evidence base in support of the site's allocation.
338	4	An analysis of the site using the Site Assessment Criteria established in the Issues and Options consultation has been completed and is attached to these representations. T agricultural land and is not in a protected landscape zone or in water source protection zone 1. The site is bordered by residential land use to the south and east and would runs along the northern edge of Worksop in this location. Design of the site would be compatible with the surrounding land uses and would seek to maintain the existing b area.
338	5	William Davis Ltd have continued to maintain and update a strong evidence base in support of the site. This includes recent updates of the Transport Appraisal and Ecologi included with this letter. A summary of this supporting evidence base is provided below:
338	6	Ecology: An updated Ecological Appraisal has been completed by FPCR in October 2011. The site is found to be of generally low biodiversity value. Not bats or badgers hav ecological potential is the existing boundary hedgerow that could support roosting birds. Consequently the ecological appraisal highlights no constraints to the site in term
338	7	Transport: Waterman Boreham Transport Planning have produced a Site Appraisal Report (July 2011) which considers the local highways network. The report finds no cons highways network and indicates in the summary that the site could "satisfactorily be accommodated within the existing transport infrastructure". The report also finds the good access to local bus stops and that local journeys within Worksop could be undertaken on foot or by cycle.
338	8	A single point of access including the provision of emergency access is available from Hemmingfield Rise, with the principle of this access agreed with the County Highways constraints in terms of access and the impact it would have on the local highway network.
338	9	Landscape: As indicated in our use of the Issues and Options reports Site Assessment Criteria the site is found to be in a Create Policy Zone of the Council's Landscape Char as within the least valuable landscape character surrounding Worksop. In September 2007, Munro and Whitten completed a Landscape Assessment (previously provided t considered development will allow the extension of the current urban envelope into the current urban fringe landscape". Through considerate design including retention a hedgerow of the site we consider the site to be a suitable site for development which will result in a sheltered and enclosed residential scheme which will not detract from
338	10	As the evidence base demonstrates the site has no constraints that would prevent its development. William Davis therefore support the allocation of the site for up to 65 of for Worksop established in the Core Strategy.

tential allocation sites. Whilst we acknowledge ikely to introduce bias into the assessment. Into the traffic light scoring system for the inmunity benefits, yet according to the traffic for the support or objection also needs to be inion it may also be possible to gauge local on the merit of alternative sites which would be comments will be dominated by residents

338	11	As indicated above William Davis Ltd support the development of land to the North of Mansfield Road (Site Reference:9). We have an option on this site and have continue earlier stages of the LDF process. This highlights the firm commitment of a housing developer to the development of the land to the north of Mansfield Road and highlight available to be delivered subject to a satisfactory planning permission. The most up to date version of the Council's SHLAA found the site to be deliverable in 6 to 10 years subject to gaining planning permission the site could be delivered within the next 5 years.
338	12	Using the Council's Site Assessment Criteria detailed in the issues and options document we have reviewed the site north of Mansfield Road. A copy of our assessment has shows that the site scores well against the Criteria with amber and green scores dominant over the 9 criteria. The only Criterion which may be considered as red is concer location in a Conserve and Reinforce policy zone indicating that a red score should be given. However as we have indicate in our assessment of the site against the criteria site by Munro + Whitten Ltd indicated that <i>"a well considered development will allow the extension of the current urban envelope into the <u>diverse and disjointed</u> urban fri issued to the Council through earlier promotion of the site and clearly challenges the conserve nature of the landscape assessment. Due to the localised and site specific n believe some weight should be given to its findings when considering the site as part of the issues and options consultation.</i>
338	13	Archaeology: A Desk Based Assessment of the site was completed by CGMS in 2007, a copy of which has been previously issued to the Council during the promotion of the work in the form of a watching brief to mitigate against potential archaeological interest on the site, but concludes that any remains are unlikely to merit preservation in s on the grade 1 listed building Manor Lodge, recommending a scheme of landscaping to the northern area of the site to filter and soften views from the listed building. This incorporated into early designs for the site, with open space and landscaping planned for the northern section of the site. William Davis have discussed this issue with Eng Council who have indicated they would raise no objection to development of the site subject to detailed master planning respecting the setting of Manor Lodge.
338	14	Ecology: An updated Ecological Appraisal has been produced by FPCR in September 2011, a copy of which is attached to these representations. Due to the intensely mana the land to the north of Mansfield Road is found to be of low biodiversity value. Some habitat value is found in the boundary hedgerows which include several trees with t layouts for the site include the retention of the majority of said hedgerows, further reducing any impact on biodiversity on site. Further surveys are recommended on any removed for mitigation should roosts be discovered
338		Transport: Waterman Boreham Ltd have produced a Site Appraisal Report (October 2011) which is attached to these representations. Junction assessments were complet following concerns raised regarding their capacity in the District Wide Transport Study. The site appraisal report includes proposed improvements to these junctions that ware problems. The overall conclusion of the appraisal is that "development could satisfactorily be accommodated within the existing transport infrastructure, subject to the
338	16	Access to the site is available via two points. The primary access will be through the Mansfield Road frontage with a secondary access through St Anne's Drive. This arrang Nottinghamshire County Council.
338	17	Landscape: In September 2007 Munro and Whitten Ltd produced a Landscape Assessment and Development Principles document which considered the site (previously pr the document concluded that "a well considered development will allow the extension of the current urban envelope into the diverse and disjointed urban fringe landscap preliminary master plan showing land on the northern edge of the site proposed as public open space linking with existing open space to the east (Protected Open Space s evidence base described above indicates the site has no overriding constraints that would prevent development. This further supports the findings of the Council's SHLAA achievable and only indicated the site 'may' be available as no planning permission had been gained. William Davis therefore strongly support the allocation of the land to contribute roughly 250 dwellings towards the 1,517 dwelling residual to be found in Worksop.
338	18	If it is decided that the land north of Mansfield Road is an appropriate location for a required school site I can confirm that this can be accommodated and would not affec requirement for circa 2 hectares of land, it is assumed that 1 hectare (playing fields) could be accommodated in the open space area to the north of the site and I hectare therefore be a reduction in the development capacity of the site from circa 250 to circa 220 dwellings. It is assumed that all allocated housing sites would make a contribu other improvements to education provision required) via CIL. The contribution of the land would therefore be treated as a contribution 'in kind' towards CIL.
339	1	Please note that we do not believe that the developments detailed on the plan referenced as 511, 370, 3, 488 & 489 are appropriate and hence object to the same for the
339		Access & egress; Although it is unclear on the plan how the additional housing will be accessed I can advise that neither Grove Coach Rd or Bracken Lane are capable of de that would be generated. 340	1	We must oppose the future plans for the development within the village of Clarborough.
340	2	The village can not take the influx of more houses and the increase of its population that goes with it.
340	3	The roads are too narrow to take the increase in traffic, this in turn is a danger to the children who use these roads to travel backwards and forwards to school.
340	4	The drains through-out the village are too small to cope with the population as it is without an increase. To improve this situation would mean major construction at a ver
242	_	There are no shops at the present for any type of shopping which would mean a journey into Retford. With no public transport on a Sunday and a limited service through
340	5	to and from a major town difficult if not impossible.
340	6	The schools are not big enough to cope with the pupils we have at the present and to increase the population would only cause a major problem.
240	_	Once again we oppose any building of houses to increase the population of this village. This we feel would cost too much both in money and hardship and ruin the lives of
340	7	there.
341	1	I have been a resident in Clarborough for the last ten years, I have two young children who enjoy the quiet village life.
341	2	I very strongly oppose the plans to build up to 93 houses down the road from my house, who is going to buy them?
341	3	1. Big Lane is as it says in its name a Lane, not wide enough to cope with a possible 200 more cars going up and down, last Christmas in the snow was impossible.
341	4	Clarborough School itself has no more places, it's a small village school.
341	5	3. Clarborough village has no amenities anymore.
341	6	4. The drains past my house are always blocking up.
341	7	5. The children enjoy playing on the proposed site and many dog walkers use it.
342	1	Contaminated Land - The Issues and Options consultation document is supported and informed by the Strategic Housing Land Availability Assessment (SHLAA). As part of t paragraph 14.1 Character of the surrounding area identifies Physical Constraints and Natural factors but no specific mention is made of contaminated land or mine workin within the Issues and Options document paragraph 2.6 in the site selection methodology identifies the following a) item 15 Ground conditions and Topography b) item 1 Stability these being included within the assessment methodology. I would suggest that the sites are not just identified and considered as a discrete unit, but that the zone mineshafts, or a colliery spoil tips should be considered and integrated within the site selection procedure. Zones of influence may extend up to and beyond 250m. These potential "constraint "could be integrated within a possible development by careful alignment of structures and land use i.e. access road, open landscape for the developm procedure will ultimately address any site specific concerns relating the contaminated land and no site can be considered beyond developing given application of sufficient this is sustainable or cost effective is a different matter.
342	2	Landscape The methodology proposed to select sites for consideration in the Preferred Options report addresses landscape issues under Criterion 6: "Will the site impact the Bassetlaw District Council Landscape Character Appraisal study, sites are scored 'green, 'amber' or 'red' dependant on their which landscape policy zone they fall into i methodology for undertaking landscape character assessment was developed by Nottinghamshire County Council's Landscape and Reclamation Team, based upon Natura (2002). This methodology was produced to update the Nottinghamshire Landscape Guidelines 1998 and to respond to changes in Government legislation (PPS7) which rec landscape character assessments in informing policy within Local Development Frameworks (LDFs). The landscape character assessment fits national characterisations (as of England Landscape, Wildlife and Cultural Features Map' produced in 2005) and regional characterisations. Bassetlaw District Council produced their own Landscape Cha by NCC. Since the process used to undertake the landscape character assessment was devised by NCC and NCC worked with the BDC staff on it's production, the Landscape this document and the Landscape Policy Zone classifications it incorporates to determine site suitability in the Allocations Issues and Options Document. The Landscape ar opportunity to engage in further discussions with Bassetlaw District Council regarding site allocation and service provision. If you require clarification on contaminated lan Principal Project Engineer, Landscape and Reclamation Team.

Consultation Individual Response Record

Reference	number	
Responde	-	Answer
nt	nt	
343	6	Option 1. Figure 4.2. This is the most comprehensive mixed use proposal and occupies the entire site area. For a development of this scale major transport infrastructure transport demands, including a new link road connecting the A57 to the south with the B6045 to the north. Employment accessibility, particularly HGVs, will need to be lim proposed residential and existing residential development with open space would not be favoured from a transport sustainability perspective. The new development need to be limed to be favoured from a transport sustainability perspective. The new development need to be favoured from a transport sustainability perspective.
343	7	Options 2 and 3. Careful thought would need to be given to the internal layout such that residential and employment traffic are separated. Commercial traffic passing thro acceptable. A layout, similar to site 39, with both residential and commercial development having a frontage and separate access to the B6045 would be preferable. The i roads would need further consideration for this scale of development, significant off site mitigation could be warranted particularly at major traffic intersections.
343		Option 4. The impacts on the B6045 and surrounding local roads would need further consideration for this scale of development, significant off site mitigation could be w intersections. The co location of proposed new development and existing residential development would need to be reconsidered for reasons of transport sustainability.
343		Residential development sites identified to the north and east of Retford (figure 5.1) are more accessible to the Town centre and its services by all modes of travel than sit sites to the north and east would be preferable to sites to the south of the town.
343	1 10	The potential employment site R7 is far more accessible than site R2. In fact it is not clear whether an acceptable access could be formed to serve site R2 on account of the potential residential development.
343	11	There are existing traffic capacity problems at junctions on the B6463 Main Street through Harworth. Although the redevelopment of the colliery will include some junction network is unlikely to be able to cope with any further significant development traffic. With the scope for further traffic capacity improvements along the B6463 limited by would be advisable if the majority of proposed new residential development were situated to the north and east of the village (where additional traffic could be more real western fringe of Harworth.
343	1	An improvement to the Scrooby Road/ A614 junction will be necessary.
343	13	I can confirm that sites (W1, W12, W13) are in suitable locations in terms of access to the A57 and the wider strategic road network. All subject to satisfactory details of a Assessments.
343	14	Notwithstanding the above, site W12 is very constrained in terms of access in that there are two low bridges between the site and the A57. However, both are above 4.0n articulated lorry. The B6079 Retford Road from which the sit would be served isn't particularly wide and lacks footways. It is difficult to see how this could be addressed to constraint of the bridge abutments and the need for land up to the roundabout in order to provide a reasonable connection to the A57 via the B6040. I'm not sure whethe through Manton Wood Enterprise Park but there is still the issue as to how to get across the railway line.
344	1	General / strategic - While it says that 'suitable applications' will be supported paragraph 2.10 does not make it clear how future proposals for economic development out Bircotes will be assessed. Explicit reference to Policies DM1-3 in the Core Strategy would be appropriate. It is clear, also, that sites other than those in or near to the three least mixed-use including employment uses.
344	2	Strategic - Currently the NPPF proposes that a 20% over-provision (against estimated need, undefined at present) should be planned for. How to deal with this will need co document is produced.
344	3	Developer contributions & infrastructure - The ability to deliver or assist efficient provision of infrastructure is not included as a criterion in the assessment of sites. While infrastructure is referred to in a later section there is potential to decide on suitable sites dependant upon their suitability in delivering infrastructure, or minimising the ne additional capacity in schools or on highways could be utilised instead of selecting sites where capacity is limited. While less likely to be significant in the selection of sites factor should be considered. This consideration should apply to transport, education, water & sewerage and flood provision as well as green infrastructure.
344	4	Highways - All sites, once allocated at the preferred options stage will need, individually and in combination, to be subject to the submission and findings of a Transport As comments concerning transport at this stage relate principally to the methodology proposed to decide sites. In terms of constraints on any proposed site the answer very proposed on that site and with other sites in combination.
344	5	The transport study supporting the Core Strategy assumes a specific quantum and distribution of development. In transport terms the broad strategic impacts for this qua establish how (or whether) the outcome of the current stage differs from the CS evidence base and the significance of any difference on the capacity of the transport netv scenarios.
344	6	For all settlements the capacity and number of potential sites are greater than the required provision established in the Core Strategy. The potential capacity for each nan of uses on mixed-use sites give many permutations and combinations which would deliver the Core Strategy's requirements, and more importantly could differ quite signi Bassetlaw Transport Study. For example the Council could seek to distribute the development among a minimum number of sites or all on a single site in any settlement. single site this could have disproportionate impacts on the supporting transport infrastructure.

344	7	Consequently County Council officers will seeking further guidance and require close liaison with Bassetlaw over responses from the County as Local Highway Authority es sites taken forward to the next, preferred option stage.
344	8	Ecology - The Site Allocation Screening Methodology outlined in Section 2 of the consultation document appears sound from a nature conservation perspective. It is noted screened out of the issues and options stage, as part of the SHLAA assessment process. This process considered, amongst other things, constraints posed by SSSIs, protect
344	9	It is noted that following completion of this consultation, further site assessment will be undertaken to identify a preferred set of sites for consideration in the Preferred C is "will the development detract from or enhance the existing Green Infrastructure of the settlement or neighbourhood?" This should ensure that designated wildlife sites fundamental component of Green Infrastructure. However, there may be a danger that other, non-designated areas (such as areas of UKBAP or LBAP habitat) may be over
344	10	Archaeology & Heritage - A separate document itemises sites with archaeological interest of various levels of potential. It is recommended that this is incorporated in any s significance are identified also in the response below. A full list will be sent with this response.
344	11	Many sites have archaeological remains associated with them, or the potential for their discovery. Consequently in almost all cases development will need to be preceded fieldwalking or geophysics evaluation, Strip, Map and Sample procedure, and other investigation, recording or preservation.
344	12	Heritage assets are affected by a number of potential sites to a greater or lesser extent. A separate document listing sites which have heritage issues is in preparation and followed up by liaison by the County's heritage officer over decisions prior to the preferred option stage. It is important that impacts upon heritage assets are appropriatel made so that their significance is understood and accounted for.
344	13	Flood Risk - The County Council will not be commenting at this stage on these sites as a Lead Local Flood Authority. However, the future enactment of Schedule 3 of the Fle the future role of the County Council as a SUDS Approving Body means that surface water drainage proposals for these sites would need to be in line with National Standa County Council. Any site allocation proposals by Bassetlaw should reflect future changes to the planning system in this respect. As Lead Local Flood Authority, the County to do work to manage flood risk from surface water and groundwater might be tied into future development and infrastructure development/ improvements. This may ha for example towards any Community Infrastructure Levy."
344		Landscape and contaminated land - As part of the site selection process the SHLAA identifies physical constraints. No specific mention is made of contaminated land or min However within the Issues and Options document paragraph 2.6 in the site selection methodology identifies the ground conditions, topography, contamination and land s methodology. The sites should not just be identified and considered as a discrete unit, but the zone of influence of such features as landfills, mineshafts, or colliery spoil tij selection procedure. Zones of influence may extend up to and beyond 250m. These compromised zones surrounding the potential "constraint "could be integrated within of structures and land use i.e. access road, open landscape for the development etc. The formal planning application procedure will ultimately address any site specific cor site can be considered beyond developing given application of sufficient technical and financial resource. Since the process used to undertake the landscape character asse worked with the BDC staff on its production, the Landscape and Reclamation team support the use of this document and the Landscape Policy Zone classifications it incorp Allocations Issues and Options Document. The Landscape and Reclamation team would welcome an opportunity to engage in further discussions with Bassetlaw District Co provision.
344	15	Grasslands (sites in various villages) - In addition, a large number of potential sites are located on areas of grassland (meadow or pasture) within or around settlements, where conservation designation. Species-rich grasslands are some of our most important sites, but are under severe threat (for example, we have experienced a 97% loss of have sites may not necessarily have been picked up through the SINC process (e.g. due to lack of landowner permission for access to undertake surveys). These grassland sites looking at things such as sward variability and the presence of features suggesting longevity of habitat (e.g. ridge and furrow), in an attempt to identify what may be areas grassland that could be of nature conservation value. However, it should be noted that aerial photo interpretation is an inexact science, and therefore it is likely that some (of low biodiversity value) have been flagged up in this process. It is also possible that other areas of grassland that do have nature conservation value have been overlook sites would merit further investigation before they can be concluded as being appropriate for development; these are mentioned in the settlement listing above.
344	16	35 – this Potential Housing site overlaps with the Nab's Ashes Wood SINC 2/116 (also Ancient Woodland), and lies immediately adjacent to Whipman Wood SINC 5/2318 a boundary should be amended to remove overlap with the Nab's Ashes Wood SINC, and it should be ensured that there is mitigation to prevent disturbance to these wood using them for recreation. There should also be a physical stand-off between the development and the woodlands.
344		30 – this Potential Housing site lies immediately adjacent to Lady Lee Quarry SINC 1/45, and development of this area is likely to have a negative impact on the site due to are also historical records of great crested newt from Lady Lee Quarry, and if still present, the rough grassland surrounding the site would act as terrestrial habitat for this therefore suggested that the suitability of this site cannot be determined without further information about the ecological value of the land in question.

345	1	No I do not agree, I cannot see what benefits additional housing and employment would provide, over and above what is required.
345	2	I think location 35 is unsuitable.
345		We already have a large enough development in Gateford which has its own problems as it is. How would the traffic get out onto the A57? Where would the access road be estate by car onto the A57, especially in the mornings when people are trying to get to work, causing long lines of traffic building up. The potential development would incr would put our children in more danger than they already are. There are no speed restrictions on the roads to remind drivers of speed limits in built up areas, hence we alre on at the last minute approaching junctions.
345	4	Have the council considered the strain more housing would put on our already strained public services e.g.: schools, GP practices, our local hospital?
345	5	The problems we already encounter with bored young people getting up to mischief because facilities for them in the immediate area are non existent would potentially in
345	6	The people of Gateford have only, in the last few years been completely free from the years of mess on the roads and the continual noise from building traffic whilst the de
345	7	I do strongly think that the area 35 should not be used for building and should be protected. (see question 3)
345		Building on this piece of land would destroy Valuable agricultural land, destroy beautiful countryside, hedgerows, woodlands and therefore have a detrimental effect on ou
345	9	Also public footpaths and bridleways would no longer be available for the walkers who frequently enjoy this lovely countryside.
345	10	Consider the density of housing the development in plan 35 would create joined onto the already large Gateford development. With density comes polution, are we not try
345	11	I wish to object strongly to the development of any additional houses at site 35 for the following reasons: A) Extension of town boundary and urban sprawl. The current Ga town boundary. Development on site 35 will, therefore extend beyond the boundary and there is a concern that Worksop will eventually consume Wallingwells and contin Lindrick.
345	12	B) Loss of amenity for children, residents and visitors. The proposed site is bordered by Owday Wood/Rough Piece and Owday Plantation, which are sites of importance for present untouched by housing. Development on site 35 will cause significant disturbance to these valuable woodlands.
345	13	The public footpath/bridleway entering the area from Monford Road and stretching to Owday plantation is bordered by beautiful tree and hedgerows, which are importan The bridleway and footpaths are used daily by many walkers, both from the estate and also by visiting recreational users.

345	17	E) Access to healthcare provision. Access to healthcare provision is limited, with doctors and dentists being sites on the other side of town. Access on foot from site 35 is in to doctors and dentists when required are currently at full capacity. with the increased population of Worksop you cannot see a doctor under 3 weeks unless it is an emergent of the second
		to doctors and dentists when required are currently at run capacity. With the increased population of worksop you cannot see a doctor under 5 weeks unless it is an energy
345	18	F) Provision of utilities and services. Development on site 35 will require significant investment in infrastructure to meet the demands of the new housing development, as
545	10	to the remote location of the site. Improvements would be needed to upgrade level of service provision due to increased demand.
346	1	I am strongly opposed to any future development of location 35 for housing or employment and in my opinion, location 35 is NOT suitable for further development.
		I do not believe that the local infrastructure could cope with the impact of such a development. Local traffic is already a problem particularly at peak times with the main
346	2	frequently used as a short cut to the A57. Traffic congestion at local shops and amenities would significantly increase, posing greater risk to children and the elderly within
346	3	The local school(s) and health centres/ Doctors surgeries would be oversubscribed, leading to further significant deterioration in quality of life of those already living in a 'de
		Location 35 should be protected from future development. It is currently used as agricultural land and provides a recreational outdoor space that is enjoyed by many local
346	4	Gateford estate. It is an area of natural beauty and development on this site would adversely affect the precious habitat for local wildlife in and around Owday and Whipm
347	1	I object to further housing on green land in Worksop.
347	2	The area is over developed and future housing would over run schools traffic lost views road damage etc.
348	1	I feel that location 35 is unsuitable for further development.
348	2	We moved to the current estate 7 years ago, because of its quiet location and easy access to woodland walks.
348	3 4	There are already issues regarding exiting Ashes Park Avenue onto Gateford Road during rush hour times. Puddleducks preschool is having to relocate (not yet known where) from St Johns Primary because the school needs the space.
348 348	4 5	Gateford Park is not a large enough school to accommodate an influx this large, and has no significant outdoor space for its children.
348	6	The value of existing housing would decrease significantly with such an increase of housing as is proposed, and the area would lose it's current natural attractiveness.
348	7	The fields proposed are currently actively used for agriculture, and I feel that they should remain so.
348	8	Open spaces should be protected. Worksop already lacks free to access open spaces, for those not fortunate enough to be able to afford Clumber.
348	9	I think the area to the south of Worksop between Retford road and kilton is the most suitable location for a large property build.
540		
		I am writing to express concern over the potential plans for housing developments on the site between Broad Gores in Clarborough. My main concerns are as follows: 1) S
349	1	had a total rebuild two years ago and, I believe, is already over-subscribed. To build an extra 90+ houses has the potential to leave 100+ children unable to attend their loc
		development of the school was reviewed in order to add more school places. Is this something the Council really want to invest in considering the cost incurred a of full re
		Another concern regarding the school is the safety concerns of parking at the school. Already, the access on Hill View Drive is insufficient, with cars blocking residents drive
349	2	on the cul-de-sac. This is a safety risk to the school at present when children are going to and leaving school.
		2) Access. If Broad Gores was to be 'joined' with a through-road, this would massively add to traffic flow down Big Lane, which is already not a wide stretch of road. I belie
349	3	wanting to bypass the main street in the village. A regular problem at Welham Bridge is large lorries getting 'stuck' and having to turn round. Would lorries then be cutting
		order to get to Retford?
		3) Lack of shops and employment opportunities. Currently, there is no shop or post office operating in Clarborough since the closure of the shop on Main Street some time

349	5	4) Flooding and drainage. During the summer of 2007, Clarborough was one of the villages affected the most by the flooding. The properties on Big Lane were almost all f their properties. Some of the properties have only just finished being renovated. It seems that no systems have been put in place to address this issue should it happen a waterlogged and, thankfully for us, seemed to soak up the water from the flooding beck. If there had been houses on the site, then the flooding problem would no doubt flooded too. Drainage seems to be a constant problem on Broad Gores and St Johns Drive. Anglian Water vans seem to be a regular feature on our street!
350		Option A
350		We would suggest that most if not all new development should be centred around all main centres of existing towns to minimise the costs to the environment, Council an existing infrastructure and amenities whilst maintaining and protecting the green belt.
350	2	If this application is granted then we would feel very strongly that any further planning permissions not be granted on any other green field sites within Clarborough and H existing road and public transport links to be used without the need for any additional requirements thereby keeping additional costs to the community to a minimum.
350	4	None, for the reasons given in the response to question 46 above.
350	5	None.
350		Existing sites.
350		As above.
350		None
351	1	Criterion 1: Is the local community supportive of the development of the site? The public consultation session at Sutton and the Parish Plan clearly demonstrate that the v development in the village so will this be adhered to?
351	2	Criterion 2: Will development of the site be compatible with existing and/or potential neighbouring land uses? Criterion 6: Will the site impact negatively on Landscape Ch development detract from or enhance the existing built character of the settlement or neighbourhood? The BDC Planning Team members present at the Public Consultati adamant that the council will not have any control over what type of properties builders decide to erect so this makes a mockery of these 3 criterion.
351	3	Option A: Spread between Worksop; Retford and Harworth Bircotes?
351	4	I disagree. I have lived in the village for 25 years and in that time over 25 properties have been built and there are 4 more currently being built - 3 on the land at the back o equates to 4 so plan fulfilled already!! I disagree.
351	5	The village has a range of accommodation including a housing estate on Portland place with council properties as well as private.
351	6	Our Parish Plan clearly indicates that villagers do not want to see further development.
351	7	If villagers views and feelings are ignored and the allocation goes ahead my preferred sites would be 281 and 282. These would cause least disruption and preserve our gree
351	8	Though the current proposal is for 4 houses I am extremely concerned about the maximum potential capacity houses stated for the 'Potential housing site references.' The
331	0	absolutely ludicrous and would result in crammed housing estates.
351	9	I do not understand how potential builders will be allowed to build what ever types of houses they want to when the rest are of are restricted to what we can and can't do look?!
351	10	Yes I think it is incredibly important to maintain the open spaces. However I am concerned at the miniscule amount of open space defined as potentially protected.
351		No. We already have a site at Daneshill which has been there for years.
351	12	We already have a site at Daneshill which has been there for years.
352		The only area where (youth services) may have a significant interest is Worksop where there appears to be the potential for one major development. In this instance we we either through our existing fixed provision (Valley Young People's Centre, on Stanley Road or the Youth zone at Worksop Library), or through mobile provision if a needs as a priority area."
353	1	I am writing to you to raise my concerns over the proposal to build new housing in Clarborough on two sites listed as 170 and 258 in the Bassetlaw district local developme village and have moved back after serving in the army, so believe I have a good understanding of the area.
353	2	In recent years the local shop, post office and petrol station have all closed. This means a trip of three miles into Retford for any essentials which is difficult for those withow with only two stops on the main road this can also mean a long walk with shopping or an expensive taxi ride.
353	3	The telephone service is poor with low quality lines and some of the slowest broad band services in the country. Increasing the number of homes using the services with the situation worse
353	4	Water quality where I live on St 10hns Drive is so poor that we have to filter all used for drinking. Again increasing the number of homes in the village is likely to increase p
353	5	Access into the estate is restricted via a small lane. Increasing the amount of commuters would cause congestion.

252	C	We have frequent transport issues in the village with the main road flooding at the end of Big Lane and access to Retford being blocked by over height vehicles becoming s
353	6	During the snows last winter, none of the side roads in the village received any attention, meaning that most of the village were trapped.
353	7	During my own schooling in the village, we had separate infant and primary schools. Both schools have recently closed and have been replaced by one smaller one. This sc
333	/	room for extra children the development would bring.
353		The following points are raised in your own documents: Both sites are on a flood plain. Building on either puts properties at a risk of flood damage and increases risk of adj
353		away for run off. Both sites are Sites of Special Scientific Interest (with 170 also being a Site of Importance for Nature Conservation).
353	9	Your document states that the sites have 'good access'. As access can only be achieved via a small lane either side, I cannot see how this can be true
353	10	The document states that site 258 is wasteland with previous use unknown. Since my childhood. I remember this field being rented out to a local farmer to grow crops by
		hard to believe that Bassetlaw council does not know it did this as it is only very recently that Arthur Lackson became unable to farm the land.
353		Considering both sites are Sites of Special Scientific Interest (170 also designated as a Site of Importance for Nature Conservation), on a flood plain, with difficult access and
25.4		the two are totally unsuitable for use as developments
354	1	Yes I do but not in a green belt space which is used by lot of people to escape the housing development already there area 35 should never be taken and used for housing
354		Location 35 the gateford site this is unsuitable to be made into housing as it is the area is already over run with traffic and this area is the only bit of escape from the housing the second structure have been totally unsuitable to build on this plat.
354 354	3 4	This is used by many walkers dog walkers and runners and will take away this bit of rural area we have here totally unsuitable to build on this plot Yes area 35 it is lovely green belt land which gives the already full housing estate some respite from noise traffic and a safe place to walk run etc.
354	-	Sorry, I'm not totally sure at the moment.
555	-	This is a difficult question to answer as I am not sure of the current required growth of a town the size of Worksop, and the implications of increasing housing without seei
355	2	Bassetlaw District Council, are in a better position to advise if this proposal is sustainable, and why.
355		39, W10, 4, W9, 8, 35, W12, W1, 9, 11, 14, 15, 60, 75, 23, 567, 569 & 568 The reason I have highlighted these sites only is because I feel most are an addition to an already
		character change within adjacent surroundings. Furthermore, developing these areas will still maintain the charm of Worksop Town without hopefully upsetting too many
355	4	I think the potential employment sites already highlighted on the map (No. W13, W12 & W1) seem well positioned, offering good transportation links within close proximi
255	-	The only site I would question purely from an aesthetics point of view is W12. This site looks rather close to the Chesterfield canal. Would this spoil the surrounding countr
355	5	of the canal, especially as regards to noise/smell pollution?
		Personally, I'm not totally convinced of a mixed-use site. I sure they may work in some areas but I am convinced given the option, any potential buyer of a property will alv
355	6	offices, outlets and schools etc. So, with this in mind, it may be wise to limit the split in favour of housing or separate them altogether. Is it possible for you to suggest som
		successful?
355	7	Yes. Generally analysing the map, you have obviously highlighted sites for localised reasons so I cannot really comment on them without knowing the area well.
355	8	I have, however noticed potential development 35 encroaches on Nab's Ashes Wood. I do feel strongly this should be avoided, as apart from the obvious benefits of wood
		which we may well need more now than ever.
		OK. You may or may not be aware I am a resident of Shireoaks. And with this comes personal knowledge of the area, and how it was 25 years ago, and how the village is de
355	9	over the years have been positive and we as a village seem to be 'just' holding onto our uniqueness. I know of many people who visit our village from surrounding areas ar
		offers. Some say it's for tranquillity, others, the rural/historical walks. Everyone I know enjoys Shireoaks in their own way and for what it represents now. I and my family e
		qualities, and the chesterfield canal just to mention a few. This leads me onto the development of Shireoaks. If pushed, there maybe one or two plots i.e. No. 26 28 & W6, that could work well and not have a detrimental effect on
355	10	regards to the other development proposals earmarked for Shireoaks on the west side of the bypass.
		Considering the proximity of our village the development proposals highlighted on the map seem grossly oversized in percentage terms compared to other parts of Works
355	11	the proposals for Shireoaks including No. 26, 28 & W6, I am sure it would surpass in size any one singular development site within Worksop apart from 4 & W9.
355	12	I cannot understand why Shireoaks has potentially been given the Lion's share of development, which will without doubt, be the end of the last true village in essence, adja
355	13	Option A
355	14	This question is difficult to answer as I am unsure where the existing sites are located on the map, and thus unaware of the consequences of further development.
		I'm not sure of the pros and cons of either way. Question. Is it possible for you to research where these sites are currently located in neighbouring authorities and obtain ir
355	15	failure? This information would be very useful in aiding us make the right decision.
250		
356	1	No, i feel that you just look for open spaces in small villages where you think you can just build new houses, but without proper consideration of the impact new houses/m

356	3	I agree that Clarborough & Hayton could have 12 new houses built.
356	4	No, i strongly feel that the area would not be able to cope with more than 12 new houses.
356	5	Site 171 only - 12 new houses
356		Since September 2011 Clarborough Primary School has had to make a new classroom in the corridor to accommodate the number of children attending the school. Imagin school will have if new houses are built and families move into them! Your idea that you could potentially build a total of 228 new houses within Clarborough & Hayton we places needed which the new school could not possibly accommodate.
356	7	To build new houses on sites 170 and 258 would dramatically increase the traffic flow on Broad Gores resulting in our children being put at risk. Traffic at present through Smeath Lane, traffic is excessive and people drive down there at such speed. I personally have had several near misses with both lorries and cars on the bends as they driv so narrow!
356	8	Clarborough doesn't have anything to offer potential new home owners/new tenants, apart from a very good but small Primary School.
356		We have no shop anymore which is very inconvenient for a lot of residents and one small public house.
356	10	We have frequent power cuts which would increase if more houses were built.
356	11	Feel strongly that the crime rate would increase in the area if more people move into the village!
356	12	Protected
356	13	REMOVED
356	14	REMOVED
357	1	We live on Richmond Road directly opposite Carr Hill school on Tiln Lane, and experience severe traffic congestion at school times, and therefore the further building of dv problem which could further endanger pedestrians and children.
357		We already have a number of heavy duty vehicles using Tiln Lane to avoid the low bridge at Clarborough, which would further add to this problem. Is it the intention of Bas building a suitable bypass to avoid the bridge at Clarborough
357		Living on the edge of town we feel this area would definitely be spoilt with the building of so many new houses, taking up essential green belt land used for agriculture.
357		In our opinion the town of Retford would need further road infrastructure to accommodate the needs of such an increased housing development
357		Finally should we not be looking at developing brown field sites before entering into this project?
358	1	No, the type of housing proposed and the consultation evening would be aimed at the higher end of the market spectrum swinging the balance towards a commuter type section of both age and class.
358	2	An even balance of both affordable houses and houses that reflect the character of Cuckney in style and materials.
358	3	A maximum of 5 houses should be built
		Area 399 offers east of access, free draining and without risk of flooding that both 303 and 398 do not offer.
358	4	New comment: Plot 399 is also located in an area of the village which has been developed n recent times without major impact visually
358	5	Its worth considering that Cuckney is served by an ancient private water supply by Welbeck Estates Co Ltd. Over the years Welbeck have opposed proposed building project of the support further development in Cuckney and that the aforementioned system has not been improved which could effect supply to existing residents
359	1	Having read and studied the proposals that have been put forward for the Local Development Framework, we feel very strongly that sites 37 and 512 often Lane in Retford housing for the following reasons:
359	2	There would appear to be a significant lack of infrastructure in services, highways and schools within this area to support the proposed level of increased occupation.
359	3	There are also serious concerns with regards to the safe access and exit of vehicles onto Tiln Lane and the amount of heavy goods vehicles which use this route which is clo blind bend from Tiln Lane onto Smeath Lane which has been known for many years by local residents and County Councillors who have campaigned to reduce the amount
359		Historically this land has always been used for agricultural purposes and is indeed a Greenfield site which the land adjacent mirrors. A large building development in this locality would detract from the existing green infrastructure
359	5	The land both on and adjacent to these proposed sites already has poor drainage and is liable to flooding.

265	1	The proposed house building sites in this area numbered 3, 370 and 511 are all low-lying) and flood every year after periods of heavy precipitation or the melt of snow in
365	1	and the water table is high.
365	2	We have seen field 370 completely flooded like a lake with water pouring down the Grove hillside looking like a weir. Houses at the end of Grove Coach Road, St Stephen's
	-	flooding
365	3	When this water has eventually drained away towards Retford, then Grove Lane, Blackstope Lane and Trent Street have had massive problems with house flooding, when
		year
265		The Government and House Insurers have advised against building on land prone to
365		flooding, looking to the future when the sea level is predicted to rise.
		Any such development on these 3 sites would certainly flood, endangering the existing housing estate by increasing pressure on the already failing drainage system and co
365	5	Retford
365	6	A Council that plans for such a development must also prepare for the aftermath of 'O flooding and the huge financial toll that it entails. Building on these sites is surely no
365	7	therefore urge the Council to seek alternative building sites, and a plan which will fulfil I Retford's needs and prove to be an asset over the next 20 years.
366	1	Suggested sites for a low number (approx 10) new houses in Ranskill would be the following
366	2	Brown field large area, easy access, no loss privacy
366	3	Large area no traffic congestion, easy access, no loss privacy.
366	4	Large area, longer access required, some loss privacy
366	5	Strip of land East edge only along Folly Nook Lane. Smaller area, easy
		access, no loss privacy
366	6	East edge only. Building along the Great North Road. Easy access. 30 mph zone already exists. But possibly will increase flooding east side of Great North Rd
366	7	With regard to 157, 156, 234 East, it would be important to avoid extra traffic
367	1	I wish to lodge my objection to this proposed development. Apart from the fact that that the whole character of the area will be vastly changed, is this not agricultural land
367	2	brownfield sites should not be developed first
367 367	3 4	and for that matter how about the many houses in Retford that stand Should they not be occupied before yet more houses are built and left to stand unoccupied? The proposed development would also add greatly to the heavy traffic which now uses Tiln lane and thus exacerbate the present congestion and danger.
368	-	Yes
368		228
368		Yes, open space site should be protected.
	1	On behalf of myself, my husband and our grown children, I write to strongly object to the above. Site reference numbers 370 and 511 as identified in the Bassetlaw District
369		Allocations, Issues and Options document. We believe these sites are not suitable for future housing development.
369	2	Traffic leaving Bracken Lane and Grove Coach Road experience difficulty at the present time. Any increase of traffic assessing a new housing estate would cause even great
369	3	Our local school, bracken Lane Primary, is at present oversubscribed and would not be able to take in any more children from a new housing development.
369	4	Unfortunately during the floods of recent years, many properties were flooded from water draining from the adjacent hills. Any new development would obviously experies
369	5	We are aware of other sites in Retford which would be more suitable for the kind of proposed developments, and question why these sites have not been chosen.
369	6	As owners of our property, which is adjacent to the proposed development we wish to strongly object.
370	1	It has come to our attention of a proposed housing development, 231 houses north of Badgers Chase and 915 houses on land north of Durham Grove, Palmer Road, Bigsby We have obtained a copy of the of Bassetlaw's Site Allocation and Options Consultation Paper and it is astounding the amount of housing that is being proposed. This letter is to object to the proposals. We are very disappointed that there has been no consultation with residents prior to production of the proposal.
370	2	These developments will alter the character of the area & the poor road infrastructure is most unsuitable for such a development, additional traffic congestion and a dang area would be a huge danger to life, Highway Safety should be a major consideration for objecting to these proposals

Responde	Comme	Answer
nt	nt	
		At present vast amounts of traffic using Carr Hill School do not always go out onto the junction from Tiln Lane to Moorgate but use the smaller Roads from School and come down Park Lane, some at great speed, before reaching the junction onto Welham Road and then continuing
370	3	their journey back through town down Moorgate, to increase this area of Retford with 1146 more houses and with a possibility of2 cars to each household is a danger, this could generate over 2000 more cars to add to this already over congested area.
370	4	Personally we feel very strongly about objecting to this proposal of development and our own property could loose it's loss of privacy and could be overshadowed by buildings near to our house & back garden with the possibility of loss of light.
370	5	These proposed areas have many tree's and to loose them would be damaging to our environment as well as the ecological factor which could result in a loss of many birc
370	6	Additionally theses proposed areas involve building outside the existing development envelope and also involves building outside the borough boundary, all brownfield sit developing the edge of town and beyond the borough boundary.
371	1	Yes, 9 houses seems an adequate response given the existing village infrastructure
371	2	Site 178 opposite Blyth Hall
371	3	The most serious issue in my opinion is the lack of Public Car Parking in the Village
371 372	4	Site 266 should be developed as additional 'open space' to add to the limited open spaces areas already in the village. I consider the proposals for the two villages to be excessive in numbers and locations. If the total complement of housing was to be built on all of these sites then the p least 40% and possibly by as much as 100% ie double The number of houses suggested for sites 170 and 258 alone could almost double the population. Not only wo villages by destroying their rural nature but would be impractical for the following reasons:
372	2	Clarborough Primary School. The school is currently full, additional housing and families could lead to serious overcrowding. As I understand the situation, some child addition there is currently a serious problem with parking in the vicinity of the school, especially at the beginning and end of the school day, but also when events take aggravation and great inconvenience for the residents of Hil1view Crescent but creating serious safety issues onto the A620. Any further numbers in the school will only m
372	3	Secondary School Provision. All 11 + pupils have to travel into Retford or Gainsborough. An increase in the school population would create more road journeys and inc schools who find It difficult to access after school activities. This is due to the poor public transport to the villages. They are, therefore, disadvantaged in this respect.
372	4	Further Education. Those pupils choosing to extend their education at Retford Sixth Form College would have the same disadvantages as the younger pupils at second Notts College in Worksop would have the additional problem of needing 2 bus journeys each way and this would exacerbate the problems of both day time access and acc
372	5	Water Supply. There is already some concern on St John's Drive, Clarborough, about the quality and stability of the water supply. Increases in population would only make
372	6	Sewage. Poor sewage facilities in Clarborough, especially on the western side of Main Street, i.e. in the area where the largest concentration of housing is suggested, are a to raw sewage being released onto land on the western edges of the village.
372	7	Broadband. The villages are a long way from the telephone exchange in Retford. This creates problems with internet usage, making much online provision unavailable in low for meaningful internet access. eg Accessing BBC iPlayer is likely to give either a programme which stops <i>every</i> few seconds to load the next section or a message s anything at all! In the digital age, with so many commercial and governmental organisations urging greater use of the internet, this should be seen as a serious concern.
372	8	Employment. There is no provision for Jobs in the village. Indeed, in recent months several jobs have been lost due to the closure of the shop / Post Office, the Kings Arn Boat public house in Hayton. If the outline planning permission for Corner House Farm (Site Reference 171) is followed through then even more jobs are likely to be lost the village for work and, thus, create more traffic for local roads.

Responde		Answer
nt 372	nt 9	Public Transport. Public transport is very limited, with no provision in the late afternoon and evening or on Sunday. The bus timetable is as follows: Buses into Retford a 07.24h and 14.28h. Saturday - as above plus one extra bus at 16.58h. Sunday - no service. Buses from Retford are: Monday to Friday - hourly service between 09.30h and above. Sunday - no service. The timing of the buses means that anyone wishing to make even a short visit to Retford and carry out business there (eg a visit to the president without their own transport, including teenagers, there is no opportunity to access any event in Retford In the late afternoon and evening or to return later than cars will again increase traffic flow into, through and out of the village.
372	10	Facilities. There are few facilities in the villages. There IS no shop, post office, library or medical facility in the villages. There are only very limited leisure facilities in the f types of facilities already generates car traffic into Retford and other towns. Extra population would increase traffic through the villages and on the roads into Retford.
372	11	Traffic. The main road through the village is the A620, which runs between Retford and Gainsborough and includes a very low railway bridge between Welham and Clarbo traffic frequently travels above this speed, especially commercial traffic. Almost all vehicles travelling from Retford into the village 30 mph limit continue to travel at o speed warning signs on entry to the village. Many vehicles do not slow below this speed all the way through the village. Traffic travelling through the village towards Retford limit by the time it is passing the end of Howbeck Lane, Big Lane and Church Lane. The dangers of Welham corner are well known as HGV drivers continue to ignor Clarborough and Hayton. Increased traffic on this road will only enhance the dangers currently associated with and caused by this bridge. Large numbers of extra housin flow along the A620 and problems into and out of Retford which will increase the dangers of road transport.
372	12	A620 "by-pass" - due to the low railway bridge on the A620, Tiln Lane (Retford) · Smeath Lane (Clarborough) is the only route which allows high sided HGV's up to 40t avoids this bridge. This is not a by-pass but a narrow, unclassified, country lane! A large number of HGVs travel the road in each direction every day Only in part of the allow two HGVs to pass and this only with care. Much of Smeath Lane does not allow passing and vehicles have to use the roadside verges. Over the years this has resul into ditches. It is, therefore, a dangerous road. As vehicles enter the village from Retford along Smeath Lane they have to cross a 'humped back' canal bridge. Many do the which their size imposes on the bridge. If a similar sized vehicle is travelling in the opposite direction these HGVs frequently mount the pavement to negotiate the pedestrians using the pavement. This occurs frequently. After crossing the bridge the HGVs immediately come into residential housing where cars are turning in order creates dangers for those vehicles which are turning. In order to return to the A620 at the bottom of Clarborough Hill the HGVs have to take a right turn and then immediately means they block the exit of Smeath Lane, are diagonally across Main Street, Hayton, and block the exit from Clarborough Main Street They then have to pain access to Smeath Lane. The travelling through the village towards either Gainsborough or Clayworth or in the reverse directions.
372	13	Putting nearly 100 houses onto Site References 170 and 258, In addition to the 32 on Site 171, would create much more traffic movement at the junction between Smeat Hill and, consequently, greatly increase the potential for road traffic accidents. This number of extra houses would also cause much more, and more dangerous, traffic m Broad Gores.
372	14	The suggestions for Site Reference 170 and 258 would connect the two ends of Broad Gores. This would produce a through road which changes the nature of the currer for this new road I have heard used by those commenting on these plans is "it will become a rat run. Both Big Lane and both ends of Broad Gores are very narrow road flows. In addition any contractor traffic during a construction phase would make the roads extremely dangerous if not Impossible to negotiate. The egress from Big La especially at peak times. With extra traffic generated through the village this would become even more so. Even when traffic obeys the 30 mph speed limit, and most d Retford, especially, is already a dangerous procedure due to the short sight lines along the A620 towards the village centre.
372	15	In times of snow local roads are not gritted by either Nottinghamshire County or Bassetlaw District Councils. In December 2010 this left Big Lane in a dangerous condition vehicles, even where driven carefully, negotiated snow, ice and deep ruts. Increased traffic flow would make accidents inevitable.
372	16	All roads within the village are narrow, including the Big Lane estate, Smeath Lane estate, Howbeck Lane and Church Lane. This limits the safe movement of traffic within increase danger to both adults and children.
372	17	Flooding. The land concerned is liable to flooding during heavy rainfall and little has been done to alleviate this since the most recent floods which affected a number of ar
372	18	Alternatives. The most obvious alternative is to site houses where facilities exist – i.e. larger centres of population. This reduces the need for car transport, there being mu fill building could be acceptable in specific cases in the Clarborough-Hayton area. Single/double sites would not put the pressure on the road network and other facilities v sites for this infill in the villages are limited and this would naturally limit the increase in population. This type of building, by its very limited nature, would not affect the cl

Responde		Answer
nt	nt	
375		No, build on plots 534 and 577
375	3	Plots 412 and 413 should not be developed by building houses as it will spoil the view of those living in the row of small cottages and cause potential dangers on the A638 v
375	4	Develop sites 534 and 577
375	5	As we never received a copy of the original questionnaire, I cannot comment.
375	6	Yes
375	7	Yes, affordable housing, a community hall/room and a play area equipped for children up to the age of 11, including soft play area for toddlers.
375	8	I can see no suitable site within Gamston at present.
376	1	I am very concerned about the impact the proposed development could have on the villages of Clarborough Hayton
376	2	The high density of housing on the site will mean a significant increase in vehicular traffic at an already dangerous junction, in addition, the traffic will increase on the 'rat ri road) by those avoiding the speed restrictions on the main road through Welham
376	3	Pedestrians and bicycles are already at risk as speed limits and consideration for other road users are ignored, crossing the canal bridge being high risk procedure.
376		I would suggest a risk assessment would highlight a potential safety issue, careful consideration, at this stage, is far better than having to use accident statistics and hindsig
377	1	The character of the whole area will be altered.
377	2	The roads in their present state would be quite inadequate. The traffic congestion on Tiln Lane, which takes very heavy lorries to and from the east to avoid the low bridge is proposed? Presumably widening of the roads, and access to the new sites would involve loss of agricultural land and the felling of such tress which are in the way.
377	3	I note also that the development I on greenfield sites, with the loss of further farming land and it is to be changed we never have to be land - it is shaped we never have to vegetables, cereal crops, quarrying for our animals etc.
377	4	In new of the above comment, I strongly object to the proposal which involved building outside the borough boundary
377	5	I wish to object to the above proposals for plans to develop 231 houses on the north side of Badgers Chase, Retford.
377	6	The existing Highway Infrastructure will not be able to cope with the increased traffic.
377	7	Good agricultural land will be lost if these sites are used. Brownfield sites should be used before agricultural land is developed.
377	8	There will be additional traffic and safety issues for road users and school children. HGV's have to use this route to avoid the low bridge at Welham. Their numbers are increased as a school should be additional traffic and safety issues for road users and school children. HGV's have to use this route to avoid the low bridge at Welham. Their numbers are increased as a school sc
		congestion along Tiln Lane at school times. Apart from the general concerns expressed above, this is going to put an estimated 1,000 extra cars onto Tiln Lane where traffic levels including large numbers of heavy go
377	8	expect gridlock at busy times of day, especially at the Tiln Lane/Moorgate junction.
377		It is surprising that proposals of this magnitude have not been given wider publicity. Many more people are likely to be directly affected have no inkling of what the Counci
377		Where are these extra people going to be employed
377		In the area of Tiln Lane specifically, the proposals envisage: up to 716 houses in the fields at the end of Bigsby Road, with access via Tiln Lane, up to 183 houses in the fields
3//		247 houses with access onto Tiln Lane. This represents about 30% of the total development propose door Retford.
378	1	I write to object in the strongest terms to the proposed future development of the potential housing sites adjacent to Bracken Lane, Grove Coach Road and Cavendish Road 511 as identified in the Bassetlaw District Local Development Framework, Site Allocations, Issues and Options Consultation Document.
378	2	The hazardous access to London Road from Grove Coach Road and Bracken Lane is already very difficult with the current volume of traffic. Additional housing and the cons enter London Road to access Retford via Grove Lane. These are all single vehicle width and hence unsuitable for the increased amount of traffic
378	3	These roads are also used by children walking to and from Bracken Lane School. Any increase in traffic would pose a greater danger to these children.
378	4	During the recent floods of 2007 a number of properties in the area were flooded by surface water draining from the adjacent hills. At that time the situation was largely consist to adjacent properties by acting as a buffer zone, allowing water to collect in the fields before slowly draining away. Any developments of these two sites would replace amount of hard surface which would increase the amount of surface run off both in speed and quantity thereby placing adjacent properties at a greater risk of flooding. An properties would also greatly increase the risk to existing properties adjacent to the site
378	5	The proposed sites are situated at the very edge of Retford and are therefore at some distance from local amenities. From the proposed development it is one mile to the half a mile to the main shopping and commercial area in the town centre. The proposal to build housing so far from shops and other amenities will lead to a dangerous incr narrow local roads.
378	6	The local school for the area, Bracken Lane Primary School is currently oversubscribed and would not be able to accommodate the large influx of additional children which

378	7	Existing properties in the area adjacent to the proposed sites are all detached properties with ample parking. The housing density per acre is far less than 30 dwellings per development totally out of keeping with its surrounding.
378	8	The proposed sites are surrounded by hedgerows which are home to many species of birds, animals and insects. Any future development of the sites would put at risk the
379	1	Why is the expansion of the town for housing seen as necessary on large areas around the periphery when such a small area proportionally dedicated for employment?
379	2	Why is it acceptable to allocate areas of farmland and flood land for future development yet not allow a small area, within the existing building framework to be deemed a
380	1	After much searching and viewing we found Sunnymede on Smeath Lane, it was ideal with a small orchard being a bungalow that we could easily maintain, the road was q decided to make an offer on the property, but before I did this I employed a company to give me a road count of traffic on Smeath Lane where the property is situated. To with around 200 vehicles over a period of 24 hours and around 30 vehicles over the same period, with on busy days cars numbering just has many, most using the road as way to Gainsborough. Smeath Lane is situated in a position of being in a basin, one side has terraced type houses, the other side which is on the Hayton boundary rises to private ownership, the context of this configuration is that it acts as an audible trap of noise, the sound from passing traffic and the many HGV lorries escape, it creates a r forth from the opposing properties which impedes everyone 24 hours a day, seven days a week.
380	2	The coke haulage companies serving West Burton Power Station continually flout planning consents and pass fully loaded through the village and over the small hump bac and length of the vehicles means they have to come over the small Victorian hum back bridge right in the centre, and it is quite often that another HGV or car is coming th are even more dangerous, cars regularly pass this winding road doing over 80 mile an hour, coke lorries and other HGVs have been recorded by me doing in excess of 60 m configuration is so that it is IMPOSSIBLE for a HGV to pass many parts of the roads without coming a third over the white line, in their urgency to get more deliveries of col still approach these dangerous bends at great speed, leaving no chance of stopping if they had to, and this is true of the rat run vehicles who attain speeds which are not o shadow of a doubt be a cause of a major accident in the very near future.
380	3	Then there is Carr Hill School, parents park along both sides of the roadside to pick up or drop off their children, large HGV vehicle have to pass this school only squeezing p let out of the school gates, or cross the road to get into the school –again this scenario is a regular occurrence, and some of the lollipop ladies holding their hand signs are these massive HGVs. The road is used so much that when the lollipop ladies stop the traffic, a queue builds up both ways very quickly involving cars and HGVs, a child of fiv wheels of these huge HGVs is a sight to make one cringe, I cannot imagine what would happen if one of these vehicles went out of control into the crowds of small children happen – HGVs and schools DO NOT MIX.
380	4	The Planning Department in their wisdom have once again pushed to one side the implications of the infrastructure of Smeath Lane – Tiln Road in their urge to complete p bungalows – in an area that urgently needs help at this time for redirecting traffic, slowing down traffic, also imposing a 7.5 ton limit, and to create pinch slowing points to HGVs using Smeath Lane or Tiln Lane. Vehicle approaching from Hayton rather than take the short cut road along Smeath Lane and Tiln Lane, rather than the long route un that 90% of traffic generated from Hayton Village goes this way creating more traffic, which adds to the already over and abused roadway system of Smeath Lane and Tiln
380	5	More residential houses would be a burden on this out-dated and dangerous road way system, it would create more pressure on the already dangerous environment of th residential of the proposed Corner Farm location – if it was allowed to go ahead, would use the short cut route on Smeath Lane - Tiln Lane this adding more to the problem
380	6	To allow other buildings areas in Hayton Clarborough without first addressing this traffic problems in essence lunacy, the area needs a bypass urgently, the area needs help speeding rat run cars, the area need a planning committee that is forward looking in its views, instead of creating more and more problems for existing residents. In 2004 r vehicle, it came around one of the tight corner fully loaded at great speed across the wrong side of the road, in essence the HGV vehicles had not choice than to go on the get around these beds in the road without crossing the middle road lines – its IMPOSSIBLE!
380	7	We have no police officer present on the road checking speeds, we have no help from any department, be it Planning, Highways, or enforcement of planning consents of t feeding West Burton Power Station.
380	8	I object to the proposed planning scheme by BDC to allocate land for building of more houses in the Clarborough Hayton area on the grounds that the infrastructure if road breaking point, by the ever increasing traffic.
380	9	Furthermore my property as other owners on Smeath Lane have lost considerable value, we all find it difficult to sell nay property, no one wishes to live in an area where g hours a day, no one wants to live where stream so fears continue on the road at great speeds in urgency to cut their time of their journey. Any person with a young family that is classified as a B road, and used more an A road, in fear if their children's safety.

380		John Mann has tried many times to get these problems sorted for the residents of Smeath Lane, and Tiln Lane, only to be confronted by the proposal on planning to conve Gate Inn into a higher carrying weight – these foolish plans would in essence create more problems for residents rather than curtail them - the planning committee must building more residential homes must be shelved until this dangerous, and unbearable traffic problem is stopped.
381	1	I agree to 12 new houses on Brown sites only. Any more will create more traffic pollution and danger
381	2	I would object on grounds of road infrastructure
381		None. Until a new bypass is completed or a 7.5 ton limit placed on Tiln Lane – Smeath Lane and pinch road areas to slow traffic.
381		Children in danger on road at Carr Hill School due to traffic passing to and from Smeath Lane area as a rat run
381		Also the biodiversity of the area with many rare species and invertebrates
382 382	2	Whilst we support the principle of utilising site assessment criteria to assess the suitability of respective sites for development as the right and proper course of action. It is the interpretation of the 'scoring system' and its outcomes that is critical to deciding which site should come forward. The setting up of a green, amber and red syste and not as an absolute method of determining which sites should come for development, as a totting up approach of scoring greens ambers and reds is too simplistic a supporting text states that it is not the Council's intention to rank the sites, yet the remainder of the paragraph and the following paragraph 2.18 conversely suggest ho the Council is intending to do. There are a number of issues that need to be considered in the interpretation of the 'scoring system' and which mitigate against applyin below: -
382	1 3 1	(i) Weighting - Should all nine criteria be given considered equal weight or are some criteria more fundamental to the site selection? I would suggest for example that crite particularly as the Council are not generally looking at many 'strategic' scale sites of over 20 ha which is the threshold at which Defrag is to be consulted on the loss of best of the site selection? I would suggest for example that crite
382	4	(ii) The consideration of Constraints – The larger the site, and / or the more complex the site in terms of its capacity for mixed use, the greater the prospect of development significant constraints cannot be overcome than in many cases the site should not be developed yet there will inevitably be large and/or mixed use sites which have some will result in a site delivering major sustainability benefits being marked down to an amber rating, whilst other smaller greenfield site which deliver limited community ber
382	5	(iii) Criterion 5 - Impacts on Water Source Protection Zones - potentially generates a conflict in that sites in the major (sustainable) settlements may well be scored amb locations may score green by virtue of not falling within an SPZ. Given that housing is not considered as a polluting activity, we would question the merit of including this c potential to downgrade sites unnecessarily on the basis of location within a graduated SPZ whilst having negligible impact thereon.
382	6	In our opinion, there should be an additional 'local infrastructure' category which assesses sites in respect of their ability to support existing community facilities and infra- part of the site allocation. Criterion 3 is the only criteria which positively scores sites for delivering economic development yet there are wider considerations that should l a site is being assessed. For example, the ability of a site to support local facilities should be recognised, as should sites which can deliver facilities for which the local comr example the opportunity for a major site to deliver a primary school site or a smaller rural service to deliver a local play area or school playing field extension are tangible can deliver, yet falls outside the current range of assessment criteria. Our request to the Council is to be pragmatic and look at critically at all the benefits that a site has t scoring system of the traffic light system in the light of the comments made.
382	7	We do not support either Option A or B.
382	IX	We have expressed the view in responding to the Core Strategy that we consider that the scale of housing promoted for Harworth-Bircotes for the plan period to 2028 is the marketability of the settlement and long term historically low housing completion rates. The regeneration agenda for the town is acknowledged yet the housing deliver
382	9	Any additional future housing growth should be focused at those settlements that are well served with a greater number of services and facilities and therefore more sust
382	1 10	Strongly disagree. The suggestion that only enough land is allocated in Sutton cum Lound for four new houses up to 2028 is considered to be far too low. The suggested fig Sutton village resident's survey in which only 66 responses were received to the 319 questionnaires delivered (representing a response rate of 20.69%).
382	11	When asked to indicate the number of new houses that should be provided in the village in broad tranches of 10s, the majority of respondents (45 or 68.2% of the overall 30% or nearly a third of respondents did support growth of between 0-30 houses up to 2028 (14 respondents suggested 0-10 houses, 4 respondents suggested 10-20 houses). My client questions what response would be received if the criteria tranches were broader for example: No new houses, 0-5, 6-10, 11-15 16-20 etc.

382	12	We are highly concerned that the suggested housing distribution targets across the RSC's appear to have been based solely on the findings of the residents' surveys. Residents the key findings from the LDF evidence work. It would appear that no consideration has been given to the Bassetlaw DC LDF document: 'Services and Facilities Study' und 10.117 refers to the key findings from the evidence work at Appendix B of the Site Allocation Issues and Options Consultation Paper and it is of concern that the Services and Appendix B. Should the services and facilities for each of the RSC be taken into consideration, the share or distribution of the suggested 10% of the housing growth for Bas
382	13	According to the information presented Sutton cum Lound has 319 households and is of a similar sized settlement to Elkesley with 347 households, Everton with 318 house Interestingly, based on residents questionnaire feedback, respondents suggests that 11-13 houses should be provided in those villages- a far greater rate than the respondents
382	14	Sutton cum Lound, like a limited number of the other Rural Service Centres, is located only approximately 3 miles from Retford town centre. The extensive and well estab approximately 1000 inhabitants, who have access to a variety of local services and facilities including the Village School, Village Hall, part-time Post Office facilities, Village village also has excellent links to the wider District especially Retford and therefore can take a higher proportion of the split of anticipated housing growth.
382	15	Our clients landholding (site number 274) which is close to the facilities of the village is an ideal site to accommodate such future housing development.
382	16	It should be noted that a planning application has recently been submitted to the Council to develop part of site number 274. As shown on the attached plan below, this a wider landholding within the village envelope. The proposal has been carefully designed so that the proposed private drive can be 'upgraded' to provided access to the wider landholding within the village envelope.
382	17	The overall subject site (site number 274) offers a logical extension to the built up area of Sutton without encroachment beyond the existing natural developed form of the property on the southern part of the site, barn conversation properties face the paddock across Lound Low Road to the west, the domestic curtilage of the two cottages a Road sweeps around to enclose the northern boundary. Thus the site is enclosed and has a significant road frontage which facilitates viable development unlike most of the accommodate in the order of 17 dwellings and development would not extend built up limits of the village since there are already properties to the immediate NE of the s
382	18	Sites 276 and 299 are large sites that in visual terms appear somewhat separate from the existing development boundary of the settlement and do not appear to be logica with providing access to and within the land could also raise viability issues.
382	19	Whilst sites 275 and 452 have a lesser visual impact on the character of the surrounding landscape that sites 276 and 299, it would appear that significant areas of mature to gain access from either Lound Low Road or Portland Place.
382	20	Site 282 and 536 appear to represent backland development
382	21	We agree that 2, 3 and 4 bed properties should be provided to meets the growing needs of the village and as over 85% of respondents suggested that small extensions bever required to meet these needs. Whilst we agree that in general terms brownfield land should be favoured for development purposes, it should be noted that there are no considered to considered necessary.
382	22	Yes we agree that the open spaces identified on the map should be protected.
383	1	I list below my objections to the proposed development in our area. This will remove valuable farmland which will be needed as the food crisis deepens (once its gone its g
383	2	Plus brownfield sites should be used first Harworth and Bircotes are asking for mixed developments (so I am told). The land around Moorgate Farm is home to various type disturbance will drive them away, this would be affected by sites 512, 37, 533
383	3	Any development on 533 will totally change Durham Grove from quiet cul de sac to a rat run. Our road is narrow with a tight bend to negotiate, we have a drainage proble worse.
383	4	The Tiln Lane to Moorgate Road infrastructure is already congested at times extra development can only make this worse. Any change to sites 512, 37, 533 and 7 would cr boundary and if carried out could end up with Retford and Clarborough meeting. Retford has to end somewhere leave it where it does.
383	5	If building has to take place in Retford any mixed use site that are already being used should be extended i.e. 51 and R7. If any other sites are still needed the ones that ha
383	6	The number of houses proposed for Retford could come from committed land if numbers are correct
384	1	no comment
384	2	I do not believe that Worksop should be allocated any more growth for housing but the employment growth could be improved by using sites which have already been use the current climate they have ceased trading and buildings are stood empty.
384	3	I believe all the sites are already over saturated with housing and particularly site 35 is unsuitable.
384		as stated in question 2 i believe there is already areas to reinstate as employment sites.
384	5	yes they should all be protected as open spaces. We need green areas for environmental reasons as well as it providing areas for keeping healthy physically and mentally

393	12	Development on this would result in a loss of amenity for local residents and would be detrimental to the entire area.
393		C) Loss of agricultural land. Agricultural land provides employment. Site 35 is productive agricultural land. It is currently being farmed, producing crops including wheat and
393	14	D) Access to shopping facilities our local shops which are sites off the estate are already busy with traffic and virtually gridlocked at busy times, which is a measure of thei including the proposed new Asda and Tesco supermarkets, are sites closer to the town centre, and are impractical for access on foot from site 35. This will lead to increase
393	15	E) Access to healthcare provision. Access to healthcare provision is limited, with doctors and dentists being sites on the other side of town. Access on foot from site 35 is in to doctors and dentists when required are currently at full capacity. with the increased population of Worksop you cannot see a doctor under 3 weeks unless it is an emerged
393	16	F) Provision of utilities and services. Development on site 35 will require significant investment in infrastructure to meet the demands of the new housing development, as to the remote location of the site. Improvements would be needed to upgrade level of service provision due to increased demand.
394		Yes
394	2	The town should be allocated more employment growth as it is greatly lacking in this area. More housing is not needed at this time as there are not enough jobs locally to increased population.
394	3	Location 35 is NOT suitable for housing. The gatefold area is already large enough.
394	4	Traffic generation would be too severe for the area and the loss of ecological habits, landscapes and wildlife would be unacceptable. There is inadequate infrastructure to
394	5	W9, W10, W8, W1 and W12
394	6	W9 and W10 (just employment)
394	7	The potential protected open spaces on the map should all be protected.
394	8	REMOVED
394	9	Yes
394	10	Option A: Spread between Worksop; Retford and Harworth Bircotes?
394		REMOVED
394		REMOVED
394		REMOVED
395		No. Not everybody has been consulted and therefore not been given the opportunity to have an input.
395		Option A: Spread between Worksop; Retford and Harworth Bircotes?
395		No, the village school cannot accommodate any more children and the village infrastructure and roads are already at capacity.
395	4	This question is not relevant as planning is already passed for this development so is irrelevant.
395		Why do we need anymore development when corner farm is already larger than the proposal of 12 additional houses
395		Yes
395	_	No, the sites currently supplied by the council are under used and there is other private land already occupied by travellers that the council won't give planning for.
396	1	Yes I agree
396		I feel the town could benefit from more business growth in particular manufacturing has for housing i already feel the town is stretched with services and the road designs
396		Area 35 is a bad area for housing it would put even more strain on services
396	4	The access to the site is all ready a traffic hot spot at busy periods
396	5	There are no facilities at all in the properties on the Gateford estates and everyone uses an already very busy Celtic Point
396	6	i also use the footpath regularly and is always in use there is enough derelict sites around Worksop so why strip our beautiful country side
396	7	39 and w10 would be a good location for mixed development there aren't many newish houses to that area and also offices etc.
396		Yes
396	9	Option A: Spread between Worksop; Retford and Harworth Bircotes?
396		no
396	11	together
397	1	I do think the screening methodology was rather difficult to understand was made really hard to find on the internet. There will be a lot of people who would like there satisfactories when the second base more user friendly.

401	7	I would strongly argue that location 35 on the Worksop map is completely unsuitable for additional housing development. I, along with a high proportion of home owners successful professionals, would turn their backs on Worksop for good if this development were to go ahead. The adjoining bridleways, paths, fields and woods were a sigr and remain a significant draw to local residents and others who travel to their area. Removal of these areas would cause a significant lowering of the quality of life for loca area. Site 35 should become 'protected open space.' Site 35 is a beautiful area of land We need to hang on to attractive areas if we are to increase the appeal of Workso
401	8	W13 would appear to be a very good choice - accessible and visible.
401	9	Yes - strongly - along with location 35 - this site also needs to become a protected open space.!
401	10	Far more employment sites need to be identified now. Standards in our local schools appear to be rising - by the time projects are completed - we need to harness the fru these people in our local area. Too many talented youngsters move away from this area after their education. The area needs to make plans to encourage their retention.
401		As above.
401		Option A: Spread between Worksop; Retford and Harworth Bircotes?
401	13	In and around existing, established sites.
401	14	Together - to allow those in travelling communities to share a focal point.
402	1	I am strongly opposed to the planning application for location 35 as it would be detrimental to everyone that lives on this estate and further.
402		Apart from being valuable agricultural land, it is used by many people for walking there dogs and numerous leisure pursuits.
402	3	We moved here 7 years ago for a slice of the country and now you want to destroy it, i feel there is no need for 700 new homes on this estate, which will also have the eff that already exist on the estate.
403	1	I agree the town needs to be developed but concentration should be linked with promoting the use and development of the town centre and not on sites further out of to will be unlikely to encourage growth of the town centre.
403	2	I think location 35 is unsuitable for development.
403		The open space provides valuable walking amenities on its numerous bridleways into natural woodland. The development would ruin this natural provision
403		The local amenities are already stretched including the access road (ashes park avenue) onto the main Gateford Road.
403		The school is full and the local shops already busy
403	6	When I bought my property I did so knowing that I had open fields to the rear, the Gateford development is already large and I am sure there are other areas of the town
		without developing picturesque farm land.
403		Sites near to the town centre and A57 (Manton Wood) to promote the town and utilise the traffic link provided by the A57 bypass south of the town towards the A1.
403		The green areas around Ashes Park Avenue must stay. They provide a vital service to local residents and make the estate more attractive to all.
403	9	Option A: Spread between Worksop; Retford and Harworth Bircotes?
403	10	The junction between Ashes Park Avenue and Gateford Road is already dangerous due to heavy traffic levels. Any increase in housing on the estate will make this situation visitors.
403	11	The junction between Ashes Park Avenue and Gateford Road is already dangerous due to heavy traffic levels. Any increase in housing on the estate will make this situatior visitors.
403	12	The area proposed is productive agricultural land farming Wheat and Oilseed rape
		The area proposed is bordered by Owday Wood/Rough Piece and Owday Plantation which are sites of importance for nature conservation. The woodland is at present un
403	13 1	35 will cause significant disturbance to these valuable woodlands
403		The area 'Gateford Hill Park' which includes Dog kennel Plantation is a mature landscaped area.
		The public footpath/bridleway entering the area from Montford road and stretching to Owday plantation is boarded by beautiful old trees and hedgerow which are impor
403	15	environment. This bridleway is used by many walkers daily both from the estate and many visiting recreational users. The loss of this countryside would be detrimental to
		importance to us, and the wildlife as Dog kennel Plantation
402	16	Our 'local' shops which are sited off the estate are already busy with traffic and virtually gridlocked at busy times, especially since one of the shops became an ASDA Addit
403		pressure on these already busy and dangerous junctions leading in and out of the shopping areas
403	17	Our local schools (primary, secondary and school based nursery's) are already to capacity. Yours faithfully
404	1	Yes
404	2	new housing should come second to more employment opportunities
404	3	I think location 35 is unsuitable
404	Λ	Option A: Spread between Worksop; Retford and Harworth Bircotes?

		Locations 35 & 8 are unsuitable for an additional 765 properties due to traffic congestion unless an additional road access was constructed onto Gateford Road. It is very difficult already a
412	2	Ashes Park Road. If additional access was provided then it would be of considerable interest to existing residents of Gateford to be advised on the types of proposed properties i.e. the mix
		housing dwellings.
412	3	Option A: Spread between Worksop; Retford and Harworth Bircotes?
413	1	I think Location 35 is unsuitable and am most strongly against it, I don't want our wonderful countryside destroying.
413	2	I would further add that this land is part of the gatefold park estate and would suggest that the new owners have bought the nursing home just to acquire this land, I am disgusted by this!
413	3	Option A: Spread between Worksop; Retford and Harworth Bircotes?
414	1	I think location 35 is unsuitable and would not like to see any more building work carried out in this area.
414	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
415	1	Regarding Location 35 (land near Gateford Nursing home & associated fields) is unsuitable.
415	2	It is a great area for walkers, cyclist & horse riders.
415	3	I live at 24 Greenwood close and have open views of these fields. I would object to any planning permission to this area
415	4	In addition, if 700 more homes were built - what would happen with the infrastructure - the roads in/out are busy now, the local schools cannot accommodate all the child places required
713		nature areas would be destroyed. Surely, there are enough brown fields sites available?
415	5	The open spaces at the side of Ashes Park Avenue should be maintained.
415	6	Option A: Spread between Worksop; Retford and Harworth Bircotes?
415	7	In one area around existing sites
416	1	Employment is required to help develop the town. However, building new homes first is putting the cart before the horse. What is required is investment into the local Business and Indus
	-	rather than building the homes and hoping that the jobs will come later.
416	2	Location 35 is unsuitable - the road infrastructure is already suffering.
416	3	Water pressure in the local already requires power showers (even in the recently built houses)
416	4	congestion will create additional safety issues
		A lot of open space (Green land) has already been developed. The issue of usage is one that affects all of us and therefore requires a full and open enquiry to establish how these developed.
416	5	sympathetic to the local area, what type of housing is going to be built, what eco systems will be built to support additional housing and what additional infrastructure is to be put in place
	_	adequate support systems in place
416	6	Option A: Spread between Worksop; Retford and Harworth Bircotes?
416	7	REMOVED
416	8	REMOVED
417	1	Yes
417	2	Worksop does not have enough facilities to cater for the current number of residents so no more housing should be allocated on this basis
417	3	I think location 35 is unsuitable due to the limited infrastructure in gaining access to and from the site.
417	4	Option A: Spread between Worksop; Retford and Harworth Bircotes?
417	5	REMOVED
417 418	6	REMOVED I think that Location 35 is unsuitable
418	1 2	A potential of an additional 700 homes, with the limited access to the main roads will cause tremendous traffic problems, especially onto Gateford Road (the main access to the A57).
418	3	In addition, the site appears to cover the public footpaths accessing the local woods for walking and these right-of-ways need to be maintained
410	5	It is also currently agricultural land, would it not be better to use the redundant old Vesuvius site (not considered within the consultation document) to cater for additional housing and/or
418	4	rather than sacrifice further greenbelt areas.
418	5	Location 4/W9 - I prefer Options 3 & 4 if this areas has to be developed, as it would have a lower environmental impact on the area.
418	6	The old Vesuvius site off Sandy Lane.
418	7	Option A: Spread between Worksop; Retford and Harworth Bircotes?
419	1	I think location 35 is UNSUITABLE for housing development for the following reasons:
419	2	the Gateford area already has difficulties in providing school places
419	3	the volume of traffic coming onto and off the estate would cause congestion
419	4	where are all these people going to get jobs from in an area where people are all ready struggling to find employment, my daughter included
419	5	I chose to move into the Gateford area because of the immediate access to the open countryside, building more houses here would spoil the open feeling to the area
110		

y difficult already accessing Gateford Road front operties i.e. the mix of privately owned to social

nild places required, and the green lands and

Business and Industries to create more jobs

now these developments are to be built s to be put in place to ensure that there is

nal housing and/or business requirements

Image: Second Processing Section 2014 Answer 419 6 Option A: Spread between Worksop; Betford and Harworth Birrootes? 420 1 Iseleve employment growth and infrastructure is important in the Worksop area but building more houses would put pressure on the aiready stretched infrastructure is important. The worksop is a but building more houses in Gateford and 700 more would be impossible. 420 3 There is predux little infrastructure in the wars to support the aiready large number of houses in Gateford and 700 more would be impossible. 420 4 Option A: Spread between Worksop; Betford and Harworth Bircotes? 420 5 Option A: Spread between Worksop; Betford and Harworth Bircotes? 421 1 Between built and green built in & a round the town. If it is decided to build further housing, then use brown field rather than green field stats, the Worksop. 421 3 Down invest developments have already been built in & around the town. If it is decided to build further housing, then use brown field rather than green field stats, the Worksop. 421 4 Down invest developments have already been built in & around the town. 421 4 Down invest developments have already been built in & around the town. 421 4 Down invest developments have already been built in & around network. 421	Reference	number

424	5	The area suffers from regular power cuts, flooding of the A60 at the junction with Lawn Road and Doncaster Road together with the road outside my property, and genera prolonged heavy rainfall. The last of which poses a health hazard to the community. As I write this response the area has suffered a power cut again! 2nd this week.
424	6	All the open spaces identified on the map should be protected from development
424	7	Option A bearing in mind there is little point in allocating housing into a rural area without a fully supported infrastructure of shops, services, buses etc.
424		REMOVED
424		REMOVED
424	10	
425	1	The site that raises concerns from our position and situation would of course be the one that would have most direct impact on our own lives and daily outlook namely the alongside, Rutland Road, London Road and Grove Road respectively.
425	2	This area has we understand already been the subject of planning applications and these have always been refused on the same grounds that namely is it a floodplain ofter ground due to the very high water table and an already overburdened water run off causing flooding damage to properties on Grove Lane, Trent Street, Blackstope Lane ar local area. Much of this flooding is due to the excessive water run off from Grove Hills, land which could not be altered to reduce this problem. Indeed in 2007 the water ru dangerous to the local inhabitants at the bottom of Grove Lane when the water run off in the water courses was seen to be unable to find sufficient passage through the d upwards from the immense pressure building up behind to well over head height.
425	3	We would also add that Bracken Lane School serving the area suffers from its sports field being waterlogged many months of the year and difficulty with the drains this has attended the school it is we understand also currently almost full to capacity with little realistic prospect to expend.
425	4	We would also like to point out that the road system in the area is already overburdened and any further development would cause further chaos when trying to get from place and onto London Road this can result in waits of 15 to 20 minutes in peak times. This would be no better if the traffic was routed via Grove Road due to the already p
426	1	No we do not believe Retford needs anymore allocated housing. it is very obvious Retford has enough vacant properties.
426	2	if only sites would actively benefit from more properties, we believe sites 342, 10, 70 and 71. These sites would benefit at they are already in the town centre and already
426	3	For employment related development we believe site 51 would be much a better choice as there is already existing businesses, so it would make more sense expanding th to the town centre.
426	4	We feel there is a lot of relevant issues developing from the proposed housing allocation of sites especially from the general public it will effect. Some of the issues that ha worse if development was to go ahead are services. Such as emergency services will struggle to cover a larger area even more than usual especially with cut backs made.
426	5	Also health services such as doctors and dentists will not be able to cope with a sudden impact.
426	6	The roads won't be able to cope with the mass of traffic.
426	7	Plus more traffic will cause unnecessary damage to the environment.
426	8	Sites 364, 41, 1, 52 and 40 need to be protected as they are believed to be on the flight path for both Gamston and Robin Hood airport.
426 426	9 10	Also sites 364 and 41 need to be protected to save the wildlife there The current Southern Boundary to Retford is well defined and provides a consistent and appealing entrance to the town and this would be lost by these developments.
426	10	It is important to maintain a distinctive boundary between the urban area and the open agricultural land and the current town limit doers precisely that.
426	12	There will be a significant loss of amenity
426	13	The local infrastructure will not cope with and occupants of the new housing would have to drive a significant distance for shops, schools, doctors and other facilities.
426	14	There are more appropriate areas of land within the existing Retford town boundaries for housing.
426	15	I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.
427	1	Overdevelopment – how many empty properties, including new builds are there in Retford Area? What demands would there be for the excessive number of new builds the state of the excessive number of new builds the state of the excessive number of new builds are there in Retford Area? What demands would there be for the excessive number of new builds are there in Retford Area? What demands would there be for the excessive number of new builds are there in Retford Area? -		In the absence of the construction of a Clarborough by-pass relief road which has been under consideration for several years but continually side lined, the route for HGVs
427		dangerous for local residents, especially school children of Carr Hill School and hazardous to motorists in view of the narrow road and dangerous bends, the likelihood of a
		traffic, road junctions etc. would be high.
		Being a dog owner myself, the size of 2 developments would diminish the availability of open rural areas where we can safely allow a dog to exercise. The menace of dog f
427		acceptable, but the irresponsibility of some dog owners allowing their pets to foul pavements etc. would significantly increase.
		There was no information forthcoming from the council offers that any consideration has yet been given to the provision of an adequate relief highway route to Gainsbord
427	6	density as a result of this development.
427	7	I was given to understand that these developments involve building outside of the existing development envelope and outside the borough boundary.
407		Being a local resident in this location I am often inconvenienced by the volume of HGVs and through traffic on Tiln Lane, the inability to exit Tiln Lane onto Moorgate and p
427	8	Hill School arrivals and departure periods. This will only worsen.
428		Option A
	_	We do not agree that houses should be built in Rampton on the grounds that there is no employment in the area and would mean that such houses would be occupied the
428	2	an increase in road traffic.
428	3	If we must have them they should be built on area 228 and/or the area on the opposite side of Treswell Road backing on to Birch Close
428	4	No
428	5	Yes
428	6	In and around existing sites. The one on Cottam Road appears to meet the current need
428		We have no opinion on this question
428	8	No knowledge of such land
428	9	On objections – makes sense close to existing ribbon development near by.
428	10	Why not look at using the area we have indicated on the plan on the opposite side of the road backing onto Birch Close
428	11	Surely this is land designated for the children's play area and sports fields
428	12	This area is opposite the playing fields and would cause traffic danger to the children
428	13	As stated in the answer to question 101, there is little employment opportunities in the village other than at Cottam Power Station and Rampton Hospital.
428	14	Additional commuter traffic would increase the danger to children which is not acceptable
429	1	We do not believe that the town should consider allocating land for large scale housing development or industry unless there is a strong indicated demand.
429	2	Initially site 51 – there is good access to the Great North Road
429	3	Initially site 51 – there is good access to the Great North Road
429	4	Initially site 51 – there is good access to the Great North Road
429	5	Re: sites 259, 41, 40, 521, 21 these sites appear to us totally inappropriate for large scale development whether for housing or employment because:
429	6	The land is prime agricultural land
420	7	The road to the A1 is little more than a country lane with several dangerous bends. Development of this site would lead to a massive increase in traffic. Similarly increased
429	/	to hazards especially around Ordsall Primary School.
429	8	Existing bungalows adjacent to the site would be severely overshadowed and overlooked leading to loss of privacy. The lie of the land would exacerbate this.
429	9	Ecological effect. Cuckoos (lapwings) return to these fields each spring. It is one of the few places in Retford that one hears their strange cries and sees their equally odd fl
429	10	The current Southern Boundary to Retford is well defined and provides a consistent and appealing entrance to the town and this would be lost by these developments.
429	11	It is important to maintain a distinctive boundary between the urban area and the open agricultural land and the current town limit doers precisely that.
429	12	There will be a significant loss of amenity
429	13	The local infrastructure will not cope with and occupants of the new housing would have to drive a significant distance for shops, schools, doctors and other facilities.
429	14	There are more appropriate areas of land within the existing Retford town boundaries for housing.
429	15	I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.
430	1	The sites 37 and 512 on Tiln Lane are outside the existing development and other sites within the town limits should be considered before using up such greenfield land.
		Tiln Lane suffers heavy HGV traffic congestion as vehicles avoid the low bridge at Clarborough. When school children are entering and leaving Carr Hill Scholl on Tin Lane p
430	2	blocking access/egress completely and making a most dangerous situation. This is a situation which only would be made worse by extra dwelling on the proposed site.
430	3	The sites 37 and 512 stand on higher ground than the existing housing on Badgers Chase and therefore any buildings on this site would adversely affect the existing homes
450	5	

Vs etc. avoiding the low railway bridge is both of an increase in accident rate because of extra

g fouling in public areas is already not

orough to absorb any increase in local traffic

d particularly dense localised traffic driving Carr

the commuters to Retford and beyond causing

ed traffic to Babworth and Worksop would lead

d flight.

e parents' cars add further congestion often

nes and cause a visual scar.

Reference number ntIt is now well over 2 years since the Strategic Review of Housing needs in Bassettaw was implemented. In the meantime the economic basis a biao altered in such a substantial way that i do not consider all the implications have need realised and that all previous assumptions as to gr site allocation issues should be reconsidered an initio as the current consultation must now be based on a fake premise and, therefore, bey any information as to how the need for additional housing is accentened main declaration do be not shop both difficult.4313The document does not provide any analysis on the availability of brownfield sites of the utilisation of the existing housing stock to meet fur given before any attempt is made to progress matters.4313The sites 37 and 512 on Till Lane Rettord site tou like a sore thumb from the existing development envelope. An overwhelming demand, w be required before this site should even be considered for any type of development.4314The use of Till Lane, including that part of the read fronting this site by HGVs making a detour to avoid the low railway bridge at Clarborough site uniest and could not, or at least should not be reasonably, be given access to Till Lane without a drive the detection times and a barard.4315The site of Car Hill School on Till Lane represents a considerable road safety hazard in particular at thild edivery and collection times and barard.4316The brography means that any development of site 37 however carefully planned will have an unputsfild advense impact on the existing de datard in barard.4317Inhore read the blection prepared by Mr J. 464	2	The whole character of the area would be altered for ever by this proposed development. The present residential areas are within the borough boundary, fronting onto op
464	2	proportioned large family homes, as are the majority of the houses along Tiln Lane and Welham Road.
464	3	The existing Highway infrastructure would clearly not be able to cope safely and functionally with the inevitable increase in traffic. In term time, at Carr hill school. There is
404		delivery and collection times, as children enter and leave school.
464		Good crop producing agricultural land would be lost at a time when there must be poorer land available that is equally suitable for housing development.
464	5	All brownfield sites should be developed prior to developing on the edge of town or outside of the borough boundary.
464	6	There would be added traffic dangers to other road users besides the risks imparted to the school children. The ever increasing numbers of HGV's using Tiln Lane (to avoid
		exacerbated the present risks due to the attendant traffic congestion.
464	7	The above development proposal involves building outside of the present development envelope. This is unnecessary because there are plenty of infill sites within the bor
464	8	There has been no consultation with local residents prior to your producing your Core Strategy.
464	9	There does not seem to be any good reason, therefore, to propose to develop outside of existing development envelope, thus spoiling the Northern end of Retford with up and it is my intention that it remains that way
		Retford from Clarborough gives a very pleasing impressing of a well cared for and prosperous town and it is my intention that it remains that way. I am writing to object to the above proposal for the following reasons: a) the addition of 230 dwellings will certainty affect he character of the area, insofar as developmen
465	1	the local manor house
		The existing highway infrastructure is presently subject to high stress due to the constant passage in both directions of very heavy vehicles along Tiln Lane, together with the
465	2	at Carr Hill primary school. Additional traffic will seriously aggravate the situation with consequent hazards.
465	3	The proposed site appears to be good crop producing land. The loss f which would be contrary to general common sense, especially when non-productive brownfield sites
465	4	It is suggested that the above objections constitute three very good reasons for the rejection of this proposal
466	1	I am writing to object to the above proposal for the following reasons:
466	2	a) the addition of 230 dwellings will certainly affect the character if the area in so far as the existing housing consists mainly of small development of well proportioned fan
466		b) the existing highway infrastructure is presently subject to high stress due to the consistent package in both directions of very heavy vehicles along Tiln Lane, together wi
	_	daily at Carr Hill primary school. Extra traffic will seriously aggravate the situation with consequent hazards.
466		The proposed site appears to be good crop producing land, the loss of which would be contrary to general common sense, especially when non-productive brown filed site
466	5	It is suggested that the above constitute three very good reasons for the rejection of this proposal.
467	1	I wish the register my objection to the proposed development of 240 houses adjacent to Badgers Chase (sites 37 and 512 land north of Retford). My objections are based of
467	2	a) The number of proposed houses will significantly alter the character of the area and detract from it, by creating a pocket of high density in an area of open countryside a
467	3	b) The traffic of Tiln Lane will increase significantly, adding to the current congestion, particularly at Carr Hill school and the junction of Moorgate, there will be an increase
407		already impacted by the large number of HGVs using Tiln Lane.
467		c) The loss of good agricultural land when there are less productive sites still undeveloped.
467		d) The general lack of facilities in the town to sustain all these proposed new homes – schools, shops, leisure facilities
467		e) Urban sprawl – such sites should only be developed when all other sites within the town boundary have been developed.
467	7	f) Lack of consultation – a notice on a lamp post and a small plan in the local free paper and a short deadline all give the impression of plans being rushed through with littl

473 473 473 473 473 473 474 474 474 474 474 474 474 474	5	
473 473 473 473 473 473 474 474 474 474 474 474 474 474		The suisting high you infrastructure will not be able to some with the increase in traffic
473 473 473 474 474 474 474 474 474 474		The existing highway infrastructure will not be able to cope with the increase in traffic
473 473 474 474 474 474 474 474 474	6	There is an ever increasing number of Heavy Goods Vehicles having to use Tiln Lane to avoid the low bridge at Welham, this combined with additional term time school tra standstill.
473 474 474 474 474 474 474 474		An increase in traffic along Tiln Lane, will pose additional hazards to road users and pedestrians alike
474 474 474 474 474 474 474 474	8	The entrance into Retford from Hayton I Clarborough gives a very pleasing impression of the town, indicating a well-cared for and prosperous town. Any development in this area seems unnecessary and detrimental to the town.
474 474 474 474 474	9	I trust my objections will be taken into account when deciding the future of this area of Retford
474 474 474 474	1	My objections to the proposed development are as follows
474 474 474		No consultation with any of the residents
474 474		Character of the area will never be the same.
474		Good crop producing agricultural land will be lost forever
		Brownfield sites should be developed prior to looking at the edge of town or beyond the borough boundary in open countryside
474	6	The roads in the area will not cope safely with the increase in traffic, specially as Heavy Goods Vehicles are using Tiln Lane to avoid the low bridge at Welham
	7	Concern with the additional traffic is that there will be an increased danger to road users, school children and pedestrians along Tiln Lane and surrounding area.
474	8	It would seem a planning error to spoil the entrance into Retford from the Clarborough I Hayton direction, as at present this gives a very good impression of a well cared for
474	9	I hope my objections will be taken into consideration when deciding the future of this area of Retford
475	1	I am writing so as to register my objections to the above proposed development. These are based upon the following criteria
475		The development, which is outside the borough boundary, would be wholly out of character with the surrounding residential area, which ostensibly comprises well propor the entirety of Tiln Lane
475		The immediate res identical area is also within the borough boundary and fronts on to open(~ countryside, providing an attractive approach for visitors, and characterising prosperous provincial market town, The development would alter this character, whilst good, fertile, crop producing agricultural land will also be lost, forever
475	4	I would maintain that all "brown field" or "in fill" sites should be further developed within the borough ~prior to even considering those on the edge of the town or outside
475	5 1	The existing highway infrastructure would not be capable of safely handling the inevitable and , significant increase in the volume of traffic, given that there is already cons and beyond when children are either being delivered or collected
475	6	Vehicles currently park along the entire length of Tiln Lane at these times, whilst also spilling into ~Bigsby Road, Elmwood Close, Richmond Road and Palmer Road, thereby buses and moving cars trying to navigate past
475		Given the ever increasing number of heavy goods vehicles having to use Tiln Lane so as to avoid I!) the low bridge at Welham, this development would make the residentia and pedestrians alike
475	8	Finally, to my recollection, I do not believe that any formal consultation process with local residents W has taken place prior to the production of the Core Strategy

487	9	reasons, so why build more?
		I am writing to formally register my objections to the proposed 'development' as stated above,
		the knowledge of which has only recently come to my notice by 'word of mouth' alone.
488		This lack of notice is particularly worrying considering the size of the planned 'development' and the considerable impact it will have on the area. I would have expected a
		publicised and considerable effort made to gather local opinion gathered well before proceeding to the apparent stage this strategy is at now.
		Moving on to the local impact, it appears, judging by the owners quoted alone, that this 'development' will be totally out of character with the present general housing lay
488		proportioned and spaced family properties, with this general character being the norm for the vast majority of the surrounding housing stretching all the way back to Well
		present well balanced and aesthetically pleasing overall first impression when arriving in Retford by way often Lane.
400		Considering the overall placement, it is disappointing to see that the implement station of these plans, regardless of the number or type of housing envisaged, would mea
488		there are surely more suitable sites available in the area. I am also led to believe that it is the case that all 'brownfield' sites are developed before sites such as these are consisting development enveloped.
		existing development envelope.
		Finally, the impact on the highway infrastructure must be discussed. The huge growth in traffic this development' would mean increases the risk of serious accident or inci
		would be to point out that there are many HGVs already using Tiln Lane what is the problem? Well the irony is that because of this HGV traffic it is difficult to introduce ac
		reality is that HGVs, in my opinion, actually present a much lower risk than ordinary, what I would class 'convenience' driving. HGV drivers are professionally trained and the
488		climb into their cab is the safety of their vehicle from all aspects, driving, positioning etc. Unlike the 'convenience' drivers, who unfortunately, more often than not, class a
		from their stereo or the subject of their mobile telephone conversation. The 'convenience' driver is the type of driver there will be a huge increase of should this 'developr
		scurrying children and parents at school times and the risk values become deeply worrying. There has been a child fatality on Too Lane in recent years and whilst not direct
		it merely demonstrates the danger of children around vehicular traffic.
400	_	In conclusion, you will notice that I have put the word 'development' in quotation marks, this is deliberate on my part as it is commonly perceived that a 'development' is a
488		strong belief that in this case improvement is the last description for such plans as these

489	2	The quality of our lives and those of the young families who make up this area is enhanced significantly by the prevalence of open countryside immediately available from the houses, which make a healthy environment for children to grow up in. However, with new developments a vast number of housings would not only obscure but would not only decrease the quality of life of the residents, this would also exacerbate the problem of road traffic to a suffocating level, as there are only small width cour The increased traffic levels that correspond with new builds increases danger to the elderly and infants. Indeed, we personally have already experienced a HGV going thro so lovingly that my husband could easily have been killed as he often works at the very point the lorry came crashing through our hedge. HGVs have to avoid the low Welf Tiln Lane currently, but the number is increasing and so the chance of a similar accident.
489	3	Increased traffic levels would not only bring increased immediate danger, but also a suffocation of the Highway Infrastructure. The aforementioned country roads are not Carr Hill School's proximity would make term time drop-off and pick-up times, already severely busy, unmanageably congested, and of course consequentially endanger the severely busy.
489	4	I am disgusted that we have not been considered as residents in the formulation of this Core Strategy to develop the site. cannot see any need for unnecessary developme existing brownfield sites ripe for development, and when this current entrance to Retford from Clarborough is pleasing.
490	1	I would firstly object to this development on the basis of traffic generation and road safety. In the Strategic Housing Land Availability Assessment produced by Bassetlaw D September 11th 2009, the following details are noted: "The speed limit on Tiln Lane would need extending. Requires visibility to be provided as standard, on site highway layout to standard, residential travel plan, planning con transport assessment". I have not been able to find these plans and assessments on the website of Bassetlaw District Council, and if they exist I would be grateful if you would provide me with co line. The same document also reads: "There are highway concerns that would need addressing before the site can be considered suitable." According to the SHLAA, if the highway concerns have not been addressed, the site can not be considered suitable.
490	2	As well as the increase in residential/domestic traffic on Tiln Lane caused by the existence of a new housing estate, the development plan of Linden Homes is a ten year pl STRATEGY DEVELOPMENT PLAN DOCUMENT (DPD), EXAMINATION IN PUBLIC Inspector's Questions Day 2 -Wednesday 18 May 2011, Main Matter 5"), meaning that there for ten years.
490	3	This is excess traffic on the road, which, in addition to being the scene of a car crash on 20th October 2008 which required the attendance of the fire brigade (as reported i also the scene of the fatal accident involving a ten year old child on 10th November 2008 (reported in the local Guardian newspaper). Despite these accidents, and despite would need extending and transport assessed etc., there have been no permanent improvements to road safety on Tiln Lane. Although a temporary speed detector has be reports in the local media from February 2011 advising that Nottinghamshire County Council were "considering" a permanent speed camera, no such improvement has th
490	4	In addition to additional vehicular traffic on Tiln Lane, the SHLAA makes no consideration of the likely increase in pedestrian and non-motorised vehicular traffic along Bolł for the elderly around Water Lane. This area is the natural way to walk or cycle into Retford from many of the houses around Tiln Lane, and is already an area with poor st
490	5	I would also object to the following statement presented in BASSETLAW CORE STRATEGY DEVELOPMENT PLAN DOCUMENT (DPD),EXAMINATION IN PUBLIC Inspector's Questions Day 2- Wednesday 18 May 2011, Main Matter 5: "For the avoidance of doubt, Linden Homes believe that its landholdings at Tiln Lane, Retford presents good urban extension development opportunity, which has the cap homes. If This is contrary to and greater than the explicit number of 154 houses stated in Bassetlaw District Councils SHLAA which is rounded upwards from the calculation "Based on 80% of the gross area (6.41ha) at a density of 30 dwellings per hectare."

		I would also object to the loss of agricultural land and vegetation. Linden Homes' "Planning and Concept Masterplan Report" dated May 2011 reads: Vegetation 3.6 The site contains no landscape features of intrinsic value apart from the boundary vegetation.
490	6	This statement contradicts itself by stating that boundary vegetation has intrinsic value, and avoids accepting the fact agricultural land produces vegetation with capital value. Additionally, there are several Tree Preservation Orders extant for Tiln Lane (B42, B125, B139, 8271, B281), so I would question whether there has been a proper assessment of the land to justify this conclusion
490	7	Your SHLAA also concedes that a grade 11 listed building is across the road from the development area, and so I would argue that a housing estate in this area will fundam
490	8	In BASSETLAW CORE STRATEGY DEVELOPMENT PLAN DOCUMENT (DPD), EXAMINATION IN PUBLIC Inspector's Questions Day 2 -Wednesday 18 May 2011, Main Matter 5, [Bassetlaw District Council granting planning approval for various Brown Field Sites in the Retford area (e.g. the Ordsall Hall Comprehensive School), Linden Homes makes Homes does not believe that all permissions will be delivered. Therefore there is a need for more deliverable sites to be brought forward for development to help ensure of deliverable sites within Retford this means that urban extensions are necessary
490	9	The essence of the argument seems to be that since there are paperwork difficulties with Brown Field sites that are considered suitable for housing, then it is OK to build o sites available for housing, I would on this basis again object to the planning development on Tiln Lane
491	1	To ensure that you are aware that I validate entirely the letter sent by my husband please also accept this letter direct from myself to register as a formal objection for yo
491	2	J write to register my strongest objections to this proposal. I would like to point out that without the information being passed to me by word of mouth from a neighbour proposal which I think is an outrageous situation. Given that I live adjacent to the proposed development I would have thought that it would have been necessary to contact me directly. Indeed when a neighbour on the r dwelling on his land the entire street was communicated with, but not it seems when not I but 230 properties are proposed.
491	3	When I bought my property I made explicit checks with BDC in relation to this land and was assured that this Brownfield site would NOT be developed unless and until all o this is cet1ainly not the case
491	4	This development will damage the whole character of the area which will obviously be altered forever by this proposed development. When I chose this house it was with will be damaged for ever.
491	5	The proposed development will open onto a highway infrastructure which will certainly not be able to cope. This section of road is already narrow and immediately is face of Retford. Traffic levels are already high and dangerous as we have all the HGV vehicles routed this way to avoid the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed this way to avoid the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed this way to avoid the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed this way to avoid the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed the low bridge the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed the low bridge the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed the low bridge the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed the low bridge the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed the low bridge the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed the low bridge the low bridge when travelling from Retford to Clarborous as we have all the HGV vehicles routed the low bridge the low bridge the low bridge when travelling from
491	6	You will no doubt recall that Tiln Lane has already sadly seen a fatality in recent times and this increased traffic will serve in no way to make this road any safer, Indeed as being installed to try to combat the actions in front offset Hill School which will be directly impacted by this development.
491	7	This development is going to remove a substantial area of good crop producing agricultural land, when clearly there remains much poorer land that is equally suitable for rational of such a proposed development in this location. As said the Character of the area was one of the driving features in my choice to purchase my current property g that all the other houses are large executive family homes. My vista from my garden would change from open countryside to a view of a housing estate, and as said I was chance of development every being granted.
491	8	My understanding is that this development will be outside of the current Boundary Borough and I had understood that prior to any development being granted as in this c sites had to be utilised within the borough.
491	9	I will end the letter as I began to register my strongest objection to this proposed development which will change the character of the area forever, will compromise the h significantly traffic with all its associated dangers so close to a School, will remove good crop producing agricultural land when many other options exist. I remain very con directly re this proposal but hope that this letter now makes you aware that I am now informed and as a result I advise you of my objection
492	1	This letter is written as my objection to the proposed building development adjacent to Badgers Chase, Retford -Sites 37 and 512 (231 houses) and sites 533, 7, 46 and 309 (915 houses) from Tiln Lane through to Welham Road.

		directly re this proposal but hope that this letter now makes you aware that I am now informed and as a result I advise you of my objection
494	1	I am writing to object to a proposed DEVELOPMENT OF 230 HOUSES ADJACENT TO Badgers Chase sites 37 and 512
494	2	I strongly object to this proposal as it will change the character of the area
494		It will also increase the traffic in the area and the current highway infrastructure will not be able to cope with the increased volume of traffic.
494		This will inevitably have an impact on the safety of the children in the area
494		The local school would not be able to manage the increased intake of children. The agricultural land will be lost thus ruining the beauty of the area.
495		Top of Worksop in the area of the Queen's Buildings: a) with the imminent opening of the cinema it would therefore seem wise to develop associated entertainment facili
495		b) One would hope that the Ship Inn and French Horn would re-open primarily as restaurants.
495	3	c) The vacant Mayfair Centre, fronting the remaining car park would probably offer sufficient opportunities for development as an indoor bowling alley complementing the
		Development of the land adjacent to Shireoaks Marina: if/when this site is developer, taking into account rural economy and environment, we would prefer to see a group
495	4	Thoresby Hall, with sufficient visitor car parking. This would enhance not only tourism but provide a work place for small businesses outlets and availability to pursue craft
		Any residential development on this site should preferably be of a quality in keeping with the surroundings, NOT social housing. Therefore this development would not cau
495	5 1	and create a more tasteful and quality aspect to the banks of the Chesterfield Canal.
496	1	I do not agree that only enough land should be allocated in Wheatley for 12 houses. More than this number is required.
490	1	I believe we require more like 20-5 as needs are diverse, there is a need for affordable housing. A need for housing for the elderly who want to downsize. A need for youn
496	2	who do not want a large 4 bedroom house. The village needs to attract more families.
	3	Sites. I do not think that site 239 should be built on. I live in the countryside because I like to see fields and views. I like walking and do not want to see big development vis
496		walk and when I walk through South Wheatley I do not want to see this.
496		Therefore I do not think that there should be any development on 236, 237 and 238 which are really outside this village.
496		Development on a small scale n site 464 would go unnoticed and would not impact on first one road. It would not block views over the fields.
496		Yes here are narrow roads. These are fine for people walking and cars. Lorries can be stopped from using them.
496	7	broadband speeds are low but if more people lived here it would be addressed.
496	8	If more school places are needed it can be expanded. We have a village hall and it is a good one and people use it
496	9	I can see nothing wrong with the play area for children and new ones could be built if there was a need conditional upon development taking place.
496	10	The open spaces need to be left open otherwise open views will be lost. Sites 36/3, 36/6, 36/7, 36/4 must not be built on.
496	11	Room needs to be left for the school to expand.
496	12	The village needs the village hall, sports field, tennis courts, bowling green and children's play area to ensure hat the village remains a living village.
497	1	result in the loss of agricultural land with consequential damage to the environment including the rich insect, bird and animal life resident in the area

498	1	We understand that consideration is being given to reclassification of the Green Belt land in the above areas to allow development of this area of Retford, namely the buil
498	2	Tiln Lane road already cannot cope with the volume of traffic and has an infant/junior school situated on it. Increasing the traffic in this area would lead to congestion and encouraging families to walk to school. This would have the opposite effect
498	3	There has been no consultation with residents on the reclassification and the development would substantially alter the character of what is currently a leafy suburban are own policies. The proposals also involve building outside of the existing development envelope on good agricultural land which is what gives character to the area and the in Retford. The proposals also involve building outside the borough boundary -boundaries are there for a reason and should be observed
498	4	Within the Retford Area there is no shortage of housing and this number of new properties is not needed for the town. Building this estate would put it outside walking dis encourage further use of the car increasing again traffic problems-why not develop within Retford i.e. the Focus site or where there is a major road to take the traffic i.e. N into these new builds further from the town centre the centre of town would be damaged and so would the businesses therein causing economic decline at a time when r look at Gainsborough and Worksop, with developments of new housing sprawling on the outskirts. Outside of Marshalls Yard Gainsborough the town centre is a dump. In and keep Retford a great place to live not make it the same as Worksop.
498	5	The proposals are fundamentally wrong and therefore should be stopped at this stage
499	1	Whilst not totally opposed to the proposed housing development around the Retford and especially Ordsall areas, we do have concerns over the effect on the town as a
499	2	There are limited access roads into Ordsall -only 1 capable of taking heavy goods vehicles, and this has to pass the primary school. Other routes into Ordsall are restricted road accessed by crossing the A1 if coming from the South. Access from Ordsall to town via Hallcroft roundabout can take y, hr. min at school out & rush hour times currer major improvements to cope with additional traffic trying to get to schools and work During the snow of last year, the outlying main roads were not cleared, never mind the shops. During the floods of 2007, all minor roads into Ordsall over the River Idle, and from the A1 were closed due to flooding, restricting access to the Worksop Road only
499	3	The local Primary school has recently been refurbished and upgraded, but this was done on a budget, and as such not all required works were sanctioned. All too late the u the current capacity of pupils at the school, never mind with an influx of additional populous
499	4	There are no facilities for children in Ordsall -one play park has recently been closed and is now being developed with domestic properties. Those areas left are all clearly s
499	5	Ordsall is currently on the edge of the turning circle for flights in and out of Robin Hood and Gamston Airports -some of the proposed developments will now be directly un
499	6	The communications networks in town will need to be greatly improved. In this modem technological age, the web is a must have facility, and currently the system in Retf
499	7	An increase in town could require additional emergency services why then have we had to fight to maintain the existing fire station service, which was to be downgraded - expansion were known The town has already lost most of the hospital services it had, and downgrades (removal of maternity services) are being planned for Bassetlaw Ho redundancies, and there is insufficient work in the area as it is, without plans to expand the populous. With out the attraction of more employment opportunities in the ar utilise the new properties?
499	8	The plans made available so far for the expansion show some areas as being designated as mixed use areas rather than solely housing -we presume this means domestic a the employment opportunities in the area. Current areas of development with this designation have ended up being purely domestic, and a lot of these and older properti
499	9	Is it the councils intention to take over these properties and through A 1 Housing, give them to the unemployed / homeless / immigrants and increase the burden on those run our own homes
499	10	There has been an increase in town centre pubs over the last few years, but where are the Restaurants? All we have are Indians and Chinese.
500	1	I am writing to register our opposition to the proposal to develop the brown field land, north of Badgers Chase (off Tiln Lane).
500	2	Our house on Bolham Lane is located at the rear of the field (opposite Tiln Lane). The property is at a lower level than the field, approximately by 15ft-20ft and all that sep higher field is a single retaining brick wall. I have enclosed photographs to illustrate the area. The difference in height from Bolham Lane and the upper field as you will be Lane, but we are the only houses (No's 58, 60, and 62) that are built so close to the embankment, and we are very concerned about the integrity of the embankment if buil here would weaken the retaining wall and could potentially have serious safety issues if breached Our upper floor windows overlook the field, but more relevant would be result from any development. Being so close and at a lower level any new dwellings would not only reduce already limited incoming daylight on this side of the house, but with new residents having access or being able to look down from there accommodation into our yard and house area below

		on site 37?
501	2	For many years there have been "secret" plans for as eastern relief road for Retford. Surely this is needed for the extra capacity that these developments will bring.
501	3	Far better to concentrate on the western side of Retford where most of the development would fit in better (sites 51/R7) due to better infrastructure.
502 502	1	There has been no previous consultation with residents prior to this proposal There has been no previous consultation with residents prior to this proposal. There will be a huge increase in traffic, especially along the Tiln Lane area for schooling
502	2	An increase in children attending the local primary school will result in more congestion and parents parking in places which could cause accidents
502	4	Access for emergency services to the areas would be hazardous
502	5	There are already housing developments where houses remain un-occupied
502	6	The proposed areas are outside of the borough boundary.
502	7	All Brownfield sites should be exhausted for housing before using land surrounding our town
502	8	Retford town's road system already struggles with congestion; this increase in residents will only serve to create more traffic, congestion and pollution
	9	Retford is a beautiful little market town, it is our worry that if it is developed beyond recognition it is going to lose its character. We are lucky enough to have areas of bea
502		areas that our children can walk, ride their bicycles, take the family dog for a walk in, if this is taken away where will they go??
502	10	The open spaces on the edge of Retford are a space for nature, whilst walking we as a family have seen many species of bird, butterfly, rabbits, livestock etc. take this awa
503	1	I am opposed to the development of 41, 53, 364, 259/R2 (particularly for the housing density) for the following reasons.
505	1	
		The proposed development of the sites will remove some of the best and most versatile agricultural land from food production. Whilst Bassetlaw may have been given an
		housing units for Retford, such short-termism should be moderated by a longer term planning priority for the retention of agricultural land. Quite simply, food security she
503	2	of top grade agricultural land out of productivity. The UK is already dependent on the importation of 40% of our food requirements. The increase in population to 70 million
	_	Globally, all land suitable for crop cultivation is being cultivated. However, productivity is dropping due to soil erosion and exhaustion, climate and environmental change,
		pressures of growth in global population, change in dietary habits and (particularly in China, India and Brazil) and political instability make food security a more important
		as much as problems with energy security can be resolved - we do not, however, have the ability to create more agricultural land).
		The proposed development will impact negatively on the landscape character of the area. The geomorphology of the site offers an immediate visual record of the geologic
503	3	which forms part of the watershed between the Idle and Ryton valleys will be obliterated together with the typical folds of the land on the western edge, which record the
503	4	The proposed development of sites will be detrimental to the existing built character of Ordsall as a village settlement distinct from Retford.
503	5	The development would also be significantly detrimental to the existing green infrastructure of the neighbourhood.
503		The building of 1200 houses (i.e. 1200 family housing units) upon land west of Ollerton Road, together with further development of land on the east would in essence dou

nt 503	8	More importantly, the sites are covered by a network of natural corridors for the transmission of biodiversity. The farmer/owner has already taken advantage of the Gove Schemes add has begun reinstating grubbed out hedges, replanting gaps in the remaining hedgerows and latticing the sites with broad strips of unploughed field/margins bio reservoirs of Whisker Hills Wood and surrounding copses are thus connected with the greater corridor of the river. All these positive elements for wildlife conservatio development. Whisker Hills Wood would become an ecological island of minimal biodiversity value. The copses would become virtually sterile. The drainage ditch to the v would its breeding communities of amphibians. It is currently a local hotspot for the common frog breeding cycle. When one considers the population crash of the specie this breeding site is regionally significant.
503	9	The current Southern Boundary to Retford is well defined and provides a consistent and appealing entrance to the town and this would be lost by these developments.
503	10	It is important to maintain a distinctive boundary between the urban area and the open agricultural land and the current town limit doers precisely that.
503	11	There will be a significant loss of amenity
503	12	The local infrastructure will not cope with and occupants of the new housing would have to drive a significant distance for shops, schools, doctors and other facilities.
503	13	There are more appropriate areas of land within the existing Retford town boundaries for housing.
503	14	I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.
504	1	No, I don't believe that Retford should be allocated more housing above that already required. It is very noticeable that there are already a lot of empty properties within
504	2	I believe that the sites that would benefit the surrounding area by development in the future would be 10, 70, 71, 342
504	3	None, there are already existing empty units and available space in existing business developments to cater for expansion.
504	4	There are many relevant issues arising from the proposed allocation of sites. The issues that can be considered, as highlighted by yourselves, are all extremely valid, but ir greater relevance to the public within close proximity of proposed sites.
504	5	On a wider scale and relevant to all the amenities already in existence within the town would be pushed beyond their limits. This includes emergency services (all conside healthcare and town centre amenities including parking, road safety and access. It must also be considered that sites 259/R2, 364, 41, 1, 52, 40, 27, 3, 370 and 511 will por landing flight paths of Gamston airport and the flight path for Finningley airport. This goes without saying it is an enormous safety issue.
504	6	Every existing open space should be protected with no future development proposals. I strongly believe that everybody should have access to open space within close pro development must include open space adequate for all neighbouring properties.
504	7	I am also concerned about the proposed development of agricultural land and the intrusion onto greenfield locations.
504	8	The current Southern Boundary to Retford is well defined and provides a consistent and appealing entrance to the town and this would be lost by these developments.
504	9	It is important to maintain a distinctive boundary between the urban area and the open agricultural land and the current town limit doers precisely that.
504	10	There will be a significant loss of amenity
504	11	The local infrastructure will not cope with and occupants of the new housing would have to drive a significant distance for shops, schools, doctors and other facilities.
504	12	There are more appropriate areas of land within the existing Retford town boundaries for housing.
504	13	I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.
505		Before answering this question the efficacy of the responses to the Questionnaire needs to be considered carefully because too much weight is being attached to the resp and every household as was intended. Until the Council can be sure that it was delivered to each and every household it should not act upon the responses received at all Council relies on the results of the original Questionnaire the decision to do so risks the Council being involved in expensive litigation because a breach of natural justice w
505	2	To answer the question -more than 12 new houses are required "and not just two or three bedroom detached and semi detached houses and/or bungalows preferable for I have carried out discrete enquiries and from my enquiries a mixed bag of housing is required. 	3	Affordable Housing 6) There is a need for one, two and three bedroom accommodation but this needs to be broken down into the various needs. a. For younger people who have been brought up in the village and now want to set up home in the village whether in a relationship or not. At the moment such people have to move out of the village to buy cheaper properties in Retford or 2
505		Gainsborough because they simply cannot afford to buy within the village. This is unfair and has the potential to permanently deprive the village of young people who are survive as anything other than a place to live for the elderly. Such affordable housing does not have to be provided by Housing Associations which often have the stigma or surely heard of "shared ownership". As at the 15t January 2012 the cheapest house for sale in North Wheatley according to Right Move was priced at £149,950. In Retford properties were advertised from £2: said. Those who have already left the village want to move back -it is quite often the case that couples about to start a family or with a young family want to move to be not attract younger people to the village then the village will die. From my enquiries I know the village has lost a number of young people who have had to move cut to be able to purchase a property and has also lost a number of young people who have had to move cut to be able to purchase a property and has also lost a number of young either with young children or about to start a family, and wanting to be near their families
505	4	Housing for older people 3. There is a group of older people who have lived in the village for m::my years and have family and friends in the village and want to downsize to something that is cheaper upkeep. So far as older residents are concerned I know of a number who fall into this category and would move if they could afford to but there is nothing available. The cheapest I was over £200,000.
505	5	Special housing needs Housing for those who need help with living. There is no provision at all within the village which means such people are forced to move out of North Wheatley
505	6	Extra special needs Sadly North Wheatley is not large enough to support a Care Home for just North Wheatley residents as has been suggested by some. A small Care Hom viable
505	7	Housing for families needing 3 or 4 bedrooms who want to move back into the village but are not looking for something particularly compact but want something that is e and general maintenance. The cheapest four bed roomed house available at 1 st January 2012 was £335,000
505	8	Those who have no ties with the village but see North Wheatley as a nice village in which to live and bring up a family and as a convenient place for travelling to and from t discussions I know of at least three people who are so interested but cannot afford to move into the village.
505	9	Those who have substantial means and again see Wheatley as a nice village in which to live and want a house with 4 to 6 bedrooms with some land , I have spoken to two property in North Wheatley for sale or not on the market which suits their needs. They need land upon which to build. All in all this is a mixed bag
505	10	Those who want no development It has also become apparent to me that quite a number of people want there to be no development whatsoever in the village. By this the because the village will quickly stagnate and this has to be wrong and totally unfair to the categories of people who I have set out above
505	11	Overwhelming consensus The overwhelming consensus of opinion is that there should not be high volumes of new housing. A village which is often referred to critically is beyond all recognition in an unsympathetic way to the original village.
505	12	From my enquiries I believe that about 20 to 25 houses will be needed over a period of time but with the facility to increase this number as and when the need arises but t
505	13	Where does development take place As to where such development takes place needs to be considered carefully to ensure that such development does not adversely implexential character of the village. Linear extensions have to be looked at cautiously because such extensions can spoil the character of a village because they do not form pone has to ask the question how has North Wheatley developed to what it is today. The answer is that housing development, has always been on a small scale within the value of the village. Even when there has been an 11 house development such as Glebe Close this has not had a huge impact on the village because it is well conducted to was farmed there prior to the development but it still forms part of the village. The houses built in Glebe Close do not directly front onto an existing street but do so onto a impact of the housing development almost goes unnoticed. This is how any further large scale development needs to be planned so that the impact on the village is minimized.

Reference	number	
Responde	Comme	Answer
nt	nt	
505	14	Sites for more than two houses therefore have to be chosen with care to ensure that. Vistas over open fields are not lost to the rest of the village. They do not have an ad are discrete and unnoticed so that they blend with the village. Such developments have a village feel about them. That they form part of the village. Building materials in I where the colour of such materials will weather in with the existing properties rather than weather out For example red clay bricks rather than concrete are used, clay part these examples because the colour in concrete bricks and tiles leaches out and usually the roofs grow an abundance of moss which has an adverse visual impact
505	15	North Wheatley is a small north Nottinghamshire village. Originally agriculture was the main source of employment but this has gradually diminished over the years. It has people working in Retford, Doncaster, Gainsborough, Lincoln and of course the Power Stations. There is a large number of people living in the village whose families have also a large number of people whose families have lived in the village only for one or two generations. It is a village which attracts people to stay once they have moved in two parallel roads each with a number of names -Top Street, Middlefield Lane, Church Street and Top Pasture Lane at the top and at the bottom Main Street, Low Street at the bottom streets were interconnecting streets -Church Hill, Cambs Lane, Stone Lane and Goachers Lane. There were then three further roads connecting the village was relative of these was an extension of Top Street leading across to Wood Lane, the second is Silver Street and then Eastfield formerly Gainsborough Road. The village was relative public houses, a village school, church, chapel, post office, shop, bakers, blacksmiths, tailor's shop, joiner's shop and builders yards and various businesses ancillary to the second is silver street.
505	16	Careful consideration needs to be given before allowing planning on some of these sites. The shape of the village is going to change beyond all recognition if large develop but the impact would be greatest on sites 239 followed by 236, 237, 238 and least on 464
505	17	If any development were permitted on this site other than straight on to Low Street it would be outside the village without any cohesive links to the village and it would o the village and it would be criminal for this view to be obscured forever.
505	18	Any large scale development on this site would create major problems with regard to road access in and out of the site. Low Street is narrow where the land abuts it and s narrow and not suitable for large volumes of traffic. Certainly not for a connection to the A620. Low Street would need to be widened to allow for footpaths and for entry
505	19	A small number of houses could be built abutting Low Street without obscuring the view referred to above but Low Street would have to be widened to allow for the build each property
505		If 8 properties were built on 236 and 57 properties built on 237 this would create a substantial linear extension of the village along Top Pasture Lane. The substantial block with the village and would be like a "carbuncle" (as Prince Charles would say) just fastened on to the end of Top Pasture Lane and like a village on its own. It would be very Wheatley and from the Sturton road . This would not be attractive at all. Views over open fields towards Wheatley Wood, Gringley, Gainsborough and Bole would be lost
505		Pasture Lane would not be able to cope with the traffic unless it was widened in some way. At the moment there is no scope for widening this road without seizing the fro Church Street and Eastfield is not capable of coping with a large volume of traffic which would be created by this development. Furthermore Eastfield would have to be w to enter and join Eastfield safely. In the last 30 years 2 houses have been built on Top Pasture Lane extending it to its present length -Whitegates and Orchard Villa on the
505	22	If a development of 54 houses took place on this site it would result in another linear extension of the village and then a large block of housing being built on the end of it like a village on its own. This site would be very visible from the A620, very visible from South Wheatley and road leading from South Wheatley to Sturton. Open view would be lost forever. Such a development would be totally out of character with the rest of the village.
505	23	Access to and from the site could be divided between Top Pasture Lane and Low Pasture Lane but neither are wide enough to cope with any increase in traffic and there is Lane. The same problems that have been outlined above in relation to sites 236 and 237 would be encountered where Top Pasture Lane joins Church Street and Eastfield. Pasture Lane joins Church Hill and the road leading from Gainsborough to South Wheatley. It is difficult to envisage how any alterations to the junction could be made.
505	24	This site is capable of accommodating 72 houses but such a large development would not be appropriate. This site could however be developed in a number of ways with without obscuring views over open countryside.
505	25	This site has the advantage of being capable of development in small phases. At the moment it has two separate viable access ways, one off Top Pasture Lane and one off created directly onto the A620.
505	26	The site would be visible only to three bungalows off Top Pasture Lane and four properties on Eastfield . Unless the whole of the site was developed it would not be visible

Responde		Answer
nt	nt	
505	27	Development on this site could proceed in small phases and the site could be divided into very attractive parcels each accommodating a small number of houses/bungalor handling at least five properties. Top Pasture Lane could deal with vehicles from five properties without causing problems at the junction with Church Street and Eastfield plan could accommodate more as and when more properties are required. The junction with the A620 may need widening depending upon the number of houses being d need for more houses was identified and the rest of the land was developed up to the 72 house capacity then if the junction into to Eastfield was not adequate a new junction lights.
505	28	Disruption to the village during development could be kept to the minimum. The owner has indicated a willingness to develop the site so that it could be developed as and a large scale development. The site is already well screened by natural hedging and would have little or no impact on the village. This is the only site identified with service
505	29	Any development has the potential to benefit the village in terms of amenities
505	30	The local infrastructure concerns are not clear. I am not aware of a potential sewerage/drainage capacity problem
505		Narrow roads are not a problem for cars. Lorries can be prevented from using these roads. Broadband speeds could be improved if there were more users and this would live in the village.
505		Extra school places could be made available if a need was shown
505		There is already a quite new village hall/community centre. It just needs using
505	34	There is already a well maintained play area for young children and new ones could be provided in larger developments by the developers
505	35	Site 36/2 It is vital that the three open spaces 36/5 36/2 and 36/1 all within the conservation area are preserved to protect views within the village and also act as reminde farming village. Site 36/2 permits open views from Top Street over farmland divided by hedgerows. It is a very precious assets. If this open view is lost now it is lost for eve Wheatley is truly in the middle of the countryside. Unlike many villages hedges are the dominant form of land boundary and it is vital that these are not lost to walls and for thrive. North Wheatley has a thriving population of sparrows and small birds which make use of the hedges. It is these hedges which essentially make the village feel so ru
505	36	The view over the old orchard by Old Mill Farm is a reminder that this was once an orchard of which there were many in North Wheatley -now all but lost
505	37	Site 36/5 This site to the north of Top Street now principally occupied as allotments is a very high site. There are trees for birds to shelter. If this site was lost the birds would be reduced in height otherwise any buildings would dominate this entrance to the village
505		presently occupied by the school, the village hall, playing fields for football and cricket, tennis courts, a children's play area, a bowling green, a garden and a shelter. No de sites. Room needs to be left to accommodate any extension that may be required to the school in the future. The village hall is essential for village life. The play area for the green, the tennis courts and the playing field
505	39	Other open spaces It is not only the open spaces shown on the plan but other open spaces that need to be preserved . Just walk down Top Pasture Lane. Once passed Wh huge views over site numbers 236 and 237 over open fields to Wheatley Woods, Gringley, Bole, High House Farm, Gainsborough and beyond. As you continue down the la 238 you can see Lea, Marton, Sturton, Lincoln and back over the village. If this piece of land was to be built on these views would be lost for ever.
505	40	Site 239 If you walk passed the pub and look over site number 239 this is a most glorious vista over fields and the village itself. If this was built on this view would be lost f
506		I would like to start by saying there was no consultation with residents prior to production of the proposals
506	2	The road infrastructure is unsuitable for such a development. Additional traffic will cause more congestion and danger to road users especially at the Moorgate and Tiln la
506	3	It will also cause a danger to pedestrians especially during school hours. This part of Tiln is a nightmare because very large lorries have to use this road to bypass the low b serious accident waiting to happen
506	4	This proposal is also building outside the borough boundary
506	5	There are a lot of disused sites around Retford without using agricultural land
506	6	When these houses are built where are the children going to school where are the jobs for the parents to go to in the Retford area
507	1	I wish to lodge my objection to the above development for the following reasons
507		Building more properties in an area which is notoriously subjected to flooding
507		Increased volume of traffic in an area that has become far too congested already, particularly at the top of Grove Coach Road and Bracken Lane
507		Changing the ambience of the area
507		In 2007 there was major flooding at the bottom of Grove Coach Road/Cavendish Road. New builds would make this problem even worse. Yours faithfully
508	1	location 35 is certainly not suitable for a development of the proposed size.
508		Option A
509	1	I think that location 35 is unsuitable and do not support these proposals.
509	2	Protect the area for the proposed development at site 35. Do not destroy the only open space environment at the already large Gateford housing estate.

512		Yes
512		Option A
512		Yes we agree
512		462
512	5	Existing sites
512	6	Together near services
513	1	l agree
513	2	Option A
513	3	l agree
513	4	The 9 dwellings at corner farm should not form any part of the 13 dwellings. These were allocated and agreed a some time ago and should not now be included in any fut new dwellings not already allocated.
513	5	453 and 296
513	6	Yes
514	1	l agree
514	2	Option A
514	3	l agree
514	4	The 9 dwellings at corner farm should not form any part of the 13 dwellings. These were allocated and agreed a some time ago and should not now be included in any futune new dwellings not already allocated.
514		453 and 296
514	6	Yes
515	1	Location 35 is unsuitable as it will cause traffic chaos at the only two places of access into and out of the existing large development
515	2	Option A
516	1	I am happy with the criteria selected
516		My slight concern is that the areas selected are based on private sector selection rather than a forward thinking plan to develop Worksop. This may be unfair as this could would find it useful if links to the quoted documents were made available with the consultation document.
516		The additional benefits to the town are not clear or sold in the consultation document. The document provided just tells what could be built.
516	4	More job opportunities are essential. I have no view on the towns additional housing requirements a part from concerns regarding the quality of the road network suitabil and nature.
516	5	I would like site ref 35 to have its woods protected and not used for housing. This area is well used by walkers and the community, not forgetting animals.
516	6	The 700 proposed houses outstrips the local primary schools which have informed the estate residents that their children are not guaranteed places.
		The road infrastructure already has choke points at the entrances and exits to the estate sections and particularly on to Gateford road from Ashes Park Ave. The site would
516	7	which is not enough. The area only has Ashes Park avenue as an exit to main roads which is not enough. The exit to Gateford road is already very busy at rush hour and fu
		risks as impatient drivers pull out.
516		The shopping area based on the Roman's Inn is very busy, which is a good thing but add site 35 with 700 houses and site 28 with 381 access by car would become difficult.
		services this would be a good thing but I would still be concerned about access across Gateford road from Ashes Park avenue.
516	9	The best sites for additional housing that would not over tax the road network are sites 45,371,151,218, 14, 11, 75, 23, 60.
516	10	I would support all. My priority order would be:
516	1	Site 195 1st choice because of the high mix of employment lad and good roads
516		Site 153 2nd choice because it will provide much needed recreational space.
516	13	Site 4 option 3 - because of the higher mix of employment land, while still protecting the playing fields. Option 1 would be acceptable with a higher percentage employment to support both lad types.
516		Site 39 good split of land use
516		Site 28 I am concerned over the road network for this area, but if the employment use is being used for local amenities I would support it.
516	16	Yes with the addition of site 35
516	17	Lots of houses but what about additional school places and GP and dentist provision? As thought been given about voice and data speeds. The outskirts of Worksop are all for the provision of certain high speed internet services.
516		Site 35 to be a protected open space.

521	1	Yes
521	2	No more housing but employment growth for existing population
521	3	I think location 35 is not suitable
524		I think the entire site at location 35 should be protected. Further development in this location will result in too higher a density of housing, a significant increase in traffic
521	4	a loss of trees, hedgerows, as well as a loss of ecological habitats and landscapes.
521	5	Option B
521	6	Existing sites as further expenditure should be allocated to the existing fixed community.
522	1	No
522	2	All the proposed housing sites are acceptable with the exception of area 35.
522	3	Area 35 is unsuitable because the existing road network is already congested and 700 more houses would make it totally gridlocked at peak times.
522	4	In addition, the local schools (particularly the primary schools) do not have sufficient growth provision to cater for the increased numbers generated by 700 additional hou
522	5	Finally, I believe there are a lot more suitable brown field sites available which better meet the Governments guidelines - rather than developing on primary agricultural la
522	6	4 & W9. This would regenerate the east of Worksop - the area of Worksop most in need of local job opportunities.
522	7	Yes - all the protected open spaces should be protected.
522	8	No
522	9	No. Area 35 is unsuitable because the existing road network is already congested and 700 more houses would make it totally gridlocked at peak times.
522	10	In addition, the local schools (particularly the primary schools) do not have sufficient growth provision to cater for the increased numbers generated by 700 additional hou
522	11	Finally, I believe there are a lot more suitable brown field sites available which better meet the Governments guidelines - rather than developing on primary agricultural la
522	12	Option A
523		GATEFORD AREA 35 - I strongly object to this proposed development
523		It will completely ruin the character of this scenic area. We need more open spaces not less
523	3	Why are you considering using Grade 3 agricultural land which is currently being used?
523	4	This would completely spoil the Conservation Area which is adjacent to this land. Destruction of beautiful countryside, detrimental effects on Owday Plantation (site of im Whipman woods. Lost bridleway/footpaths hedgerow, walkways which are well used and appreciated by many people daily. There are some very old horse chestnut tree building on area 35 would ruin and destroy wildlife and habitat for it never to return. Gateford Hill covers a large area of landscape between Gateford Road, Woodsetts La Plantation. Any houses built near would ruin the landscape it would mean losing Gateford Hills key views dating back as far as 1800's. Quote from Bassetlaw document "C OPEN GAPS BETWEEN CONTRIBUTE POSITIVELY TO THE HISTORIC LAYOUT AND PLAN FORM OF THE CHARACTER AREA. PROPOSALS FOR NEW DEVELOPMENT ON GAP SIT SUPPORTED WHERE THEY CAUSE NO DETRIMENTAL HARM TO THE HISTORIC LAYOUT AND PLAN FORM OF THE GATE HILL CHARACTER AREA. If anything is built on this area it will cause detrimental harm.
523	5	The A57 is already congested with constant traffic and anymore vehicles would mean a permanent traffic jam especially mornings and evenings. Traffic coming out of the impacted.
523		For Existing homeowners it would mean; Loss of privacy, loss of daylight, light pollution, pollution, risk of flooding. It will overload all local amenities, schools, surgeries a
523		Option A
524		Housing and Business needs to make more use of the brownfield sites that exist all around the area. there is no need to use farm and woodland for housing in this district.
524	2	The addition of extra housing on site on the local area 35 will have a major environmental impact, the area has great natural assets and is enjoyed freely by many people
524	3	The last development at Celtic point resulted in the destruction of an important archaeological site
524		Current access to the area is directed down 1 main road and traffic is already a problem more people will result in safety issues and accidents
524		Option A
524		
524	7	Those who choose to live in permanently on sites will use residential pitches these need full facilities those who chose to roam need the basics as it is their choice to live in
525		No
525		Location 35 is unsuitable for the following reasons:
525	3	Traffic generation, access, road safety and parking provision;
525		Loss of trees or hedgerows;
525	5	Loss of ecological habitats or landscapes

530	3	housing. Council agreed to pass these comments onto BDC Planning Policy before the 31st January deadline.
531		Yes
		I am happy for the town to allocate more land to housing and employment growth (especially employment growth) but am not happy for greenfield sites to be used at all v
531	2	available in and around the town. The greenfield land should be ring fenced until all the brownfield sites are used to their full potential.
531	3	I am strongly against using site 35 for housing.
531	4	The location is on beautiful greenfield land which is constantly used for agricultural production.
531	5	The area is accessed by Public Footpaths and other paths used permissively by local dog walkers, children and families for exercise and recreation.
531	6	The loss of habitat, especially the woods and hedgerows is unthinkable.
531	7	The area is home to many species of birds which are in decline including Yellowhammers.
531	8	. The density of dwellings will overwhelm the already stressed infrastructure, particularly the roads. The exit from the current estate onto Gateford Road is appalling even r
551		bring 1000 more cars or more and the results would be unthinkable.
531	9	On the Ashes Park estate we have no shops, pharmacy or other amenities. The addition of so many new homes would overload the facilities that are closest to the estate a
531	10	The local primary school is already having to use port-a-cabins as classrooms and will not cope with an huge influx of children.
531		I feel strongly the brownfield sites which have been identified should be used first before destroying beautiful fields and woodlands with yet more homes.
531		The brownfield sites
531		Site 35 should be protected without question as per my above comments.
531		Option A
531	15	Yes, it would be ideal to enlarge existing sites
531	16	I would provide the sites with both types of pitch so the community can stay together and support each other and give them the versatility of site they need. It would be in
532	1	yes to a certain degree, there should be more housing available, however to the scale in which the council are planning on is a largely excessive
532	2	yes i do agree with the screening methodology
532	3	700 houses within the gatefold area is rather extreme especially when you look at the issue they already have in this area in regards to traffic in/out of the pre-existing dev
532	4	other areas for example Rhodesia, Mansfield road area would provide a more beneficial development site for housing at it would contrude on neighbouring pre-existing de
552	4	areas with greater accessibility to Mansfield, chesterfield, m1 and a1 which are all beneficial to the community as a whole
532	5	however before we look at more housing we need to look at more employment opportunities in the area. employment is hard to come by and educational services are far
		within the UK.
532	6	I think it would be more beneficial for shireoaks and Rhodesia areas to obtain more housing as this will reduce the traffic to other areas which is already over crowded for
		The best area i think would be better for employment within the community would be best suited near the Wilkinson and B&Q development sites (Manton woodhouse and

532	8	the sites near the golf course would be beneficial as housing developments with a small area for employment opportunities for example local shops so that there is a wide
532	9	also the site near plantation hill area would be beneficial for the top half as housing then i would suggest the lower area to be employment areas
532	10	i would say yes to the gatefold area on the map, as the traffic areas already happening within this area will only get worse especially for a potential development of 700 h
532	11	Also the fact the area is currently been used by the local community, for fitness, and cultural prospects. the wildlife in this area is beneficial too as it provides a diverse lan not destroy
532	12	With a potential development of 700 houses would lower the already low house prices in the area and companies would struggle to sell the amount of housing in the area income providers unable to obtain the financial requirements.
532	13	If there is more housing being developed in the Worksop area, then we need to look at educational areas for the young and adult learners, as the college will not be able population. the primary and secondary schools are already overborne so by enhancing housing in the area, we would also need to look at the pros and cons on educationa
532	14	Option A
532	15	together - keeping this pitches together would be beneficial as there is one allocated site and therefore not infringing on other areas.
533	1	It is only when people may be directly involved with proposed building sites that they have to knuckle down and wade through the often confusing literature involved. Fin people simply haven't the energy, time or technology to do it. The council should post a letter to each resident in the areas of concern explaining exactly what may or may home. The letters should be addressed by name to the residents. Flyers and council newspapers are all very well, but most people, including me simply glance at them and the bin. The council should make sure that everyone knows about this and is given a real chance to reply. I didn't know until today that there were public sessions in town about this and therefore cannot respond. Also the questions are phrased in such a way that it would be impossible to say 'no' as in theory houses should be built and gyps different matter.
533		No, the town should remain a small town. There are not enough jobs in Retford for the residents as it is, building more houses is not the answer. There is a lot of affordabl and no-one is buying it. Opposite and next door to me are very nice properties for under £150,000 and no-one has even been to look in a year. Why don't the council help association style)? If no-one is buying the affordable housing, why do we need more? Where are all these people going to work? The hundreds of extra cars will totally blo enough. It only has one centre, there's no out of town add-on shopping centre, the supermarkets already have full car parks, the schools are full, town centre parking is ve going to encourage employment growth.
533	3	364, 41, 40, 52, 1

537	6	D) Access to shopping facilities our local shops which are sites off the estate are already busy with traffic and virtually gridlocked at busy times, which is a measure of thei including the proposed new Asda and Tesco supermarkets, are sites closer to the town centre, and are impractical for access on foot from site 35. This will lead to increase
537		E) Access to healthcare provision. Access to healthcare provision is limited, with doctors and dentists being sites on the other side of town. Access on foot from site 35 is i to doctors and dentists when required are currently at full capacity. with the increased population of Worksop you cannot see a doctor under 3 weeks unless it is an emer
537	8	F) Provision of utilities and services. Development on site 35 will require significant investment in infrastructure to meet the demands of the new housing development, as to the remote location of the site. Improvements would be needed to upgrade level of service provision due to increased demand.
537	9	We have a protected Viking Burial ground in the neighbourhood, do you really wish to build more homes around it instead of leaving it in the setting it is, fields, woods etc
537	10	The traffic effect and further density of buildings in this area are my main reasons for objecting. I have 2 small children I wish to grow up in a safe and environmentally frie adventuring in. I do not want the upheaval of having to move them from schools and the home they have always known to move somewhere else, which we would. We a comes to council amenities, which i personally prefer
537	11	We pay the most council tax in the area and seem to have no say in anything. I am quite happy to carry on pay the high council tax just to get the grassed areas maintained areas is it isbeautiful!
537	12	Option A: Spread between Worksop; Retford and Harworth Bircotes?
537	13	I think we have sufficient land for them and it should be kept that way.
537	14	Yes Stansing of Town Downdow and Urban Consult The surrent Cataford Estate already autorida to the switting town houndow. Downloament on Site 25 will therefore outon
537	15	Extension of Town Boundary and Urban Sprawl. The current Gateford Estate already extends to the existing town boundary. Development on Site 35 will, therefore extend concern that Worksop will eventually consume Wallingwells and continue to extend all the way to Carlton in Lindrick
537	16	Loss of amenity for Children, Residents and Visitors. The proposed site is bordered by Owday Wood/Rough Piece and Owday Plantation, which are sites of importance for present untouched by housing. Development on site 35 will cause significant disturbance to these valuable woodlands.
537	17	The public footpath/bridleway entering the area from Montford Road and stretching to Owday plantation is boarded by beautiful old trees and hedgerows, which are imp environment. The bridleway and footpaths are used daily by many walkers, both from the estate and also by visiting recreational users
537	18	Development on this site would result in a loss of amenity for local residents and would be detrimental to the entire area. In addition, increased traffic levels on the estate environment by increasing noise levels, pollution and danger to pedestrians and cyclists.
537	19	Loss of Agricultural land. Agricultural land provides employment. Site 35 is productive agricultural land. It is currently being farmed, producing crops including Wheat and C
537	20	Access to Shopping Facilities. Our local shops which are sited off the estate are already busy with traffic and virtually grid locked at busy times, which is a measure of their the proposed new Asda and Tesco supermarkets, are sited closer to the town centre, and are impractical for access on foot from Site 35. This will lead to increased traffic
537	21	Access to healthcare provision is limited, with Doctors and Dentists being sited on the other side of town. Access on foot from Site 35 is impractical
537	22	Provision of Utilities and Services. Development on Site 35 will require significant investment in infrastructure to meet the demands of the new housing development, as of the remote location of the site. Improvements would be needed to upgrade level of service provision due to increased demand.
538	1	I have recently seen and read about the proposed housing development between Gateford and Carlton. I am writing to you to register my strong opposition to the schem beautiful woodland into a vast housing estate. Having recently moved back to Gateford from Chesterfield, the house we bought has views all the way across to Carlton. T the woods and open green land provides exceptional walking areas for the local residents, this is something else that would be lost. When Government are pushing us to why is that Bassetlaw deems it right to take away our countryside.
538	2	Already Ashes Park Road and Eddison Park Avenue is a rat run for people going from Carlton Road to Gateford Road and this would be made worse by the large scale deve tries to exit Ashes Park Road onto Gateford as it would similarly at the Carlton Road end of the estates.
538	3	Added to my concerns is the fact that you will be taking away the natural habitat of a vast range of wild life, is this right? I don't think so. If extra housing is required why dilapidated housing seen in many areas of the town. Buy them and refurbish them or knock them down and build where they now stand. Or is this too simple an answer?
538	4	Does Bassetlaw council want Carlton and Gateford just to become 1 big suburb of Worksop? If I'd wanted to live in Carlton I would have bought a house there.

538	/	I have recently seen and read about the proposed housing development between Gateford and Carlton. I am writing to you to register my strong opposition to the schem beautiful woodland into a vast housing estate. Having recently moved back to Gateford from Chesterfield, the house we bought has views all the way across to Carlton. T the woods and open green land provides exceptional walking areas for the local residents, this is something else that would be lost. When Government are pushing us to why is that Bassetlaw deems it right to take away our countryside.
538		Already Ashes Park Road and Eddison Park Avenue is a rat run for people going from Carlton Road to Gateford Road and this would be made worse by the large scale deve tries to exit Ashes Park Road onto Gateford as it would similarly at the Carlton Road end of the estates
538		Added to my concerns is the fact that you will be taking away the natural habitat of a vast range of wild life, is this right? I don't think so. If extra housing is required why dilapidated housing seen in many areas of the town. Buy them and refurbish them or knock them down and build where they now stand. Or is this too simple an answer?
538		Does Bassetlaw council want Carlton and Gateford just to become 1 big suburb of Worksop? If I'd wanted to live in Carlton I would have bought a house there. Yours
538	11	This development will encroach on the dividing land between Worksop and Carlton in Lindrick and Wallingwells. This will only further contribute to the 'urban sprawl' and further.
538	12	The area proposed in productive agricultural land farming wheat and oilseed rape, agricultural land provides employment which will be lost as a result of this developmen
538	1 1 4 1	The area proposed is bordered by Owday Wood/Rough Piece and Owday Plantation which are sites of importance for nature conservation. The woodland is at present un will cause significant disturbance to these valuable woodlands. The area 'Gateford Hill Park' which includes Dog kennel Plantation is a mature landscaped area.
538	14	The public footpath/bridleway entering the area from Montford Road and stretching to Owday plantation is boarded by beautiful old trees and hedgerow which are impor environment. This bridleway is used by many walkers daily from the estate and many visiting recreational users.
538	15	The loss of this countryside amenity would be detrimental to the entire area. This land is of the same importance to us, and the wildlife as Dog kennel Planation.
538	16	Our 'local' shops which are sites off the estate are already busy. Additional housing will only cause increased pressure on these already busy and dangerous road junctions The main amenities e.g. supermarkets, shops, doctors and dentist are all situated in the town especially when Tesco moves. Access to the town is only practical by car and Congestion in and out of town will only increase therefore as a result of this development.
538	17	The junction between Ashes Park Avenue and Gateford Road is already dangerous due to heavy traffic levels. The increase in traffic levels on the estate will generally redu
538	18	This development will require detailed consideration as to the provision of schools and nurseries as we feel our schools are already too or over capacity.
539	1 1	LOCATION SITE 35 IS UNSUITABLE FOR HOUSING DEVELOPMENT -the proposed 700 houses = a poss 1400 extra cars, this area is congested, at peak times you can wait in a 20/30mins to exit ASHES PARK AVENUE onto Gateford road, increased pollution
539		More danger to pedestrians
539		the schools in this area are at capacity and put further strain on service!
539	4	LOSS of old trees and countryside walks
540 540	1 2	I think location 35 is unsuitable and will create overdevelopment of an already well developed site. Option A
540	3	In particular I wish to strongly object to the development of any additional houses at site 35 for the following reasons. A) A great loss of amenity. It would have a detrimer visual and physical enjoyment of this rich landscape, which is a mixture of ancient hedgerows, copses and woodland. The rich mosaic of habitants for animal and birds would be a loss of open walkways and bridleways which many people enjoy – both is a most of the strong the strong of the strong the strong of the stron
540	4	B) Urban sprawl and extension of the town boundary. Current housing already extends to the existing Worksop town boundary. Development of site 35 will extend beyon and Carlton in Lindrick. Additional housing will lead to too much density in an area that has sufficient housing.
540		C) A loss of nature conservation. The effect on Owday and Whipman Woods and Owday Plantation, which is a Site of Importance for Nature Conservation would be catast
540	6	D) There is an opportunity cost for our children's education. There will be less chance to learn the importance of the natural by having pertinent exposure to this environn them understand that beyond the urban sprawl there are farms, wild animals and birds to observe and understand. Here, they have it on their doorstep and are exposed t environment and they can see the land farmed and the crops grow. This areas must be preserved for our community.
540		E) Safety Issues. There will be increased danger from traffic. The number of cars would increase dramatically. At present residents and visitors use this land and take their they are safe.

eme of converting green open space and This is one of the reasons we bought it. Also to do more exercise and take more fresh air

540 540	8	
		F) More congestion and pollution. At present our local shops are busy and are utilised well by the local community. More housing will most certainly lead to local congesti large supermarkets from this site on foot and this would then lead to increased traffic to and from the town. There will also be extra noise and pollution from the increase
F 40	9	G) Loss of agriculture and employment. Currently this land is agricultural and productive and it supports the employment of land workers.
540	10	H) Infrastructure and Services. Increased density of housing and population will put a strain on local infrastructure and resources, for example doctors, dentists and other l sewerage will have to be provided and significantly upgraded again leading to destruction of the environment.
541	1	We think that location 35 is unsuitable because of the significant increase in traffic this would bring to the estate (especially at the junction with Gateford Road and also th would increase danger to pedestrians.
541	2	Developing up to the woodland would significantly increase the risk of damage to the woodland and wildlife. It would have a detrimental effect of Owday woods and Whi
541	3	The loss of a beautiful countryside walk would also be detrimental to the area - this at a time when the government is encouraging people to be active and lead healthier l
541		It would also be taking up valuable agricultural land.
541	5	Whenever possible open spaces as identified on the map should be protected from any future development proposals.
541		For many people location is important when choosing a home. The open spaces, fields and woodland are a very attractive feature of the Gateford estate. The proposal fo an overdevelopment of the Gateford area.
541	7	Option A
541	8	This development will encroach on the dividing land between Worksop and Carlton in Lindrick and Wallingwells. This will only further contribute to the 'urban sprawl' and further.
541	9	The area proposed in productive agricultural land farming wheat and oilseed rape, agricultural land provides employment which will be lost as a result of this development
541	10	The area proposed is bordered by Owday Wood/Rough Piece and Owday Plantation which are sites of importance for nature conservation. The woodland is at present unt will cause significant disturbance to these valuable woodlands. The area 'Gateford Hill Park' which includes Dog kennel Plantation is a mature landscaped area.
541	11	The public footpath/bridleway entering the area from Montford Road and stretching to Owday plantation is boarded by beautiful old trees and hedgerow which are impor environment. This bridleway is used by many walkers daily from the estate and many visiting recreational users.
541	12	The loss of this countryside amenity would be detrimental to the entire area. This land is of the same importance to us, and the wildlife as Dog kennel Planation.
541	13	Our 'local' shops which are sites off the estate are already busy. Additional housing will only cause increased pressure on these already busy and dangerous road junctions The main amenities e.g. supermarkets, shops, doctors and dentist are all situated in the town especially when Tesco moves. Access to the town is only practical by car and Congestion in and out of town will only increase therefore as a result of this development.
541	14	The junction between Ashes Park Avenue and Gateford Road is already dangerous due to heavy traffic levels. The increase in traffic levels on the estate will generally redu
541	15	This development will require detailed consideration as to the provision of schools and nurseries as we feel our schools are already too or over capacity.
541	16	By providing easier access to the main roads. Reducing pressure on Gateford Road to and from Worksop.
541	17	It would avoid the destruction of an area which is important for local wildlife, for walkers and for recreational use.
541	18	Provide the potential for existing schools to be expanded e.g. in Shireoaks. Whereas this is not possible in Gateford.
542	1	I do not agree with location 35 as this will have an adverse effect on traffic in the area.
542	2	The potential loss of trees and increased pollution would also be detrimental to the area.
542	3	Option A
543	1 1	Landowners and developers only see the monetary outcome of putting their land up for development generally without thought for the people already living in the area. perspective of the suitability of further development because they live day to day in the area and know the shortcomings of where they live and how further development
543	2	There is already a large number of new build houses that are unoccupied, for sale or let which highlights the fact that maybe there is enough housing in the town at preser
543	3	Employment would be good but all the big employers have left the town e.g. Jenkins, The Rubber Works, Clarks and the Wire Works the remaining employers are small fir land for larger employers has all but gone (for housing). The bigger businesses such as Wilkinson's have been directed to Worksop as is most of the other business thereby
543	4	Sites 3 and 310 in particular should not be developed because the area is prone to severe flooding.
543	5	The access is very poor at the junction of London Road and Bracken Lane and Grove Coach Road and more transport would only increase this problem.
543	6	It is also my belief that this area has previously been put forward for development and has been denied by the House of Lords.
543		Area 511, 458 and 459 also suffer with flooding during heavy and prolonged rainfall and therefore are really suitable for building.

550	3	I think location 35 is unsuitable.
550	4	Not sure.
550	5	Location 4 looks like a promising site. It is sufficiently large enough to have a well planned infrastructure as opposed to piggy-backing an already strained area as many ot
550	6	The area along Ashes Park Avenue (it appears to be labelled as 2/82) should be considered for protection. It is a haven for wildlife, a much used bridle path, and a safe gre
550	7	The location 35 is to be attached to an already existing housing area. This area already suffers from poor access (especially at peak times) often with long queues to exit o estate.
550	8	Poor water pressure in some circumstances and sub par internet speeds (the entire town is serviced by one exchange on the south side of the town. it already struggles to satisfactorily).
550	9	The local primary schools are already over subscribed and would need extra places/facilities or a new school to support an extra 700 houses in the local vicinity.
550	10	Newgate medical centre is already oversubscribed and ANY new development will need to provide increased availability of GP surgeries and the nearest chemist is not wi
550	11	The already congested road infrastructure in this locale would also be unbearable during construction due to site access. The road surface (which is already bad in poor w conditions) would be dirty and slippery from said traffic.
550	12	Option A
550	1	REMOVED
550	14	REMOVED
550	15	None known.
551	1	I feel there are a lot of areas in Worksop (I believe they are called 'brown areas')that should be built on first and the beautiful open green areas should be left alone
551	2	If we lose these open spaces, Worksop will be even less attractive and people will be less likely to want to move here.
551	3	There is also the dangerous impact it will have on the wildlife that live here.
551	4	I think location 35 is unsuitable.
551	5	As stated above, we have some beautiful areas in Worksop that desperately need to be protected. We are losing them fast and it will be having a negative impact on wildl appeal to attract others to move to the area.
551	6	Option A
551		REMOVED
551	8	REMOVED
551	9	In particular I wish to strongly object to the development of any additional houses at site 35 for the following reasons. A) A great loss of amenity. It would have a detrimen visual and physical enjoyment of this rich landscape, which is a mixture of ancient hedgerows, copses and woodland. The rich mosaic of habitants for animal and birds would something no open space or park could replace – and a very much valued asset, there would be a loss of open walkways and bridleways which many people enjoy – both n
551	10	B) Urban sprawl and extension of the town boundary. Current housing already extends to the existing Worksop town boundary. Development of site 35 will extend beyon and Carlton in Lindrick. Additional housing will lead to too much density in an area that has sufficient housing.
551	11	C) A loss of nature conservation. The effect on Owday and Whipman Woods and Owday Plantation, which is a Site of Importance for Nature Conservation would be catast
551	12	D) There is an opportunity cost for our children's education. There will be less chance to learn the importance of the natural by having pertinent exposure to this environment them understand that beyond the urban sprawl there are farms, wild animals and birds to observe and understand. Here, they have it on their doorstep and are exposed to the urban sprawle and the urban sprawle and are exposed to be urban sprawle and the urban sprawle and are exposed to be urban sprawle and the urban sprawle and are exposed to be urban sprawle and the urban sprawle are farms, wild an an urban sprawle and understand. Here, they have it on their doorstep and are exposed to be urban sprawle are to be urban sprawle and the urban sprawle are farms.
551	13	environment and they can see the land farmed and the crops grow. This areas must be preserved for our community. E) Safety Issues. There will be increased danger from traffic. The number of cars would increase dramatically. At present residents and visitors use this land and take their t they are safe.
551	14	F) More congestion and pollution. At present our local shops are busy and are utilised well by the local community. More housing will most certainly lead to local congestion large supermarkets from this site on foot and this would then lead to increased traffic to and from the town. There will also be extra noise and pollution from the increase
551	15	G) Loss of agriculture and employment. Currently this land is agricultural and productive and it supports the employment of land workers.
551	16	H) Infrastructure and Services. Increased density of housing and population will put a strain on local infrastructure and resources, for example doctors, dentists and other sewerage will have to be provided and significantly upgraded again leading to destruction of the environment.
552	1	Yes, we agree with the criteria.
552	2	Option A

566		
566		G) Loss of agriculture and employment. Currently this land is agricultural and productive and it supports the employment of land workers.
566	13	H) Infrastructure and Services. Increased density of housing and population will put a strain on local infrastructure and resources, for example doctors, dentists and other sewerage will have to be provided and significantly upgraded again leading to destruction of the environment.
567	1	I think location 35 is unsuitable
567		Option A
568	1	Yes
568		Option A
568	3	Yes, we agree
568	4	Site 428
568	5	Site 423 floods
568	6	Site 557 is down an unadopted road
568	7	Yes, they should be protected.
569	1	We think location 35 is unsuitable due to a substantial increase in traffic.
569	2	This would result in an increased danger to pedestrians, especially children as there is a primary school very close.
569	3	This school is already oversubscribed and would not be able to take any more children in, and any children from the proposed site will need to travel by car to alternative
569	4	We as residents were unable to get an NHS place in a Worksop dental surgery therefore where would you propose the new residents of these 700 homes attend a dentist
569	5	Also it is already hard enough to get a doctors appointment with local surgeries as well, again where would you propose the new residents go for medical help.
569	6	This all goes without saying about the destruction of farming land and loss of beautiful countryside walks & wildlife.
569	7	Option A
569	8	This development will encroach on the dividing land between Worksop and Carlton in Lindrick and Wallingwells. This will only further contribute to the 'urban sprawl' and further.
569	9	The area proposed in productive agricultural land farming wheat and oilseed rape, agricultural land provides employment which will be lost as a result of this developmen
569	10 1	The area proposed is bordered by Owday Wood/Rough Piece and Owday Plantation which are sites of importance for nature conservation. The woodland is at present un will cause significant disturbance to these valuable woodlands. The area 'Gateford Hill Park' which includes Dog kennel Plantation is a mature landscaped area.
569	11	The public footpath/bridleway entering the area from Montford Road and stretching to Owday plantation is boarded by beautiful old trees and hedgerow which are impo
		environment. This bridleway is used by many walkers daily from the estate and many visiting recreational users.
569	12	The loss of this countryside amenity would be detrimental to the entire area. This land is of the same importance to us, and the wildlife as Dog kennel Planation.
		Our 'local' shops which are sites off the estate are already busy. Additional housing will only cause increased pressure on these already busy and dangerous road junctions
569	13	The main amenities e.g. supermarkets, shops, doctors and dentist are all situated in the town especially when Tesco moves. Access to the town is only practical by car and
		Congestion in and out of town will only increase therefore as a result of this development.
569	14	The junction between Ashes Park Avenue and Gateford Road is already dangerous due to heavy traffic levels. The increase in traffic levels on the estate will generally redu
569	15	This development will require detailed consideration as to the provision of schools and nurseries as we feel our schools are already too or over capacity.
570	1	There is nowhere within this questionnaire to raise and outline objections to proposed sites so I will do so Within this section. I object to the proposed site 35 as it is unsu significant development of there services.
570	2	Access to the Gateford estate is already problematic without further strain through increased traffic.
570	3	REMOVED
570	4	Furthermore, additional housing development significantly threatens the natural environment of nearby woods, fields and walks. I therefore object in the strongest terms
570	5	Option A
571	1	I feel that site location 35 is not suitable for housing. the increase at this location with connection from the existing transport infrastructure would be unacceptable.
571	2	Not only will this add to the noise levels for the area, substantial delays in accessing in to and out of the Gateford area especially at peak times.

nt	nt	
571	3	The increase in housing will also effect the limited green open spaces that we have
571	4	Option A
572	1	I think location 35 is unsuitable as it will increase traffic flow at the already very busy junction of ashes park road with Gateford Road.
572	2	Option A
573	1	Location 35: To build 700 houses on this site will end up being an enclave Too many people without local proper infrastructure Poor road access just like St Annes
573	2	Option A
574	1	There will always be the need for more housing but can the infrastructure deal with this extra housing.
574	2	Location 35 is unsuitable for this amount of development we have already had electricity supply issues on the existing estates and the school had to be enlarged as it was n
574	3	There is already a problem with traffic getting off these estates onto the main road an increase would cause real problems
574	4	Brown field sites should be used first before new sites are developed
574	5	Ashes park should be kept as an open green area
574		Option A
574		REMOVED
575	1	No comment
575	2	I feel that there are enough houses in Worksop. Many houses that go on the market are up for sale for up to 2 years before they are sold. Also there seem to be many house
		long time.
575	3	I feel that location 35 is not suitable for proposed housing for a number of reasons
575	4	I understand the local primary school is oversubscribed now.
575	5	There are not enough local shops to serve so many more houses.
575	6	The traffic is very heavy at peak times to get from Ashes Park Avenue onto Gateford Road. Also there would be the destruction of woodland and loss of countryside walks.
575	7	Site 4 as this would incorporate all the additional houses required
575	8	Yes
575		Option A
575	10	Concentrated around existing sites
576	1	Yes
576	2	Whilst previous town centre development has increased numbers of shops in town centre, an abundance of empty shops in the town is testament to the investment requir shoppers etc.) before considering developing vast swathes of land to act as commuter belt for Sheffield, which may be of less benefit to Worksop in the long term.
576	3	Location 35 appears to be unsuitable in terms of housing volume proposed given the busy roads already servicing that area, along with destruction of green belt.
576		28, 90 & W13
576	4 5	4, 9 & 39. Areas possess good transport infrastructure, and could be developed without increasing levels of disruption in Worksop.
576	6	Yes, green spaces add to quality of life. Semi rural location adds appeal to Worksop.
576	7	Worksop has a lot of potential (good transport links) housing (comparatively) affordable, countryside location.
	-	However, to get more money/investment to 'stick' to Bassetlaw, the town centre should be revitalised. The new Cinema may go some way towards addressing this, but at a
576	8	akin to that of a dying town rather than a growing community.
576	9	Option A
576	10	REMOVED
576	11	Together, to foster sense of community.
577	1	Location 35 is totally unsuitable. The infrastructure is not present or available to support the proposed number of dwellings.
577	2	Option A
578	1	I believe location 35 is unsuitable - further development in this area would put a huge strain on schools and services and traffic.
578	2	Option A
578	3	This development will encroach on the dividing land between Worksop and Carlton in Lindrick and Wallingwells. This will only further contribute to the 'urban sprawl' and o further.
578	4	The area proposed in productive agricultural land farming wheat and oilseed rape, agricultural land provides employment which will be lost as a result of this development

578	5	The area proposed is bordered by Owday Wood/Rough Piece and Owday Plantation which are sites of importance for nature conservation. The woodland is at present unt will cause significant disturbance to these valuable woodlands. The area 'Gateford Hill Park' which includes Dog kennel Plantation is a mature landscaped area.
578	6	The public footpath/bridleway entering the area from Montford Road and stretching to Owday plantation is boarded by beautiful old trees and hedgerow which are import environment. This bridleway is used by many walkers daily from the estate and many visiting recreational users.
578	7	The loss of this countryside amenity would be detrimental to the entire area. This land is of the same importance to us, and the wildlife as Dog kennel Planation.
578		Our 'local' shops which are sites off the estate are already busy. Additional housing will only cause increased pressure on these already busy and dangerous road junctions The main amenities e.g. supermarkets, shops, doctors and dentist are all situated in the town especially when Tesco moves. Access to the town is only practical by car and Congestion in and out of town will only increase therefore as a result of this development.
578	9	The junction between Ashes Park Avenue and Gateford Road is already dangerous due to heavy traffic levels. The increase in traffic levels on the estate will generally reduce
578	10	This development will require detailed consideration as to the provision of schools and nurseries as we feel our schools are already too or over capacity.
579	1	I would prefer the development of new housing on brown field sites rather than encroachment onto green field sites.
579	2	I have real concerns about further development in the Gateford area, particularly as it does not currently have the infrastructure and services to support this.
579	3	I think location 35 is unsuitable for development of up to 700 new homes. I understand that the current plan is for entrance to be via Churchill Way, significantly increasing which will also endanger pedestrians. Ashes Park Avenue is already a busy road filtering traffic from the new estates into the busy and dangerous junction with Gateford Ro additional strain on local services, including Schools and provide increased pollution.
579	4	I am also concerned about the environmental effects including destruction of farmed agricultural land, detrimental effect on Owday woods, Whipman woods with the pote beautiful countryside walk.
579	5	The area alongside Ashes Park Avenue is an important green space which is used by the local residents. I would be opposed to any further development in this area
579	6	Option A
579	7	I appreciate the local authority has a statutory duty to allocate suitable sites to G&T. My preference would be around existing sites where suitable
579	8	No
580	1	I consider that Location 35 is unsuitable for additional housing. I consider that the countryside around Gateford should not be further developed and that the existing infras support an additional development.
580	2	Option A
581	1	I think location 35 is unsuitable.
581	2	Option A
582	1	Option A.
582	2	No, I disagree that land should be allocated for at least 8 new houses.
582	3	The current development at "Minster View" will represent a significant increase in the village population.
582	4	The infrastructure increase, the post office, shop etc and the viability of the public house is questionnaire.
582	5	Most of the roads are narrow, especially Low Street and Little Lane and there is already damage t the verges/bank sides due to lorries, trains and cars pulling in to allow tra
582	6	The narrow lanes and fields and open spaces are part of the village character.
582		At the worst only 2 houses should be allowed.
582	8	The preferred site is 134 there is better access to the road than the access to Low Street, and the current farm buildings are dilapidated.
582		Also site 136 has always been green land.
583	1	Narrowness of the road. Even the bus has difficulty negotiating them. Safety of the school children at peak times.
583	2	The surrounding fields are often standing in water, the drainage dykes are not equipped to take all the extra water that would be generated.
583		We have all experienced problems with the sewage system in the past few years
583	4	The narrow roads are only suitable for single traffic
583	5	I would also like to ask would it not make sense to build on existing brown fill sites.
584	1	There has been no consultation on this with local residents
584	2	This development, if it goes ahead, would alter the character of a pleasant existing area.
584	3	The current roads are unsustainable for such a substantial development
584	_	Good agricultural land would be lost There would be unacceptable traffic congestion and notential danger to read users, e.g. on Tiln Lane and Bigshy Bead
584	5	There would be unacceptable traffic congestion and potential danger to road users, e.g. on Tiln Lane and Bigsby Road

Responde	Comme	Answer
nt	nt	
594	1	In conclusion, we remind councillors that they are elected by their constituents to do the best they can for Retford and it's residents, something that they are aware of, I'r "more" or "bigger" doesn't guarantee BETTER
594	2	As a resident of Park Lane, I am concerned that the development of any or all of these sites will have a considerable adverse effect on the area, especially in terms of acce danger, pressure on local services and potential flood danger
594	3	Access to and from all these sites will inevitably increase pressure on the link roads of Tiln Lane, Longholme Road and Moorgate Hill. At rush hours, vehicles travelling to w along Tiln Lane to avoid the low bridge at Welham, will produce long delays, greater risk of accidents, and pollution via noise, exhaust fumes and visual impact. This canno
594	4	The amount of housing required for future development seems questionable. In the current economic climate, will there really be so much growth in Retford, and where a stock of empty houses to add to the already high number of unoccupied houses.
594	5	The cost of increasing provision for water and power, drainage, school Places and healthcare will have to be met by someone. Will potential developers be willing to foot t and/or BDC be happy to tackle the flood risk which much of the land is classified as having? The loss of farmland and some SSSI hardly seems environmentally sound, and t access for walkers would be a serious blight on Retford and its future
594	6	The residents of The Drive, overlooking sites 46 and 309, have covenants which prevent building on those fields. Though some of those residents may wish to benefit from I know that many others do not. How is it possible for developments to go ahead with such a split of desire?
594	7	Given the chaotic outcome that development of these northern sites seems to threaten, there do seem to be better options for some development around Retford. The set to the A1, and hence the wider road network, whilst avoiding the through-Retford routes
594	8	If greenfield sites do have to be used, then why not jump the immediate boundaries of Retford, avoid urban sprawl, and use rural sites where the opportunity for purpose everyone? It is not too late to avoid a potential disaster, but I do fear that going ahead with proposals such as those outlined in sites 7, 46, 309 and 533 would create that o
595	1	I write in respect to your request for views on the proposed housing etc., developments. My comments apply to sites numbered 488, 489, 511 and 370 shown n the Retfor of access to the sites. Both Bracken Lane and Grove Coach road have a street parking throughout its 24 hours, and Grove Coach Road is in fact a barrow bridle path where
595	2	Secondly, this is a flood risk associated with all the sites. An addiction to build housing on site 511 was refused n 1996 because of fears of flood problems and I doubt that be any more acceptable then that proposed now.
595	3	Thirdly, building in these sites would lead to the loss of agricultural land, and loss of part of the green belt. It is unlikely to enhance the neighbourhood.
595	4	Finally, judging from previous reactions to previous reactions to build on two of these sites that would be little, if any, community support for any development.
596	1	This proposed development has, to the best of my knowledge been instigated without any consultation with local residents
596	2	The proposed development is totally out of character with the area. The areas in question are green belt land; good agricultural land would be wasted when brownfield sit
596	3	The present road infrastructure is tidally unsuitable to support a development of this size. Tiln Lane is already an accident black spot, (with the death of a child). Tiln Lane is designated HGV alternative route. This development would impose additional traffic congestion, danger and safety issues to other roast users and pedestrians on Tiln Lane
596	4	The proposed development areas are outside the existing development envelope and borough boundary.
597	1	I grew up on Bigsby Road, my parents still live there and as such I still spend of lot of my time there. I feel housing development on this site would not be good for the com area
597	2	On the proposed site at present is some beautiful agricultural land that is home to a large variety wildlife and trees. Walking the fields in the morning and it is not uncomm The land also hosts lots of trees, including many old oak and horse chestnut trees that local children (including myself when I was a boy) have gone to for generations to co the trees other plant life on the land includes many wild berries and wild flowers that are not only becoming rare themselves but help our country's declining population o and due to its natural beauty it is very popular among walkers from all over Retford and the sounding areas, with routes regularly published in the Retford Times and book office to name a few
597	3	Another issue is the road access and traffic generation. Getting on to Tiln Lane from Bigsby Road, Richmond Road and Palmer Road and getting on to Moorgate and Welha is already a nightmare a peak times and causes a knock-on effect crating congestion right into and through the town. The added traffic and congestion this site would gene worse, not to mention the increased danger to pedestrians in what is a primary school area. In closing I ask that you not deprive our community of this much loved piece of the second
598	1	I have many worries and they are as follows, I feel that there has been no proper consultation with the residents of these areas, there should be a meeting to enable resided discuss and put forward any views they may have regarding the proposed plans

I'm sure. However, please remember that

602	4	The sympathetic development of this site will in no way impinge upon the natural beauty of the area, nor impact upon any wild life Habitat
602	5	Any Service Road for this site would not cause any difficulty when entering the existing highway, as it is wide and straight at this juncture giving drivers good views both wa
602	6	Very few Mattersey homes will be impacted by additional houses on this site
602	7	We accept that the Parish Council and Planners are in a better position than us to know the requirements as far as numbers and types of dwellings. We had envisaged a di
002	/	to encourage young families into village and school life
602	8	If children are to be asked to walk to School, thus saving the environment, it is entirely reasonable to expect a footpath as outlined
602	9	The village of Mattersey has not been allocated any affordable houses for at least 45 years, and it is desperately needed -now. As far as we are concerned this land is available immediately
603	1	My objections are mainly on the grounds outlined below. a) The road infrastructure is totally unsuitable for such a large development, traffic restrictions at the bridge on V to use Tiln Lane which at certain times is overloaded and already presents high danger levels. Park Lane and Longholme are already "school ?" and with the expected traffi a major road. There would also be a chance that the population increase would also involve the number of buses with the demand for increased service into Retford centre
603	2	b) Surface drainage is also a problem in the area e.g. Park Lane can be like a rover at certain times and Welham Road is a constant ?. Therefore the construction of a large of commercial/industrial property will probably increase the risk of flooding.
603		c) All brownfield sites in the Retford area should be developed for housing before considering the proposed development. Also consideration should be made of the ever in which could also be redeveloped as housing or commercial.
604	1	No development should go ahead until the road under the railway bridge is altered to allow high lorries to proceed to Gainsborough.
604	2	This would make the traffic situation better easing the problem on Tiln Lane. Also the road after Badgers Chase, the road become very narrow with many corners. Also the unsatisfactory.
604	3	The entrance on to Tiln Lane near the school becomes a nightmare at school times lorries unable to move.
604	4	Do we need anymore houses? How many are empty in Retford including already built and already planned.
604	5	Is there sufficient work and industry in Retford?
604		Are the sewage and drains suitable for more properties or vase alterations to be made to the system?
604	7	All brownfield sites including neglected industrial sites focus for one (for affordable houses)? This would leave land that is already good agricultural use. Further more with to get mortgages.
605	1	The proposed future development of the Grove Lane, Bracken Lane and Grove Road areas will obviously introduce many problems to this part of the locality and will be if g are owners of property.
605	2	There is also the problem of increased traffic to and from the area, roads such as Bracken lane, Grove Coach Road and all roads and lanes leading out on to London Road w especially where large vehicles are part of the traffic. At times, today, particularly school times, problems occur due to parking and there is little room for additional traffic
605	3	More importantly it is well know that rain water flows down from Grove Hill to the land in the Bracken Lane area lying in adjacent fields and flooding the dykes in the vicini time, and buildings especially residences, suffer considerably.
605	4	My wife and myself agree that the proposed future development should not take place and that the area should remain as it is.
606	1	We would wish to object to the proposal to develop land off Bigsby Road, Retford. There has been no consultation with the local residents.
606	2	The traffic congestion on Tiln Lane (the main access point) is a danger already.
607	1	I would like to object to future development in my area. My objections are: a) Flooding in 2007 when several houses were under water and myself n Grove Coach Road Gro
607		b) Roads cannot cope with cars.
607		c) Bracken Lane school with more children.
607		We would find it very difficult to farm and carry on in livestock with the roads and cars parked on them with our tractors, cars, lories and other farm vehicles as we use the
607		Houses too near farm as we have a 7,000 pig unit in the next field. I think people would complain about the noise and sometimes the smell.
607	6	The government keep telling us to do more to produce food, how can we when land is being sold for houses?
608	1	I am writing to protest at the proposed housing development on this area. There is already congestion at time in the Tiln Lane area, and this scheme would make it danger
608		As there would be more children in the area f these houses were built – where would they attend school? Carr Hill school is already full.
608	3	Brownfield site should be used rather than the edge of the town.

609	1	1100 houses in Tiln Lane area! How on earth will Tiln Lane cope with the number of vehicles added to the amount of traffic already using this road? Completely unsuitabl
005	-	Clarborough. Twice a day the road comes to a stand still with buses and cars using the school. The T junction with Moorgate is difficult enough now.
610	1	Yes
610	2	Option A
610	3	Yes
610	4	468
610	5	Yes all should be protected.
611	1	We would like to express our strong opposition to the proposed new housing developments surrounding Kilton Forest Golf Course, & between Gateford and Kilton Forest
611	2	It is our opinion that this should remain 'green open space'. Green space such as this, is a highly valued amenity to the Worksop community, and should NOT be used for
611	3	We find this proposal outrageous, and intend to do everything within our power to stop it from proceeding any further.
612		I am a resident in kilton in Worksop and wish to make my views known that i am strongly opposed to the building of new houses in and around kilton and kilton forest, in
	1	green land here should be kept as that, for everyone to enjoy.
613	1 1	The proposed building on sites in this area, numbered 3, 370 and 511, are all low-lying and flood after periods of heavy rain or melting snow, specifically at the beginning water table. Houses at the end of Grove Coach Road, St Stephen's Road and St Helen's Road have all suffered from flooding. Other areas of Retford have also had flooding these areas will only compound the problem. Any such proposals to develop the above three sites would endanger the existing housing estate and will compound and inc failing drainage system. The Government and House Insurers have advised against building on land that is liable to flooding.
613	2	The local road infrastructure will also be put under added strain and pressure from the proposed increase in housing on these three sites, which are already currently bus from Bracken Lane Primary.
613	3	There is already house building in progress in various parts of Retford which still have to be sold and a serious lack of jobs in the area.
613	4	Building on these three sites will be very detrimental to the existing estate and I urge the Council to find alternative building sites to those stated at the beginning of the I
	-	asset to the requirements of Retford in the future.
614	1	Cuckney is an ancient village of less than 300 residents situated in rural North Nottinghamshire. It is built at the confluence of 3 major roads and is a ribbon development development in the village has been by the Welbeck Estate and more that 80% of the property is owned by the Welbeck Estate and rented to tenants. There are several part village. There is a small village shop, a pub and a primary school. Approximately 2 years ago the Post Office closed. There is very little employment within the village is surrounding towns or for the Welbeck Estate. Very little new development has taken place in the village in the last 25 years, but Bassetlaw District Council is now seeking residents regarding possible development in the village. Cuckney Parish Council is very keen to continue development discussions both with Bassetlaw District Council an Estates Company Ltd
614	2	It is the opinion of the Parish Council that careful development should be encouraged within Cuckney. The reasons for this position are as follows: A community should be a cross section of ages
614	3	The community should be able to support the facilities we currently have: the school, shop and pub
614	4	The proportion of rented housing in Cuckney is unusually large and dependant upon a single Landlord. It would be beneficial to increase the proportion of owner occupie
614	5	As the number of people employed by Welbeck Estate decreases there is a higher risk of rented properties being left without tenants. The Parish Council has views abou considered and the location of this development.
614	6	Any development should be in keeping with the style of the village
614	7	Developments within the village should be "small" and generally use infill sites rather than completely new areas
614	8	They should attract a cross section of residents, but particularly "first time buyers" and young people
614	9	They should be built using attractive schemes to encourage purchase
614	10	Newly built areas should be mixed in nature, and if several properties are built may include both larger and smaller properties
614	11	Bassetlaw District Council has identified several sites which may be appropriate for development within Cuckney. The original scheme identified 10 possible sites within C
		later consideration.
614	12	Cuckney PC Supports the development of infill areas within the village
614		Supports small and sensitive developments within the village
614		Does not wish to see isolated large new areas of housing
614	15	Believes that of the 10 areas originally put forward 7 were summarily dismissed for inappropriate reasons and these should be reconsidered in more detail, perhaps in discussion

614	16	Believes that the three areas put forward for further development should not be considered in isolation
615	1	I think location 35 is unsuitable.
615	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
616	1	I think location 35 is unsuitable.
617	1	I live on Richmond Road and Tiln Lane is already unsuitable for the amount of traffic using it. The heavy goods vehicles have to use this unsuitable route to avoid the bridge
017	1	problems. The increase in traffic would cause safety issues in the area of Carr Hill School and at the junction of Tiln Lane with Moorgate.
617	2	The population increase would cause problems in relation to school, health and employment. Where will these people work, receive health care, education etc.?
617	3	Building on our green agricultural land when areas are stood derelict and empty is not necessary. Do we need all these extra dwellings in what is a market town? The whol
017		spoilt.
617	4	As far as I am aware there has been no discussion or consultation with the residents of this area.
618	1	Some weeks ago we visited your display on Retford Market Square and examined the plans for future development. We were concerned that among the plots being propo
310		land at the bottom of Grove Coach Road.
		A recently as the summer of 2007 properties in this area were flooded and indeed the bottom of Grove Coach Road was inaccessible due to flood water. It would appear the
618	2	adequate to cope when substantial rain falls. In the 1990s plans for development were initially passed even though the Utility Companies were against the proposals. Com
		development did not proceed.
618	3	At peak times access to London Road can be difficult from Bracken Lane and Grove Coach Road and additional building would only exacerbate the problem. Bracken Lane is
64.0		dropped at school and collected.
618		Whilst we appreciate the Government's plans for new housing and the reasons, it does seem obvious the this particular area should be left as it is.
619 619	1 2	Having lived in Bigaby Road and St Saviours Close for over 40 year, I have seen the build up of traffic and deterioration of traffic flow on Tiln Lane. Deterioration of the Character of the area
619		Dangerous build up of traffic conditions and threat of life
619	4	Schools safety. The Tiln Lane/Welham Road junction already presents considerable problems where accidents have occurred.
619	-	Does the council have a proposed target for the number of acceptable accidents/deaths that might occur if there plans are carried through.
620		Site allocations including the fields either side of Bracken Lane and fields backing onto Rutland Road and Cavendish Road.
		We are against any development in this area because the only access is via Grove Coach Road and Bracken Lane, and an increase of traffic along these roads would cause a
620	2	inhabitants.
620	3	The school is already full and its playing field often flooded
620	4	The infrastructure could not sustain more building as there are already problems with flooding in some parts. This could be made much worse if the land were developed.
C 2 1	1	14 new houses is approximately 1 house per year of the plan. I would suggest that this is totally inadequate for the 5th/6th largest village in Bassetlaw. I would have though
621	1	in mind we have no limitations I believe, on sewerage, primary school places etc.
621	2	The only way the village will obtain a village hall, which the residents have identified as desirable, is taking from a significant housing development.
621	3	No preference but you should note site 516 received planning permission for an additional house in in July 2011
622	1	Our major concern is that at present the surrounding road system is totally unsuitable for any further development. Currently, Tiln Lane and Smeath Road are carrying too
JLL		the diversion away from the low bridge on the A620. Any increase in traffic would increase the danger to road users and pedestrians.
		If pupil numbers are to be increased at Carr Hill School due to the new development, then this would increase the current traffic problems associated with the arrival and o
622	2	Road is now being used for both school buses and public transport for which it was not designed. It is too narrow. Any additional traffic at these 'peak' times would cause v
622	3	With the increasing requirement for the production of home-produced food in the U.K., we are against the development of good agricultural land for housing development
		development of 'brownfield' sites before moving onto 'greenfield' sites.
622	4	There is no doubt that a development the size of the one proposed would appreciably alter the character of the area. We moved to our current house in 1987 because it w
		the local walks to the north and north-east of town. These would be destroyed by such a development.

626	3	Traffic is already a problem at the junctions of Grove Coach Road and Bracken Lane with London Road and the proposal to add over 600 homes will cause huge problems, Grove Coach Road and Bracken Lane were never designed to cater for the density of traffic which the proposed development would inevitably create, and there is no alte
626	4	Bracken Lane School is already oversubscribed so where would the children from these extra houses attend school?
626	5	The proposed development areas involve building outside the existing development envelope, and outside the borough boundary, and there would be a loss of good agric
626	6	There is already an existing problem with traffic at the Tiln Lane/Moorgate junction and this has increased significantly over the years. The proposal to add hundreds of ne particularly at school start and leaving times. The present road infrastructure is totally unsuitable for such a large development and the extra traffic that this would genera particularly as Carr Hill School is already on a busy road used by HGVs avoiding the low bridge on the A620, and the children's safety would be compromised if further traffic
626	7	Carr Hill School is already oversubscribed, so where would the children from the proposed 1130 houses attend school?
626	8	The proposed development areas involve building outside the existing development envelope, and outside the borough boundary, and there would be a loss of good agric
626		The proposed development would increase the risk of flooding to surrounding properties. When there is heavy rain the drainage system around Tiln Lane and surrounding of water. How would the drainage system be able to cope when over a thousand extra homes are added into the equation. Elmwood Close already floods when there is he
626	10 1	We have been told by other residents that the field at the bottom of Longholme Road is protected as there are natural springs on this land so how can the council even co must be a conservation area?
626	11	We would like to express our concern about the way that these proposed developments have been advertised. We only became aware about the proposal by word of mo Apparently there was a small article in a Retford newspaper which went unnoticed to many residents. We feel that the council have tried to go under the radar and hoped that affect the majority of Retford.
626	12	On a final note, Retford is a lovely historic market town, and we feel that these proposed developments will ruin it. The existing new developments in Retford are not in key
020		certainly do not add any charm to a small historic market town.
626	13	Schools are already full, doctors surgeries already fully booked and Bassetlaw hospital is not equipped to accommodate all of the extra residents these developments wou already full on market days so where will all these people park to shop? The unemployed cannot find jobs so who will employ all of these extra residents, and who will pay because the council have accepted a development on a flood plain?
627	1	For as long as we have lived here (since 1988), fields 511 and 370 have been considered flood plain. These fields need to hold water draining from Grove hills until the beer away from the area. To a lesser extent field 488 does a similar job. Despite this, in August 2004 and again, more seriously, in June 2007, this end of Bracken Lane was affed ditches along and adjacent to Bracken Lane were full and the pumping station on Bracken Lane was unable to cope with the volume of water. This resulted in the domestit top of downstairs toilet bowls and some partial flooding of gardens. (Appendix 2 & 2A) In 2007 the situation was much worse and lasted for longer. Again, the pumping st drainage ditches were full and overflowing onto Bracken Lane where the culvert passes under the Lane. Once again, domestic drains back-filled, this time to the extent the water into the garage, but not, fortunately, into the house. The rear garden was more extensively flooded, for a much longer period and to the extent that water flowed d (Appendix 3) This lasted, to various degrees, for two weeks. On one occasion at the start of the flooding, the fire service was in attendance pumping water from the Lane between fields 511 and 488. We also know that in 2004 and 2007 houses/gardens at the end of Grove Coach Road were flooded and the Environment Agency June 2007 I or gardens at the end of St Helens road were affected. Whilst field 488 suffers less from flooding, it is often water-logged and has not been used to grow crops 'properly' f permission for the development of field 488 was declined at Ombudsman level in 1980, due to opposition from locals, Severn Trent, Environment Agency and Highways Av objected to an application to develop field 511 in 1996. Since the 2007 floods, nothing has been done to improve drainage in this area. Building 312 houses would severel of the flood plain and adding much more 'hard' rain catchment area. It would also drastically increase domestic drainage/sewerage into a system which already has proble this area h
627	2	A further 312 houses in fields 511, 489 and 370 would drastically increase traffic, which would have to pass along Bracken Lane and Grove Coach Road for access. Bracker narrows further just past 50 Bracken Lane. Vehicles often have to pause opposite our house to wait for a vehicle coming down Bracken Lane to pass, before they can process sides by drainage ditches, making widening the lane a very difficult task. Bracken Lane has Junior, Infants and Nursery schools, which already generate problems with traffic start/finish times), with cars parked well along Bracken Lane and on Bramble Road and Rose Avenue. Adding further traffic would increase the problems, including that of mainly older properties and is often congested because of on- road parking. Similar considerations therefore apply.
627	3	Bracken Lane School is, we understand, near to full capacity, as, we believe, is Thrumpton Lane School. The secondary schools have spare capacity, but are on the other side of Retford.

627	4	The development of the fields in question would necessitate the removal of many large trees and much old hedgerow. This, together with the loss of the fields themselves habitat for wildlife.
628	1	I am a Trustee of the Douglas Rupert Clark deceased Will Trust, and a Partner of a firm of Solicitors in Retford. I am aware of the recent consultation, and confirm that I be and 309 should be considered favourably, taking into account its location and availability, and also the willingness of the proprietors of each constituent part to actively co
628	2	It is considered that the site is highly suitable for residential development, given its location and favourable access point.
628	3	It is noted also that the site is surrounded on three sides by residential development and is likely to be treated more infill than encroaching into open countryside.
628	4	There is, I understand, total agreement between the land owners to see this site developed.
629	1	In my area of Bracken Lane and Grove Coach Road (Retford) I consider the land unsuitable for future housing development due to the serious flooding problems we have h
629	2	Every year my front garden is flooded and my front flowerbed is only capable of supporting rose bushes. When my husband was a school-boy in the winters of the 1920's h On several occasions we have had to sweep away the water away from our patio as it pours down the sloping terrain of our road.
629	3	Frequently I have been delayed by the problem of driving and entering London Road at peak times, morning and afternoon. I have counted 22 cars waiting to enter Londor
629	4	Why do we require more housing when there are already hundreds of empty houses in our area?
630	1	I have been informed that the Bassetlaw District Council are proposing to develop over 1,130 houses on good agricultural land north of my current abode. It seems there h to the production of the proposals which comes as no surprise to me at all.
630	2	The additional traffic congestion and danger to road users and pedestrians on Tiln Lane is plain for all to see. There is already extra traffic using Tiln Lane at the moment th Clarborough but are using it to avoid the speed limits in these areas.
630	3	Another of my concerns is the way these proposals will alter the character of the area,
630	4	and the loss of good agricultural land when all brownfield sites should be developed first.
630	5	The existing Highway Infrastructure will not be able to cope with the increased traffic
630	6	Good agricultural land will be lost if these sites are used. Brownfield sites should be used before agricultural land is developed.
630	7	There will be additional traffic and safety issues for road users and school children. HGV's have to use this route to avoid the low bridge at Welham. Their numbers are incr congestion along Tiln Lane at school times.
631	1	I wish to object to the building of 900 houses, near my house, off Bisby Road. I originally bought my property as I wished to live near to the edge of town, in a semi rural lo street considerable less 'rural', as it would become in the middle of a large estate. On a daily basis I walk across the fields on which the development is proposed, and my d amenity and, the character will be significantly changed. I wanted to live on the edge of the development envelope, now I will be in the middle of it.
631	2	The increased traffic travelling toward the new houses will also make the walk to the site more dangerous and less pleasant. My dog and grandchildren will be unhappy wa it was pretty.
632	1	I would like to object to the proposed planning of 1700 houses in the Worksop Area. I have looked at the proposed sites and feel the loss of Greenbelt/farm land would be the loss of beautiful scenery and wildlife the rambling running/bridleway paths would be lost forever to more concrete box houses.
632	2	The other main objection I have is that it would be very near the smelly sewage works which in the summer is especially awful, in summer we have to suffer disgraceful sm Greenland does this always mean something has to be built upon it.
632	3	Will Worksop amenities be able to cope with a large influx of people?
632	4	The police station/service a hospital with theatre service/ward closures in the Guardian every year, road traffic problem, narrow roads, parked cars chaos and where would moment for our young people.
633	1	We think Tiln Lane (the only access) is far too narrow for the amount of traffic that would be going through. Its busy enough already as lorries use this to avoid the low bric Lane.
633	2	There are houses standing empty now so what is the point of building more
633	3	Do not take greenfield sites take brownfield sites first. Greenbelt areas are a precious commodity and we should try to hang on to them.
634	1	In March 2011 we received a questionnaire about the future development in Blyth and asking for any suitable land for infill/ development. We wrote suggesting our farmy attended the meeting in Blyth on December 14th he noticed Mr Moore's fields allocated as possible sites but no mention of our suggestion. We feel it is possible that our our proposal again. Our farmyard Bridge Farm, Blyth is directly opposite Mr Platt's farm buildings which have now been developed. We feel we have a strong case to put for

635	1	Although the site has been identified for high quality employment use since the mid 1990's the site is not considered to be viable for employment purposes. A report was 2011 and an Executive Summary of that report is included -see Appendix 3. It states that to bring forward an employment I business scheme on this site is highly unlikely. is based on the cost of infrastructure provision, end values (development costs would exceed completed value) and speculative development would not be viable with suc this backdrop we respond the questions relevant to Worksop & Gateford.
635	2	We agree in principle with the screening methodology and we use the criteria (in the 'Summary & Conclusion' section) to comment on the suitability of Site 28/W6: Land a residential led mixed use development site.
635	3	We consider that the town could be allocated more housing and employment growth if a scheme was developed in such a way that it would benefit the regeneration of the large sustainable urban extension (SUE) / new residential quarter of a 1,000 plus units at Gateford could change the perception of Worksop as a place to work and live. A Gainsborough in Lincolnshire, where the growth agenda has led to a new SUE being granted planning permission this year (2011). New housing, employment, schools, and public open space (both formal and informal) is aiming to attract new investment to the town which can only take place with a major regeneration scheme. Land at Gateford that vision to Worksop but land at Gateford Common alone has the ability to deliver a mix of uses in a location that would be attractive to the housing market. (Please see who have already expressed an interest in the site and the opportunity).
635	4	We act on behalf of the landowners who are the freehold owners of land referenced as Site 28/W6: Land at Gateford Common. We support the development of this land
635	5	As above we support Site 28/W6: Land at Gateford Common as capable of accommodating an element of employment land in the future (the southern element fronting of
635	6	We support the allocation of Site 28/W6: Land at Gateford Common for mixed use residential led development.
635	7	The site history and most recent commercial appraisal of the site indicates that the employment potential of the site is only likely to be delivered through a cross subsidy o land value - i.e. residential.
635	8	The site has a very clear defensible boundary - the outer ring road - and its development would be consistent with neighbouring land uses (residential and employment la urban area / extent of Worksop and as such it is entirely appropriate for this parcel of land to accord with the residential development to North East and North West of Ga
635	9	Development would not encroach upon the wider open countryside, although the land itself is essentially open and access points could be delivered from the north, east,
635	10	Importantly we believe that in the current market it is essential to identify sites (the very best sites) that are most deliverable and attractive to the housing market. This si and the wider town area has to be considered as a 'top ranking' site.
635		We consider that it is important for any site to consider the matter of access at an early stage as it is the cornerstone of development deliverability. In this regard our clier Sanderson Associates (Highways Engineers) to review the site. The site (as proposed in the consultation document) indicates employment to the south and residential dev that four points of access have been considered appropriate as access points into the site. They are from (1) Gateford Road, (2) Kirkpatrick Drive, (3) Claylands Avenue and conceptualize this is by looking at a plan and we have attached a technical drawing within Appendix 5 and a simple master plan to show this. Access from road points 1, 2 residential development and the access from 3 would be solely used by the employment site. An emergency access would be considered linking Claylands Avenue with Ga Statement would be required to accompany a specific development proposal it has already been identified that the site is accessible and with development of the site, acc The potential improvements for sustainable travel and the positive effects of 'travel planning ', would reduce the development traffic so as not to have an unacceptable in
635	12	During the period of this consultation we have also been asked to consider the potential implications of new housing growth and the need to provide new primary school understand that the County Education Team consider that Gateford is a location where a new school would be required. In principle we do not object to land being made to be considered in the context of a development viability appraisal which would factor into account matters such as utility costs, affordable housing, etc. The delivery of a employment land. This is a matter that we would like to discuss with both Bassetlaw DC and the County Council.
635	13	Taking into account the previously submitted representations we have made and referenced in this letter (letter to Bassetlaw DC on the 10/10/11 -see Appendix 2) we stil should be identified as a SHLAA 'developable site' (for housing or mixed use) on the 'Worksop Plan ' – (Page 25 of the document). This is a matter which we would like Bas site can be discussed in the open forum of a Planning Hearing in 2012 and in front of the duly appointed Planning Inspector. The basis of arguing this case is based upon th namely the Suitability of the Site criteria (Page 10 & 11) and the Availability of the Site (Page 11). However, as set out in the 'Introduction', these representations principa development at Gateford Common.

635	14	We have identified that we support the allocation of the land at Site 28/W6: Land at Gateford Common for a residential led mixed use development allocation. The allocat the November 2011 Inspectors Report which identifies Worksop as the focus of development in Bassetlaw to 2028. Importantly we consider that the wider area should be larger scale -a potential sustainable urban extension. This would include land on the north side of Gateford Road which we consider has been incorrectly 'screened out'. He Gateford Common. Taking into account the Site Allocations Screening Methodology on Page 10 development of the site would be both suitable and available. Taking into / current allocation for employment development we recommend to Bassetlaw that the site should be identified as a preferred site for development and allocation.
636	1	We are writing primarily as residents since 1979 of the Grove Coach Road area of Retford, so with strong interests in the planning situation for the area on the eastern bou north of the end of, the built-up area at the ends of Grove Coach Road, St Helen's Road, St Stephen's Road and Bracken Lane. We oppose the inclusion for potential housir numbered on the map on pages 38-39 of your consultation document: 370; 511; 488.
636	2	There is wide awareness among local residents, and among officers of and elected representatives on the District Council, of the reasons for which these fields should not area there have been three planning applications, two of which were for 511 and 488. Both were rejected. The 1981 application for 488 went to appeal, but was rejected Maclean for development of the area adjoining 370 succeeded, but in defiance of reason and with strict conditions attached -none of which, however, represented anythi surface water drainage problem. We are therefore alarmed that our local planning authority (LPA), which should be protecting our fragile drainage environment, has accel andowners to include these areas in a formal consultative document. This implies that no reasons were found to exclude them. But, as you know, the suitability for devel exhaustively investigated as the result of planning applications. Both were rejected. 488 (1981) went to a public enquiry after an appeal. The DOE inspector did not mince rejection (see Appendix EI. In the case of 511, in December 1995, the developer must have realised the futility of appealing and withdrew an application to do so (see App as far as we know, not been the subject of a past application. However, the reasons for which applications for 511 and 488 were rejected apply equally to 370. In the case permission to develop 488 the defence was mounted very effectively by our Council. This is ame council is now proposing to include this area, and 511 and 370, in a block prediveloped fits. Whilst they will now, we trust, be removed, their inclusion, even at this stage, will have given rise to expectations among the landowners. You may say "Preferred Options" document, this will not imply that they will automatically gain planning consent. However, it will mean that they are considered a priori potentially su following reasons: i) The decision to include them in the final block plan would be taken by officers of the LPA. If a planning application was subsequentify made, the councilo

cation is supported (in the broadest context) by be considered for development of a much However, we do support the allocation at to account all of the listed criteria and its former

636	3	CONFLICT WITH NATIONAL OR LOCAL PLANNING POLICY Your online map confirms that all these areas, as we and you well know, include flood plane of the upper sector up they will be raised above the flood level by removing water storage capacity in the present floodplain into the lower lying parts of adjoining built-up areas, which have already the Beck over the last thirty years. In one case a house has been flooded several times to the extent of making it temporarily uninhabitable, and, during the 2007 floods , refurbishment. Without sustainable drainage solutions (SU DS) for these areas, and those adjoining them, the lives and properties of existing residents, at least those clos are developed. Their properties are also likely to become uninsurable and blighted. This would be true if even only one of the three areas was developed. While the risk is the Beck is a stream-like land-drain, and discharges into the river Idle. It is therefore a direct tributary of the area where we live, indirect fluvial flooding ("non-fluvial" flooding) can be as disruptive and potentially disastrous as direct fluvial flooding. The Planning Policy Statement 25 (Development and Flood Risk) sets out t question and provides detailed guidance to local planning authorities. We consider that the areas of Retford which are the focus of our submission fall indisputably within leads to the conclusion that, apart from other planning considerations, to be considered later, these areas should be developed only if a workable SUDS is implemented. An appeal by the applicant was subsequently withdrawn. A copy of the letters sent to us by the Council detailing the reasons for rejecting the application statched as A, dealing with flooding is numbered (5). In these submissions, coverage of the Beck and its flooding problems is numbered 2 in the first and 4 in the second. This coverage, when it was drafted, because nothing material has changed. The Beck has been adopted by the Environment Agency. So far, the EA have worked only on the section to the cross
636	4	the 2007 floods, which had severe effects in the section of Grove Lane and adjoining streets next to the culvert and caused serious flooding to gardens and at least one present of the narrowness, and, east of the Beck, extreme narrowness, of Bracken Lane. At the cost of loss of ecological habitat, rural environment and arable land, the eastern sect west of the Beck only as far as the western edge of 488.
636	5	The impact on the Bracken Lane/London Road junction (a crossroads) of the greatly increased traffic flows along Bracken Lane.
636	6	The already overstretched Bracken Lane would be one of two access roads to area 511 and the sole direct access road to area 488.
636	7	Grove Coach Road, already heavily used, would be an alternative access road to area 511 and the sole access road to area 370.
636	8	The junctions of both these roads with London Road would need traffic lights. The cross-roads where Bracken Lane joins London Road arguably already does.
636	9	The unsuitability of the leg of Bracken Lane, after it turns left at the T-junction at Black's farm and follows the Retford eastern boundary, for development as a suitable alt flows towards Leverton road/the town centre. The "road" shown on OS maps connecting the T-junction where Bracken Lane joins Grove Lane to Leverton Road is an unm London Road to Leverton Road down Bracken Lane therefore involves a very narrow lane through Little Gringley. Either of these possibilities as a main route would be ver at least the second case. There would be pressure to replace the Grove Lane level crossing by a bridge/underlie, with consequences for at least one property. The bridge of way and has traffic lights. This bridge would need rebuilding and widening. Only to the west of this bridge is the route suitable for increased traffic flows.
636	10	LOSS OF TREES OR HEDGEROWS The very large hedgerows to each side of Bracken Lane on the east side of the Beck would be lost. If the second stretch of Blacken Lane, a increased traffic volumes the extent of the loss would be very large. The section of lane which is an extension of Grove Coach Road (the right turn at the same T junction) development on area. 511 would also lose both its hedgerows.

on of the Retford Beck. If these areas are built them, as well as for the areas currently drained dy experienced serious garden flooding from , to result in its needing major internal ose to the Beck, will be damaged if these areas a in this area is not of fluvial flooding as such, te difference between the "type" of flooding

636		LOSS OF ECOLOGICAL HABITATS OR LANDSCAPES The verges and large hedgerows of the sections of Bracken Lane and Grove Coach Road referred to above are important 488 and 511, at least, is arable land, attractive and an important "green lung" for the town which does not have the benefit of many such areas immediately adjoining buil would cease to offer their present excellent walking and cycling opportunities. This would be a serious loss also in view of national and local schemes encouraging healthie lose the potentially excellent arable land of these areas. These areas appear to be under-utilized by local farmers and relegated mainly to spasmodic grazing. There is a wo term economic sense to build on good farming land where other land less suitable for this purpose is also available -as is the case around the Retford boundary, and as you
636	1 17 1	DESIGN, APPEARANCE, LAYOUT, DENSITY AND MASS OF BUILDINGS 158 houses for area 511 implies a much higher density than in the existing areas immediately to the we with the local built environment.
636	13	In addition, we are concerned at the impact on the foul drainage system. The point to which the foul drains of a development on 511 would run by gravity is at the T juncti joins Bracken Lane. This would also be true for areas 370 and 488. For 488 the flow would be against the fall of the land, so a supplementary pumping station would be new in a loop to/from London Road via Grove Coach Road, Bramble Road and Bracken Lane. The sewage from most of the 1960s part and all the 1970s part of the Grove Coach section of Grove Coach Road, runs through a gravity sewer to a pumping station close to the Beck on the north side of Bracken Lane. Sewage from the later Maclean exten sewer to the same pump. From the pumping station, sewage is pumped up under Bracken Lane, because of the opposing gradient, and discharges into the public gravity se Bracken Lane. Sewage from houses developed on 511, 370 and 488. There seems no alternative to pumping this up under Bracken Lane to the same gravity sewer. This wo total of 312 houses. We question whether the existing gravity sewer and the sewer into which this drains under London Road are capable of sustaining such a large increase
636	14	The mains water branches supplying the Grove Coach Estate etc. would need increasing in size where they run from London Road under Grove Coach Road and Bracken La
636	1 15 1	Bracken Lane School As this stands, it would be inadequate to the demands of anything approaching the maximum capacity of these three areas. It is a single storey buildin it on its present side or building a completely new school on part of the new development area/s. Either of these possibilities would have a further impact on the environn
636	16	You identify potential development areas for new housing around Retford with a maximum total capacity of 3,894 dwellings. Areas 488, 511 and 370 are shown as for pote However, the total possible capacity of all the areas shown (3,894 dwellings) greatly exceeds even the net possible demand, which your own document states to be 577 (p capacity shown as possible, and only 64% of just one set of linked areas on your map (7+46+309). This alone is shown as having a potential for 899 dwellings. With such a h estimated requirements we request that you eliminate now from your proposals areas which are problematical/sensitive such as 488, 511 and 370.
636		Given the state of the local economy and the town's failure to attract new employment (even enough to replace that lost through recent major closures), despite its excell architecture of a remarkably well preserved market town, we question why you feel the need to overshoot any possible estimated requirement for new dwellings by such
636	1 1 2 1	We also, as in 1995, draw attention to the large (now very large) numbers of unsold, generally fairly affordable (by market standards), new and second hand dwellings in R should there be a market for an additional 577?
636		Appendices provided covering: A 1995 submissions to the LPA regarding the application to develop 511. B Notice of the withdrawal of an appeal against the LPA's rejectior recent work carried out on the Beck by the Environment Agency. D Part of the front page of the Retford Times, 02/03/1995. E The DOE inspector's report of 1981 rejecting refusal to grant planning permission for development of field 488. F Report in the Retford Times, 23/03/1995.
637	1	I think that Beckingham has had enough development there should be no more development.
637	2	Planning was passed for a public house as I have built my house adjacent to public house I am totally against this I now know.
637	3	The farmer landowner wants to build houses on it. Which I said any many agreed from day one.
637	4	Now the Parish Council say they don't want a pub at that location, and want it at first application, which is opened the door for housing. This is outside the village envelope objection.
637	5	How can the schools cope with extra housing?
637		The drains capacity cope
637		Sewers
637	8	Water table
637	9	The public house I have and many other people have been saying for 2 years now that the prime aim was to get Mr Pickering the land owner planning for houses which I h money to A. buy land for public house, B. finance public house, C. the public house will never happen in this climate at first proposal of 2nd proposal we will end up with he

nt	nt	
637		B. should be protected open space
637		C. I ask you is there any greenfield sites that are safe.
637		D. Beckingham will become a very large housing estate not attractive as a village anymore
637		One last point would people who are proposing development please drive round the village to see the amount of housing in the village.
638		Yes
638	2	no, it is already crowded enough
638	3	9, 30, 90, 28
638	4	w1, w12
638	5	195,343, w8, 28, w6
638	6	yes, especially the golf course area, Worksop is far too built up already
638	7	yes
638	8	Option A: Spread between Worksop; Retford and Harworth Bircotes?
638	9	Around existing sites
638	10	Separately, so there is no confusion between the two
639	1	Include regeneration of unused/abandoned housing and sites in the town centre and current areas of housing.
639	2	No, regeneration should be considered of town centre sites that are unused.
639	3	I think location 35 is unsuitable
639	4	site 4/w9, I think option 2 is the most suitable
639	5	yes
639	6	If/when you build more houses then you will have to consider availability of primary school places and provision of doctors surgeries.
639	7	Yes to the feedback, but no to the advertising of it, i should be more widely advertised, e.g., by leaflets delivered door to door
639	8	Option A: Spread between Worksop; Retford and Harworth Bircotes?
640	1	This would depend on the properties intended to be built. Are they to be built for the private buyer or for the housing benefits claimants.
640	2	I think location 35 is unsuitable
640		Vesuvius site
640		REMOVED
	5	Area 35 should be protected. most of us bought houses on Gateford for the wide open countryside. As a resident of Gateford for 16 years we have little in the way of Cou
640		countryside as compensation to enjoy. We continue to provide major cash flow to the council and I personally feel that all political parties wish to add to the coffers with
		on them by the Government
640		Option A: Spread between Worksop; Retford and Harworth Bircotes?
640	7	NO
640	8	I wish to object strongly to the development of any houses at site 35 based on the below reasons: The junction between Ashes Park Avenue and Gateford Road is already
640		increase in housing on the estate will make this situation intolerable and dangerous to residents and visitors.
640 640		Increased traffic levels on the estate generally reducing the quality of our environment, increasing noise levels, pollution and increasing danger to pedestrians and cyclists The area proposed in productive agricultural land farming wheat and oilseed rape.

Responde	-	Answer
nt	nt	
641		The road system is already far too busy and more dangerous than ever.
641	4	The sewage system is well over capacity and regularly fails
641	5	The wooded area is home to large numbers of rare birds and other flora and fauna.
		The general feeling of the community is that it is not needed and will spoil what is already here. This is likely only to benefit greedy building companies and not the presen
641	6	large numbers of houses. It will only attract people from outside of the area and is likely to be unaffordable to most current residents.
641	7	Option A: Spread between Worksop; Retford and Harworth Bircotes?
642	1	No the infrastructure for Worksop is insufficient to sustain any further housing. It is saturated already with no real new amenities provided for the people living - it has alr
642	2	I think location 35 is unsuitable as there will be a strain on schools and services, worse traffic at local shops, increased pollution.
642	3	Further destruction of farmed agricultural land.
642	4	Increased traffic problem as already there is a great problem trying to get onto and off the main highway, mainly Gateford Road. No solution has been presented to the re
642	5	Option A: Spread between Worksop; Retford and Harworth Bircotes?
643	1	I think location 35 is unsuitable
643	2	The Gateford area does not have enough facilities for the current level of housing i.e. adequate schools, doctors, chemist, post office
643		Option A: Spread between Worksop; Retford and Harworth Bircotes?
643		REMOVED
644	1	I think location 35 is unsuitable as the current infrastructure cannot support this development
644	2	I understand the route into this development will be via Churchill Way. This is only a small road and cannot safely accommodate the traffic generated by an additional 700 this area
644	3	In a morning the queue to get out of the very dangerous junction on Gateford Road often stretches back to the 2nd roundabout. Adding another 700 houses would see th
644		Gateford Park primary school is already full so where will the children go from this development.
644		There are already quite a few properties in Gateford that have been for sale for a long time i.e. over 2 years, therefore i do not believe that there is a requirement for any
644		Option A: Spread between Worksop; Retford and Harworth Bircotes?
645		There has been no consultation with residents prior to the production of this proposal.
645	2	The development will alter the character of the area.
645		The present road infrastructure is unsuitable for such a development.
645	4	There will be a loss of valuable and useful agricultural land.
645	5	There will be added congestion and danger to pedestrians and road users on Tiln Lane, which is already congested due to the Carr Hill School traffic at peak times of day.
645 645		The junction at Tiln Lane with Moorgate is unsuitable to further traffic load.
645 645	7 8	The proposed areas involve building outside the existing development area The proposal involves building outside the borough boundary
645	-	All brownfield sites should be developed for housing before developing the edge of town and beyond the borough boundary
645		Furthermore there will be a loss of trees and countryside and there will be loss of privacy for residents adjacent to developed areas
645	10	The road safety and road access issues are particularly worrying as many children use this area on foot going to school
645		In addition to this I understand that there is a proposal to develop a travellers site in the area, which has not been made public. This is totally unacceptable for the area ab
646	1 1	My husband and I oppose the proposed housing development and that the land should remain green open space, I have lived here all my life 44 years and hope this will n our children.
647	1	Yes I agree with the development of 9 houses.
647		Careful consideration should be given as to where such development takes place for reasons of safety, access etc.
647		Site 266 because I think this is known as the dog walking site with a public footpath, which can be re-routed around the field
647		Any access to Retford Road could be opened with the minimum of risk. This land is not used for farming
647		Site 214 is agricultural and too large for development of a small housing plot/site.
647	6	Too valuable as farming land.
648	1	I agree that land should be allocated in Blyth for a MAXIMUM of 9 houses.

		The proposed areas involve building outside the borough boundary when there are already several large developments being built within Retford. With the loss of traditio
652	6	insufficient employment opportunities in the area to meet the demands of an increased population.
652		Before any of these proposals are acted upon, full consultation with current residents needs to be implemented together with all other service providers who would be affi
652	8	The drainage system is already prone to flooding
652	9	If an increase in traffic and parking is to take place, access for emergency vehicles would be severely restricted.
653	1	I think Location 35 is unsuitable
653	2	i think open spaces in and around towns are important. i believe they should be protected
653		At some point all towns need to stop expanding, the reuse of old sites is a much better option than destroying open areas and surround country side
653	4	At some point all towns need to stop expanding, the reuse of old sites is a much better option than destroying open areas and surround country side
653	5	Option A: Spread between Worksop; Retford and Harworth Bircotes
654		I think location 35 is unsuitable.
654	2	Yes, the current 'potential protected open spaces' should be fully protected and NEVER be built upon
654	3	Option A: Spread between Worksop; Retford and Harworth Bircotes
655	1	i think location 3S is unsuitable already plenty of housing in that area there are already not enough schools also extra traffic may be a hazard
655		Option A: Spread between Worksop; Retford and Harworth Bircotes
656		I strongly feel site 35 is unsuitable, I feel Gateford has sufficient housing and any more would unnecessary strain on current resources.
656	2	It would also cause added traffic congestion making Gateford even harder to access and exit at peak times.
656	3	It would take away beautiful countryside and views
656	4	Take away privacy
656	5	Cause a detrimental impact on house prices
657	1	Location 35. I cannot see the sense of building on arable land at a time when there is a world food shortage.
	2	This land also backs onto woodland and is a haven for wildlife, pheasants, rabbits, hares and deer all of which can be seen by the many individuals who use this area for wa
657		activities. The increased traffic would have a significant effect on the residents of Gateford Hill Care Home who regularly use the road system for wheelchair access to the l
		we have across the estates.
657		Please protect our countryside and the environment it creates, at a time when environmental issues are high on the Governments agenda
657		Option A
658	1	I think that location 35 is unsuitable for various reasons
658		Option A
659	1	I think that location 35 is unsuitable. My main concern is the traffic generation this development will cause along with road safety issues. As it is at the moment, there is se
	_	the Gateford estate at peak times. If the volume of vehicles in the estate increases, then this will become a serious problem
659	2	Another concern I have with the new development is the lack of facilities available. For example, schooling, there is very limited space in the local primary schools and even
659	3	Loss of ecological habitats, landscapes and hedgerows is also one of the points in this development I am concerned about. There is small selection of local wildlife including
		live in the area of the build. I enjoy seeing the wildlife and such on regular dog walks through the estate and in particular location 35.
659		This is a common dog walking route, for most houses in the Gateford area
659	5 1	As stated at the beginning of this, my main issue is with the increase of traffic. One of the main routes to the location is the road that my house is located on, the house its
		will be visible and there will be an increase in noise pollution too.
659		Option A
660		Location 35 is unsustainable in the Gateford area as Gateford is a huge site already.
660	2	Even more houses will mean more congestion to roads in Gateford. Gateford is horrendous in the mornings to get onto the main road tail backs are backed up to the previous of
660	3	Gateford and the surrounding area will not be able to tackle the amount of children needing to enter into nursery and primary and even comprehensive education as the s
660	4	The local shops on Celtic Point is also horrendous for the amount of traffic entering and leaving the shopping area, which will lead to even more tail backs.
660	5	Do we really need to chop down trees and destroy the landscape for more houses which aren't even needed just to satisfy the greedy landowners.
660	6	Option A
661	1	No sorry. Direct consultation with the people that will be directly affected before any site is to be looked at. That way, suitable sites will be recognised before they are expl
661	2	Employment is not always produced as a result of new building, or new sites - consideration must be given to improving what we have and upgrading the infrastructure we

		The proposed site location 35 will create too many issues with infrastructure. Local amenities will need to be reviewed, such as GP, schooling, shopping - additionally, introducing 700 household
668	8	for young people 3-16 is unacceptable.
668	9	This has the potential to increase anti-social behaviour within the 8-16 age range; the area has had issues with this recently, including exclusion zones at Celtic Point and Gateford Road.
668	10	In addition, the disruption to surrounding houses from a new development will impact not only from an environmental perspective i.e. noise pollution, traffic pollution.
		It will result in the loss of 70 hectares of agricultural land which is enjoyed by local people and is valued by residents on the estate, many of whom selected this area because of the access to the
668		Owday Woods tec This development may result in people moving away from the area, many of whom are employed in the local area, this will have a knock on effect to the local economy which
		the influx of the new households with them being primarily to service Sheffield housing market.
668		Option A
669		No
669		I think location 35 is unsuitable for the following reasons; overshadowing, overlooking or loss of privacy
669	3	Traffic generation, access, road safety and parking provision
669		loss of trees and hedgerows
669		loss of ecological habitats or landscapes
669		Yes
669		Option A
669		Around existing sites - will save money
669	9	Together - will save money
670	1	I think location 35 is unsuitable
670	2	Option A
671	1	I think location 35 is totally unsuitable
671		Option A
672		I think location 35 is unsuitable because it will increase traffic to an already over saturated part of the town. This will also make it unsafe for the many children in the area.
672		Option A
672		REMOVED
673	1	I think location 35 is unsuitable
673	2	Option A
674		I think location 35 is unsuitable
674		Option A
		Only allocated more housing if on 'brown land' (i.e.: previous building land, factory land etc., NOT 'green land'
675	1	
675	2	I think location 35 is unsuitable. The increased volume of traffic would be ridiculous. It is extremely difficult to get out onto Gateford Road at times now, without the addition of at least 700 mor
675	3	It will have a detrimental effect on Owday and Whipman woods
675	4	increased pollution and reduced local house prices
675	5	Yes, all open spaces should be protected. There is enough land available for building that isn't open space
675	6	Option A: Spread between Worksop; Retford and Harworth Bircotes?
	-	
675	7	No, no new sites should be within the District. The local house prices would drop massively
675	8	Should be put together. Let the residential people have the hassle and upheaval of transit travellers coming and going
675		None
675	10	In response to the above document I would like to record my opposition to any building on site number 35. This land must be protected as an important amenity for the enrichment of present a

troducing 700 households with no amenities

cause of the access to the bridle paths and the local economy which may not be filled by

dition of at least 700 more cars

e enrichment of present and future generations.

675	11	In particular I wish to strongly object to the development of any additional houses at site 35 for the following reasons. A) A great loss of amenity. It would have a detrimer visual and physical enjoyment of this rich landscape, which is a mixture of ancient hedgerows, copses and woodland. The rich mosaic of habitants for animal and birds would something no open space or park could replace – and a very much valued asset, there would be a loss of open walkways and bridleways which many people enjoy – both i
675	12	B) Urban sprawl and extension of the town boundary. Current housing already extends to the existing Worksop town boundary. Development of site 35 will extend beyon and Carlton in Lindrick. Additional housing will lead to too much density in an area that has sufficient housing.
675	13	C) A loss of nature conservation. The effect on Owday and Whipman Woods and Owday Plantation, which is a Site of Importance for Nature Conservation would be catast
675	14	D) There is an opportunity cost for our children's education. There will be less chance to learn the importance of the natural by having pertinent exposure to this environm them understand that beyond the urban sprawl there are farms, wild animals and birds to observe and understand. Here, they have it on their doorstep and are exposed t environment and they can see the land farmed and the crops grow. This areas must be preserved for our community.
675	15	E) Safety Issues. There will be increased danger from traffic. The number of cars would increase dramatically. At present residents and visitors use this land and take their they are safe.
675	16	F) More congestion and pollution. At present our local shops are busy and are utilised well by the local community. More housing will most certainly lead to local congestion large supermarkets from this site on foot and this would then lead to increased traffic to and from the town. There will also be extra noise and pollution from the increase
675		G) Loss of agriculture and employment. Currently this land is agricultural and productive and it supports the employment of land workers.
675	1 1 2	H) Infrastructure and Services. Increased density of housing and population will put a strain on local infrastructure and resources, for example doctors, dentists and other l sewerage will have to be provided and significantly upgraded again leading to destruction of the environment.
676	1	I consider that site 35 would be inappropriate for housing development for the following reasons: Additional traffic congestion on Ashes Park Avenue and junctions with G traffic on local roads which would access the new site - problems with young children on much busier roads
676		Loss of bridleways and green space
676		Strain on all local services
676		Option A
677	1	With regards to housing, there are over 800 empty properties within Bassetlaw which need to be brought back into occupation.
677		I think location 35 is totally unsuitable. The increase in traffic would cause huge problems, particularly when leaving Ashes Park Avenue to try to get onto Gateford Road, a houses would cause more congestion.
677		Gateford is already densely populated
677		spoil an area of natural beauty with the loss of trees, hedgerows and wildlife.
677	5	I think the land off Blyth road is a more suitable option. It is creating employment as well as providing housing.
677 678	6 1	option A I think location 35 is unsuitable
678	2	The potential development will effect everyone significantly causing increased traffic jams exiting and entering the Ashes Park Estate, many more cars causing danger to o
678		A strain on our schools and services
678		Worse traffic jams at local shops.
678	5	Construction road damage and years of mess, destruction of versatile and currently farmed agricultural land, destruction of beautiful countryside
678		Loss of bridleways/footpaths hedgerows, lost beautiful land which is frequently used by walkers daily.
678		Increased pollution
678		reduced local house prices.
678	9	the proposed development will detrimentally affect the view and privacy of current homeowners
678	10	Option A
679	1	Employment growth for sure, but not more housing, the area is full of new developments, some still not sold, by adding more jobs to the area then hopefully people will b standing empty.
679	2	I think location 35 is unsuitable due to the extra congestion it would cause, having lived here almost 10 years traffic has clearly increased during my time living here. I there be ridiculous to traffic, services, schooling allocations and more. I do NOT agree with this proposed site.
679	3	Option A: Spread between Worksop; Retford and Harworth Bircotes?
679	4	NONE.

693		Option A: Spread between Worksop; Retford and Harworth Bircotes?
694	1	I think location 35 is unsuitable for numerous reasons: namely that the current infrastructure is already under strain - exiting and entrance to Ashes park avenue is ridiculo
694		Allocated places at local primary schools are over subscribed
694	3	there is currently no park or community centre for those dwellings which exist now not to mention a further 700!!
694	4	Yes i do
694	5	but i also think the proposed site development at 35 is currently farmed, agricultural land and cannot understand why this land is not protected after Gateford has taken u
694	6	Option A: Spread between Worksop; Retford and Harworth Bircotes?
694	7	I wish to object strongly to the development of any additional houses at site 35 for the following reasons: A) Extension of town boundary and urban sprawl. The current Ga town boundary. Development on site 35 will, therefore extend beyond the boundary and there is a concern that Worksop will eventually consume Wallingwells and contin Lindrick.
694	8	B) Loss of amenity for children, residents and visitors. The proposed site is bordered by Owday Wood/Rough Piece and Owday Plantation, which are sites of importance fo present untouched by housing. Development on site 35 will cause significant disturbance to these valuable woodlands.
694	9	The public footpath/bridleway entering the area from Monford Road and stretching to Owday plantation is bordered by beautiful tree and hedgerows, which are importar The bridleway and footpaths are used daily by many walkers, both from the estate and also by visiting recreational users.
694	10	Development on this would result in a loss of amenity for local residents and would be detrimental to the entire area. In addition, increased traffic levels on the estate work increasing noise levels, pollution and danger to pedestrians and cyclists.
694	11	C) Loss of agricultural land. Agricultural land provides employment. Site 35 is productive agricultural land. It is currently being farmed, producing crops including wheat and
694	12	D) Access to shopping facilities our local shops which are sites off the estate are already busy with traffic and virtually gridlocked at busy times, which is a measure of their including the proposed new Asda and Tesco supermarkets, are sites closer to the town centre, and are impractical for access on foot from site 35. This will lead to increase
694	13	E) Access to healthcare provision. Access to healthcare provision is limited, with doctors and dentists being sites on the other side of town. Access on foot from site 35 is ir to doctors and dentists when required are currently at full capacity. with the increased population of Worksop you cannot see a doctor under 3 weeks unless it is an emergence of the second
694	14	F) Provision of utilities and services. Development on site 35 will require significant investment in infrastructure to meet the demands of the new housing development, as to the remote location of the site. Improvements would be needed to upgrade level of service provision due to increased demand.
695	1	Yes
695	2	may offer the opportunity to provide funding for the restoration of Green Farm, which contains a significant listed building on the 'at risk' register and in a considerable st use of historic buildings on the site which are currently underused/redundant.
695	3	However, any new development should be limited to a small number and confined to the existing hard surfaced area to the north.
695	4	Any housing should also be of a scale and design appropriate to the setting of historic buildings at Green Farm (and wider area) and use appropriate materials.
695	5	Site 221 (east of Doncaster Road, Langold) should provide an opportunity for industrial/commercial enterprise, either within the site or off-site in the vicinity.
695	6	The site could also provide an opportunity to utilise the former railway line as a community facility, perhaps linked under the road bridge to Langold Country Park.
695	7	A small part of site 520 (at its southern end) could be suitable provided the improvements to adjacent listed buildings are included and delivered.
695	8	Site 197 would also appear to be suitable as the site is hidden from view from the A60 and a large hedge divides the site from the field to the east. Accessibility may howe
695	9	Sites 174 and 176 are not suitable as development would cause significant harm to the character of Costhorpe, having open views eastwards, including towards Hodsock P
695	10	Agree with sites identified.
695	11	Option A: Spread between Worksop; Retford and Harworth Bircotes?
695	12	Should be concentrated within urban centres of Worksop, Retford and Harworth, close to local facilities and services.
695	13	This depends on the nature of the individual site, the nature of land ownership and the relationship between occupiers and land owners. Some sites are more suitable to le services and facilities is high and site ownership is stable). Other sites are suitable only for transit (where few services are provided on site/nearby). Some sites may be suit services are of a good standard and where the constant moving of vehicles would not impact on highway safety and local amenity.
695	14	I do not know of any sites in Carlton or Langold which would be suitable. Provision should be concentrated in the 3 main urban centres and close to main access routes.

714	3	Traffic generation, access, road safety and parking provision. Even if roads in the area were widened etc. as the S.H.L.A.A. (Strategic Housing Land Availability Assessment vehicles (500?) would create significant road safety and congestion issues particularly entering London Road. So many more noisy and polluting vehicles would also advers
714	4	Inadequate infrastructure to support the development. Everyone we speak to in Retford cannot understand the need for so many new homes when properties stand emp new employment opportunities. There has already been extensive house building in Retford in recent years. The local primary school is at capacity, enlarging it would det already awful parking problem at 'drop off times.
714	1 5 1	Flood risk. Due to its location (at the bottom of hills and sloping terrain) the area can be subject to flooding. Building on these greenfield sites would exacerbate the proble absorption of the fields in question
714	6	Loss of trees and hedgerows. The hedgerows surrounding the fields in question are home to many species of birds, which are a significant source of pleasure to local resid
714		Loss of ecological habitats or landscapes. The pleasant open green nature of the sites in question would be lost if developed. Currently many local residents enjoy walking 370. Losing these fields would be to the detriment of the 'liveability' of the area, having the opposite effect of 'improving attractiveness to local residents' and 'promoting Bassetlaw Due. planning policy
714	8	Design, appearance, layout, density and mass of building. The number of housing units suggested for these sites (particularly 511 having 158 units) seems far too dense to
714	9	Impact on listed buildings and / or Conservation Areas. The sites would impact on the local Conservation area
714	10	farmers fields which would be lost to valuable and productive agriculture, in a country where space is limited
714	11	Impact on public visual amenity. Developing these sites would have a significant detrimental impact on the visual amenity of the area. In the S.H.L.A.A. your assessment w see e.g. site 370) that 'the site is within the wider residential area'. In fact the sites are not 'within' a residential area but are the start of completely open countryside! To a agreeable area in harmony with its surroundings into one surrounded by densely packed dwellings significantly affecting the quality of the lived environment
715	1	Trusting you will take these concerns into consideration when deciding on sites for future housing development in Retford
715		The western section of site 3, adjoining London Road could be classified as infill
715	1 3 1	The area west of London Road, east of Whitehouse's Road, adjacent to the railway line should not be excluded from development as it is already has a brick building with road. It has potential for development for agricultural or residential use
716	1	As residents of Palmer Road, we object in the strongest possible terms to the council plans to develop land (ref: 533, 7, 46 & 309) on the grounds of: a) no consultation wi proposal
716		the development will completely alter the character of the area
716	3	loss of habitat for wildlife, birds of prey, deer foxes, rabbits, pheasant, partridge and many other small birds. Presently a neighbour who is ringing secretary of North Nott's garden adjacent to plot 7. The swallow travelled 11,000 miles to umzumbe barn swallow roost site is South Africa, where it is recorded as being recaptured
716	4	Loss of trees, willow which is harvested and many other trees which surround the site.
716	5	Loss of good agricultural land
716	6	This is a quite residential area the development will completely alter the character of the area and destroy the peaceful area where we all enjoy living
716	7	There will be a huge increase of traffic. Tiln Lane is an already busy road, lorries have to use this road to avoid the low bridge at Welham. Tiln Lane would be turned into an massively creasing the traffic
716	8	Traffic would also increase to dangerously high levels along Palmer Road, into Cornwall Road onto Bigsby Road or Park Lane and Longholme Road to Welham Road to avoi
716	9	The junction from Tiln Road onto Moorgate is already extremely hazardous. This development would cause huge traffic increase with traffic queuing from Moorgate t get
716	10	The danger to road users and pedestrians would be immense
716	11	The already stretched services, fire, police, hospitals, GP services would not be able to cope. The funding needed to increase these services would be massive
716	12	The proposed area involves building outside the development envelope. The proposal involves building outside the borough boundary.
716	13	All brownfield sites should be developed for housing, before developing the edge of town and beyond the borough boundary
717	1	I wish to object to the future development proposals that are being considered for the area surrounding Bracken Lane. As a resident living in the area for forty five years, I problems that this development would bring.
717	2	There has been a succession of problems in the area due to the heavy clay nature and layout of the land all caused by flooding from Grove Hills and the decline of the road area.

722	9	Inadequate infrastructure to support the development that would result in increased traffic generation by potential new residents having to travel to necessary/essential
723	1	I am opposed to any development on the land between Gateford and Carlton-in-Lindrick. This agricultural land has two rights of way across it which are well used and enjo
723	2	The land should remain as a green open space.
724	1	Location/Site 35 is seriously NOT suitable. The local schools and roads are already at capacity so this site would push the local facilities too far!
724	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
725	1	Yes
725	2	Sites 79, 80, 86, 91,92,93, 201, 202, 498, 499, 564
725	3	We do not believe Site 87 should be a mixed site at all.
725	4	There are transport issues coming from grove wood road and fox covert with low bridges. We are already having problems with lorries hitting these.
725	5	We do not consider it suitable to have industrial units next to the school area which is protected open space and we already have an underused industrial estate on Stocky
725	6	We are unhappy with allocation at site 481 when this is total open space and not in our opinion suitable for housing.
725	7	We do not consider sites 89 and 88 are suitable for housing. They are very close to the canal and are poor sighted in respect of exiting the village.
725	8	Option A: Spread between Worksop; Retford and Harworth Bircotes?
725	9	Existing sites as if there are already sites available which could be expanded this causes less concern than establishing new areas.
725	10	Separately if possible as we would have thought this was more considerate to those who are resident.
726	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
726	2	yes lagree
726	3	site 428 is the best site
726	4	yes the play area and school should be protected
726	5	existing sites
727	1	The screening methodology criteria appear satisfactory. The suggested allocation of housing and employment growth goes beyond that which the PC feels is needed within the area. Worksop (incl. Shireoaks and Rhodesia) shou
727	2	other rural service centres. This has been reflected in the questionnaires completed by residents in 2011.
727	3	The PC would prefer to see smaller infill sites utilised rather than very large developments (use of indicated sites with 40 or less allocated housing would yield around 245) particular area and their infrastructure including traffic problems. This also reflects the views of 90% of residents who indicated that brownfield sites should be developed like to see up to 50 urban extensions of up to 50 houses. Para 4.1 in the BDC I&O SA doc has already identified known infrastructure problems, including congestion alor school capacity, clearly therefore considerable work would be needed to increase traffic capacity on sites which rely on the single carriageway sections of this road.
727	4	Sites 218 and 151 are within Shireoaks and residents have indicated their reluctance to permit further development due to concerns regarding infrastructure, traffic issues surgery facilities.
727	5	However, it is felt that these two sites have an existing small settlement and therefore the impact would be minimal, although it is essential that Coach Wood, southwest of the whole site must be preserved. In view of this, the design, density and housing mix ought to be carefully considered to ensure it conforms with Policy DM5 with referen
727	6	Site 9 would be a much larger development but would increase an existing area and it is felt that further housing would mean that additional facilities such as surgeries, so of the estate.
727	7	Site 35 - This is an extension of an existing estate and it would give further possibility for an increase in services. The agricultural land is not grade 1 and drainage should be
		Site 561 - The exit road from this site would mean that access to Shireoaks Road would be close to the level crossing. The possibility of extending the car park opposite this
727	8	when it was proposed a couple of years ago. The entrance to the proposed development site could not be widened to accommodate vehicles due to the proximity of the i other. it is therefore not felt to be practical for future housing.
727	9	Sites 45 and 371 would have an unacceptable impact on traffic generation, loss of trees and hedgerows and would have an adverse effect on the infrastructure of the villa
727	10	Residents of new houses in this area would be affected by traffic noise from the A57. It would contravene Policy DM4 with regard to scale being inappropriate to the exist

728	1	1.1. CgMs has been instructed by Wild goose Construction to prepare representations to promote the allocation of the site known as land north of Station Road, Beckin previously submitted such representations to the Bassetlaw Strategic Housing Land Availability Assessment (SHLAA). Having now considered the planning authority's Site welcome the inclusion of the site (ref: 106) as a potential housing site and now submit the following report to the planning authority for its consideration in the sut Allocations Preferred Options document. 1.2. Wild goose Construction has selected the site because of its sustainability credentials and the attractive character and app envisages a high quality, well-connected and well-balanced residential development, which will contribute positively to the settlement's established character, and make centre of the village. Such a development in this location will constitute a highly sustainable solution towards meeting the adopted Core Strategy's objectives. 1.3. Wild controver operating throughout a wide geographical area centring on Yorkshire and the East and West Midlands, with a reputation for quality and client satisfactio approach and a focus on attention to detail. These attributes have enabled Wild goose Construction to maintain a reputation for unrivalled customer service and quality. clients illustrates its success. 1.5. The company's development and house building arm, Wild goose Homes, undertakes speculative developments throughout the region Chesterfield. The company do not utilise standard house types and all units are of a bespoke design tailored to suit the individual merits of a site. The company have bee achievements in both the design and delivery of residential and commercial developments. The company is committed to the environmental aspects of new buildings, new developments meet at least Code Level 3 by incorporating various features to assist in energy efficiency such as improved insulation and photovoltaic panels. Regulations requirements. 1.6. Wild goose Con
728	2	3.1. We recognise that Policy CS8 of the adopted Core Strategy establishes that the 20 identified Rural Service Centres (including Beckingham) could share <i>up to</i> 10% of the to 2028. This equates to 770 dwellings over the plan period, but allowing for current planning commitments and readily deliverable sites, the residual requirement is 328 d intention is that if less than 10% of the housing requirement is ultimately met in the Rural Service Centres, then the residual requirement to meet the District's total needs settlements of Worksop, Retford or Harworth-Bircotes. 3.3. While we accept that the above flexible approach is supported by recently adopted policy embodied in the Cor Allocations process should so far as is possible seek to meet the targets for the proportional split of residential development set out in Table 4.1 of the adopted Core Strate split will not ensure a sustainable settlement hierarchy. The need to maintain the sustainability of rural settlements, by the appropriate allocation of development in such 1 important and is in accordance with national policy contained with PPS3: Housing (paragraph 28). 3.4. In accordance with PPS3, the identification of locations for developmer constraints and risk associated with broad locations and specific sites; accessibility to existing community facilities. Such an objective approach should apply to development thus, the level of development in each of the Rural Service Centres, and the choice of specific sites, should depend on a range of criteria relating to sustainability and suital settlement to take further development, we consider that in addition to the availability of local services, particular consideration should also be given to relative proximity which provide more major services. The subject site at Station Road, Beckingham is less than 6km from the nearest town Gainsborough, which can be accessed by regular that while the planning authority proposes a logical and objective approach to screening potential sites in the preparation of the subse
728		3.7. It is understood that a resident's survey way undertaken in each Rural Service Centre which asked for views on the level of housing development that should be provid objective way of measuring actual demand or need. In the case of Beckingham, out of 486 questionnaires, only 90 responses were received – giving a response rate of 18.5 response cannot be considered as statistically significant. Furthermore, the most common response was "no new housing". If this was regarded as the most significant fact should be no new housing in Beckingham, despite the fact that it is a highly sustainable location for new residential development. 3.8. Although the planning authority has residential development considered appropriate by survey respondents was 6.5 houses, we do not consider that such a figure should be regarded as being of significance f statistical average derived from the responses received. It is not grounded in material planning considerations relating to the sustainability of the settlement as a whole, or based on a representative sample of residents' views.
728	4	3.9. We also note that the survey-driven approach to the apportionment of development is also problematic in that when the survey results for the 20 Rural Service C shortfall of 3% relative to the identified Core Strategy target for residential development in the Rural Service Centres. The suggestion that this requirement may be redis stated in the Site Allocations Issues and Options document, may not only result in environmental degradation in the affected larger settlements (Worksop, Retford contribute to the social and economic decline of the affected Rural Service Centres.

kingham for residential development. We have te Allocations Issues and Options document we subsequent preparation of the subsequent Site ppearance of the existing village. 728	5	3.10. It should also be noted that the draft National Planning Policy Framework advocates that local authorities should allocate at least a further 20% over the strategic the supply of housing, local planning authorities should: identify and maintain a rolling supply of specific deliverable sites sufficient to provide five years worth of hou supply should include an additional allowance of at least 20 per cent to ensure choice and competition in the market for land." (para 109).
728	6	3.11. We would suggest that the determination of how much development may be appropriate must be based on material planning considerations and should be stro suitable sites. While the overriding aim should be to achieve10% of all residential development in the 20 Rural Service Centres as a whole, we consider that some in sustainability credentials (like Beckingham), and highly suitable sites (as proposed) may take more than an equal share of the residual requirement i.e. more than one- dwellings (16.4 dwellings).
728	7	3.12. While the proposed "Stage Two" site assessment criteria appropriately include the question of compatibility with neighbouring land uses, and impact on built ch sound spatial planning, they should be broadened also to refer explicitly to relationship to settlement form and urban design considerations. In that respect, we consider capacity of individual settlements, due regard should be had for well contained sites which sit within or immediately adjacent to the existing settlement envelopes, and improve the existing built form of the settlement. Such is the case with the subject site, north of Station Road, Beckingham.
728	8	4.1. As a larger village of over 1,200 residents Beckingham itself is a highly sustainable location for development. It includes a village shop and post office, a primary scho social club. The town of Gainsborough, Lincolnshire is accessible within approximately 15 minutes by bus, and between mornings and evenings on weekdays the Gainsborough trains to the cities of Lincoln and Sheffield may be accessed. It should also be noted that If required, the towns of Doncaster, Worksop and Retford may also Although access to local services is of significant importance in reducing the potential need to travel, Government guidance emphasises the importance of accessibility sustainability. No individual village can be entirely self-sustaining, as most residents will need to travel to higher order centres to access certain essential services and for should therefore be a key factor in determining the growth potential of individual settlements. 4.6. We consider that the availability of a range of local services in F together with the village's close proximity to the town of Gainsborough (less than 6km), and the availability of good public transport connections to a range of higher orde that the 7 dwellings suggested in Table 10.2 of the Site Allocations Issues and Options Consultation Document.
728	9	5.1. It is considered that the subject site, which currently lies outside the Beckingham settlement envelope, but immediately adjacent to established built up areas, constitute the form of the existing settlement. It is readily accessible from the existing highway at Station Road, and would complete the street frontage between the main body of the development to the east, so consolidating the form of this part of the settlement.
728	10	5.2. We have previously made representations concerning the site referred to as no. 106 for SHLAA purposes. It measures approximately 3.4ha in total. At around 30 dwel approximately 10% of the site as open space, it has the potential to be developed for up to 90 dwellings. However, we recognise that such a level of development is likely demand.
728	11	5.3. For the purposes of the current site-allocations exercise, we therefore propose that only the southern-most portion of the above area should be allocated for in the re of the total site available and a relatively low building density - which would facilitate a development of good high quality layout and good urban design principles, to inclu- further dwellings behind. Our objective would be to agree an appropriate mix of forms and sizes of dwelling with the planning authority, so providing for a range of housin area concerned and demonstrates its strong relationship with existing residential plots to the east and west.
728	12	5.4. The intention would also be to include a road layout with potential to provide access to the remainder of the potentially available land to the north, so that if required also be readily brought forward for residential development. 5.5. The proposed development also has the potential to facilitate a footpath and cycle linkage through the si track way to the north, so providing a sustainable, safe and convenient means of access for the existing residents of Station Road to the services and facilities located in th School and the village shop and post office are located approximately 500m from the site. 5.6. The development of the site and associated highways connections have the isolated ribbon development on Station Road (east of the site) with the main body of the village and the services it contains. Convenient and safe pedestrian and cycle link life for existing residents and the sustainability of this outlying part of the existing community. 5.7. The site is well contained within clearly defined physical boundaries - th of the site being bounded by mature hedgerows, and the west abutting the existing residential area.
728	13	5.8. There are no landscape character related designations on or adjacent to the site. Therefore, the site's development would avoid any adverse impacts on the surround preferable to some other potential sites in Beckingham which would protrude awkwardly from the existing built up area or be poorly integrated with the main bod hedgerows to the northern, southern and eastern boundaries in particular would reduce the landscape impact of any development, and it should be noted that the easter screen due to the existence of a number of trees.

728	14	5.9. The subject site is not located within or adjacent to a Conservation Area. While it is understood that the planning authority is contemplating a possible Conservation with Michael Tagg (Conservation Officer), has shown that there are currently no identified heritage assets (designated or non-designated) on or immediately adjacent to t
728	15	5.10. The site lies outside any designated flood zone. However, it is recognised that policy DM12 of the emerging Core Strategy would require submission of a surface wat we would be happy to comply with this requirement. We understand that a Sustainable Urban Drainage system will be required.
728		5.11. It is understood that there is an underground oil pipeline which runs within the site alongside its eastern boundary. However, it is considered that this is not a particu incorporated within areas of garden land or public open space within the proposed development.
728	17	6.1. The planning authority's SHLAA shows a number of theoretically possible development sites located in an around Beckingham. We consider that on the basis of area a at least 10 new dwellings. However, the authority has already discounted a number of such sites as undevelopable, and we consider that none of the remaining sites offer potential of the subject site north of Station Road. 6.2. The following table provides a summary of our key observations on the alternative sites which include reference, we have already been identified by the planning authority. (The site reference numbers are those used by the planning authority for SHLAA purposes. Those highlighted in recauthority).
728	18	101, 562, 563: Sites isolated from main body of village by dual carriageway. Related access constraints and reduced potential for social cohesion. No safe or convenient pe
728	19	107: Site close to busy roads and roundabout – poor residential amenity (noise and pollution). Questions of market appeal.
728	20	102: Relatively detached from core of Beckingham village. In visible setting of Listed Buildings. Visibly prominent so greater landscape impact.
728	21	105, 203: Not logical to redevelop 105 in isolation from adjacent 203 (improved access required). Both sites include historic buildings (requiring demolition) and identified
		archaeological potential.
728		555: Access constraints – large site but could only be served by track between existing dwellings fronting Low Street
728		556: Constrained access on Vicarage Lane. Relatively distant from village centre.
728 728	24 25	451: On northern edge of village. Relatively distant from village centre. Visibly prominent so greater landscape impact. 104: In visible setting of Listed buildings. Relatively distant from village centre.
728	25	497: Access constraints on Church Street (unadopted). Heritage assets nearby.
728	20	103: HER entry – earthworks – archaeological significance. Peripheral to main body of village and protrudes into open countryside – greater landscape impact.
728	27	496: Detached from existing built up area unless developed in conjunction with 103. Adjacent to A631 – road noise – greater landscape impact.
728	29	6.3. In comparison to the above sites it can be seen that the subject site is more centrally located that most. It can be readily made accessible from the existing highways r significant impacts on built heritage or the wider landscape. Furthermore, it has the potential to offer a residential development with high standards of amenity and an op need arise. It has no significant constraints.
728	30	7.1. It is acknowledged that planning permission was granted on appeal for the development of a public house on the subject site (decision 28 March 2011). To date, the p existence of this permission as a constraint to the site's residential development, due to the community's expressed desire for a pub in the village (as referred to in the Be However, enquiries with pub operators have to date proved fruitless and the owner and interested developer (Wild goose Construction) now wish to promote housing de report. 7.2. We do not consider that the existence of planning permission for a public house should prevent the alternative development of the site for residential purpose expressed desire for a pub, the site owner would like to suggest that subject to relevant planning permission, an alternative and more commercially viable site could be m shows such a site, also in his ownership, where it is intended that we will shortly submit a planning application for the development of a public house. 7.3. We consider the potential development of a local public house include its situation between the main body of the village and Beckingham Sports and Social Club, but not immediately adja direct conflicts of amenity.
729	1	I am contacting you with the strongest opposition to the proposed build of 700 dwellings Gateford. I have lived on the estate 13 years, the wild life and size of the estate c services/conveniences(school places, lack of recreational activity centres ,the list goes on) to cover the amount of families/dwellings from the beginning ,have loved it's cc gangs, litter being a minus, green space wildlife variety, walks a plus)
729	2	This will ruin it in my opinion the amount of traffic at the proposed entrance will cause even bigger queues at rush hour than now, it is already very congested. I apologise plans in the strongest manner
729	3	This development will encroach on the dividing land between Worksop and Carlton in Lindrick and Wallingwells. This will only further contribute to the 'urban sprawl' and further.

730		Option A: Spread between Worksop; Retford and Harworth Bircotes?
730	13	REMOVED
731	1	I think location 35 is unsuitable
731	2	Option B: Focused in just one of the above towns?
732	1	I think location 35 is unsuitable
732	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
733	1 1	No, and I believe that the proposal for 1500 new homes to be built will put significant strain on the current Worksop infrastructure - it will increase traffic and school issue needs to be significantly reduced.
733	2	I believe location 35 is unsuitable for the 700 new houses proposed
733	3	There are already significant traffic issues getting on and off the estate, with this number of houses planned this can only get worse
733	4	There would be more strain on schools and services in the area
733	5	loss of some beautiful countryside and farmland used by many walkers
733	6	Are you sure in the current climate that there is a need/market in this area for the number of houses you are proposing to build
733	7	Option A: Spread between Worksop; Retford and Harworth Bircotes?
733	8	I believe they should be concentrated in and around existing sites as the infra structure is already in place to support them.
733	9	In particular I wish to strongly object to the development of any additional houses at site 35 for the following reasons. A) A great loss of amenity. It would have a detrimer visual and physical enjoyment of this rich landscape, which is a mixture of ancient hedgerows, copses and woodland. The rich mosaic of habitants for animal and birds wor something no open space or park could replace – and a very much valued asset, there would be a loss of open walkways and bridleways which many people enjoy – both is a mixture of ancient hedgerows.
733	10 1	B) Urban sprawl and extension of the town boundary. Current housing already extends to the existing Worksop town boundary. Development of site 35 will extend beyon and Carlton in Lindrick. Additional housing will lead to too much density in an area that has sufficient housing.
733	11	C) A loss of nature conservation. The effect on Owday and Whipman Woods and Owday Plantation, which is a Site of Importance for Nature Conservation would be catast
733	12	D) There is an opportunity cost for our children's education. There will be less chance to learn the importance of the natural by having pertinent exposure to this environn them understand that beyond the urban sprawl there are farms, wild animals and birds to observe and understand. Here, they have it on their doorstep and are exposed t environnent and they can see the land farmed and the crops grow. This areas must be preserved for our community.
733	13 1	E) Safety Issues. There will be increased danger from traffic. The number of cars would increase dramatically. At present residents and visitors use this land and take their they are safe.
733	14 1	F) More congestion and pollution. At present our local shops are busy and are utilised well by the local community. More housing will most certainly lead to local congesti large supermarkets from this site on foot and this would then lead to increased traffic to and from the town. There will also be extra noise and pollution from the increase
733	15	G) Loss of agriculture and employment. Currently this land is agricultural and productive and it supports the employment of land workers.
733	16 1	H) Infrastructure and Services. Increased density of housing and population will put a strain on local infrastructure and resources, for example doctors, dentists and other sewerage will have to be provided and significantly upgraded again leading to destruction of the environment.
734	1 1 1 1	The old nucleus of Walkeringham is round the church in the area on the map labelled 'Church End'. Walkeringham has no conservation area at present, but in my opinion, possible one, before further features and buildings are lost. It might include provided points a)-m).
735	1	The Highways Agency (HA) welcomes the opportunity to comment upon the Bassetlaw Site Allocations and Policies Issues and Options document. It is the role of the HA t the Strategic Road Network (SRN), as set out in DfT Circular 02/2007: Planning and the Strategic Road Network. Development in Bassetlaw (including housing and other us network, either on an individual or cumulative basis. In this respect, the Highways Agency's specific interest relates to the SRN in the area, comprising the A1 running thro see development proposals that are consistent with sustainable principles and are supported by appropriate and evidence-based transport policies which will help to mini adverse impacts on the highway network, particularly the SRN, and seek to encourage sustainable travel wherever possible.
735	2	The sites included in the Issues and Options document are those which have been promoted by developers, local landowners and Parish Councils, among others, as having a number of the proposed sites have already been screened out as a result of the assessment used for the SHLAA, and that only sites that are within or next to a settleme (Settlement Hierarchy) have been considered as having potential for development. The Agency has previously expressed broad support for the Authority's approach in the the main settlements within the District, such as Worksop, Retford and Harworth Bircotes. Concentrating residential development (along with retail, employment and oth main urban areas should provide the most sustainable locations for such growth as they are more accessible by a choice of modes of travel.

735	3	Of the criteria proposed for use in the document, it is only the ninth, and final, criterion upon which the Agency would wish to comment. This relates to the identification of individual sites, and states that 'while the Council's work with infrastructure providers to date has not identified any significant strategic infrastructure problems, the de achievable if a number of locally specific infrastructure improvements are delivered before or alongside the development of the site'. The Agency welcomes the inclusion identify the infrastructure necessary to support growth in Bassetlaw, as well as seeking its delivery through development. Planning conditions and s106 Agreements are like mechanism through which to secure such infrastructure, which may also include the provision of comprehensive package of sustainable transport measures, such as new infrastructure or facilities.
735	4	It is considered that further criterion could be added which identify the potential level of impact which individual sites may have upon the SRN and also the opportunities would then support policy DM13 of the Core Strategy which seeks to ensure that opportunities are taken to reduce dependency on the private car and direct new develop accessibility by other means. The findings of these assessments should further assist the Authority in identifying the most suitable sites to be carried forward for consultat strengthen the summary of key observations/concerns which is intended to be provided in relation to each site.
735	5	The Agency acknowledges the statement that the Council has, for some time, been working closely with infrastructure providers, such as Nottinghamshire County Council invaluable in helping to identify potential issues or shortfalls in infrastructure across the District, which may be exacerbated as a result of forthcoming development. The A Infrastructure Levy (CIL) currently being prepared by the Authority, and is keen to maintain a close level of involvement as the CIL charging schedule is developed.
735	6	The Agency welcomes the opportunity to comment upon the Issues and Options consultation of the Site Allocations DPD. This is an important stage in the identification of Bassetlaw, and the Agency is keen to remain involved as the site allocation process is progressed. At this stage, it is difficult for the Agency to comment upon specific sites the potential impacts of development sites, both individual and cumulative, upon the SRN in the area. As discussed earlier, the HA's specific interest relates to the A1 whic developments in particular have the potential to impact upon the highway network, including the SRN, and it is therefore important that suitable policies are in place to m generated by new development and identify any mitigation and/or infrastructure requirements. The Agency is fully supportive of the intention to further assess identified criteria, including whether there are any constraints to delivery. It is, however, considered that this process could be further strengthened through the inclusion of criteria and the potential for sustainable travel. This additional detail would enable the Agency to determine whether or not specific sites or groups of sites would affect the operatias a strategic traffic model, known as DIAMOND, which can provide a broad indication of the potential SRN traffic impacts of proposed development. Should the assessm
736	1	I having read proposed development plan and the SHLAA I am in broad agreement with most of the plan, conclusions and ideas about development. The charm of Retford relative compactness of the town centre and the ease with which open countryside can be reached in almost any direction. These are key qualities which should be very h
736	2	As I explained in my recent conversation with Jo Davies I was rather surprised and somewhat disappointed to find my house and garden included in the "Yellow zone" wit matter, I still wish that I had been informed in advance but accept the logic of being included.
736	3	Any redevelopment of the former factory site on Blackstope Lane will impact upon this property buy frankly given the problems of an empty building as a magnet for thiev development is better than the current situation. Light industrial use would seem ideal if there is demand, but surely the Randall Way developments provide plenty of this
736	4	I am going to be radical and suggest a community woodland. This would require demolition of the factory but would link the area with the other land (site 560) on Blacksto developing. This idea could even be continued across Blackstope Lane and onto the old Dairy site (44). I will even kick off the idea by offering to give the first 100 trees to t work for I have planted a large private wood in Cornwall and an arboretum at Worksop College).
737	1	First I would like to point out the council's lack of effort in trying to inform residents of what was happening, it is the residents that p[ay the councils wages. Of those that s was happening until we knocked on their door. Most people are appalled with the LDF process and think that the council are underhandedly trying to sneak this in through substantiate this, I believe the process started in 2009 but, the document I refer to below was published by the Council on your website for comment by the public by 18 th single comment should have alerted the council to the fact that no one had any knowledge of it. You organised a series of public meetings, but failed to fully inform the put the 3 rd December. Additionally, from information provided by those who did attend, you originally were going to hold the meeting at the base of the town hall stairs. This many people. Secondly, when someone complained about the lack of advertisement of the meeting you got a member of the public to stick a white board outside the but meeting. However, this was only 10 minutes before it began. Overall if you had infirmed the people in Retford properly dozens more residents would have been there to v
737	2	As per our petition, our main objections are: 1) we want to keep our greenbelts and protect our wildlife: deer, fox, grass snake and barn owls have all been regularly sites i you should have done a full independent conservation study for protected wildlife and plants. Personally I have seen ass the above wildlife but like you I have not checked Newts, Badgers etc.

745	5	Improve existing sites before considering building new ones.
745	6	No
745		Yes
745	8	None
745	9	An increase in allotments provided especially with the long waiting lists. The council should be encouraging people to live a healthier life style rather than trying to squee already support the existing houses.
745		Option A: Spread between Worksop; Retford and Harworth Bircotes?
745		Yes but they should also be consulted on the process
745	12	Either
745		None aware
746	15	Yes, housing is important, but not at the expense of green belt land. We have plenty of brown field sites that would be amply sufficient in Worksop or indeed Bassetlaw
746	2	I think that area 35 is totally unsuitable. Gateford
746	3	Harworth
		I feel that this site or indeed any green belt site should not be built on at all, we have precious little land left in England and we need to keep this space open and not built
746	4	areas and views and don't need further housing here
746		There is, like in any town brown field sites to use.
746	6	The fact of building another 700 homes on the estate will really not add any value to the area only a detrimental one
746		The estate road on ashes park avenue into gatefold road is already a problem for traffic and congestion. There is the issue of further homes having an impact upon the cor
746	8	the schools can't cope now with the numbers of children, let alone with any more additional ones.
746		Wildlife is also rife in the area with birds, voles, birds of prey that they would have an impact on.
		This needs to stay as green belt land. Tesco have been in discussions for ages about relocating, this would then relieve another possible site that could be used for housing
746	10	seafield or versuvius site instead of putting yet more supermarkets in the town, if we indeed do need to have more houses, these would be prime sites.
746		Option A: Spread between Worksop; Retford and Harworth Bircotes?
746	12	REMOVED
746		I wish to object strongly to the development of any additional houses at site 35 for the following reasons: A) Extension of town boundary and urban sprawl. The current Ga town boundary. Development on site 35 will, therefore extend beyond the boundary and there is a concern that Worksop will eventually consume Wallingwells and contin Lindrick.
746	14	B) Loss of amenity for children, residents and visitors. The proposed site is bordered by Owday Wood/Rough Piece and Owday Plantation, which are sites of importance for present untouched by housing. Development on site 35 will cause significant disturbance to these valuable woodlands.
746	15	The public footpath/bridleway entering the area from Monford Road and stretching to Owday plantation is bordered by beautiful tree and hedgerows, which are importar The bridleway and footpaths are used daily by many walkers, both from the estate and also by visiting recreational users.
746	16	Development on this would result in a loss of amenity for local residents and would be detrimental to the entire area. In addition, increased traffic levels on the estate wo increasing noise levels, pollution and danger to pedestrians and cyclists.
746		C) Loss of agricultural land. Agricultural land provides employment. Site 35 is productive agricultural land. It is currently being farmed, producing crops including wheat and
746	18	D) Access to shopping facilities our local shops which are sites off the estate are already busy with traffic and virtually gridlocked at busy times, which is a measure of the including the proposed new Asda and Tesco supermarkets, are sites closer to the town centre, and are impractical for access on foot from site 35. This will lead to increase
746	19 1	E) Access to healthcare provision. Access to healthcare provision is limited, with doctors and dentists being sites on the other side of town. Access on foot from site 35 is in to doctors and dentists when required are currently at full capacity. with the increased population of Worksop you cannot see a doctor under 3 weeks unless it is an emery
746	20	F) Provision of utilities and services. Development on site 35 will require significant investment in infrastructure to meet the demands of the new housing development, as to the remote location of the site. Improvements would be needed to upgrade level of service provision due to increased demand.
747	1	I think location 35 is UNSUITABLE
747	2	Yes
747	3	I believe the local infrastructure to location 35 in particular, cannot accommodate extra housing
747	4	I also feel that there is already a huge problem with traffic to and from the estate via Gateford Road as it is, without adding another 700 properties

		I would strenuously object to the development of location 35. Why? 1) Schooling for a start. We live less then 2/3 mile from Gateford School but ended up 18th on the list
757		There are 4 children in the immediate vicinity of the same age and all 4 go to different schools due to this issue. The school she currently attends has 31 children in the class
		not going to alleviate this issue.
757	2	2) The traffic exiting Ashes Park Avenue to Gateford Road at 8:30 is very heavy, exacerbated by issue 1) no doubt, with queues back to the Scampton\Alexander island not
		help, not only the traffic and the danger this poses to pedestrians but the additional pollution created by the extra vehicles.
757	3	3) Local amenities are already scarce, with most situated in town and the re-location of Tesco will make travel into town, which is only practical by car, even more necessa
757	4	4) Less agricultural land. This country is already woefully inadequate at supplying it's own needs, removing more agricultural land not only loses jobs, but the skills necessa
757	5 1	5) Where do the kids go to learn about nature? We can easily walk to Owday on a sunny weekend, without having to resort to using the car, surely that's an admiral sentin we're not reliant on cars to do everything. Remove the land, and what's the next option? Clumber Park? Resort to the car again, with all it's necessary issues.
757	6	6) How will building more houses bring in more business and money to Worksop? Enticing more business into the town centre, etc., might. Some extra housing may in the
/5/	6	growth in the community not additional drain on already stretched resources.
757	7	Option A
758	1	Please have links attached that allow you to navigate without loosing everything you have commented on
758	2	Hasn't taken in to consideration the poor bus service to Sheffield and Meadowhall Poor internet speed which will be slower with additional housing No facilities for young development
758	3	Lack of good quality shops other than M&S in town centre
758		Poor issues and fluctuating electricity at times to Gateford estates Has sewage and water supplies also been considered
758		Poor issues and fluctuating electricity at times to Gateford estates
758		Has sewage and water supplies also been considered
758	7	Poor quality single carriageway links to A1 /M1 Sheffield A57, Blyth routes where many residents work and adding additional cars to already busy roads
758	8	A town needs to grow and develop but it is being sensitive about this There are areas of brown site land e.g. glass works which could be developed to great sites which Bas

/30	19	correct
758	20	Option A: Spread between Worksop; Retford and Harworth Bircotes?
758	21	REMOVED
		I wish to object strongly to the development of any additional houses at site 35 for the following reasons: A) Extension of town boundary and urban sprawl. The current Ga
758		town boundary. Development on site 35 will, therefore extend beyond the boundary and there is a concern that Worksop will eventually consume Wallingwells and contin
		Lindrick.
758	23	B) Loss of amenity for children, residents and visitors. The proposed site is bordered by Owday Wood/Rough Piece and Owday Plantation, which are sites of importance for
		present untouched by housing. Development on site 35 will cause significant disturbance to these valuable woodlands.
758	24	The public footpath/bridleway entering the area from Monford Road and stretching to Owday plantation is bordered by beautiful tree and hedgerows, which are importar The bridleway and footpaths are used daily by many walkers, both from the estate and also by visiting recreational users.
		Development on this would result in a loss of amenity for local residents and would be detrimental to the entire area. In addition, increased traffic levels on the estate would be detrimental to the entire area.
758	25	increasing noise levels, pollution and danger to pedestrians and cyclists.
758		C) Loss of agricultural land. Agricultural land provides employment. Site 35 is productive agricultural land. It is currently being farmed, producing crops including wheat and
750		
758		D) Access to shopping facilities our local shops which are sites off the estate are already busy with traffic and virtually gridlocked at busy times, which is a measure of their
		including the proposed new Asda and Tesco supermarkets, are sites closer to the town centre, and are impractical for access on foot from site 35. This will lead to increase
758	28	E) Access to healthcare provision. Access to healthcare provision is limited, with doctors and dentists being sites on the other side of town. Access on foot from site 35 is in
		to doctors and dentists when required are currently at full capacity. with the increased population of Worksop you cannot see a doctor under 3 weeks unless it is an emerged
750	20	F) Provision of utilities and services. Development on site 35 will require significant investment in infrastructure to meet the demands of the new housing development, as
758	29	to the remote location of the site. Improvements would be needed to upgrade level of service provision due to increased demand.
		I oppose the development of location 35 at Gateford, Worksop. The access to Ashes Park Avenue from Gateford Road is totally unsatisfactory already. There have been a
759		recent years and access and exit from the estate at busy times is a nightmare. Any further development on the Gateford estate would only makes this junction even more
		further housing growth
759	2	My second concern is around access to GP's and dentists. Doctors appointments at Larwood surgery are an on going problem and I now have to travel to Langold for acce
		population by a significant numbers only stretches these resources even further
759	3	Option A: Spread between Worksop; Retford and Harworth Bircotes?
760	1	I believe the developments on sites 35, 26, W6 should not go ahead because of the following: the sites are in areas with woodland and hedgerows would be lost which wil
760	2	
760	2	In addition the public footpaths are well used by the public for walks and taking dog walking.
760	3	I believe the developments on sites 35,26 and 28 & W6 should not go ahead because of the following: the sites are on areas with woodland and hedgerows would be lost wildlife. In addition the public footpaths are well used by the public for walks and taking dog walking
		The developments on sites W35 26 and 28 & W6 will cause considerable increases on Gateford road, which will increase the already existing problems of traffic backing up
760	4	ones
760	5	The proposed additional developments in Shireoaks will increase further traffic on the A57 and Gateford road roundabout, which will cause more traffic to back on Gatefo
760	6	Noise from the existing industrial estate on Claylands is already is an issue at times, what business will be allowed on site W6. plus lorries going into the state will have an i
700	_	Flooding has been a problem the existing Gateford estate, with sites 26 and 28 & W6 will appropriate levels of drainage to be put in place to ensure that these sites and th
760	7	road) be protected against flooding, because with the loss of farm land, any run off water will have to go somewhere
		I believe the developments on sites 25.26 and 28.8. W6 are in the wrong place. These developments should take place on areas to the parth west of sites identified as 10
760	8	I believe the developments on sites 35,26 and 28 & W6 are in the wrong place. These developments should take place on areas to the north west of sites identified as 19 traffic being added to Gateford road and Gateford road roundabout/A57, because of private and businesses vehicles which need to travel to Sheffield and beyond
		traine being added to Gaterord road and Gaterord road roundabout/AS7, because of private and businesses venicles which need to travel to sherheld and beyond
760		In addition many existing industrial estates in Worksop and Shireoaks have vacant premises already, surely having more industrial units is not going to help this situation.
761	1	Location 35 Gateford North is unsuitable. The existing infrastructure does not exist and will not cope with added burden of additional home construction
761	2	The existing junction from Ashes Park Avenue onto Gateford Road is already over capacity and therefore dangerous due to the volume of traffic, the layout of the junction

761	3	Option A: Spread between Worksop; Retford and Harworth Bircotes
762	1	I agree with the criteria but it does not appear to have been applied very rigorously in terms of section 2.6 when choosing some of the sites.
762	2	Development for employment on brownfield site would be acceptable
762	3	I strongly object to the proposal for site reference 35 as the majority of the factors listed in section 2.6 would be adversely affected. Development of this area would cert
762	4	Open spaces should be protected from any unnecessary development.
762	5	Option A: Spread between Worksop; Retford and Harworth Bircotes?
762	6	In and around existing sites
762	7	Together
763	1	Basically sound
763	2	In view of the time taken to fill the Celtic Point development I would not have thought that the town can take another large development particularly in the north of the to
763	3	3 and site 4
763	4	4
763	5	All of the open spaces should be protected (and if possible expanded) - they are very important for the well-being of communities.
763	6	I am totally opposed to site 35 being developed. This is prime agricultural land that has been used to grow wheat, potatoes, carrots and oilseed rape (among others). Its lo hedgerows and close proximity of the buildings to the existing woodland would have a seriously negative impact on the natural environment
763	7	This development would double the number of houses in the Gateford development and overload the already busy road network - trying getting off Ashes Park Avenue in would in no way solve this problem. The amenities in the area are at best minimal and would be totally inadequate to cater for additional housing
763	8	This development is both outside the borders of Gateford and also at the limits of the broadband connection - the distance from the exchange resulting in relatively poor of that needs consideration wherever housing is built.
763	9	Option A: Spread between Worksop; Retford and Harworth Bircotes?
764	1	I don't feel competent to comment on this.
764	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
764	3	10 houses seems reasonable.
764	4	My preference would be to see the plot Ref no. 256 used for housing.

764	8	Rhubarb Farm wishes to stress the need to keep Site 251 in use as agricultural land farmed by Rhubarb Farm, because of its social, environmental and employment value is stakeholders like local authority and various services. The local ex-offenders that we will employ will be working on this piece of land, as will the apprentices, and they will Community Supported Agriculture Scheme. This piece of land will therefore be of great value socially, agriculturally and environmentally. We will be bringing it back into long time, creating employment, creating interest in fresh organic produce, creating a diversity of crops and wildlife and bringing health to all those who come to work/vo 200 volunteers will come to Rhubarb Farm to work in 2012. We shall be running Farm Days, involving CSA members on the land and generally making a rich and diverse e people of Nether Langwith, Langwith and Whaley Thorns, and those living beside Site 251 have endorsed and encouraged our work in various ways. One neighbour sits or come to our events, some have given all the apples from their trees two years running for our apple-juicing and soup events, others come to our meetings, or take an inte www.rhubarbfarm.co.uk It would be a tragedy for Rhubarb Farm to lose the use of the land Ref. No 251, as we are just at the start of our enterprise, and have many plans more people, the environment and the economic climate of the area. We have reached the second stage of a bid to the Big Lottery (only 20% of applicants nationally reac Buddying Project to support more people with mental ill health.
765		Yes
765		Option A: Spread between Worksop; Retford and Harworth Bircotes?
765	3	Yes for at least 5 new homes
765		410 would be my preferred site, but 412 is an alternative.
765 765	5 6	I agree that the open spaces should be protected Yes, this site is currently laying vacant and already causing concern among residents. I agree that some housing maybe a benefit to redeveloping the site.
765	7	Existing sites
765	8	Together
766	1	take out green field sites from your list - plenty of potential with brown sites
766	2	No new houses, there are plenty of unused houses and new builds not being sold due to the fact that there are no buyers for them.
766	3	none
766	4	none
766	5	no - leave housing and industry separate
766	6	Grove Hills sends millions of gallons of rainwater down towards sites 3,311,570 - significant millions of pounds of investment would be needed to the drainage systems to
766	7	The fields and ditches have been home to some wildlife which need protecting - such sightings as small snakes and the humble field mouse have been noted by locals.
766	8	Grove Coach Road at this point is allocated a restricted byway.
		Sites 3,311,570 are flood plains and are not suitable for development. This has been confirmed by NRA National Rivers Authority and Anglian Water. The areas houses alro
766	9	houses there means more houses will flood. Previous attempts to put houses on these fields have failed due to these issues. Are the council going to invest millions to sor
		this money from as there are many other bigger issues to spend this money on.
766	10	Option B: Focused in just one of the above towns?
766 766	11 12	absolutely no way
766		together none
767	13	yes
767	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
767	3	yes
767	-	yes it would, as i don't agree with any development on this site.
767		we need more senior citizens bungalow's in (No Suggestions), at least 30, as people are living longer.
767	6	off yew tree road, explained at meeting, as been postponed now, due to traffic problems, drainage, etc.
767	7	yes, in existing ones
767	8	near pepperly rise, back of headland, but the incinerator at crookford could jeopardise that if they get the go ahead.
768	1	Option A
769	1	Yes
769	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
769	3	I am happy for a maximum of 8 houses to be built in Gringley over the next 15 years

e to the local community and wider vill be growing organic vegetables for the co agriculture use after it has lain fallow for a volunteer on the land. We anticipate at least e environment. Responde		Answer
nt	nt	
		However, I would not want to see too many grouped together on one site, as this does not sit well with the existing form of the village. A housing estate type developme
769	4	is what is happening on the former detention centre site. However, this is on one side of the village so has less impact. Since only 8 houses are planned over 15 years, the
		sites, rather than all put on one or perhaps 2 sites.
769	5	Site 135: This is a sloping site and a good open space at present. Given very sympathetic design of the buildings, I would be happy to see up to 3 homes on this site.
769	6	Access from Low Street is difficult - the road is very narrow, with no hope of widening, and no footpath.
769	7	The site is also higher than the North side of Low Street, where a number of bungalows are located, and there would need to be a height restriction on building to avoid the structure of the str
705	,	properties. Good design will be the key to ensuring any development blends in with the surroundings.
769	8	Site 134: This site needs sympathetic renovation, and could probably be modified to create 2 homes. I would not wish the existing buildings to be demolished - rather use
769	9	Sites: 23/2, 23/3 and 23/4. No development should ever be permitted on these valuable open spaces.
		The key to all development in the village is to ensure that good architects are used who can work with the local style of buildings. When done well, new houses can blend
769	10	for example. However, when done badly, (and I won't name names) - the effect is disastrous!
769	11	Sites: 23/2, 23/3 and 23/4. No development should ever be permitted on these valuable open spaces.
769	12	Around existing sites - because that will probably cause less difficulty than trying to establish a "green field" site.
769	13	Together, I would have thought
769	14	No
770	1	Do not agree with the screening methodology
770	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
770	3	An agreement to a maximum of 4 houses however I see no reason for building any new houses due to the amount of land development in Retford and surrounding areas a
770	4	281 or 282
770	5	The residents I have spoken to are fully opposed to any further development around this peaceful village
770	6	Yes the sites identified should be protected from development for the purpose of building development
770	7	There is already a site designated at Daneshill. There is no need for a further site being developed
770	8	No
771	1	I am happy with the list of constraints contained in Para 2.6. If they are listed in priority order I don of agree with that but I am happy that all these factors should be constraints
		been affected by flooding I believe that flood risk should be a key consideration given the misery that flooding causes.
771	2	Retford does need employment growth. In the 25 years that I have lived here the manufacturing and mining base has shrunk and we have had insufficient increase in ne
		in Worksop and Newark but nothing of note in Retford. Our proximity to the newly upgraded A1 should make us an ideal base for future expansion.
771		As for more housing, at the moment the current developments cannot sell their existing provision so in the short term there seems little point in allocating new housing la
771	4	However I do acknowledge that this is as long term planning document therefore if we can attract more employment into the area then we may well need more housing.
		As mentioned previously my house has been affected by flooding on 2 separate occasions. I am well aware that mine is not the only Ouse so affected and that some were
771	5	having your ground floor flooded to a depth of 4 inches leaves a significant financial and emotional burden. The entire eastern flank of Retford, in the lee of Grove Hill, live
,/1		some of my neighbours do still get frightened when there is heavy rain. The belt of agricultural land between Grove Hill and the current housing provides the 'sponge' and
		that land would result in more water being used (by households) and less greed land to act as the sponge.
771	6	There are parts of Retford, to the north and west which are not subject to flood risk and these would seem far more sensible places to build.
774	_	I am too aware that Retford has a difficult transport infrastructure with 2 railway lines, a river and a canal all contributing to road traffic management considerations. Wit
771	7	changes some of the sites would result in considerable congestion increases at already over crowded crossroads and junctions.
771	8	So, my opinion is that sites 1, 37, 40, 41,51 and R7 52, 364 and 512 are the best sites both in terms of minima flood risk and least disruption to transport infrastructure.
771	9	Sites 3, 370, 511, 488 and 489 are totally unsuitable for housing because they constitute a significant and on going flood risk, there is no easy expansion of the transport ir
//1	9	not cope with the increased capacity, it is usable and used agricultural land.
771	10	Overall I would like to see employment opportunities restricted to current areas rather than developing new areas. There town centre should be reserved for retail and c
	10	'eyesores' which need attention e.g. that big derelict building on Grove Street. The Randall Way area has scope for some further expansion.
771	11	The proposals outlined in paras 5.10 and 5.11 do have some industrial potential as well as housing potential but as mixed sites it might require some restrictions on the ty

nent is inappropriate, although I accept that this hese should be split over a number of possible

771	12	Retford is blessed with a number of open spaces, not all well utilised at the moment. I world like to see these further developed as open spaces at some point in the future because they are not being used. Also the feeling of town in the country needs to be preserved. The open spaces we have help to bring the countryside right into the hea
771	13	Not a simple answer, some do need redeveloping, Oakland's for instance, site 1/21 and 1/23 is a valuable sporting site. somewhat run down at the moment but it does hav people.
771	14	Kings Park and the Cemetery need to be maintained.
771	15	Other open spaces should be left largely to nature.
771	16	Some, parts of 1/22 don't seem to serve much purpose at all and could be developed for housing. (I know that there is a football pitch at the bottom and that should be p
771	17	Option A: Spread between Worksop; Retford and Harworth Bircotes?
771	18	I have no expertise on this but I world have thought that it makes sense to maintain and develop existing sites since I assume that they were located where they are as a process.
771	19	Don't know. I suggest that you consult the traveller community but see my answer to question 121
772	1	Yes, but must ensure the character of the town is maintained and that brown field sites are used before any expansion into green field sites. Any expansion into green fiel development that these are adjacent to first.
772	2	for plot 7, i want to make the following points. 1. The road systems that feed Bigsby Road that currently grants access to plot 7 is fed by narrow roads that are parked on b alternative. As such, it is very difficult to pass and creates a danger to both the drivers and footpath users at this moment in time. the inclusion of 700+ houses on plot 7 w
772	3	2. There will be a loss of open space and public footpaths that are used by high numbers of the public.
772	4	3. Loss of wildlife habitat
772	5	1. I would not want to see plot 7 developed for the reasons stated in Q13
772	6	Option A: Spread between Worksop; Retford and Harworth Bircotes?
772	7	Around existing sites only
772	8	Together for better provision of facilities and for a clear understanding of where this is.
773	1	Yes
773	2	Employment growth is essential in order to ensure that there are enough people who can afford to buy new houses. I am not aware of any real efforts to encourage signif
		area. The figures provided demonstrate how little employment development has taken place in 2012/11.
773	3	Current housing development sites seem to be on hold or there are houses that cannot be sold so it is hard to predict how much new housing should be allocated.
		The sites to the east of the town are subject to flooding. Where I live there have been two very bad incidents of flooding in the early 1990s and more recently about 5 year
773	4	behind my house and onto the fields that are now identified as possible housing sites (511/370/3). These fields act as a flood plain and if built upon the rain would not be
770		drainage work is undertaken.
773		Also there is very limited access by road and the local primary school is full.
773 773	6 7	The road on which Bracken Lane School is sited is very narrow and there is already a lot of congestion and the associated problems with parking and road safety.
773	8	I feel that the sites to the north and west are more suitable, particularly out along North Road i.e. 512, 37, 7, 46 and 309 to the north and 364, 41, 40, 52 and 1 to the west the site to the north seems most appropriate due to transport links (51 and R7)
113	0	I would like to comment on the way in which this consultation has been done. It has not been adequately publicised. We have not been individually notified of the propo
773	9	possibly to make it less likely that there will be much response and more likely that these proposals can go ahead unchallenged.
773	10	yes
773	10	yes, I would like more facilities for recreation and sport, young people need constructive forms of entertainment such as improved athletics facilities at Oakland's playing i
773	12	Option A: Spread between Worksop; Retford and Harworth Bircotes?
773	13	Yes- It makes sense to develop existing sites on the assumption that their current locations were properly researched and consultation was made with the travelling comm
773	14	together to make the best use of facilities
774	1	In principle, yes.
774	2	It is very important that the character of the village is taken into account.
774		New houses, unless they are specifically allocated for the elderly, should have a reasonable sized garden for a rural property and must have off-street parking for at least t

774		The existing planned developments will stretch the services significantly - school places, sewage and traffic in particular. There is logic in providing some additional shelter
774	6	the bus route - the High Street frontage of the plot marked 142 would be very appropriate for this.
774	7	Other than this, in the next 16 years there will be opportunities to develop backland and infill between existing properties to provide all 11 houses.
774	8	All planning consents should be required to comply with the Village Design Statement prepared about 15 years ago and apparently overlooked by planning permissions sin
774	9	Site 142, High Street frontage only, for sheltered and possibly 'first time' buyer housing.
774	10	Site 143 is a corner of land too small for serious agricultural use; although close to the A57 it would be reasonable to allow one or perhaps two houses on the site with acce
774	11	Site 145 Should be set up in such a way as to provide alternative access to the planned development on the Chicken Factory (site 196).
774		Sites 108 and 146 might be appropriate for development if necessary but in both cases it should be single road frontage development.
774		Site 110. Development here on the footprint of the existing former farm and industrial buildings would be appropriate. The extension along Tuxford Road would not.
774	14	Sites 111, 112 and 150 should be ruled out completely - they are very close to the main road and the east Coast Main line railway and are on the edge of the village, with p
		require opening the two tracks onto the A57 which be hazardous for the traffic on that road.
774		School.
774		Sewage.
		Traffic.
		Parking.
774		Broadband.
774	20	Lack of shop/post office.
774	21	All the open spaces defined on the map should be protected. It is vital that ample open space within the village is preserved so that it does not take on the character of an
774	22	No. The Markham Moor site is clearly significantly under-utilised; there is no point therefore in contemplating additional sites in the area.
774	23	Together - because I cannot see any reason for separating them.
774	24	No
775	1	I think location 35 is not suitable for the planned development of 700 houses. I believe this development will have negative impact on the area for several reasons:
775	2	1, Using a greenfield location is ludicrous when there are so many brownfield sites available.
775	3	2, The woods surrounding the proposed development are a precious and well used amenity for the existing population, building on them and restricting access to them wo
775	4	3, At peak times traffic levels on roads around Ashes Park Avenue are very high, gridlock would occur if the development did not have additional access to Gateford Road.
775	5	4, Local amenities are still woeful, this development would put even more strain on them.
775	6	5, Houses have had flooding issues in this area, replacing farmland with concrete in this vast area will undoubtedly make the situation worse.
775	7	All in all there are other sites available which would have less of a negative impact on existing residents.
775	8	Nabs Ashes wood together with adjoining wooded areas are an extremely important and well used refuge for both wildlife and people who want to escape from the urban Areas such as these should be fiercely defended, the development of location 35 would both destroy part of the woods and greatly restrict access to the other wooded are
775	9	Option A: Spread between Worksop; Retford and Harworth Bircotes?
776	1	yes to a certain degree although the loss of view would be very disappointing
776	2	I do believe that some additional housing would benefit the town but I would like to see projections of how this additional building of homes will proportionately increase
776	3	I would question how can building additional homes, decrease the towns unemployment? Most building workers are skilled and semi killed tradesmen. Training is currently government cuts. What measures will be put in place to ensure that extra housing will mean more jobs? There has been little development for the past 11 years due to int housing has also been poorly managed, with loss of government funding due to Bassetlaw council being unable to maintain key performance indicators over the last few you managed more efficiently by the local council judging by the councils past record? I would like to remind council that the building of a cinema has been on and off for a lon council you cannot agree.
776	4	The site reference number 35 is unsuitable in my opinion. My reasons are:
776	5	1.disruption to the neighbourhood with additional site traffic and noise levels increase.
776	6	2.Loss of access to walkers, and conservationists to nearby fields and woods.

776	8	4.Pollution will increase with extra traffic putting added pressure on highway maintenance.
776	9	5.Danger to school children from road traffic .
776	10	Yes open spaces should be protected for all the above reasons I have listed in question 3.
776	11	No
776	12	Option A: Spread between Worksop; Retford and Harworth Bircotes?
776	13	Existing sites should be developed. The travellers have already developed their communities in the current sites. Children and young people will have established friends a
//0	15	created a comfort zone.
776	14	Not sure
776	15	No
777	1	No, I believe all issues should be considered as different issues may be relevant to different people. And these plans will impact everyone in Worksop.
777	2	No, Worksop's population is already testing existing infrastructure.
777	3	I think location 35 is unsuitable.
777	4	No.
777	5	Option A: Spread between Worksop; Retford and Harworth Bircotes?
777	6	REMOVED
777	7	REMOVED
777	8	REMOVED
777	9	In response to the above document I would like to record my opposition to any building on site number 35. This land must be protected as an important amenity for the e
777	10	In particular I wish to strongly object to the development of any additional houses at site 35 for the following reasons. A) A great loss of amenity. It would have a detrimer visual and physical enjoyment of this rich landscape, which is a mixture of ancient hedgerows, copses and woodland. The rich mosaic of habitants for animal and birds wor something no open space or park could replace – and a very much valued asset, there would be a loss of open walkways and bridleways which many people enjoy – both is a mixture of ancient hedgerows.
777	11 1	B) Urban sprawl and extension of the town boundary. Current housing already extends to the existing Worksop town boundary. Development of site 35 will extend beyon and Carlton in Lindrick. Additional housing will lead to too much density in an area that has sufficient housing.
777	12	C) A loss of nature conservation. The effect on Owday and Whipman Woods and Owday Plantation, which is a Site of Importance for Nature Conservation would be catast
777	13	D) There is an opportunity cost for our children's education. There will be less chance to learn the importance of the natural by having pertinent exposure to this environn them understand that beyond the urban sprawl there are farms, wild animals and birds to observe and understand. Here, they have it on their doorstep and are exposed t environment and they can see the land farmed and the crops grow. This areas must be preserved for our community.
777	14	E) Safety Issues. There will be increased danger from traffic. The number of cars would increase dramatically. At present residents and visitors use this land and take their they are safe.
777	1 15 1	F) More congestion and pollution. At present our local shops are busy and are utilised well by the local community. More housing will most certainly lead to local congesti large supermarkets from this site on foot and this would then lead to increased traffic to and from the town. There will also be extra noise and pollution from the increase
777	16	G) Loss of agriculture and employment. Currently this land is agricultural and productive and it supports the employment of land workers.
		H) Infrastructure and Services. Increased density of housing and population will put a strain on local infrastructure and resources, for example doctors, dentists and other
777	1/	sewerage will have to be provided and significantly upgraded again leading to destruction of the environment.
777	18	I) Insufficient employment opportunities. Worksop does not provide enough employment opportunities for local people at current population levels, 700 additional home to further unemployment within the local area.
777	19	J) Increase of teenage groups and crime. This is due to the lack of out of school activities made available for the several thousands of teenage Worksop residents. An addit current situation of teenage groups congregating on street corners and outside local shops even worse, this will cause distress to vulnerable and elderly residents.
778	1	My husband and I wish to register our objections to the proposed housing developments between Gateford and Carlton in Lindrick
778		Our reasons for this are as follows;- (1) the loss of green fields, woodlands, & farmland, with the subsequent blurring of the boundaries between Worksop and Carlton in L
778		(2) the impact on traffic levels on surrounding roads into Worksop that are already pretty heavy in rush hour as it is, which will bring

e a decline in various wildlife. There are

s and family in their existing sites and will have

e enrichment of present and future generations.

778		(3) extra pollution and noise from the increased traffic,
	_	(4) the apparent unwillingness of the council to consider using brownfield sites instead, e.g. the ex Coats-Vyella site on High Hoe road, and the recently emptied plot along
778	5	Eastgate, if the current landowners are being intransigent then CPO's should be considered on brownfield sites,
778	6	(5) the lack of employment in the surrounding area to support thousands of extra households,
778	7	(6) can the existing school and health services really cope with thousands of extra households?
779	1	I wish to register my concerns for the proposed developments around Tiln Lane and Bigsby Road areas in Retford. Mainly the road networks in Retford are not designed to five minutes to travel to my parents home (to care for them) now it can take upwards of fifteen minutes +., as all traffic has to go through the bottom of Moorgate. All bac lorries have to come through this area as there is no routes around the town, also school traffic has only one route. Surely any further development plans have to incorpor different areas of Retford.
780	1	We noticed with great concern the plans for the proposed building of more houses on Bracken Lane and Grove Coach Road in Retford. While we appreciate the need for n proposed are good ones. Some additional problems would take place if it is given the go ahead.
780		The land suggested soaks up most of the run off water from the farm hills beyond it. Areas nearby have already suffered flooding after prolonged heavy rain. We all kno recent years must be taken into account now. Add to this the runoff from new roofs, driveways and new roads from the 600 dwellings proposed. The drains at the mon obviously be more flooded dwellings, also present homes losing value as insurance premiums would rise considerably. Who wants to buy a house in a flood threatened are
780		Another problem would be the additional traffic - at least 600 more vehicles - in an already difficult area to access the London Road . During peak times and school run tim parked cars on our Avenue, Rose Avenue and Bracken Lane. The roads are not wide and are also bus routes. Imagine what it would be like with 600 more vehicles. At th need to turn left on London Road, then u turn at the Whitehouse's small roundabout to get into the flow of traffic. Any more vehicles would be a problem, never mind 600
780	4	We would like to suggest the areas proposed be more useful to the environment and the community if developed into a wetland and maintained properly. The area coul soakaway, and also no additional harassment would be caused to the present occupants of this area.
781	1	I am very strongly opposed to housing or any other development on the Kilton Forest golf course and this land should definitely remain green open space.
781	2	My neighbours have also stated that they too are strongly opposing such housing developments on the Kilton Forest golf course and this land should definitely remain gree
781	3	All our neighbourhood and myself purchased our properties because of being next to the green open space.
782	1	I am writing to express my concern at the proposed housing developments in this area of the town. If agreed the character of this part of the town will be changed for the area.
782	2	This is already a very busy area with excess traffic using Tiln Lane en route to Gainsborough to avoid the low bridge at Welham.
782	3	Carr Hill School situated in Tiln Lane has also to be considered as extra housing comes with extra traffic on the roads.
782	4	The Council must already be concerned with this as we have just had new traffic signs installed to try and slow vehicles down as they access the road near the school.
782	5	Another consideration is the infrastructure of the existing roads as already Moorgate is a death-trap at busy times of the day and the amount of new houses proposed would be a set of the day and the amount of new houses proposed would be a set of the day and the amount of new houses proposed would be a set of the day and the amount of new houses proposed would be a set of the day and the amount of new houses proposed would be a set of the day and the amount of new houses proposed would be a set of the day and the amount of new houses proposed would be a set of the day and the amount of new houses proposed would be a set of the day and the amount of new houses proposed would be a set of the day and the amount of new houses proposed would be a set of the day and the day and the amount of new houses proposed would be a set of the day and the day and the amount of new houses proposed would be a set of the day and the day
		extra traffic would have to use this route to access the town and surrounding areas.
782	6	I do feel brownfield sites should be used before agricultural land is developed as we already have the empty school sites with prime building land standing idle and a poor s
		has to be put to good use before developing good agricultural land which benefits the wildlife too. I do hope the Council will very carefully consider its decision and what really is best for the town of Retford and not let money have an impact on the decision. Let us make
782	7	sites which have been set aside for housing and keep Retford the lovely market town that it is.
783	1	I am writing to express my concern at the proposed housing developments in this area of the town.
783	2	This is a very busy area of the town and existing highway infrastructure will not be able to cope with the extra traffic this large amount of housing would inevitably bring to with excess traffic using Tiln Lane en route to Gainsborough to avoid the low bridge at Welham.
783	3	The safety of the children must come first and we must avoid extra traffic on this road at all costs. It is already a bottleneck at school times and multiple dangers are evider
783	4	The character of this part of the town would be changes with this proposed housing development.
783	5	There are plenty of sites already earmarked for building and these brownfield sites should be used first before agreeing to planning on existing agricultural land.
783	6	The environment should be considered and the effects on wildlife.
783	7	Drainage has been a major problem for residents off Tiln Lane, especially since the development of Shetlands - you may remember the flooding of the property on Tiln Lan
705	,	happened if the field had not been built on. These factors have to be considered as the more land we lose has an impact on existing properties.
783	8	The old school sites which are now lying derelict should be used before any other plans are agreed. They are an eyesore to the environment and residents living nearby. The
		effort to keep Retford looking pristine and fetching to the eye for residents and forthcoming property owners.
783	9	Let us have the market town to be proud of and keep Retford tidy and give care and consideration to all factors before new plans are hastily agreed with repercussions and

Responde	-	Answer
nt	nt	
784	1	it has been brought to my attention that there are to be discussions proposing the development of houses north of Badgers Chase, Durham Grove etc and wish to bring
784	2	The roads in that area would not hold the increased volume of traffic. Further traffic on Tiln Lane would cause danger to road users and pedestrians alike, especially schoo That area becomes very busy twice a day at school entry and exit times. There are no main roads off Moorgate or Welham Road suitable for carrying more traffic.
784	3	The proposal would take good agricultural land outside the borough boundary, also good wildlife areas with those of substantial trees and hedgerows. There must be othe within the existing development area which does not interfere with well established farm and wildlife friendly land.
784	4	There has been no consultation with residents.
784	5	This area has long been a place for residents of Retford to enjoy some peace and healthy exercise in their busy and stressful lives and it would be a dreadful mistake to dep
784	6	Living in the area I am of course opposed to the plan but apart from that I do think it is a bad idea for various reasons and hopefully you'll agree with me.
785	1	I know there is a national shortage of affordable housing but here in Retford and surrounding areas there are whole estates standing empty with no prospective occupiers their house and they will let you know what low demand there is. Since Retford has lost most of its industry and commerce there is nothing to encourage outsiders to com
785	2	How is the present infrastructure going to cope?
785	3	Tiln Lane/Smeath Lane are dangerous and totally unsuitable for any more traffic. My own daughter was knocked down by a large vehicle using Tiln Lane as a shortcut.
785		The number of HGVs using this road is increasing all the time.
785	5	Valuable agricultural land is being used while there are still many brownfield sites on the map and within existing boundaries.
785	6	Since we are talking about a substantial development, the need for a Welham/Clarborough bypass becomes even more pressing. By their past inaction NCC have encourage of this area.
786	1	I am writing to express my concern at the proposed housing developments in this area of the town. If agreed the character of this part of the town will be changed for the area.
786	2	This is already a very busy area with excess traffic using Tiln Lane en route to Gainsborough to avoid the low bridge at Welham.
786	3	Carr Hill School situated in Tiln Lane has also to be considered as extra housing comes with extra traffic on the roads.
786	4	The Council must already be concerned with this as we have just had new traffic signs installed to try and slow vehicles down as they access the road near the school.
786	5 5	Another consideration is the infrastructure of the existing roads as already Moorgate is a death-trap at busy times of the day and the amount of new houses proposed wo

788		Before entering into this monumental decision by you, the Council, perhaps you should have considered the impact on lives of present residents, the use of all the brownf development first. There have been numerous school sites as yet not developed and to this end these brownfield sites should be used before any greenbelt land extension
		are also the factory sites that need consideration for building, however there are still a considerable number of homes that have been built recently and remain unoccupie
788	8	Concerning the proposals for the development of Carr Hill School and its site, there is surely enough space to build a new school on the same site that the present school or
		We will be objecting strongly to any of the outline proposals to develop greenbelt land, especially around this area. We are astounded that yet again the Council do not lis
788	9	consider their feelings.
788	10	We question who will buy these houses in these austere times as the houses built in the last 5 years have not sold due to the recession. How do you expect people to buy
/00	10	entice growth of population due to no employers in the area?
789	1	Mortgages have been harder to obtain so who will be buying these houses?
789	2	Some companies are not able to sell existing properties that have just been built
789	3	Where are all the extra properties going to be drained to?
789		Loss of trees and hedges is interfering with wildlife
789	5	We were always prevented from bringing HGVs down smaller side roads, now you are allowing it. Causing way too much damage because of the increased weight that the
		time at all we will need local roads repairing. And at what cost?
789		No consultation with residents prior to production of proposal
789	7	The development would change the character of the area
789	8	The present road infrastructure is unsuitable for further development
789		Loss of good agricultural land.
789		Additional traffic congestion and danger to pedestrians and road users on Tiln Lane and surrounding roads
789	11	The proposed areas involve building outside the existing development envelope/the borough boundary.
789		There is still room to build on the old school sites
789		Also, there are the two old Elizabethan sites that could be built on, therefore tidying up these derelict sites.
789	14	All brownfield sites should be redeveloped first, before developing the edge of the town beyond the boundary.
790	1	The drainage in the Blackstope Lane area is very out-dated, its thin pipes being inadequate for the existing houses. I often come in to my bathroom to experience an unple permeates the whole bungalow. A friend of mine has, from time to time, used his own rods to clear drains between three properties.
		permeates the whole bungalow. A mend of mine has, from time to time, used his own rods to clear drains between three properties.
790	2	Secondly, it was due to the fact that the land was so waterlogged in 2007 that floods rushed up from Grove Lane and Blackstope Lane. I was flooded out for 10 months. I a
750		leant heavily on the authorities to do everything possible to alleviate such a happening in the future. It could only be alleviation because we could not rule out a further or
790	3	No future housing development, please, in the area in question.
791	1	I am writing to object to the proposals for development of fields to the north of Badgers Chase and to the north east of Palmer Road, either side of Tiln Lane on the north
704		Having lived on Tiln Lane for 15 years I am constantly appalled by the volume and speed of lorries using this road, especially because Carr Hill School has two entrances on
791	2	danger.
701	2	An increase in the volume of traffic will congest and worsen an already dangerous road. The infrastructure of the present road is unsuitable for such a development. I feel
791	3	past at the present time. To increase the traffic would make this much worse.
791	4	Since I have lived in Retford there has always been talk of diverting lorries from using Tiln Lane; this has not happened and I feel to increase the volume of traffic would be
,,,,	-	integrity and preserving the character of the area.
791	5	The area at the end of Bigsby Road will be a huge loss of agricultural land and again I worry as to where the site would have access.
792	1	I have had no information prior to these proposals
792		Infrastructure for the proposed development is very unsuitable.
792	3	Traffic on Tiln Lane is already very dangerous.
792		When I bought my property I was told it was on the greenbelt of Retford.
792	5	The Silver Birch Tree at the bottom of Palmer Road has a TPO
792		How can large vehicles go down Smeath Lane if another 900 homes are being built in the area.
792		Where are people going to work? With the demise of engineering and manufacturing jobs in the area everyone cannot work in a charity shop.
793	1	I am writing to offer my opinion in regard to the LDF consultation. I am particularly concerned about proposals for plot no. 35 which is immediately behind my home.

793	nt	
	2	The proposal to build 700 houses on agricultural land is in conflict with national and local planning policy, as there is more than sufficient brownfield land available in the D
755		considered as a priority before agricultural land.
793		The development would overlook my property and lead to loss of privacy, loss of view of open, rural elements, considerably devaluing my property.
793		traffic would significantly increase, threatening road safety and parking would become an issue, for at times the area is already very congested.
793		There would be a loss of historic trees and hedgerows, loss of habitat and damage to landscape.
793		There would be inadequate infrastructure to support the development e.g. school places and bus routes.
793		The marvellous views of much used, open, recreational space would completely change.
793	8	I am not an expert but I believe the concentration of surface water into the stream would at times pose a flood risk towards Carlton the out towards Blyth.
793	9	The project would do little to increase sustainable employment opportunities, which I understand is the Council's priority. All that would increase is the number of houses, same faculties and jobs.
793	10	There are several better sites to give adequate housing and commercial opportunity without destroying agricultural/recreational land. These are: 1) The old pits at Shireoa site on High Hoe Road; 3)The old gas works on the canal; 4) The old Dorma site at Woodend; 5) The old Maltkins at Gateford Road; 6) Drill Hall on Shaw St; 7) The landfill si
793	11	I have every confidence that common sense will prevail and that you will make every effort to utilise old industrial, spoilt land before taking away this source of joy and ins
794	1	The development would extend beyond the existing development boundary on what has always been good agricultural land and at a time when brownfield sites are availa
794	2	The number of houses proposed by the development is out of all proportion to the size of the existing developed area.
794		Such a development would cause a detrimental alteration to the character of the area.
794	4	The effect of such a large development and the associated traffic it would generation the traffic congestion from Tiln Lane onto Moorgate, which the area already suffers f the lorries which already have to use Tiln Lane and Smeath Lane.
794	5	There are already several recently constructed housing developments in Retford with unsold/unlit properties and in view of the current concerns of the viability of propose major employment sites in town have now closed and been built on, there is little opportunity for employment in the town.
794	6	The Council appears to have learned nothing from its previous endeavours to provide such sites, i.e. Torworth and Leverton Road, both of which were wrecked and reduce abandoned the sites to be cleaned up by the Council, presumably using ratepayers' funds
795	1	We agree with the majority of the criteria in principle (however, it seems the complexity of the criteria may have been worded so as to outwit the average person) as long
795	2	We believe site 9 should not be allowed to go ahead. Criterion 7 states this site would detract from the character of the area, as it is countryside which surrounds Manor Lo of great significance (not shown on your map for some reason!).
795	3	For the same reason, criterion 8 - agricultural land and open spaces in rural areas should be protected as once they are developed they are lost forever, resulting in loss of
795	4	Criterion 9 (2.40) the infrastructure is not adequate to join Mansfield Road as this is already a congested area. The cost of altering the infrastructure to support the extra h amount of housing it would provide.
795	5	We do not believe the town should be allocated more housing. This should be kept to a bare minimum, as we do not have sufficient schools, hospitals, policing, fire service however, to promotion of existing industrial areas that are already built and are currently standing empty. Surely a reduction in rates would encourage business which in the employment - manufacturing in Worksop before we have any further housing. If we have housing and no jobs this will result in more people to support on benefits, of which
795	6 1	We believe sites 4 and W9 would be the best to use as the area is large enough to accommodate everything; housing, schools, shops, care home etc. Keeping it all in one p enhancement to infrastructure etc. and cause minimum disruption to the rest of Worksop.
795	7	The areas surrounding proposed plots 9 and 30 should be protected as they provide a buffer zone which surrounds Manor Lodge, Lady Lea Nature Reserve and the bridlew used by dog walkers, horse riders, cyclists etc. and provides a much needed escape from the built up estates. These areas should be protected, promoted and cleaned up, promotes natural wildlife. if these areas are encouraged and not destroyed they could be a tourism asset - i.e. fishing and picnic areas, nature trails etc.
795	8	Development of these plots would be detrimental to wildlife and the beauty of the countryside and should be left as rural spaces.
795	9	has English Heritage been consulted over the development of plot 9? We are currently renovating Manor Lodge and have had to adhere to strict planning to be in keeping surrounding buildings - i.e. choice of material. Will the new housing on plot 9 be have to be built in the same way? If so, these will not be affordable housing.
795		Existing sites should be improved. No future sites should be developed - does not encourage economic growth.
796		Reference to the proposed building in the Bracken lane/Grove Coach Road area. It has come to my attention that planning permission is being submitted to build over six l

796	2	I am a long-term resident of Blackstope lane and am very concerned about the possible new development. All can remember in 2007 our properties were extensively dam
796	2	The Retford Beck channels all of this drainage down to the river Idle. Any more building development would mean excessive water down this system as concrete severely r
	3	the existing system would be very costly and probably generate even more drainage problems in the low-lying areas.
796	4	I cannot imagine the traffic chaos on London Road.
796	5	Therefore myself and fellow residents strongly object to any of this madness. Once you have been flooded you can never forget the nightmare.
797	1	We strongly object to any housing development on the open land allocation number 39 this is a very nice green area.
797	2	I do not support the above sites being allocated for any type of development. 1) Both the above sites are outside the original 2010 Planning Boundaries agreed by the Cour Government Inspector
797	3	Independent Government Inspector, who also in his reply stated Greenfield sites should only be considered as a last resort: Take these out of the plan and you are still left the requirement needed
797	4	2) Both above sites at present have no access. Any access would involve a major road junction or roundabout to be configured to allow the proposed new traffic
797	5	This could only be built at the bottom of the dip with Thievesdale Lane and Blyth Road and traffic coming from town at present cannot be easily seen from the present inte conducive to more traffic; it is not edged, is very dark due to trees and needs constant attention to drainage and pot holes. It is also an accident black spot area with many
797	6	3) Site 4/W9 large copse of trees in the middle and it has been established that many have Protection Orders.
		During the last month a copse and pond have been removed and filled in. Prior to this there was an active bird population with at least 12 varieties of birds regularly as we
797	7	present this has been reduced greatly and would totally disappear with the removal of the copse. This has obviously impacted on the ecology already and to reduce good c
		will make this worse and destroy the landscape.
707		4) In terms of the usage of the land to build up to 3500 houses on the two sites would add to a large housing area and produce what would be only described as an 'Urban
797	8	the population of Worksop
797	9	In my opinion would be on the wrong side of Worksop in terms of employment opportunities.
797	10	At the same time site 39/W10 is now regarded as a public amenity and any day of the week is busy with adults and children pursuing all sorts of activities from hang gliding
757	10	areas for dog walking. Also major fairs and events are frequently held as well as football facilities.
797	11	5) You will also appreciate that there is no infrastructure at present on these Greenfield sites. For sites of this size a major cost factor would be incurred. A major access wo
151		encountered locating this to ensure public safety.
797	12	At present time the water supply in the estate next to site 4/W9 has to be flushed frequently to clear the build up of sediment and chlorine.
797		At the same time the sewerage pumping station at the bottom of Thievesdale Lane is regularly pumped out by tankers because it cannot cope on its own.
797		Finally the BT unit is not adequate to supply a good quality broadband service and would need major upgrading.
		6) It would appear that the surface water, sewerage is not adequate to cope as in the past several years mud and water has flowed down the field in the site 4/W9 and floo
797	15	the subject of insurance claims. Any development of the site with hard surfaces would exacerbate this and lead to the bottom road junction being flooded. More so now the
		covered over.
797	16	7) Finally the impact on public visual amenity would be devastating. Woodland, Greenfield and amenity land would be lost under overlarge urban sprawl; this surely does n
		a whole.
797		Add to this the increase level of traffic which has to go through the town to shop and to work as well as school runs (none in the area to cope with additional children)
797		Also the need for further medical facilities
797		Criteria 4: this cannot be used until Grade Category is defined: Cannot be lumped together for convenience.
797		Criteria 3: Can only-answered G to this question therefore has no validity. All sites will get the same score
797	21	Criteria 2: To wide a question, invariably answer will be G. Needs refining, the only way 'R' would be the answer is if you plan development of say a 'Nuclear Power Station
		I would like to put my objections forward for you to consider. My main concern is the flooding in this area, we have lived here for 12 years and my house is situated next to
798		the garden is under water. We had extensive flooding in 2007, which resulted in a great deal of damage to my property. A flood protection scheme should be set up and nr
		see if this works before anything could be considered. (Please see photographs of flooding at my property over the last 12 years.)
798	2	Entering London Road from Grove Coach Road and Bracken Lane is a problem already, if the above were to happen there would be over 500 extra vehicles using these hou
		these roads have drives which cars have to reverse out of which would cause a road safety issue.
798		The Bracken Lane School is almost full to capacity and cannot be extended any further and once again during the winter the children cannot go on the playing field as it is v
798	4	The area to be considered is home to lots of wildlife and many footpaths and walkways which we would loose.
798	5	Planning for houses in this area was turned down in 1995/6 because of all the above points so why should anything be different in 2012, has the weather climate improved

801		Dog walkers and bird watchers, etc., will be compromised by the additional traffic and building on the fields. Wildlife will gradually disappear as hedgerows and trees are fe
801	6	We feel there are other areas in and around Retford which would be more suitable for building without loss of valuable countryside.
801	7	Additionally why do we need so many more new houses in Retford? The Estate Agents have many houses for sale on their books, as well as the new large development in these houses especially in a small market town like Retford.
802	1	I am sure you have had lots of letters regarding this so I won't bore you with what my objections are other than to say you need to come and stand outside Carr Hill school then imagine what it will be like with potentially another 1340 cars going either to work or ferrying children to school, factor in the articulated lorries -another accident wa
803		I write to absolutely oppose even the idea of houses being situated in this area. Never in my life would I even have envisaged someone coming up with the idea of being al over every single day. It never even crossed my mind this could possibly happen because it is pure open countryside for as far as the eye can see after the "new" Brixworth thought then this would definitely be the outskirts of Retford for Good!!!
803	2	It is ludicrous to think that one house let alone 500 can be put on this unspoilt land, which we all thought was green belt.
803	3	It houses many different types of wildlife, including foxes and also has special scientific interest, the wildlife has been untouched for many years.
803	4	The scenery in this part of the world is breath-taking, and it is a pleasure to live where we are .
803	5	You will cause more problems than enough building in this area. People will move in droves from their homes and why should they, we bought these houses for where the Then some greedy landowners come up with the idea to spoil our life's, its beyond belief, this land will then be ruined for ever just for the sake of someone now making a
803	6	The area noted, is liable to flooding. It is marshland and gets swamped even when there is only a little rain. The houses on Welham Grove are already subsiding as it is.
803	7	There are no access routes, services etc., roads, it would be chaos for the residents of this area to put up with all this upheaval of making this viable.
803	8	The congestion in Retford is unacceptable now so god only knows how it would sustain anymore houses.
803		I do not agree with the fact the Government needs to provide more housing for the future. Retford is full of new houses that have been built and have never been filled ar that just need renovating. There are plenty of houses available for people, plenty!!! Stop building for crying out loud. This country is going to rack and ruin because of over our villages and towns. Retford used to be a lovely little market town and it is because of the Council and avaricious people that it is no longer that now and we will NEVER
804	1	As bungalow residents of Park Lane we are concerned to have had no formal notification or consultation of what appear to be immense developments of proposed housin entire character if other past developments in Bassetlaw are repeated in respect of density, height of the properties and effect upon the traffic if the present school runs a
804	2	The development of the road system in respect of the Welham low bridge has languished many years so we cannot expect any other necessary improvements to cope wit
804	3	As Bungalow dwellers the loss of privacy and overlooking by three floor densely sited structures on tiny plots we would find objectionable.
804	4	It is regrettable that brown field sites are still available for development but no doubt these proposals are an easier option regardless of loss of good arable land.
804	1 5	In all we see an unconsented massive change to the character of the northern boundary of Retford being proposed without, at this stage, any practical benefit to whole of than a dormitory town.
805	1	The highways infrastructure in this area cannot sustain a significant increase in volumes of traffic, this development will bring. HGVs have to use the route down Tiln Lane 1 problem especially during school times outside Carr Hill School.
805	2	Much needed agricultural land will be lost, we should use the existing Brownfield sites in Retford first for any development
805	3	The character of this part of Retford will be changed for the worse due to this development.
805	4	The sites above are abundant with wildlife including protected species of Barn owls.
805	5	The development will bring additional safety issues for both road users and pedestrians, also there will be extra noise pollution in an area mainly populated with senior cities and pedestrians also there will be extra noise pollution in an area mainly populated with senior cities and pedestrians also there will be extra noise pollution in an area mainly populated with senior cities and pedestrians area mainly populated with senior cities and pedestrians area mainly populated with senior cities are an area mainly populated with senior cities area m
805	6	There is not enough employment in the area to cater for a significant increase in population these developments will bring.
805	7	I am not against housing developments in the Retford area but feel either the existing Brownfield sites should be used first before Greenfield sites
805		If not then mixed used sites 51, R7, 259, R2 should be used to bring both housing and much needed employment into the area.
806	1	Some of the proposed sites are good agricultural land which we can ill afford to lose. Therefore all brownfield sites should be used first.
806	2	The proposed areas are outside the borough boundary and outside the current area for development.
806		Our strongest objections are on the grounds of safety. Any additional traffic would add to the existing problems along Tiln Lane. The road is used by a lot of heavy lorries the height restrictions on the A620. Traffic already builds up at times on Tiln Lane. More traffic would increase the danger to the many pedestrians, including small children

813	19	Existing sites. New council housing corresponds to the requirement of the majority of inhabitants, addressing this requirement with new locations should take precedence have a much lesser land/geographical requirement.
813	20	Together. Same reasons as 121
814		The Strategic Housing Land Availability Assessment (SHLAA) was published in September 2011 in line with PPS3 and identifies potential housing land. Everton has been incl Rural Service Centre. Site 405 was deemed to be 'suitable' as the site offers a suitable location for development and 'achievable' as there is a reasonable prospect that hou doubt as to whether the site is 'available', the landowner has expressed an intention to ensure the land is developed should the site be deemed acceptable for housing.
814		The site is an area of 5.7 hectares (14.08 acres) and is currently used for the purpose of agriculture. It is situated on the edge of the settlement fronting the A631 with prev opposite. Although, due to the Council's density calculation, the site has been deemed suitable for 154 units, it is proposed that only part of the site be allocated and subm in line with the potential housing requirement in Everton, i.e. 13 properties. The northern area fronting the A631 (Bawtry Road) is most likely to be suitable if this was the o
814	3	An area of archaeological interest has been identified north of the proposed site, but is deemed to be located outside of the site itself on a different area of land. The deve adverse effect on the protection and conservation of this other area.
814		The plan below is provided by the Environment Agency as an indication of those areas at risk of flooding (diagram given). The area illustrated clearly shows that there is litt site. In any case, it is anticipated that if developed, it will be in the site's best interest to ensure that the run-off rate is maintained so as to attenuate surface water utilising in line with Planning Policy Statement 25 for England on Development and Flooding.
814	5	Access is deemed suitable and convenient with the main highway serving the village being situated directly adjacent to the proposed site. Any highway requirements are a allocated into the Bassetlaw Site Allocations DPD.
814	6	Everton is extremely popular with commuters to both North Nottinghamshire and South Yorkshire as well as further afield. The village is considered to be attractive and ar to enhance this. House prices in the village have proven to be less volatile when compared to other areas in the locality.
814		In line with the Core Strategy, the proposed site is considered to be only suitable for housing due to Everton being a Rural Service Centre. However, there is scope for a pot if necessary as a means to enhance the sustainability and economic development of the village. Public consultation has revealed that demand for such a provision is strong
814	8	Due to convenient location of the proposed site being a small extension on the edge of the village, this will allow minimal disruption to the settlement as a whole. Should t development of the site approach from the West, potentially there is no reason why any should enter the village at all.

814	9	Public opinion was originally mixed when gauging support for the site, however this became much more favourable and stronger when it was explained to local residents submitted for consideration, based on the housing need in Everton, only part of the site was likely to be allocated. Although our independent consultations could be consi own processes and Issues and Options Consultation Paper will be the base of any conclusions and consequential decisions going forward. Our own findings and views apper own feedback from their 'Future Development Questionnaire' that was delivered to 318 households. It would appear that 2 and 3 bedroom properties are most favourable allocated, the site would be viable to deliver both of these identified housing types i.e. 2/3 bedroom bungalows, should the Council deem this acceptable. Obviously, due titself ideal to a range of different housing should this be preferable. Similar to the Council's own investigations, it would appear that public opinion does not view farmland as only one respondent viewed this as important. The proposed site, being agricultural land, would therefore be a strong site for adoption based on this criterion. Based o agree that it would be true to say that there is some (amber) community support for the development of the site, however compared to the concerns that have been high it could be regarded that the site has strong (green) support.
814	10	The vast majority of Everton village is made up of residential dwellings. Therefore, existing public amenity is compatible with the occupation of the new proposed develop and privacy are consistent with what has already historically been established within the village. There is a farm and associated land to the immediate west, east and sout the current site be adopted as suitable for housing, meaning that the majority of the site be preserved as farmland, therefore continuing to complement the immediate su developed land has been established in the formation of various dwellings fronting the A631 together with the construction of Long Meadows. Such land use is also comp likely that the northern sector of the site be deemed suitable for adoption. Therefore, due to the northern area of the site proving compatible and consistent to the similar with the remaining land most likely to remain as open countryside similar to the rest of the neighbouring land that surrounds it, the site is deemed to be compatible (gree
814	11	As previously mentioned in 3.8 above, public consultation has revealed the preference to have a shop established within the village, as was confirmed at the public consul Saturday 19th November 2011. Currently, the nearest shopping facilities are located in Mattersey which is not conveniently located for those without transportation. The allows for the possibility of a mixed-use scheme to be developed that would not only meet housing requirements, but also establish employment and an identified local at mentioned in 3.7 above, Everton is popular with commuters. Through allowing the site to be adopted would accommodate more contributors to the wider economic development for those seeking employment locally would prove to have a detrimental effect on the future economic growth within the District. Based on a single use residentia development will continue as is current (amber), although a mixed-use scheme, identifying the need for a Village Shop and/or Post Office would lead to the delivery (green
814	12	It has been accepted by the Council that a significant amount of development between now and 2028 will be on greenfield land and it is understandable that the impact o minimised where possible. The proposed site is not deemed to be 'valuable' when considering it is of poor agricultural quality. PPS7 recommends that Natural England's A taken into account when considering development of greenfield land. In this case, the site falls into Grade 3b. Although Bassetlaw are unable to differentiate between 3a a grade 3 sites are considered equally of the same quality and therefore falls within (amber) impact on grade 3, 4 or 5 agricultural land.
814	13	It is recognized by the Council that the majority of Bassetlaw's major settlements are in a SPZ. Similarly, part of Everton is also in such a zone. The proposed site is conveni being Zone 3. Development is therefore likely to have a minimal effect on the provision of either drinking water for residents or the area's ecology. Due to the zone in wh proposed site, development will have little or no impact on groundwater and water source extraction. Due to the distance of the site from the nearest extraction point the although mitigation will be implemented to ensure any risk is lowered even further should the site be approved for development. Based on the Council's traffic light system Source Protection Zone 3 (amber). However, housing is not considered by the Environment Agency as a polluting activity and it is proposed that the prospective use of the treated more favourably.
814	14	Policy DM9 within the Core Strategy recognises the importance of protecting the District's landscape. Site 405 is within Idle Lowlands Policy Zone 04: Conserve and Reinfor recognised as requiring further reinforcement and is not seen as being of the most sensitive Character Zone where mere conservation is needed. Therefore, the proposed appropriate scheme would introduce reinforced or enhanced landscape features.
814	15	It is proposed that future development of the site will be undertaken in such a way that the design and layout will be in line with already established newly built housing we ensure that any newly constructed units do not detract from older properties elsewhere within the locality. Therefore, the future proposed development of the site will see of the settlement.

814	16	Natural England is promoting the concept of Green Infrastructure as a way to deliver a wide range of benefits for people and the natural environment together. Their poli they endeavour to ensure that Green Infrastructure is delivered via the spatial planning system, as an integral part of new development. Natural England define Green Inf delivered network of high quality green spaces and other environmental features. It should be designed and managed as a multifunctional resource capable of delivering a life benefits for local communities. Green Infrastructure includes parks, open spaces, playing fields, woodlands, allotments and private gardens. The proposed site is curre not classified as a Local Wildlife Site, nor does it include any woodland. However, the suitability of the site enables new housing to have the potential for private gardens a to support natural and ecological processes and are deemed integral to the health and quality of the sustainable community. There is further potential, when consulting w consider whether a Section 106 agreement under the Town and Country Planning Act 1990 might become relevant. This would mean there is scope for other areas of the areas or Public Open Space. Development of the site, therefore, is highly likely to enhance (green) existing Green Infrastructure within the village.
814	17	As previously mentioned in 2.3 above, the landowner has displayed a strong intention to see the site developed, hence his instruction for the formulation of this comment 'available' pending planning permission and allocation into the DPD. It is recommended to our client that should the site be successfully considered in the Preferred Optic specialist Planning Consultants and a Developer will aid in the allocation into the DPD. It is worth noting that as there is an assumption by the Council for the site to be del enough time, with the aid of Developer input, to gain planning consent for the implementation of new housing within this time frame. Any further constraints relating to h will be addressed proactively and in accordance with standard practice when considering possible Community Infrastructure Levies and Section 106 agreements (see 11.4) the site reveals within the 'Final Assessment Comments' section that 'there are no known constraints which would prevent the site from being suitable for housing develo above. Therefore, the site has no existing constraints (green).
814	18	The above comments seek to address the criteria by which the proposed site will be considered for the second formal round of consultation, the Preferred Options report in such a way as to ensure the comments above are rational and impersonal and primarily address planning policy. It is understood that the following assessment of the Is out by the Council will allow reasoned decisions to be made based on the above criteria and all comments included within this report can be made publically available. The be forwarded directly to the Planning Inspector responsible for examining the finished document.
815	1	I would oppose any such development on the following grounds, Ruining aspect views I have from the side and front of my property.
815		Devaluing the value of my property
815	3	Loss of a valuable local leisure resource
815	4	Local infrastructure unable to cope with a large increase in local population.
816	1	I have just had a visit from a concerned resident telling me about a proposed NEW development which I knew nothing about. How can this happen in this day and age with such a devastating development? I am at this time reading a letter which I will be signing and sending off. This letter mentions the WILDLIFE in this area. My wife and I more sit in our back garden in the summer months and listen to the SKYLARKS that nested in fields not to far from our front door. But alas never to be heard again. So please do spreading again. I have since heard a FOX calling for a mate and A Tawny Owl calling in the night. Please let them continue living here as that was why I moved from East L the wildlife and the countryside.
816	2	This development cannot be good for them or us as it will increase the traffic flow, whilst destroying their homes. We have had a number of CAR Crashes at the bottom of large amount of Emergency services to deal with the injured people in the cars, including children.
817	1	More employment growth.
817	2	Location 35 is unsuitable for development
817	3	All open spaces should be protected from development
817	4	more employment growth is required. not housing growth. there are not enough employers in the town to accommodate the unemployed that Worksop already has. Mo looking for work in the area that cannot provide it.
817	5	Option A: Spread between Worksop; Retford and Harworth Bircotes
817	6	sites should be kept around existing sites. Its easier to manage and police when travellers are in the same area
817	7	This development will encroach on the dividing land between Worksop and Carlton in Lindrick and Wallingwells. This will only further contribute to the 'urban sprawl' and further.
817	8	The area proposed in productive agricultural land farming wheat and oilseed rape, agricultural land provides employment which will be lost as a result of this developmen
817	9	The area proposed is bordered by Owday Wood/Rough Piece and Owday Plantation which are sites of importance for nature conservation. The woodland is at present uni will cause significant disturbance to these valuable woodlands. The area 'Gateford Hill Park' which includes Dog kennel Plantation is a mature landscaped area.

817	10	environment. This bridleway is used by many walkers daily from the estate and many visiting recreational users.
817	11	The loss of this countryside amenity would be detrimental to the entire area. This land is of the same importance to us, and the wildlife as Dog kennel Planation.
		Our 'local' shops which are sites off the estate are already busy. Additional housing will only cause increased pressure on these already busy and dangerous road junctions
817	12	The main amenities e.g. supermarkets, shops, doctors and dentist are all situated in the town especially when Tesco moves. Access to the town is only practical by car and
		Congestion in and out of town will only increase therefore as a result of this development.
817	13	The junction between Ashes Park Avenue and Gateford Road is already dangerous due to heavy traffic levels. The increase in traffic levels on the estate will generally redu
817	14	This development will require detailed consideration as to the provision of schools and nurseries as we feel our schools are already too or over capacity.
818	1	No
818	2	I think Site 35 is unsuitable due to traffic issues, local amenities not being sufficient for 700 more homes, not enough places at schools. Loss of agricultural land
818	3	Away from Gateford where traffic issue are already critical
818	4	Option A: Spread between Worksop; Retford and Harworth Bircotes?
819	1	I think location 35 is unsuitable development
819	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
		I wish to object strongly to the development of any additional houses at site 35 for the following reasons: A) Extension of town boundary and urban sprawl. The current Ga
819	3	town boundary. Development on site 35 will, therefore extend beyond the boundary and there is a concern that Worksop will eventually consume Wallingwells and contir
		Lindrick.
819	4	B) Loss of amenity for children, residents and visitors. The proposed site is bordered by Owday Wood/Rough Piece and Owday Plantation, which are sites of importance fo
015	-	present untouched by housing. Development on site 35 will cause significant disturbance to these valuable woodlands.
819	5	The public footpath/bridleway entering the area from Monford Road and stretching to Owday plantation is bordered by beautiful tree and hedgerows, which are importan
015		The bridleway and footpaths are used daily by many walkers, both from the estate and also by visiting recreational users.
819	6	Development on this would result in a loss of amenity for local residents and would be detrimental to the entire area.
819	7	C) Loss of agricultural land. Agricultural land provides employment. Site 35 is productive agricultural land. It is currently being farmed, producing crops including wheat and
		D) Access to shopping facilities our local shops which are sites off the estate are already busy with traffic and virtually gridlocked at busy times, which is a measure of their
819	8	including the proposed new Asda and Tesco supermarkets, are sites closer to the town centre, and are impractical for access on foot from site 35. This will lead to increase
	_	E) Access to healthcare provision. Access to healthcare provision is limited, with doctors and dentists being sites on the other side of town. Access on foot from site 35 is ir
819	9	to doctors and dentists when required are currently at full capacity. with the increased population of Worksop you cannot see a doctor under 3 weeks unless it is an emerge
819	10	F) Provision of utilities and services. Development on site 35 will require significant investment in infrastructure to meet the demands of the new housing development, as
		to the remote location of the site. Improvements would be needed to upgrade level of service provision due to increased demand.
		The figures used in the Gypsy and Traveller section do not seem to relate to the EMRP, where a minimum of 25 residential pitches were required to 2012, along with 18 tr
		have been provided, this leaves 20 residential pitches and 18 transit to 2012. This is also the finding of the Nottinghamshire GTAA Update 2010 (page 18). Also, since the
		appear that a new GTAA should be conducted in order that there is a robust and sound evidence base. However in order to avoid further delay, then the figures of 20 and
820	1	(albeit they are to 2012 and there is no estimate of need arising beyond that time - a rough estimate could be gained by applying a 3% compound growth rate which revea
		pitches 2012 - 2028). The location of new sites should be discussed with local Gypsies and Travellers, but will largely be guided by the core strategy policy. Just as mainstr
		manner across the district, it is unlikely that it would be appropriate to deliver Gypsy, Traveller and Travelling Showpeople accommodation evenly across the district.
		Small, private, family sites tend to be favoured by the Gypsy and Traveller community, and these should be provided separately to transit provision. Some transit provision
820	2	relates to accommodation for visitors, on residential sites. Successful transit sites need to be managed in a different way to residential sites, so the two do not always go t

829	10 1	Bassetlaw District Council has failed to take in to consideration an already heavily populated and under serviced area when considering plans for a further large development (site 35). The extra traffic to and through the estate already in existence will increase the risk residents already face from through traffic wishing to avoid poorly managed traffic controls at the Cannon Public House crossroads.
829	11	Site 35 should be a protected site, remaining open and undeveloped land
829	12	Option A: Spread between Worksop; Retford and Harworth Bircotes
829	13	No further new sites should be developed within the District
829	14	Together
830	1	Have no idea what this means- all jargon
830	2	Option B
830	3	No, the parish plan said NO more buildings
830	4	None
830	5	Your previous check box of no. houses people wanted was 0-5. People who ticked that thinking that meant 0 have been misrepresented with BDC stating 0-5 means 5. You deliberately misled people using this question
830	6	Yes, we need to protect our village from creepage and urban sprawl
830	7	No
830	8	Separate
830	9	Not in Sutton
831	1	Yes
831	2	No - if anything there is too much.
831	3	Any except Site 4 and W9 which consist of significant areas currently used as a golf course and for recreation. There would be a disproportional effect on the local transport infrastructure from such major development, both in the short and long term.
831	4	Any except Site 4 and W9 which consist of significant areas currently used as a golf course and for recreation. There would be a disproportional effect on the local transport infrastructure from such major development, both in the short and long term.
831	5 1	Any except Site 4 and W9 which consist of significant areas currently used as a golf course and for recreation. There would be a disproportional effect on the local transport infrastructure from such major development, both in the short and long term
831	6	Yes, however there is a distinct lack of protection of any sizeable area in the north-east, retention of at least the golf course area even if only as open parkland with some play areas would be better.
831	7	No
831	8	If Site 4/W9 were to be used, protection of the current golf course area is favoured, with any employment use concentrated to the south east abutting Rayton Lane beyond the sewage works
831	9	However better protection of the amenity value the Ryton Valley and Chesterfield Canal predicates against this.
831	10	Option A: Spread between Worksop; Retford and Harworth Bircotes?
831	11	Preference is for around existing sites to retain closeness of access for those traveller who have relatives/friends using existing locations. This could help to minimise management costs
831	12	Provision should be together to allow ease of management and potentially minimise cost to the community
831	13	No
832	1	Yes
832	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
832		Yes
832	4	410
832	5	Yes they should be protected.
832	6	Yes this should be a priority.
832	7	Existing sites
832	8	None
833	1	Yes
833	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
833	3	Yes and cheaper houses for younger people
833	4	Site 228 is the best for housing

833		Primary school is only half full
833	6	Yes the new play area should be protected from housing.
833		Existing
833		Separate
834		Yes it is sufficient
834		Option A: Spread between Worksop; Retford and Harworth Bircotes
834		No, the detention centre development is more than enough
834		No more housing
834	5	Too much traffic onto the main bypass
834	6	Yes, i agree these should be kept
835	1	Yes
835	2	NO - the current allocation seems very high anyway.
835		Any except Site 4 & W9.
835	4	Any except Site 4 & W9
835	5	Any except Site 4 & W9. A large portion of this site is currently used for public open air recreation and therefore its use for development would be detrimental to the area.
835	6	I agree with those identified on the plan but as stated in my response to Q5 a large part of Site 4/W9 is currently used for public recreation and this at least, if not the who
835	7	None
0.05	•	In the event of Site 4/W9 being selected for some development, additional consideration must be given to how use of the southern portion overlooking the Ryton and Car
835	8	part of an important broad green gateway running towards the town centre
835	9	Option A: Spread between Worksop; Retford and Harworth Bircotes?
835	10	Continued use of existing sites is preferable, with any expansion to meet new requirements adjacent. This would help to keep management and maintenance costs lower.
835	11	By reason of helping to keep costs down co-location would be most practical.
835	12	No
836	1	Yes - criteria seem reasonable
836	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
836	3	I strongly disagree. I understand that the factory site has been approved with 41 new houses. There are another 26 existing planning permissions.
836	4	The village infrastructure can't support more development; it will struggle to cope with the development at the factory site and the existing permissions.
836	5	None
836	6	Yes
836		Existing sites, preferably expanded if possible as shortfall is relatively small
836		Preferably together to minimise number of sites
837		No
837		No the town cannot take anymore
837		None
837		None
837		No
837		None
837		All should be protected
837		No
837	9	Option A: Spread between Worksop; Retford and Harworth Bircotes?
838	1	NO. The methodology has been one of intimidation. The Parish were involved in a major consultation culminating in the Parish Plan, and in 2010 Bassetlaw again set about the previous work. It seems that the planning office are already being influenced by other forces without any regard for the views of the parish. Planning offices will never whilst ever they go against such strong opinion. There is no credible argument for further building in the parish of Sutton.
838	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
838		No - No more land should be destroyed for building.

838	4	The residents surveys did not state 4 houses would be acceptable. The way in which the planning department calculated the figures is completely wrong. They have used used 10 as the agreeable figure. They could have just as easily used 1 as the figure or of course if they were genuinely unbiased they would have used the centre point i.e. the question the actual figure deemed acceptable by the residents is actually 0.8 houses. The planning officer who have attended the village meetings and council meetin response from Sutton is amongst the strongest they have ever had. The answer is NO MORE HOUSING
838	5	NO MORE HOUSING IN SUTTON is required or justifiable
838		Sutton has had extensive housing development over the past 35 years. Two interlinked housing estates, and a separate cul-de-sac for which an 18th century farm and farr are all part of the legacy Bassetlaw planning department have imposed on Sutton. This has completely changed the demographics of the parish, which is no just a dormito and cities beyond. The influx of such numbers of non rural residents has diluted the community feel and integration with most not wanting to actively integrate in rural lif village further destroys the demographics of the village by reducing the opportunity for people to buy properties with the opportunity to have a small holding or to keep s remaining pieces of land inside the village envelope either belong to larger properties, or are redundant land bought as investment opportunities. The parish are not even because ever scrape of open space has been bought up by speculative capitalist waiting for more favourable planning conditions. It is totally wrong that the parish is held not find in there favour just because they have bought it as a speculative investment. If they invested in the markets and they lost out that's the gamble, and land should presumption in favour of the developer.
838	7	All open space within the parish whether on the map or not, and irrespective of ownership, now needs protecting to stop further speculative investors trying to build on p least 7 farms within its curtilage, now there are none, and the last remaining small holding is currently under threat of the planning office and capitalists.
838	8	REMOVED

842	1	We do not want to have the rug taken from under our feet if Site no. 251 was to be designated for housing. 8 acres is barely enough to operate viably on, so Rhubarb Farr the land designated for housing, because it would make a big hole in our economic viability. In addition, Rhubarb Farm would like to enter into negotiation with the Welbe No.252 as a cafe, shop for our produce, and training space for our courses. The small piece of land behind this house would be perfect for growing herbs and as a teachin the main road would be perfect to attract passing trade and running a cafe and shop would enable us to do far more in training volunteers in customer service, as well as enterprise and provide more employment. We have not as yet talked with Welbeck, but feel that our proposed use of this building would be more in keeping with the are historic house in the village, instead of losing it to a new development. Since Bassetlaw District Council gave Rhubarb Farm planning permission to operate as a social enter both Bassetlaw organisations, and Nottinghamshire organisations and Council have funded Rhubarb Farm, we fervently hope that officers and councillors will see fit not to and allow Rhubarb Farm to continue to bring economic and social benefit to the village and the wider area.
842	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
842	3	Yes, we agree with 10 new homes
842		252 is the best site
842		Main cockney road is busy.
842		Yes they all should be protected.
842		none in NL please
842 842	8 9	as above
842 843		none Do not agree. Our Parish Plan published in 2010 should be sufficient information to reject on further development in the village
843		Option A: Spread between Worksop; Retford and Harworth Bircotes?
843	3	No not really. The Parish Plan reflected no housing was required. The way the housing issues were addressed in both the parish plan and the later planning department que some housing need and speaking with neighbours and friends there was if anything at all, a need for small privately owned "started homes" which is not the same as "affor department glossary. Housing association has generally led to town misfits and trouble families being placed in villages where they don't want to be and are not generally have anywhere in the village to buy anymore and are forced to leave the area. The only buildings that ever seem to happen in the village now are large 5 bed executive ho
843	4	There are no sites in the village acceptable for development as this will lead to wholesale abuse and creepage across all redundant land and the last remaining open paddo
843	5	Every time planning permission is granted it is for 5 bed executive homes for which there is no demonstrable requirement for. Villages are a mixture of small 2 up 2 down everything in between. This mix of housing and culture is being destroyed by over development and greed of developers capitalising on big exec homes and ignoring the v to grow in to.
843	6	All open space should be protected.
843	7	Any redundant land should be compulsory purchased from people who have neglected it for over ten years and the villages should then have a greater say in what happen starter homes (not estates), Recreational ground etc.
843	8	Sutton already has the Daneshill site and that's enough thank you.
843		No comment just not in or near Sutton, thank you
843		None in or near Sutton
844		Sutton has a parish plan already that states no more development.
844	2	The term "affordable housing" was misleading. Many people thought this was about starter homes for young people like me, but is wasn't. For those who took the time to that it basically meant housing association dwellings for use by people that fall outside of scope for the usually housing benefit help. I have friends in other villages where they state that you would not want to live there and have these people as neighbours? read into that what you want.
844		Option A: Spread between Worksop; Retford and Harworth Bircotes?
844		If it was four small cottages (2 up 2 down) type houses that may be acceptable.
844	5	But there is always going to be an issue of how do you make sure that the villagers are able to get them? Privately owned see's them go on the open market to the highes having housing for ordinary people anymore, they just seem hell bent on helping the misfits and benefit cheats. There used to be a council estate in the village which was built etc. as a first home until they could afford to move (if they wanted to own there own place) but the council have all but sold them all now, so I don't have a chance to home.

arm would not even want to see a small part of beck Estate to use the old house on Site Ref. ing area for growing. The location of this site on as generate more income to support the area, and would preserve and restore an aterprise on the piece of land Ref. Responde		Answer
nt	nt	
844	6	Not really sure. Anywhere would just seem to open up the village to the possibility of wide spread development on the larger sites which would ruin the village. Little deve sites from further development may give people more confidence that the planning department weren't just going to sell the village down the river. Planning office should people and the local council to gain genuine trust and work together to provide for the villages children as they set out on their lives.
844	7	Infill destroys opportunities for people to aspire to "the big house with a bit of land" where they might get involved in original rural activities such as chickens and pigs and keep letting people build on the big gardens etc. this aspect of the community will be gone for ever, and it just ends up like Stepford Wives!
844	I X I	All open spaces should be protected and used for the community if the owner leaves it redundant. If land is not used and maintained properly then something should be d village can't apparently afford to provide allotments because all the available land has been bought and left idle by people hoping to sell it off as expensive building plots.
844	9	Concentrate them in the centre of Nottingham city centre.
844	10	Keep them together so it takes less sites overall.
845	1	1) I am concerned that these sites will generate even more traffic on Tiln Lane and Bigsby Road and in particular worsen the already present road safety problems at the Bi Moorgate/Tiln Lane junction. The Bigsby Road/Tiln Lane junction is misaligned slightly making turning right from Tiln Lane to Bigsby Road and the right turn from Bigsby R these turns should be. This is often made worse by the speed of traffic travelling from Smeath Lane direction and by HGVs travelling at speed and using the middle of the r before Bigsby Road.
845	2	The Tiln Lane/ Moorgate junction is dangerous now without increased traffic. Again the alignment, with a bend on Tiln Lane just before the junction does not help; this is a attempting to exit onto Moorgate and they often block the other side of the road often causing traffic wanting to exit Moorgate onto Tiln Lane to stop on Moorgate. Illega when the sun is low in the sky in early mornings this adds to the safety problem. Everyday there are near misses by responsible drivers here, often the junction layout lead would be unnecessary if the junction was better designed. Tiln Lane is the diversionary route for tall vehicles round Clarborough bridge; in my observation it is also used by immediate area who are not over height for the bridge, this is presumably because they are unsure of their exact height . Other issues also exist at this junction and I would required.
845	3	2) I am concerned by the impact on other local infrastructure. Water pressure is often low in the area, particularly in the summer.
845		Broadband speeds are already generally low by modern standards and BT broadband grinds to a complete halt most mornings for several hours.
845	5	Worthy of note also is that there is no current provision for medical services or shops in the immediate local area.
845	6	In addition to the foregoing I am also concerned, as a regular user of the footpath through this site,
845	7	the loss of ecological habitats and landscape
845	8	impact on public visual amenity (particularly from the Chesterfield canal).
846	1	The reasons are; LOCAL ROAD ACCESS TO THESE SITES ARE POOR - there is considerable congestion at school times already on Bracken Lane; any further development wor involved in an accident outside the school, crossing over where there is often double parking at school collection time, and cars weaving in and out of parked cars. Other a with housing on either side.
846	2	BRACKEN LANE SCHOOL IS OVER-FULL - there would be no places for additional children moving nearby.
846	3	THESE FIELDS NORMALLY FLOOD IN THE WINTER. Developments would suffer as there is a brook running down Bracken Lane, and also across the Lane into the sites identi turn towards Bracken Lane farm. This brook floods in pools in the fields.
847	1	No
847	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?

858	1	When accessing from either end the development bordering Ashes Park A venue and Edison Park Avenue by motor vehicle, cycle or on foot it gradually opens out revealin occupied by well maintained houses of many sizes and designs that are accessed via roundabouts and side roads within wild life corridors which include ponds, a stream (shrubs and wooded areas, bridle paths, well maintained grassed areas with random seating and a ball games area with goalposts. The estate also houses an infants/prima selected when moving their families into this area. It is used daily by hundreds of walkers, joggers and dog walkers, outside school hours there are always children on bike well theses days). Children are often seen in the stream pursuing sticklebacks' and the like whilst others are on their bikes at an area they call the ramps honing the skills t the like. On a daily basis many from outside the estate take welcome advantage of the surroundings to walk their dogs. Every week a local football team utilise the area to seen doing their extra endurance training. The area is a well used and appreciated green space which should remain a classified Protected Green Space and not a potentia opportunity to hive off all or sections for development. With the probably imminent development of many more houses within the area accessed via Churchill Way it is en Protected Green Space for the new residents to use as well. This estate complements the adjacent ' Old Gateford Conservation Area' and should continue to do so. These estate built by Shepherd Homes. If the whole estate bordering this area were canvassed the count would easily exceed 1000!
858	2	'The undersigned residents request that the areas either side of Ashes Park Avenue and Edison Park Avenue within the current developments remain as designated as Pro
859	1	Site allocation no. 4. We object to the above site being used for housing development. This is the only course locally that doesn't require large membership fees that your class can't afford.
860	1	After receiving your letter we are completely against any building projects on site number (4).
861	1	I would like to put my objections for you to consider. My main concern is the flooding in this area, we have lived here for 10 years and my housed is situated next but one garden is either under water or water logged. We had extensive flooding in 2007 which resulted in flooding all around my property. Entering London road from either Gro problem, with all the extra traffic from the above development would cause a road safety issue. Planning for houses in this area was turned down in 1995/6 because of al different in 2012?
861	2	Lastly Bracken Lane School is almost full to capacity and cannot be extended any further and once again during the winter the children cannot go on the playing fields as it
862	1	Area 69 is an important green wedge of land and is visually important to users of the canal towpath.
862	2	The land has a wealth of flora and fauna and wildlife, some of which may be endangered species, especially the 'barn owls' and 'water voles'. Building on this land would a
862	3	The land is also low lying and waterlogged, at times we have seen it totally flooded. This would cause drainage problems.
863	1	Poor access to Blackstope Lane from Gas House Bridge, where an accident is waiting to happen with cars parked right up to the corner on the access roads.
863	2	Blackstope Lane is a residential area, where the majority of residents are pensioners who appreciate the lack of constant traffic.
863	3	The end of the lane is a single track, already weakened and damaged by heavy lorries accessing previous works.
863	4	The area is liable to flooding.
863	5	Any development would put a strain on the existing sewerage system.
863	6	Much as we should like to see the old factory demolished and the area tidied up, we feel that any development would be inappropriate.
864	1	strongly disagree that 'Enough land should be allocated in Ranskill for at least 14 new houses'. The question itself is badly stated. This is asking residents to agree to at least cheque for any number of new houses above 14, i.e. potentially unlimited. I also strongly disagree with the statement contained in the question 'as suggested in feedback looked at the data and cannot find a significant number of residents who support more than 10 new houses.
864	2	I would support up to 10 new houses built within the existing village boundary, and using brown field land, or infill between existing properties, permission to be granted and tested on an individual basis by residents, Parish Council and Bassetlaw Planning Department.
864	3	Data from the recent survey indicates that 64% of residents said no new housing at all, and a further 7.6% said only 0 -10 houses. I think that non respondents should be reconsider and complete the questionnaire and by their actions, willing to accept the majority view. This large majority in favour of no new housing is consistent with the print 2006. If the surveys are not to be brought into disrepute (already a widespread view of why bother to reply when 'they' will do what they want anyway), then the views Bassetlaw should support no new building. There have been considerable new housing developments within the village boundary in recent years, i.e. Lowfield Close, Blue Persimon development at the bottom of Station Road which has only recently been completed, and is not yet fully occupied. I believe that this is sufficient for a village of the village, to live in a village environment and it should be kept at this size, and the village boundaries protected against further development. Ranskill has a farming com the village. Some residents earn their living from farming, and it is important that this is sustained for the future and farming land should not be diminished.

ling a clean, fresh, green, spacious landscape n (visited by Heron, Mallard and Moorhen), nary school. 864	4	As a general principle the village envelope should be kept as it is now. There is continual pressure by landowners to convert their gardens or fields into building land beyon This should not be done beyond existing boundaries to the detriment of the village as a whole. Building should not be allowed to compromise the envelope and create pre
864	5	The village has a main road passing through it North to South. West to East Blyth Road, Station Road and Mattersey Road are subject to heavy traffic and accidents occur a traffic lights.
864	6	The main East coast Railway line passes close to the east of the village and creates noise. The recent development of Robin Hood Airport has created noise increases in the problems for residents.
864	7	There is an open aspect to the west of North Road, this should be retained.
864	8	The settlements of Torworth, Ranskill, Scrooby Top and Scrooby are all areas with their own individual identities, separated by their boundaries and mainly farm land. New line of main roads. It is essential that these settlements retain their own identities and there should be no development to the Northern and Southern boundaries, to prevest settlements. Developing any part of the Site 234 will create a precedent and inevitably the land to the North of the site would be developed.
864	9	This site is bordered on two sides by Folly Nook. This lane is a major asset to the village and is a well loved example of a country lane with a rural aspect and fields on eithe short recreational walk and has been developed as such by the provision of two seats (one of which was donated by a villager in memory of walks with his wife), trees and As the village is crossed by fast major roads there are few walks for residents away from the main road.
864	10	This site is bordered and bisected by hedgerows which give a country aspect and are home for diverse wildlife at a time when many hedgerows are being threatened. They excluded from this site.
864	11	At the Consultation Meeting the Bassetlaw team seemed to favour developing a strip of currently farmed land at the edge of a field between existing housing and an isolat Nook Lane. I would strongly object to this as it would go beyond the village boundary, spoil the previously mentioned open aspect and be used as a precedent to develop t
864	12	There are environmental concerns of a potentially large increase in the number of vehicles accessing Folly Nook Lane and North Road, where there is already a major prob Drive.
864	13	This site is beyond the Village envelope and if developed would be used as a precedent for development of the other Northern sites, such as 234 and 224. Planning permis two previous occasions, including rejection following an Appeal. It compromises Folly Nook Lane for the reasons detailed under Site 234.
864	14	Development in this site behind the existing properties will adversely affect the quality of life of the residents of Folly Nook Lane. It will go against the country aspect of the
864	15	This site is one property with planning permission for one further property. This site has been affected by the confusing movement of Bassetlaw DC reducing the boundary outside the previously existing boundary.
864	16	Any building outside the existing boundaries would provide precedence for further development beyond boundaries, and weakens the Village envelope.
864	17	Does not compromise any village amenities such as open aspects and country walks.
864	18	Does not have any issues relating to heritage properties.
864		No traffic implications as in site 234.
864	20	The nature of the site would lead to potentially large number of properties making the village much bigger. Does not have any implications for joining the separate commu
864	21	This site is outside the boundary and would set a precedent if used.
864	22	The general area around site 537 is poorly served with roads and is generally in a poor state. The land does not seem to have a particular agricultural use.
864	23	Current access is from Station Road, any further development would add to existing heavy traffic issues along this road. The new development just to the west of the railw
864	24	If development outside the boundary had to occur, I would support a small development of site 537. However, it would be necessary to upgrade the road system, possibly Road, to reduce existing traffic problems along Station Road.
864	25	This site does not compromise the individuality of the settlements.
864	26	This is a large site with a capacity of 191 houses. I strongly object to this site being used for new housing for many of the reasons previously given.
864	27	At present the open aspect of the village including this site is an asset to the village and residents of North Road.
864	28	It is again outside the village boundaries and building would breach the envelope and create precedents.
864	29	It has got to be assumed that if part of this site were developed, the landowner would push for the rest of the site to be developed in due course.
864	-	A large number of vehicles entering and exiting North Road would increase traffic problems.
864	31	It is currently valuable farming land and should be kept as such.

nt	nt	
864	32	A site that was previously identified for new housing was the land on North Road, between the new development of Blue Bell Court and the Police House. This site is not r Choppins Field and is owned by an absentee landlord whose family originally came from, and some of whom still live in, the village. It is overgrown and an eye sore. Veget the owners have to be chased up to maintain it. It is outside the boundary, and whilst I am against any developments outside the boundary, it is a limited site and would s proposed.
864	33	However, development here would certainly affect the open aspect and be to the detriment of residents nearby.
864	34	The overriding issue is the credibility and continuation of the Village boundary. The Boundary has recently been tightened by Bassetlaw DC and now these proposals confin require a further redrawing of the boundary to include the new site. It is clear that the majority of the village do not support this and wish for minimal new housing. This c within the existing boundary. Developers will exploit any inconsistencies or flaws in the proposals because it has been done before and is in their interests to continue to c
864	35	I would support protection of the open spaces identified on the maps.
864	36	However, the village playing field already has existing planning permission for the erection of a Village Hall, which the village currently lacks, and any protection should stil benefit of the village as a whole.
865	1	The junction between Ashes Park Avenue and Gateford Road is already supporting heavy traffic levels; an increase in housing will put additional pressure on the roundabo Road, making the current situation more dangerous and adding to pollution and noise levels.
865	2	The proposed area is currently productive agricultural land.
865	3	The environment would suffer badly - the area proposed is bordered by Owday Wood/Rough Piece and Owday Plantation, local sites of importance for nature conservatio habitat, including trees and hedgerows, affecting local wildlife.
865	4	The public bridleway which enters from Montford Road and stretches to Owday Plantation is used and enjoyed daily by both habitants of the estate and many others visit
865	5	Local schools (nursery, primary and secondary) are already filled to capacity.
865	6	The road around the Celtic Park shopping site is often gridlocked, particularly since the opening of the Asda store, and there have been a number of accidents involving ca
865	7	The majority of residents will have chosen to live here due to the nature of the surrounding area, I believe most of us will feel that the area has now absorbed housing to f would have a detrimental effect on the area.
865	8	The local Bassetlaw Hospital and surrounding GP surgeries would have to absorb such a major increase in population, has any serious thought been given to this by the pla
866	1	I object to this proposal, as I used to live at number 55 Grove Coach Road for over 20 years, during this time we were flooded 3 (three) times, as you will see from the pho early part of the month of June, Spring Bank Holiday time as my children were off school, I am not sure of the year but it was between 1980-1985. The dyke which runs at flowed. As you see from the photos the water flooded the back garden and carport, it also covered the front garden and the front door had to be sandbagged. I had sewer fire place in the lounge.
866	2	The land around this area is known for flooding and further housing would course problems with traffic of about 500 cars trying to get out of Grove Coach Road and Brack nightmare already.
866	3	I am sure Bracken Lane School cannot cope with more children.
866	4	We have plenty of properties for sale in and around this area of Retford without another 600 houses.
867	1	Yes.
867	2	Spread equally between Harworth Bircotes, Retford and Worksop, subject to consultation with those communities.
867	3	No. We cannot imagine that, in responding to that question, residents meant other than the total number of houses they were happy to see built. It is not credible that th total of 13 the Corner Farm and other developments now in progress that had not commenced at the time, or the proposed five affordable dwellings. We held an extraor a Allocations questionnaire, and members of the public present confirmed this opinion. The questionnaire asked residents how many new houses they would like to see built should be in addition to the current 17 approvals. The Parish Council considered that the wording of this question may cause confusion to members of the public not verse in the Planning Department accepting comments from the public at face value. In view of the number of approvals, plus the proposed five affordable dwellings, we do not for further dwellings. It is also a fact that there will continue to be windfall development within the settlement over the next 15 years.
867	4	Our Parish Plan, which was the subject of detailed consultation, with a response rate of over 70% of households, states: The main conservation issue is achieving adequate particularly in view of the amount of extension and infill building, to preserve the character of the Parish and meet the view of residents that future development should b affordable housing. Government policy may well move in favour of increased green field development and we cannot rule out that, despite residents' wishes for strictly li It is important, therefore, that we liaise with Bassetlaw District Council over Planning Guidelines, making the Council aware of the concern of residents and taking a view of development if this becomes inevitable.

880		No. Existing approvals (19) more than cover the 13 new dwellings suggested.
880		No.
880		None
880	6	Sites in Everton, North of A631 suffer from: -Traffic generation
880		access
880		road safety
880		parking provision(access has to be via High St or Chapel Lane, both very narrow)
880	1 1	Impact on listed buildings and/or Conservation Areas
880		Yes and added to where appropriate
881		Option A: Spread between Worksop; Retford and Harworth Bircotes?
		No. You have blatantly manipulated the data to meet your own purposes. The majority of villages who responded to the Village Plan, and those that responded to your que
881	2	development in the village.
881		Once again your not listening! We have said by a majority we don't want further development.
881		Your use of statistical data need reporting to the Ombudsmanits being manipulated to suit the response you are under pressure to achieve.
881	5	Yes
881	6	We don't want any, so if required add to existing sites.
882	1	What does this mean?
882	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
882	3	I strongly disagree. The utilities cannot support the number of houses currently approved for planning.
882	4	None
882	5	The village has implemented a parish plan that states no further housing development. However if affordable housing was an option, how would these people survive rura
002	5	resources in the village?
882	6	Yes
882	7	Traveller site at Daneshill is currently closed - why not open this rather than opting for new development
882	8	Together. There i a facility already providing this at Daneshill
882		Daneshill
883		Option A
883		No, i believe that enough housing has been built in the village. The village cannot cope with anymore housing as we have no shop or post office.
883		No sites are preferred.
883		Traffic and drainage is an issue to the East of the village.
883		Yes, the sports ground should be protected.
884		Yes
884		Option A.
884		Not unless the flooding and A57 are sorted out. The village has nearly flooded in 2000, 2005, 2007 and 2009.
884		Further housing would also cause problems for the A57, which currently a difficult access.
884	5	The Green should be retained.
884	1 1	Existing sites
884		Separate
885		Yes, Lagree Ontion A: Sproad between Workcon: Potford and Harworth Birector?
885		Option A: Spread between Worksop; Retford and Harworth Bircotes?
885 885		Yes, for an 18 year period, I believe that 18 new houses would not impact the village too much.
885 885	1 1	480 would need to be redeveloped first - I agree that a mixed use is best for this site.
885 885	5	I feel the housing should be placed toward the village and the employment to the edge, so the impact is less on local residents.
885 885		All open spaces need protecting from development Existing sites in Workson
885		Existing sites in Worksop
886		No

 890 9 Option A: Spread between Worksop; Retford and Harworth Bircotes? 891 1 Not entirely - areas such as location 35 should not be a consideration for building. 891 2 No - more housing does not necessarily mean that residents will use the town - many people live here but work away. I personally use the town centre but we are retired walk around the area. 891 3 I think location 35 is not suitable. This is a beautiful area and many people visitors and residents alike enjoy the amenity that this area provides. 891 4 Taking into account that location 28 & W6 (Gateford Common) is also earmarked for 381 houses and 195, 343 & W8 earmarked for a total of 611 houses it appears that y 	890
