 891 1 Not entirely - areas such as location 35 should not be a consideration for building. 891 2 No - more housing does not necessarily mean that residents will use the town - many people live here but work away. I personally use the town centre but we are retired walk around the area. 891 3 I think location 35 is not suitable. This is a beautiful area and many people visitors and residents alike enjoy the amenity that this area provides. 891 4 Taking into account that location 28 & W6 (Gateford Common) is also earmarked for 381 houses and 195, 343 & W8 earmarked for a total of 611 houses it appears that y 	890

897	1	2.1. We recognise that Policy CS8 of the adopted Core Strategy establishes that the 20 identified Rural Service Centres (including Everton) could share <i>up to</i> 10% of the Di 2028. This equates to 770 dwellings over the plan period, but allowing for current planning commitments and readily deliverable sites, the residual requirement is 328 dw is that if less than 10% of the housing requirement is ultimately met in the Rural Service Centres, then the residual requirement to meet the District's total needs will be rewords of the housing requirement is ultimately met in the Rural Service Centres, then the residual requirement to meet the District's total needs will be rewords of the adopted or Harworth-Bircotes. 2.3. While we accept that the above flexible approach is supported by recently adopted policy embodied in the Core Strategy, we should so far as is possible seek to meet the targets for the proportional split of residential development set out in Table 4.1 of the adopted Core Strategy. Any significant sustainable settlement hierarchy. The need to maintain the sustainability of rural settlements, by the appropriate allocation of development in such locations is considered accordance with national policy contained with PPS3: Housing (paragraph 28). 2.4. In accordance with PPS3, the identification of locations for development should be base planning considerations, which amongst others include: demand and need; the potential contribution to cutting carbon emissions (focussing development in locations wit risks associated with broad locations and specific sites; and accessibility to existing community facilities. Such an objective approach should apply to development in both of development, we consider that in addition to the availability of local services, particular consideration should also be given to relative proximity and connectim more major services. Everton is a highly sustainable location for development, being located on a regular main bus route between the towns of Bawtry and Refford. It is is settl
897	2	2.7. It is understood that a resident's survey way undertaken in each Rural Service Centre which asked for views on the level of housing development that should be provious objective way of measuring actual demand or need. In the case of Everton, out of 318 questionnaires, only 89 responses were received – giving a response rate of 27.99% cannot be considered as statistically significant. 2.8. Although the planning authority has acknowledged that the mean level of residential development considered approphouses, we do not consider that such a figure should be regarded as being of particular significance for land-use planning as is it purely a statistical average derived from t material planning considerations relating to the sustainability of the settlement as a whole, or the availability of suitable sites. Nor is it based on a representative sample of survey-driven approach to the apportionment of development is also problematic in that when the survey results for the 20 Rural Service Centres are considered as a whole identified Core Strategy target for residential development in the Rural Service Centres. The suggestion that this requirement may be redistributed to the three largest set lssues and Options document, may not only result in environmental degradation in the affected larger settlements (Worksop, Retford and Harworth / Bircotes), but it courdecline of the affected Rural Service Centres.
897	3	2.10. It should also be noted that the draft National Planning Policy Framework advocates that local authorities should allocate at least a further 20% over the strategic the supply of housing, local planning authorities should: identify and maintain a rolling supply of specific deliverable sites sufficient to provide five years worth of hous supply should include an additional allowance of at least 20 per cent to ensure choice and competition in the market for land." (para 109)
897	4	2.11. We would suggest that the determination of how much development may be appropriate must be based on material planning considerations and should be strongly suitable sites. While the overriding aim should be to achieve 10% of all residential development in the 20 Rural Service Centres as a whole, we consider that some individu sustainability credentials (like Everton), and highly suitable sites may in principle take more than an equal share of the residual requirement i.e. more than one twentieth (16.4 dwellings).
897	5	2.12. While the proposed "Stage Two" site assessment criteria appropriately include the question of compatibility with neighbouring land uses, and impact on built c sound spatial planning, they should be broadened also to refer explicitly to relationship to settlement form and urban design considerations. In that respect, we consider capacity of individual settlements, due regard should be had for sites which sit within or immediately adjacent to the existing settlement envelopes, and particularly existing built form of the settlement. Such is the case with the subject site at Hall Farm Yard, Gainsborough Road, Everton

w ones, if and when they are built?

District's total housing requirement 2010 to dwellings. 2.2. 897	6	3.1. As a Rural Service Centre, Everton is a particularly sustainable location for new development. It is a thriving historic village which includes a number of services. Curre a hairdressing salon, a picture-framing and gift shop, village hall, church and recreation ground. The proposed development would help to sustain the vitality of these local of further facilities, so being of benefit to new and existing residents. In addition, the site is less than 5km east of the town of Bawtry, a thriving market town, which I facilities. Everton is also conveniently located on the A631, along which regular buses travel between Bawtry and Retford (approximately twice hourly), and also W Although access to local services is of significant importance in reducing the potential need to travel. Government guidance emphasizes the importance of accessibility sustainability. No individual village can be entirely self-sustaining, as most residents will need to travel to higher order centres to access certain essential services and for should therefore be a key factor in determining the growth potential of individual settlements. 3.3. Planning Policy Statement 1 "Delivering Sustainable Development" wa 27 that in preparing development plans, planning authorities should take into account issues such as accessibility and sustainable transport needs when bringing forwa improved access for all to jobs, health, education, shops, leisure and community facilities, open space, sport and recreation, by ensuring that new development is loc Guidance Note 13 "Transport" was published in 2001 and represents current government policy on the relationship between development and transport. Paragra development and influencing the location, scale, density, design and mix of land uses, planning can help to reduce the need to travel, reduce the length of journeys and jobs, shopping, leisure facilities and services by public transport, walking, and cycling. It therefore states, in paragraph 19 that, in preparing their development plans, local to acces
897	7	4.1. The site identified at Appendix A, measures approximately 0.52 ha. It constitutes a farmyard which is no longer required for agricultural purposes. The site contain buildings which are of poor aesthetic quality and impact adverse on the setting of nearby historic buildings, the Conservation Area and the general appearance of this par existing vehicular access, currently serving its unregulated use for the storage and distribution of agricultural materials and machinery. The established use has the pote traffic of an obstructive nature than the proposed development. It should be noted that the site can also be served by an alternative means of access also within the driveway from Gainsborough Road further to the west, which currently serves the existing adjacent residential barn conversions. Consultation with Nottinghamshire Highv utilisation of both access points may be the most suitable way of serving the site. 4.3. The site stands immediately next to a number of existing residential properties co dwellings within the barn conversion referred to above. The planning authority has to date considered the adjacent former agricultural barn and stables buildings as curti association with the Grade II Listed Hall Farmhouse on the north side of Gainsborough Road. A sensitively designed redevelopment of the site would therefore significantly improve the general appearance of this part of the village, which is immediately adjacent to a key approach from boundaries of the site, and the rear portion of the eastern boundary, are well defined by existing gappy hedging, which would be supplemented or replaced as part of any
897		4.6. It is envisaged that the site could be viably developed for five dwellings of varying scales, utilising built forms reminiscent of traditional barns, a farmhouse and cottage housing demand in rural parts of Bassetlaw. Such a development would be relatively low density, but this would be fully compatible with the existing pattern of developme designated Conservation Area. 4.7. There is sufficient space within the site to facilitate the provision of driveways and garages for each proposed dwelling, so avoiding the appearance of the area and discouraging criminal activity. 4.8. We have previously had a number of detailed discussions with the Conservation Officers which culminated in concept. The feedback received was of a very positive nature, and it was verbally agreed that such a development would enhance the setting of nearby listed buildings.

rently they include a primary school, two pubs, cal facilities and would encourage the provision provides a broader range of retail and other Worksop and Gainsborough (twice daily). 3.2. y to public transport in determining locational employment. Accessibility to public transport was published in 2005. This notes in paragraph vard land for development and should provide ocated where everyone can access services or st use of public transport. 3.4. Planning Policy raph 3 notes that by shaping the pattern of d make it safer and easier for people to access cal authorities "should give particular emphasis ocal planning authorities to ensure that new of locations and specific sites for development which may be accessed on foot, together with y justifies the apportionment of more than the

ains two modern utilitarian agricultural storage part of the village. 4.2. The site benefits from an otential to generate significantly more vehicular the control of the site owners - that being the shways Authority has to date suggested that the comprising Hall Farm Cottage, the Stables, and rtilage-listed buildings by virtue of their historic hificantly enhance the setting of those heritage from the east. 4.5. 897	9	4.9. The sustainability credentials of the site are enhanced by the fact that it lies within 5 minutes walk of the bus route that passes through Everton. 4.10. The site does n outside any designated flood zone and is free-draining. It lies at above 10m AOD, and rises marginally to the rear (southern) boundary. The site's established use is unlikely 4.11. Since June 2010, the site has been included within Everton Conservation Area. It is recognised that Hall Farm on the north side of Gainsborough Road, with which the Grade II listed building, and the converted barns have to date been regarded as being curtilage-listed for their group value. While the proposed redevelopment would enh Conservation Area, and improve the setting of the above heritage assets which fall within it, the site is not in a position where its development would have any direct effe 4.12. It is considered that access to the site for the modest development envisaged could be achieved without any significant impact on the highway network. Both of two one current function of the site is as a means of through access for agricultural vehicles to the fields beyond, it should be noted that this land may be alternatively accessed development would therefore have no adverse effect on the accessibility and workability of the adjacent agricultural land.
897	10	4.14. A key advantage of the subject site is that while it is not currently defined as being within the development boundary, it is contained to the north and east by existing the subject site for residential use would thus be more compliant with existing adjacent uses, and would improve amenity for existing residents. 4.15. Due to the site's we regarded as an opportunity for rounding of the existing area of residential development. Development of the site for housing would therefore not intrude into the surrour consolidate the existing form of the settlement. 4.16. We would further comment, that while we are seeking the specific allocation of the site for residential development located within the identified settlement boundary because it falls within an area that has been identified as part of the historically established settlement (ref: Everton Co Owners, June 2010).
897	11	345 & 400 Relatively distant from village core – less likely to encourage walking to access services.
897	12	453 Small site with poor access (visibility limitations)
897	13	296 Historic open space within village core. Nearby heritage constraints.
897		407 Affects setting of adjacent Listed Building, but well located relative to village core – logical 'infill plot'.
897		406 Large visibly prominent gap site, but could be logical 'infill plot'.
897	16	408 Plot constituting undeveloped frontage of Croft Way – also owned by Magnus Trustees and being promoted for residential development by us. Development would
007		close to village centre, and would avoid any significant landscape impact.
897		401, 409, 484, 405, 404 – Large edge of settlement sites - significant landscape impact. Nos. 404, 405 and 484 particularly prominent from A631 (affecting wider setting of
897 897		402 & 403 – Both sites suffer from constrained highways access – NCC objection. Also prominently located on edge of settlement – landscape impact, and relatively distan 475 Small site constrained by mature trees, heritage sensitivities and poor access.
897		475 Small site constrained by mature trees, nertrage sensitivities and poor access. 476 Garden area forming immediate setting of Listed Building.
897		5.3. In comparison to the above sites it can be seen that the subject site is more centrally located that most. It can be readily made accessible from the existing highways r would have positive impacts on built heritage and the wider landscape. Furthermore, it has the potential to offer a modestly sized residential development with particular significant constraints.
897	22	4.1. It is considered that the subject site, which currently lies outside the Everton settlement envelope, but immediately adjacent to the established built up residential ar round off the form of the existing settlement. 4.2. The site identified at Appendix 1, measures approximately 0.19 ha. It is situated to the east of the existing reside subsidiary Croft Farm Close, presently comprises a development of 25 detached dwellings of mixed size and form at the eastern edge of the village of Everton. Although sides of the highway, the site occupies a frontage of approximately 52 metres which is not presently developed. The proposed development would therefore complete settlement, utilising the existing highway access provided by Croft Way, so maximising the efficient use of existing infrastructure. It would not involve any significant pro We have previously made representations to the Core Strategy concerning the site (referred to as no. 408 in the SHLAA), and for ease of reference summarise its key chart
897	23	4.4. The site constitutes part of a larger field of approximately 1.8 ha. It is currently classified as Grade 3 Agricultural Land and used as grass pasture. 4.5. Access to the fiele which Croft Way forms a T-junction to the north. Therefore development of the subject site would not affect the agricultural viability of the remaining majority of the field of the field of the subject site would not affect the agricultural viability of the remaining majority of the field of the field of the subject site would not affect the agricultural viability of the remaining majority of the field of the field of the subject site would not affect the agricultural viability of the remaining majority of the field of the subject site would not affect the agricultural viability of the remaining majority of the field of the subject site would not affect the agricultural viability of the remaining majority of the field of the subject site would not affect the agricultural viability of the remaining majority of the field of the subject site would not affect the agricultural viability of the remaining majority of the field of the subject site would not affect the agricultural viability of the remaining majority of the field of the subject site would not affect the agricultural viability of the remaining majority of the field of the subject site would not affect the agricultural viability of the subject site would not affect the subject
897	24	4.6. The site is grass covered but contains no vegetation of any particular significance. The only tree is a small, relatively young self-seeded ash tree on the western bound although there is some hawthorn in poor condition. While it is most likely that such vegetation would have to be removed to facilitate the development, it is sparse and no association with the proposed development would enhance its setting and the ecological value of the site, far outweighing the loss of the specimens referred to.
897	25	4.7. The site is relatively flat, and stands approximately half a metre below the level of the existing highway, at between five and ten metres AOD.
897		4.8. The site is not within a defined flood zone and appears to be free draining.

897	30	4.13. The field, of which the subject site forms part, is crossed by a public right of way. This public footpath enters the field at the gateway to Roe Lane, near Linden Ho direction to the south-west corner of the field. It should be noted that the map of definitive rights of way held on the Nottinghamshire County Council website has bee formal right of way lies entirely to the east of the subject site and will not be affected by the proposed development. 4.14. We have noted that the authority's SHLAA do footpaths which cross the site. On the basis of our investigations to date we consider this to be incorrect.
897		4.15. The sustainability credentials of the site are enhanced by the fact that it lies within 10 minutes walk of the bus route that passes through Everton.
897	32	4.16. It is envisaged that the site could be viably developed for six dwellings (three semi-detached pairs) which would help to meet the diversity of housing demand in rura would be relatively low density, but this would be fully compatible with the existing pattern of development in this part of Everton. 4.17. There is also sufficient space with private gardens and driveways with off-road parking for each dwelling. 4.18. Given the form of development envisaged, we consider that the site may have particular pote housing. We have previously referred to productive discussions with the ACIS group, who as a Registered Social Landlord has previously expressed particular interest in the the need for affordable housing is a serious issue. Furthermore, evidence that there is a specific need in Everton has been provided through a Housing Needs Survey, comr Bassetlaw District Council has also acknowledged its support in principle for the provision of a small affordable housing development in Everton - a matter which has previ Planning Policy & Conservation Manager.
897	33	406 Large visibly prominent gap site, but could be logical 'infill plot'.
897	34	477 Yard – also in ownership of Magnus Trustees, and being separately promoted for residential development by us. Well related to services in village core. Development buildings so enhancing setting of nearby Listed Buildings and improving eastern approach to historic core.
898	1	Yes, provided the methodology does not lead to a situation where the input from professional planners is undermined
898	2	Option A
898	3	The consultation paper indicates Bassetlaw far exceeds the amount of development that could be accommodated, particularly in rural areas, and the Council will not be al document.
898	4	Gringley has already accommodated 63 new houses as a result of the new build on the former detention centre and the impact of this development, which is significant in be realised. I believe Gringley has contributed more than its fair share of residential development and that further housing would be detrimental to the character of the vil
898	5	If further development were to take place I support the views expressed by the resident's questionnaire, that infilling between development boundary lines should be avo
898	6	Development of sites 134 and 135 would constitute significant infill and over development within the conservation area, eliminating greenfield space.
898	7	Reiterating my response to Q76 I feel there is no justification for further development on sites 134/135.
898		Gringley Parish Plan 2004-2014 identifies narrow lanes with grass verges and banks topped by low walls or hedges together with the historic retention of gaps between bu the village as being special features which form an integral part of the village character. Development of proposed sites 134 and 135 would compromise these special feat
898	9	Access to site 135 is via Low Street, an extremely narrow lanes without a footpath and space only enough to allow a single vehicle to pass. Low Street provides a thorough of the village and the A631 to the Playing Field and the Chesterfield Canal amenities as well as providing access to farms and farm land in the Middle Bridges area. Develop and cause a safety hazard, particularly with vehicles entering and leaving the site. With restricted visibility, vehicles rounding the steep bend from Cross Hill into Low Street should insufficient parking be available on the site, thus restricting access for emergence cars leaving the site.
898	10	Drainage problems at the junction of Low Street and Horsewell Street have never been resolved satisfactorily and since there is no provision for mains surface water drain elevated site 135 is bound to cause flooding at this junction.
898	11	The conservation area is characterised by many greenfield areas which separate existing houses and farm buildings. Development of the site 134 and 135 would result in lo ecological habitats and further endanger the village's conservation.
898	12	Should either site be developed it would set a precedent for similar spaces within the conservation area to be developed. Of particular concern would be the potential infil by Low Street and Little Lane.

		Planning permission for site 135 has been sought on many occasions in the past and on each occasion plans have been rejected for good reason since the proposals for de
898	13	countryside. In relation to past applications, which went to appeal, the Inspector considered that any development here would be harmful to the rural settlement policies
		conservation area and character of the village. These criteria still apply.
898	14	I support the view that the open spaces indicated should be preserved and that as much open space as possible should be maintained within conservation areas.
898	15	G&T sites should be concentrated in and around existing sites to enable efficient and cost effective delivery of essential services to those sites.
898	16	Again, transit and traveller pitches should be provided together to enable efficient and cost effective delivery of essential services to those sites
898	17	Houses in the proposed development would overlook, overshadow and lead to a loss of privacy for the existing neighbouring dwellings.
898	18	The proposed open space/garden would require maintenance by the local parish, which would place an additional financial burden on the parish council and its residents f
898	19	If the area on the plan buffering the existing owners property from the development, which is labelled 'Not To Be Developed To Maintain Historic Settlement Features', the to maintain the villages special historic settlement features.
898	20	The outcome of the Site Allocations Issues and Options Consultation exercise is still awaited and no decisions should be made regarding this land until all responses from G considered.
899	1	This development will encroach on the dividing land between Worksop and Carlton in Lindrick and Wallingwells. This will only further contribute to the 'urban sprawl' and further.
899	2	The area proposed in productive agricultural land farming wheat and oilseed rape, agricultural land provides employment which will be lost as a result of this development
899	3	The area proposed is bordered by Owday Wood/Rough Piece and Owday Plantation which are sites of importance for nature conservation. The woodland is at present unt will cause significant disturbance to these valuable woodlands. The area 'Gateford Hill Park' which includes Dog kennel Plantation is a mature landscaped area.
899	4	The public footpath/bridleway entering the area from Montford Road and stretching to Owday plantation is boarded by beautiful old trees and hedgerow which are impor environment. This bridleway is used by many walkers daily from the estate and many visiting recreational users.
899	5	The loss of this countryside amenity would be detrimental to the entire area. This land is of the same importance to us, and the wildlife as Dog kennel Planation.
899	6	Our 'local' shops which are sites off the estate are already busy. Additional housing will only cause increased pressure on these already busy and dangerous road junctions The main amenities e.g. supermarkets, shops, doctors and dentist are all situated in the town especially when Tesco moves. Access to the town is only practical by car and Congestion in and out of town will only increase therefore as a result of this development.
899	7	The junction between Ashes Park Avenue and Gateford Road is already dangerous due to heavy traffic levels. The increase in traffic levels on the estate will generally redu
899	8	This development will require detailed consideration as to the provision of schools and nurseries as we feel our schools are already too or over capacity.
899	9	I object to this planning proposal as I know there is also of wildlife in the proposed area. I know there are wild deer and at least two badger sets near this area. A lot of peo understand, the few people who are aware do not want to make this public knowledge, due to their habitant being disrupted. I feel that if these houses were built, all this

908	4	The area proposed is bordered by Owday Wood/Rough Piece and Owday Plantation which are sites of importance for nature conservation. The woodland is at present unt will cause significant disturbance to these valuable woodlands.
908	5	The area 'Gateford Hill Park' which includes Dog kennel Plantation is a mature landscaped area.
908	6	The public footpath/bridleway entering the area from Monford Road and stretching to Owday plantation is bordered by beautiful tree and hedgerows, which are important
908	7	This bridleway is used daily by many walkers, both from the estate and also by visiting recreational users. The loss of this countryside would be detrimental to the entire ar us, and the wildlife as Dog kennel Plantation.
908	8	Our local shops which are sited off the estate are already busy with traffic and virtually gridlocked at busy times, especially as one of the shops became an ASDA. Addition
908	9	these already busy and dangerous junctions leading in and out of the shopping areas. Our local schools (primary, secondary and school based nurseries) are already at capacity.
909		I wish to object strongly to the development of any additional houses at site 35 for the following reasons: A) Extension of town boundary and urban sprawl. The current Ga town boundary. Development on site 35 will, therefore extend beyond the boundary and there is a concern that Worksop will eventually consume Wallingwells and contin Lindrick.
909	2	B) Loss of amenity for children, residents and visitors. The proposed site is bordered by Owday Wood/Rough Piece and Owday Plantation, which are sites of importance fo present untouched by housing. Development on site 35 will cause significant disturbance to these valuable woodlands.
909	3	The public footpath/bridleway entering the area from Monford Road and stretching to Owday plantation is bordered by beautiful tree and hedgerows, which are importan The bridleway and footpaths are used daily by many walkers, both from the estate and also by visiting recreational users.
909	4	Development on this would result in a loss of amenity for local residents and would be detrimental to the entire area.
909	5	C) Loss of agricultural land. Agricultural land provides employment. Site 35 is productive agricultural land. It is currently being farmed, producing crops including wheat and
909	6	D) Access to shopping facilities our local shops which are sites off the estate are already busy with traffic and virtually gridlocked at busy times, which is a measure of their including the proposed new Asda and Tesco supermarkets, are sites closer to the town centre, and are impractical for access on foot from site 35. This will lead to increase
909	7	E) Access to healthcare provision. Access to healthcare provision is limited, with doctors and dentists being sites on the other side of town. Access on foot from site 35 is in to doctors and dentists when required are currently at full capacity. with the increased population of Worksop you cannot see a doctor under 3 weeks unless it is an emerge
909	8	F) Provision of utilities and services. Development on site 35 will require significant investment in infrastructure to meet the demands of the new housing development, as to the remote location of the site. Improvements would be needed to upgrade level of service provision due to increased demand.
910	1	I wish to object strongly to the development of any additional houses at site 35 for the following reasons: A) Extension of town boundary and urban sprawl. The current Ga town boundary. Development on site 35 will, therefore extend beyond the boundary and there is a concern that Worksop will eventually consume Wallingwells and contin Lindrick.
910	2	B) Loss of amenity for children, residents and visitors. The proposed site is bordered by Owday Wood/Rough Piece and Owday Plantation, which are sites of importance fo present untouched by housing. Development on site 35 will cause significant disturbance to these valuable woodlands.

Development on site 35 will require significant investment in infrastructure to meet the demands of the new housing development, as to the remote location of the site. Improvements would be needed to upgrade level of service provision due to increased demand.
911	9	We bought our house so it would be peaceful and away from built up areas, where we are is bang next to the new site, this would be horrendous for us to live next to, the
911	10	It would completely ruin where we live, are property would lose value, it would be too busy. Who would compensate the loss of our nice lands and where would we live? I consider not using this site.
912	1	I wish to object strongly to the development of any additional houses at site 35 for the following reasons: A) Extension of town boundary and urban sprawl. The current Ga town boundary. Development on site 35 will, therefore extend beyond the boundary and there is a concern that Worksop will eventually consume Wallingwells and contir Lindrick.
912	2	B) Loss of amenity for children, residents and visitors. The proposed site is bordered by Owday Wood/Rough Piece and Owday Plantation, which are sites of importance fo present untouched by housing. Development on site 35 will cause significant disturbance to these valuable woodlands.
912	3	The public footpath/bridleway entering the area from Monford Road and stretching to Owday plantation is bordered by beautiful tree and hedgerows, which are importan The bridleway and footpaths are used daily by many walkers, both from the estate and also by visiting recreational users.
912	4	Development on this would result in a loss of amenity for local residents and would be detrimental to the entire area.
912	5	C) Loss of agricultural land. Agricultural land provides employment. Site 35 is productive agricultural land. It is currently being farmed, producing crops including wheat and
912	6	D) Access to shopping facilities our local shops which are sites off the estate are already busy with traffic and virtually gridlocked at busy times, which is a measure of their including the proposed new Asda and Tesco supermarkets, are sites closer to the town centre, and are impractical for access on foot from site 35. This will lead to increase
912	7	E) Access to healthcare provision. Access to healthcare provision is limited, with doctors and dentists being sites on the other side of town. Access on foot from site 35 is ir to doctors and dentists when required are currently at full capacity. with the increased population of Worksop you cannot see a doctor under 3 weeks unless it is an emergence of the second
912	8	F) Provision of utilities and services. Development on site 35 will require significant investment in infrastructure to meet the demands of the new housing development, as to the remote location of the site. Improvements would be needed to upgrade level of service provision due to increased demand.
913	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
913	2	We disagree to any further development sites being allocated in this village on the basis that already a new estate of 68 houses has only recently commenced. We feel tha in a village of this size.
913	3	Taking into account the inevitable steady addition of houses being developed by existing house owners on their own land, there is no need to allow for the building of any
913	4	BAS0134 is a disused farm building in an area of particular rural beauty. We have no objections to seeing this developed into a single property, but to see this demolished i shame and would spoil the look and feel of the village.
913	5	In addition, this is a site that we have considered on a more personal level for purchasing, should it ever be available to buy, for the development of a village farm shop/ter such facilities in the village at the moment and we feel that there is a need here that we may be able to fulfil should the land be made available to us for such a use. In doir property entirely in keeping with its surrounding area and even, with the farm shop, bring it back to a working property.
913	6	BAS0135 is a more suitable site for development of maybe 2 or 3 houses as it nestles in between other properties and is off the main road and therefore less visible.
913	7	However, any more houses than that would impact on the amount of land around each with the surrounding houses in that area.

infrastructure compared to other areas that are more conducive to safe traffic areas.	g traffic before turning. Th wersely, traffic turning rig e is a slight kink in the roa
916 5 I believe that open spaces are a valuable and ecological asset to local community life and I would not like to see our villages or towns loosing their	r character.
916 6 I think it preferable to site in new locations, as this gives less concentration of clique mentality and allows the smaller sites to be accepted more r	eadily by the community.
916 7 I believe they should be sited together. As it has been widely known that travelling pitches are left in a bad/unkempt state, residential sites may l tend to deal their own kind better than the Council would ever succeed in doing.	
917 1 l agree with the criteria used.	
917 2 Worksop should not be developed as an overspill site for surrounding towns and cities. There are already empty industrial units around the town	n, so why do we need mor
existing Worksop population, with a maximum of 600 new houses.	
917 3 If Housing is needed it should be built on sites 39/W10 and site 28/W6 as these sites are close to existing employment areas.	
917 4 future employment sites should be 39/W10 and 28/W6	
917 5 1 would support the allocation of mixed use sites 39/W10 and 28/W6 as these are close to existing mixed use sites, and already have the majorit	y of infra-structure neede
917 6 all the existing open spaces should be protected as amenities for the town.	
917 7 I agree with this feedback. If development is necessary it should be done close to existing mixed use sites, on sites 39/W10 and 28/W9	
917 8 I do not agree to the development of site 4/W9 as this is greenfield land and has no existing infra-structure.	
917 9 Option A: Spread between Worksop; Retford and Harworth Bircotes?	
917 10 REMOVED	
917 11 Transit and residential pitches should be sited together. this would keep any potential problems at one place	
918 1 I believe that location 35 is not suitable	
918 2 Option A: Spread between Worksop; Retford and Harworth Bircotes?	
919 1 Yes but believe that more prominence should be given to Heritage Assets Protected areas and flora/fauna, ancient woodlands and local nature r	eserves when they in area

919		4, 28 w13
919	5	option 2 it is more balanced to employment needs in current and likely future climate
919	6	Yes particularly areas 70 around shireoaks and also believe part of area 218 which is currently part of Coachwood green should be added. As treasurer of Woodlands and wholeheartedly support their aims to preserve this natural asset and further develop the adjacent Marina site.
919	7	The current areas of coach wood green currently in are 218 particularly the woodlands should be added to 70/8
919	8	Yes wholeheartedly particularly the need for a restaurant adjacent to Marina and near village to capture future canal traffic and cuckoo way walkers and cyclists on NR6
919	9	Option A: Spread between Worksop; Retford and Harworth Bircotes?
919	10	Use existing
919	11	Together
920	1	Yes
920	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
920	3	I think East Markham could support more housing, especially if they were smaller developments with mid range housing.
		Building houses on larger plots increases the volume of traffic moving in and out of those areas. Houses on plots that would perhaps allow privately owned vehicles to par
920	4	roads through the village although many people park on the road even if they do have a drive to park on
920	5	Sites 491 & 523 with less through traffic along the road to the front of these plots, also there is no footpath to cross when entering and leaving the site.
920	6	No
920	7	Yes
920	8	REMOVED
920	9	No idea what impact these pitches have on the community if provided together or separately
920	10	No
921	1	Harworth and Bircotes. I am a landowner of some of the plots named in the LDF, these are plots 207,205,193 (part) and I am a tenant farmer on plots 193 (other part), 18
921	2	I feel that the further development of the town will provide more affordable housing for younger people starting on the property ladder, bring more security to our local s
521	-	especially with the much needed facelift to the Scrooby Road shopping area.
921	3	I would like several of my plots actively considered for planning, these are 205, 207 and 193 (part) however I do have some concerns about development on a couple of or
921	4	I the Landowner actively want to sell plots 205, 207 and 193 (part)
921	5	205,206,358,359 are all flat green sites so no demolition would be required they are ready to go with respect to building.
921	6	Plots 205, 358, 359- would be a natural extension to the pre-existing Common Lane housing area with these plots being edge of town farmland. There is excellent access t
		boundary with the A1 around the far perimeter of these sites.
921	7	Plot 207 is also edge of town farmland and would provide a natural extension to an established row of houses. Again being situated on the main road through the village is not used by
		natural boundary to the village at the far end of this plot, created by the railway line. Plots 207, 206,205, 359, 358 provide low grade agricultural land, and are only suitable for growing wheat/ barley, which are low price crops. Whereas plots 182, 194, 187,
921	8	used to grow carrots etc. high value crops as they have excellent irrigation systems in place
		On plots 205, 358, 359 we have on going issues with people fly tipping, dumping garden waste and household waste in the fields as fields are unused. Building on these plots and household waste in the fields as fields are unused.
921	9	consuming job of clearing up after fly tippers.
921	10	Obviously we make our living farming we own some land however we have been tenant farmers on plots 193(part) and 180 since 1895. If building was approved on these faming rights over this land which is owned by the church. This would have a detrimental effect on farm income. We have invested a large amount of money in last 2 year more money was invested in 193 (part) field to ensure the public right of way was maintained in accordance to what Bassetlaw Council (James Russ) Area Rights of Way C villagers enjoyment. This cost us approximately £5,000. Having been a Tennant Farming family on this land for over 100 years I feel our interest and business deserves to I to put a negative burden on our farm when at the consultation meeting at the Blacksmiths Arms on January 24 2012, it was announced that the new to open ASDA had be newsagent and pharmacy in order to protect pre-existing businesses in the village, surely a precedent has been set and our long standing business must be protected too.
921	11	Plot 193 is actually 2 parts with different owners so will need re-identifying on the Issues and Options Consultation Paper map.

921	12	We already experience flooding around the Main Street area as the drains are not large enough to cope currently. So any further residential development north of this are plots 182, 194, 192
921	13	There is a large local equestrian community, however hacking on the local roads is already dangerous with DHL lorries speeding up Tickhill road, and Boy racers from Bircc distinct lack of Bridleways in this area- the old railway line could be converted into a fantastic Bridleway which would also allow the local community to walk dogs safely ar
921	14	A new Public house in Bircotes to stop the stream of drunks from Bircotes to the Blacksmith arms on an evening.
921	15	Main Street, Harworth including the crossroads has severe flooding after 12 years of heavy rain and after 20 minutes of thunderstorm rain. I have lived in this flood plain fu house and lifted it almost 2 meters to escape the flood water. The reason for this flooding is because the surface water drain is inadequate and the Harworth dyke which f nay more water from further housing developments without extensive widening and depending as far as the River Torne. The flooding has increased in recent years owing creating hard standings n gardens for cars. It is vital that future development does not have its water discharging into any drain or culvert which conveys water under Mair conveyed to the River Idle – east of Bircotes or to the Willoughby Dyke which flows South West of the A1M and which has the capacity for taking further water.
921	16	Regarding further housing development to the north and east of Harworth/Bircotes – plots 182, 194, 187and 191 - this area is prime agricultural land capable of growing e carrots and brassicas, due to the large fields and underground irrigation and should not be built upon.
921	17	The western side of plot 182 is totally unacceptable for housing development due to the close proximity of Harworth Sewage Works. Various improvements and modernis failed to stem the stench.
921	1 18	Plots 180 and 204 are the site of the ancient settlement of Harworth where foundations still remain. This site should be listed as a site of "special archaeological interest". field in an attractive and pleasant position and building here would have a great impact on public visual amenity.
921	19	The Western end of lot 193 is a grass paddock where horses and cattle graze. There is a public right of way running diagonally across this field. To build houses here would public including residents and families with children who regularly walk here and enjoy the flora and fauna of the only grass field with a public right of way across it in Harv
921	20	Plot 190 is the field which has a Spoil Heap from the Colliery. For 40 years residents and visitors to the area have had to look at this eyesore. The panting of trees and shrul peasant environment. It would be detrimental to the people of Harworth and Bircotes to lose this ecological habitats and landscapes in favour of house building.
921	21	With regard to the number of houses required to be built, in my opinion is that planning permission be granted in the west of the village in the past the majority of the devented the eats. Housing to the West would provide a better balance, plots 358, 359, 205, 206 and 181. I the surface water from such a development would drain into the Willoug are small fields and uneconomic to farm with modern machinery making it ideal for housing development.
921	22	Further housing ought to be infilling within the natural boundary of the village – plots 184, 185, 186 and 188 and the eastern end of 193. All the surface water from these p flooding Harworth village.
921	23	Plot 192 is poor scrubland and should be considered for house building to make up for the number of houses required.
921	24	All the potential protected open spaces coloured green on the map should be retained. I believe the land to the south of the village should be used for industrial land not r
		nearest Blyth roundabout should be for storage and distribution and the plots adjacent to the old Glass Bulbs for Industry and employment.
921	25	The land to the North of plot 190 adjacent to Scrooby Road is the site of the Old Brickworks in Harworth (photographs enclosed), I am surprised that this is at the advanced when I was young I remember deep ponds where clay had been taken out. In the years between 1940 and 1955 these deep ponds were then filled in with household refuse brickyard house and kilns were buried underneath this rubbish in places up to 20ft deep. I fail to see how this site could be suitable for any building planning permission is house on this site at any price.
922	1	This question is pointless, it is evident that countless council officers have spent countless hours costing thousands in council tax churning out jargon and acronyms to cove put off and will not read further: maybe this was the intention? Why not just state that the council is required to produce an area development plan and that matters A, B
922	2	No: the infrastructure of the town is already at breaking point, with traffic problems and capacity problems in local services such as schools. What overall benefit is there two would be out of the area, generating more traffic on an already crippled road system.
922	3	prefer sites 7,512 and 37 as well as small infill sites such as 10,70,71,342
922	4	Brownfield Sites
922	5	The problem with mixed use sites is that the employment available is unlikely to be taken up by the immediate residents, so more traffic generated and does not fit the 'g
922	6	Many of the proposed sites would potentially be affected by flooding (especially refs 511, 370, 3, 1, 52, 40) and further development of these sites would lead to greater in there would be less open surface for drainage.
922	7	The local infrastructure (especially Bracken Lane/ Grove Coach Road) is inadequate for the current levels of traffic generated by school drop off/pick up and would be tota residential access traffic.

922	8	There is no surplus capacity at Bracken Lane School - where is envisaged that all the children living in the proposed housing will be schooled? And what about the resultan
922	9	Sufficient thought also needs to be given to proposed density/parking and garaging - the recent trend for high density 3 storey houses on narrow roads with no frontage a problems in Retford (see Albert Road - cars parked on both sides of the road yet somehow double decker buses and other traffic is expected to navigate this hazard)
922	10	Priority should be given to the development of brownfield sites and infill sites, where the overall appearance would be enhanced by new development replacing run down infrastructure is already in place.
922	11	How much extra council tax does the council expect to generate from the proposed developments and how does it propose these monies will be spent? Will any of this be expect a reduction on council tax as fixed costs are spread over a larger number of council tax payers?
922	12	I believe Retford enjoys good local open spaces and these should be preserved.
922	13	Option A: Spread between Worksop; Retford and Harworth Bircotes?
922	14	No new locations to ensure no further residents are inconvenienced or areas blighted.
922	15	Together in order that fewer areas affected
923	1	Notification to residents in Harworth & Bircotes should have been done back in November 2011 by a house to house leaflet drop and a meeting back in November or Dece deadline date. We have round 25 houses on Milne Road and not one person was aware of the proposed plans. Hidden Political agenda???????? Treat the residents of Ha
923	2	In Bircotes around the Milne Road area there have been 38 houses on the market for over a year. In total you can drive round the whole area and count 68 for sale boards coal mining land why not upgrade the rabbit warren in Harworth before building more new builds.
923	3	Employment growth if you must but can we keep the aesthetic appearance of the country side which is why many people move into the area away from the cities.
923	4	None of it really but in order of preference 193. 204 180 358 204 232 359 205 181 206 207 190
923	5	H6
923	6	Leisure and retail would bring money into the area from surrounding areas and would be of benefit.
022	7	In and around area 187 which you have proposed for housing there are 3 underground streams 2 of which are piped into the current fields. When we get heavy rain a lot
923		torrential rain it floods down the hill over Bawtry Road.
	8	For the whole project you mention the infrastructure in respect of road network, sewage etc. But we are in the 21stCentury and since the new houses have gone up in Har
923		communication network is better in the outback's of Australia than it is in Harworth and Bircotes. If you want somewhere to develop bring the current up to date with tecl
923		into the 21st Century.
923	9	Also this area is a corridor of wildlife, adders, Greater spotted woodpeckers, yellow hammers, owls, deer, hare's and large birds of prey are to just name a few.
923	10	If anything needs doing to area 187 it would benefit the ground stability and the area to turn it back into woodland.
923	11	Option A: Spread between Worksop; Retford and Harworth Bircotes?
923	12	Specify? Sites run by the local council with liaison officers or permission for privately run sites? Be more specific as to who the sites are for - one group of Gypsy's will not n group of travellers.
923	13	together or separately - see above response
923	14	Wherever the sites are located with the different lifestyle to those of established residential areas the sites should be located to avoid site residents being intimidated by the sites should be located to avoid site residents being intimidated by the sites should be located to avoid site residents being intimidated by the sites should be located to avoid site residents being intimidated by the sites should be
924	1	Option A
924	2	I agree that there should be land allocated for 9 houses but no more than that number.
924	3	I couldn't pull up the map. I would prefer a SMALL infill development policy but if that is not practical then land at the top of Spital Road after the Old Police House.
924	4	I am greatly concerned about the capacity of the sewers in Blyth. When it rains heavily water is seen to pour OUT of the manhole covers on Ryton Fields.
924	5	I also have concerns as to how the electricity supply would be affected given that we have frequent power cuts.
924	6	A public footpath runs through 1 of the fields marked and the exits of 2 of the fields, either side of the A1 flyover is extremely dangerous.
924	7	A large development would affect the intrinsic quality of this unique and historic village.
924	8	I agree that the few open spaces in Blyth should be protected.
924	9	Definitely not
924	10	Together to minimise disruption and dis-satisfaction within the district.
924		None known
925	1	Option A
925	2	Only 9 houses as any more would spoil the village. At the council meeting it was suggested that low cost housing should be provided for young people to buy in Blyth.

		I am a young person and I would not buy here because you MUST have a car, you can't go out anywhere large unless you can afford a taxi home. I don't think the planners
925	4	The site near the motor way junction up Spital Road.
525	5	The infrastructure of the village could not cope with any more houses and cars. Already the traffic as a big problem especially the lorries which use the village as a short cu
925	6	The character of a relatively small and clearly defined village would be altered should there be large development.
925	7	We often have power cuts and I doubt the electricity supply could cope. Broadband provision is already pathetic.
925	8	There a so few designated open spaces in Blyth that they should be protected at all cost.
925	9	Existing sites. I don't see why you should spoil anymore areas
925	10	Together and keep them in one place.
925		None Known
926	1	Site 8 the back of Westerdale. The following issues need to be considered. Any 2 or 3 storey buildings will significantly reduce the light available to current housing.
926	2	The effect on current soak away drainage will damage current facility and cost to householders.
926	3	The prevailing wind direction is South West and therefore all properties currently on site will be adversely affected during the many years of development causing potentia
		inconvenience in terms of quality of life including air damage to clothing, gardens and other personal assets.
926	4	Destroying the wooded area and hedgerows will significantly damage the wildlife and specific plant life.
926	5	The value of existing properties will be adversely affected whatever style of housing is built on the site.
926	6	Site 8 is not appropriate for housing development when compared with a number of other sites that will not cause such major dismay to current householders.
926	7	Leave site 8 as agricultural land or develop the wooded area and surround as an area for sedentary leisure
926	8	Focused in just one of the above towns?
926	9	Existing sites
926	10	Together
927	1	Yes but you still appear to have included areas that suffer from flooding despite this being one of the things you list as being why you would exclude an area!
927	2	Areas 511 & 379 flood with surface water from the higher ground nearby
927	3	I do no think we need any more housing other than the suggested amount. Retford desperately needs employers to come into town too much former employment land have jobs.
927	4	I would prefer to see housing development on sites 40, 52, 1, 37 41 27. As far as I am aware these areas have no flooding problems, have roads that would appear to cope
927	5	I strongly object to the areas 511, 370, 489, 488 & 69 being included in the consultation as for much of the year the land is sodden as the fields take the surface water from
		extreme weather gardens off Grove Coach Road, Bracken Lane, St Helens & St Stephens have flooded including some houses.
927	6	Planning has been declined before (1995) in this area flooding problems being one of the reasons why it was rejected?
927	7	I would like to see employment land to be developed on the outskirts of the town and feel development could be made to the north and south.
927		Site 10 should remain employment land and not be turned into housing.
927	9	No preference
927	10	Retford suffers from gridlock at peak times, has some kind of ring road ever been considered to help development in future years?
		If you wished to engage the whole population in this consultation then you should have issued letters to each household in the District, not everyone reads the Retford Times and the restored to the restored
927	11	FM. Your document is cumbersome and I fear some people would have given up after 2 pages, believe it or not there are still lots of households who do not have a computer of the second
		elderly residents.
927	12	Green areas in the town should be protected particularly Kings Park and all current playing/leisure areas.
927	13	Option A: Spread between Worksop; Retford and Harworth Bircotes?
927	14	I think they should, it would make economic sense the services are currently there and would not have to be provided in any new designated area.
927	15	Why not together reasons as before economic, cheaper to provide.
928	1	I am sorry, I do not understand the question you are asking - this question does not make any sense to me. I do not find this questionnaire very user friendly.
928	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
928	3	I agree that any new houses built in Gringley on the Hill should be detached dwellings with gardens, in keeping with the village character, unlike the housing estate placed be more in place in suburbia.
928	4	I am in favour of individual dwellings but not in favour of housing estates.

ers have got that bit right at all.

030	-	I think either site has potential but these sites should not then exclude the tasteful build of a property somewhere else, so these sites should not take up all of the numbe
928	5	together.
		The new housing estate on the detention centre site has vastly too many houses on it and would be better placed in a town. The houses have no gardens, I have already s
928	6	Planning has just been passed for Pollybell Farms on the basis that all their articulated lorries use this once quiet road. So you see our village is pretty much spoiled now. S
		play, dogs, litter, and people move here still thinking it is a quiet place to be.
928	7	Yes, I think the open spaces marked on the map should be protected.
928	8	I think gypsy sites should stay in existing sites because they destroy wherever they go.
928	9	Lets keep them all together, then they can fall out with themselves not everyone else.
928	10	I am not aware of any.
929	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
929		Yes, and some low cost housing for younger people
929	3	165 and 164 are most suitable, but sites near to main street do flood.
929	4	The village green and play area need to be protected.
930	1	Yes
930	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
930	3	Yes at least 14
930	4	280 is my preferred site for development.
930	5	Site near to the centre of the village flood.
930		the village green spaces should be preserved.
930	7	Existing sites
930		Separately
931	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
931		No, Sutton has seen enough new housing over the past few years.
931	3	No sites should be allocated for housing
931	4	The village has over 10 properties for sale.
931		Yes, I agree with the above
931		Existing sites in Worksop. Daneshill site should be improved.
931		Separately. Different gypsy cultures do not mix well.
932	1	Yes
932	2	Yes, town has significant issues that need addressing. I support the aim to regenerate Harworth. The new development at the colliery is a benefit. The town does need mo
		accommodate the expansion.
932		162 and 168 would be natural extensions to Harworth
932	4	The sites nearest to the Town so that people can walk to work. An increased bus service would also help.
932	5	I would support further retail development.
932		No development should occur around any of the towns woodlands.
932	7	These need to be improved but also should be protected.
932		Option A: Spread between Worksop; Retford and Harworth Bircotes?
932	9	Existing sites.
932	-	None
933	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
933	2	Yes over an 18 year period, this does not seem high at all.
933	3	Site 237 would be suitable for a small extension
933	4	The road network in Wheatley is not suitable for a large development, but should support 12 new houses.
933	5	Yes the village hall and school should be protected.
934	1	Yes
934	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
934	3	No, we believe the detention centre development will be enough new housing for Gringley.

bers, by cramming too many houses too close
y seen children playing on the road outside it. . So many extra cars, children with nowhere to
more shore and a improved laisure contro to
more shops and a improved leisure centre to

Responde	-	Answer
nt	nt	
934	4	No other sites should be developed.
934	5	Roads will struggle to take all new traffic from the detention centre site, so anymore would put further pressure on the roads.
934	6	Yes, the village recreation ground should be protected.
935	1	I think location 35 is unsuitable because it will mean a loss of privacy for residents living directly in front of site 35 because the land is significantly raised.
935	2	The traffic generation will increase to a dangerous level as traffic is already extremely congested at peak times on this estate.
935	3	In particular, the Ashes Park entrance junction is heavily congested at times and would need the installation of traffic lights to cope with the added pressure a new estate v
935	4	There are currently established hedgerows running alongside the boundary of site 35. The removal of this hedgerow would mean a loss of habitat for wildlife and also dam hedgerow needs yearly maintenance, which is currently carried out by residents who would lose access if this development were to go ahead.
935	5	There is an inadequate infrastructure to support this development as the local shops and schools are already over-capacitated.
935	6	If this development were to go ahead this would need to be addressed to maintain an adequate quality of living for residents. We feel the open space has a vital role to prothe existing community. It would mean a significant loss of amenity for residents who use this open space daily. For example, dog walking and running to name a few.
935	7	We feel that site 4 & W9 is in a better suited location for any forthcoming development as it is a much larger area of land and it would not interrupt the lifestyle of as many
935	8	I think that site 35 should be protected from future development proposals because it is a valuable open space used by the local community. Any development on this site for residents.
935	9	Option A.
935	10	This development will encroach on the dividing land between Worksop and Carlton in Lindrick and Wallingwells. This will only further contribute to the 'urban sprawl' and further.
935	11	The area proposed in productive agricultural land farming wheat and oilseed rape, agricultural land provides employment which will be lost as a result of this development
935	12	The area proposed is bordered by Owday Wood/Rough Piece and Owday Plantation which are sites of importance for nature conservation. The woodland is at present unt will cause significant disturbance to these valuable woodlands. The area 'Gateford Hill Park' which includes Dog kennel Plantation is a mature landscaped area.
935	13	The public footpath/bridleway entering the area from Montford Road and stretching to Owday plantation is boarded by beautiful old trees and hedgerow which are impor environment. This bridleway is used by many walkers daily from the estate and many visiting recreational users.
935	14	The loss of this countryside amenity would be detrimental to the entire area. This land is of the same importance to us, and the wildlife as Dog kennel Planation.
935	15	Our 'local' shops which are sites off the estate are already busy. Additional housing will only cause increased pressure on these already busy and dangerous road junctions The main amenities e.g. supermarkets, shops, doctors and dentist are all situated in the town especially when Tesco moves. Access to the town is only practical by car and Congestion in and out of town will only increase therefore as a result of this development.
935	16	The junction between Ashes Park Avenue and Gateford Road is already dangerous due to heavy traffic levels. The increase in traffic levels on the estate will generally reduced
935	17	This development will require detailed consideration as to the provision of schools and nurseries as we feel our schools are already too or over capacity.
936	1	I agree with the criteria but don't know how it was implemented. Was it a group of self interested parties or a group of unbiased people. Who were/are they?
936	2	This is asking for my belief (what ever that is supposed to mean) without giving details of the benefits and who will benefit.
936	3	Since Area 35 is close to me I will make comment. I'm not for or against development of this area. Because Gateford is mainly residential it would make more sense to use
936	4	If this is to be the case, I would ask that access roads do not link up to those immediately south (i.e. Gateford)as this would change them from quiet dead ends into busy th not connected, that is how they should stay.
936	5	The telephone service in my area for Internet access (speed)is very poor. If a development does take place this would be an opportunity to upgrade telephone network thi residents would benefit.
936	5	Gypsies should be welcomed anywhere, so long as they abide by the same planning rules as everyone else.
936	6	No preference most seem appropriate
936	7	No preference most seem appropriate
936	8	Yes most if not all of these are within residential areas and it is important to preserve the setting of these residences.
936	9	Other that poor internet speed in Gateford and I believe from what other people have told me in other areas too.
936	10	If "feedback" is the Bassetlaw Local Development Framework document then yes from my perspective it seems very appropriate.
936	11	Option A: Spread between Worksop; Retford and Harworth Bircotes?
936	12	I do not know where the current sites are so cannot really make comment.

936	13	Yes If they are together I can see transit areas becoming residential.
937	1	Unsure what this means?
937	2	No I feel that we should still within the existing allocations.
027	2	I would prefer the sites numbers 45 & 371 & 26 to be developed. This allows Shireoaks to retain the village feel , whilst still providing extra housing. A57 would take the m
937	3	traffic through the village.
937	4	w13
937	5	28 & w6 because the majority of traffic to this could via the A57 ,without impacting on the village of Shireoaks.
937	6	Using 195, 343 & w5 would drastically change the environment which is currently open fields and green space . Adversely affect the feel of the village ,611 houses put ther
937	7	The road to the village could not support the level of traffic this size of development would create.
937	8	Yes , they should be protected. I feel that none of the open spaces identified should be used in future development it is vital to protect the 'country feel' to the area of Shi after years of pollution etc. caused by the colliery. The Cornwall Road estate as many young families and elderly people and the open spaces create a much better area for
937	9	Much more could be made of the Chesterfield canal and the Marina in Shireoaks, there is ample space for car parking and maybe a pub/restaurant would encourage mor
937	10	Please consider the loss of the sites that you are proposing, and consider in particular what the impact of building 611 houses on the edge of an historical village like Shired
937	11	Yes
937	12	Option A: Spread between Worksop; Retford and Harworth Bircotes?
937	13	In and around existing sites.
937	14	Together.
937	15	no
938	1 1	Re screening criteria for 'Preferred options stage' criteria 3 has title including 'economic development opportunities' but the detailed narrative talks about employment lar new Employment this should be specified. i.e. Economic development does not always equate to employment
938	2	Identified and unresolved constraints'. How do Residents see what has already been noted/discussed between Promoter's of a Site and the Council. It will be in the Promo
		and understate scale of resolution. How does the criteria ensure All constraints are captured, including those proposed by Residents?
938	3	'Facilities of value to the community'. How do the criteria allow Residents to assess the value of these, against the impact on them of a proposed Site development, and th
938	5	resolve the constraint. How does the criteria allow for measuring possible impact on some residents of a development near them, against the benefits for other people in
938	4	A fundamental part of this criteria should be full visibility of all possible constraints, plans to resolve, facilities of value being offered by the Promoter/Developer
		No. The Town should take it's equitable share of Bassetlaw's requirement, as should all other rural centres and surrounding villages. Rural centres / other centres should n
938	5	proposed for them, as expense of Retford Town taking it.
938		Sites 364, 41. Have better access to/from main road network (A1), and to secondary school/post16. Avoids further congestion crossing Town centre/use of Arlington Way
938	7	Sites 51,571, 572; Have better access to/from main road network (A1), and to secondary school/post 16. Avoids further congestion crossing Town centre/use of Arlington
938	8	Sites 1,52, Have better access to/from main road network (A1), and to secondary school/post 16. Avoids further congestion crossing Town centre/use of Arlington Way
938	9	51/571/572/R6: Land northwest of Retford; access to main routes without crossing Town centre/Arlington Way. Site 41, 53 & 364; access to main routes without crossing
938	10	51/571/572/R6, 41, 53 & 364. Benefit of mixed Sites is that housing provided in same location as new employment
938	11	I would not want to see any further housing development that needs access to/from London Road. This road (and access to it)is already heavily congested at peak times d Retford, school journeys to schools on north side of Retford, and those wanting to work in the town centre. Closure of the A1 northbound south of Retford bring traffic do
938	12	Open spaces should not be permanently protected unless they are properly maintained as such; e.g. Kings Park, Oakland's playing fields. Other 'waste-land' spaces should l each time further development has to be looked. Open spaces being farm/agricultural land are just as important to some residents.
938	13	Assuming this questions relates to 'Opportunity sites' 24 & 44: Land east of Retford. They should be developed if there are community benefits, and the financial cost born justifiable. I have not specific development in mind
026	1.1	
938	14	Option A: Spread between Worksop; Retford and Harworth Bircotes?
938		Concentrate on existing Sites. Allows these communities to concentrate together, and any council services to be concentrated (not duplicated/replicated for several location). Provide together; Allows these communities to concentrate together, and any council services to be concentrated (not duplicated/replicated for several locations). However

		I also wanted to raise my concerns about potential sites 3, 370 and 511. Any potential sites (which I expect would include these) that need access to/from London Road in
938	17	Road, or further south of these, would add even more congestion to traffic using London Road. and real difficulty exiting Bracken Lane/Grove Coach Road.
938		In addition, potential site 370 has suffered from significant flooding.
020	1	Yes i do believe in growth(housing and employment). But where there is future developments (housing) you must include better facilities, not like the Gateford developmen
939	1	do.
939	2	I think location 35 is unsuitable
939	3	Gateford estate 1999- Council tax money received ????? Facilities Zero. Location 35 Council tax money ?????? Facilities ????????????
939	4	Option A: Spread between Worksop; Retford and Harworth Bircotes?
940	1	I do not think that Worksop should be allocated more housing. There is not enough employment within the Worksop area for the current population of Worksop and mo
		worse. Under the current economic climate employment is unlikely to increase. Therefore negate the need for more housing in Worksop.
940		none
940		Any sites that are to be used for employment should not be allocated near any housing
940	4	none
940	5	Yes, there should be protected open spaces between Worksop and other surrounding towns and villages, in order to keep individual identities. Farm land, fields and wood
		separate.
940	6	In particular I do not agree with any further housing being allocated to the back of the St Annes Estate off Mansfield Road, Worksop (I understand this is proposed site nur
		There are already problems with access/exit to the St Annes Estate. A regular build up of traffic trying to leave the estate via the two exists, one onto the roundabout and
940	7	are regular queue's of traffic all the way up Mansfield Road to get into Worksop. Building more properties here would only cause more congestion.
940		There would also be an effect on the current wildlife within this area.
940		In general there is not sufficient local amenities such as schools, health centres, hospitals etc. to accommodate for anymore housing in Worksop.
940	10	Option A: Spread between Worksop; Retford and Harworth Bircotes?
940		none
		I would like to disagree with the categorization within Criterion 4. Criterion 4 states that 'consequently this assessment will consider all grade 3 sites as being of the same
941	1	automatically grouped with grade 3or4? Is it not as easily rewritten to show grade 3 sites in the same class as 1&2?
941	2	I believe the numbers to be correct if not higher than necessary.
941	3	I would like to disagree with the proposal to develop any housing on site 35. I have written a letter to discuss this in more detail.
941	4	I am not in a position to know the details behind any other sites proposed and therefore am unwilling to make any suggestions.
941	5	I personally know of no objection to sites W12 & W1 - it seems reasonable to develop these area's for further industrial use.
941	6	I have no comment
		Parts of area 35 are designated as a 'mature landscaped area'. Owday Woods, rough Piece and Owday plantation are sites of importance for nature conservation. Many pe

942	5	Areas which already support employment, e.g. there are un-utilised areas within Ordsall and the north of the town has already become an area for employment developm
942	6	The importance of open spaces should not be under estimated, they add to the character of a place and foster calmer environments for living (i.e. dissipate the tensions the tensions the tensions the tensions the tension of a place and foster calmer environments for living (i.e. dissipate the tensions the tensions the tensions the tensions the tension of a place and foster calmer environments for living (i.e. dissipate the tensions the tensions the tension of a place and foster calmer environments for living (i.e. dissipate the tensions the tensions the tension of a place and foster calmer environments for living (i.e. dissipate the tensions the tension of a place and foster calmer environments for living (i.e. dissipate the tension of a place and tension of a
		close proximity to one another or too many dwellings in one development)
942	7	Retford cannot support any significant growth for the reasons stated above. If it becomes much larger it will lose its character as a market town
942		Option B
942	9	It would make sense to link them to existing sites where appropriate facilities already exist
942		Separately, the needs of each are different
943		The criteria in the Screening Methodology is agreed.
943	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
943	3	It is not agreed that 13 new houses would be sufficient for a village of some 327 dwellings, located so close to Bawtry. Over the last 10 years or so, both public houses have
		the local Post Office still remains, it only does so, whilst remaining on the open market. Site 423 on the western fringe of the village is considered suitable since, it could be argued, it would not conflict with emerging National Planning Policy, would not cause of
943	4	privacy to the locality
943	5	with excellent visibility on Thorpe Lane create no adverse traffic issues.
943	6	Equally, development of this open grassland site, would not impact on land most valuable for agricultural purposes.
943	7	Part of the site remains at risk from the River Idle, and identified as being within Flood Zone 2, however, the majority of the site is suitable for development.
	_	The site is bounded on the Thorpe Lane frontage by hedgerow, however, there are no trees on the site. The hedgerow would be retained along the frontage, severed only
943	8	from Thorpe Lane.
		It is anticipated that natural habitat will remain almost unaffected by a development of this site. A significant length of the site's north/north eastern boundary, bounds the
943	9	of the site which bounds the Idle, lies within Flood Zone 2, these factors virtually ensure the preservation of the natural habitat.
042	10	Should a limited development be permitted, whilst taking into consideration housing needs of the local community, the site would easily accommodate frontage developn
943	10	adjacent, on the Thorpe Lane frontage.
943	11	There are no Listed Buildings within this locality, which is also not within a Conservation Area, and as a result, development of this site, would therefore be compatible wit
943	12	No.
943	13	It is considered that the open space identified on the Mattersey Village Map should be protected. The sites have remained as such, for many years, and therefore form a v
	14	New Gypsy and Traveller sites should be concentrated in and around existing sites. Gypsies and travellers tend to cling to their natural habitat, so to speak, and where sites
943		has always been to extend those sites, if land space permits. That way, where local communities have always been aware, and accepted the presence of such sites, extensi
		not created too much concern.
943	15	Creation of new sites, always causes concern and conflict between local authorities, prospective residents, and local communities, and is rarely successful. Gypsies and tra-
945	15	kind, or people of similar backgrounds, rather than be "parachuted" into areas where they do not feel welcome.
943	16	Transit and residential pitches, sited together, do not work. Two different cultures exist, whereby "transit people" are usually on the move, and "residential people" look to
545	10	roots down and guiding their children through local schools. The two communities rarely mix.
943	17	Whilst unaware of potential sites, the response to Question 2 is particularly relevant.
943	18	The village is in need of a new lease of life, and it is considered an injection of at least 10% of the current number (327) of dwellings would revitalize the community.
944	1	Yes, the Screening Methodology criteria is acceptable.
944	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
044		The 4 house minimum allocation feedback appears inadequate. Sutton-cum-Lound provides a valuable and attractive contribution to the Bassetlaw region, and it's location
944	2	it even more important. With travel distance short, it is easy to commute, and whilst not everyone wishes to reside in a town, a moderate increase in population can only
		With some 319 houses in the village, an increase of 10%, say 32 dwellings, would not adversely impact on the community, as long as they catered for appropriate current o

944	5	Site 536 is chosen as probably the most suitable for development of some of those 32 dwellings. The Council's Final Assessment comment suggested as such, although it c relative to "the very narrow margin fronting the site and adjacent plot boundaries". However, it is pointed out that the owners of the site, who have considered developm always being to include their residence, Hawksley Farm house and outbuildings, to which site 536 is attached, as a development site. Combination of the two sites almost something which hadn't been envisaged by Planners when originally considered. As a result, the overall site could be serviced and accessed satisfactorily to Notts County C more houses to be built than the maximum of five off a private drive, referred to in Council documentation.
944	6	The site's favourable location within the built form of Sutton, makes it ideal for new development in the village. It is virtually surrounded by housing, the exception being t Ground on the northern boundary.
944		It is therefore considered the site, through it's ideal location and attributes is more than ideal for development, and similarly, Site 275 could be considered for the balance increase of 32 dwellings, overall.
944		No
944	9	Every settlement needs areas of open space. Sutton is fortunate in that it is located in the middle of attractive countryside. Little, new, protected open space provision is p result, however, what little exists, ought to be protected.
944	10	Without doubt, Gypsy and Traveller sites should be concentrated in and around existing sites. Gypsies and travellers tend to cling to their natural habitat, so to speak,, and sensible option has always been to extend those sites, subject to land availability. In this way, where local communities have always been aware, and acceptable, of such s permit, does not usually create too much of a problem.
944	1 11 1	However, whilst creation of new sites generally causes concern and conflict between local authorities, prospective residents, and local communities, and negotiations are generally prefer to mix with their own kind, or at least, people of similar backgrounds, rather than be "parachuted" into environments where they feel unwelcome and une
944	12	Transit and residential pitches, sited together, do not work. Two different cultures exist, "transit" people are frequently on the move, whereby "residential" people look to their children, and becoming part of the community. The two cultures do not mix easily.
944	13	Potential site locations are rare, however the above response to Question 121 is relevant.
945	1	The screening criterion do not appear to take into consideration the impact on 1) amenity impacts on existing residents / built environment, 2) the capacity of the local roa safety of the local community e.g. significant increase in traffic flows past schools. These aspects should be considered as a minimum as part of Criterion 7: Will the develo built character of the settlement or neighbourhood?
945	2	No - development should be proportionate to growth
945	3	Sites 1, 52, 40, 41 and 364
945	4	10, 70, 71
945	5	Separate allocations as this will aide the development of communities in housing developments and provide accessible employment opportunities for all at other sites
945	6	Impact on existing population appears to have been omitted from considerations.
945	7	Yes
945	8	Option A: Spread between Worksop; Retford and Harworth Bircotes?
945	9	Concentrated around existing sites as facilities and assessment of impact on local communities are already in place.
946	1	Yes
946	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
946	3	Yes, we agree with the figure of 15 new houses in N Leverton
946	4	164 and 165 are the most appropriate sites for housing
946	5	Yes, the play park should be kept.
947	1	Yes I feel the town would benefit from further development, including affordable housing to help people get on the property ladder. By Developing the area we would see
947	2	more jobs in the area it can only be a positive move for the town. 207, 206,205, 359, 358 I have chosen these sites for development as they are currently an eye sore- I am appalled by the amount of rubbish that I have seen people dump
		see them developed and put to a positive use for housing.
947	3	114,116 As these are already in an industrial area of the town hence keeping all the industry out of the centre of the town in one area.
947	4	I feel it would be best kept solely industrial
947		I feel that the Bircotes area of the town is already over developed, however the old Harworth village area has seen very little residential development in recent years and I buy a house there but I certainly would not buy one in Bircotes. However I do feel that Bircotes is missing a good public house as my friends all have to walk down to the b being developed give Bircotes a decent pub e.g. Weatherspoons

947		180, this field is next to the church- building on this would change the out look from the church- who wants to get married in a housing estate?????
947		Parking at the church is horrendous any way if this space was developed it would only get worse- how would they accommodate funeral and wedding parking.
947	8	193- as I have always walked my dog down here- lovely to see the horses and cows grazing here.
947	9	Option B: Focused in just one of the above towns?
947	10	No- as we have enough metal thefts in the area already
947	11	Together- so they are in one area rather than spread out affecting more people
948	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
948	2	Yes, and some low cost housing for younger people
948	3	165 and 164 are most suitable, but sites near to main street do flood.
948	4	The village green and play area need to be protected.
949	1	I feel that site 35 is completely unsuitable for the following reasons. Lack of facilities (the estate has no doctors, community centre, dentist or other local amenities).
949	2	The local primary school is already over subscribed (I am a Governor).
949	3	Traffic out of the estate is already very busy in rush hour.
949	4	Option A: Spread between Worksop; Retford and Harworth Bircotes?
949	5	Open area (there is little 'play' area for existing kids).
950	1	Yes
950	2	No
950	3	4/W9 Option 4
950		198/W8
950	5	195/W8 The site is less intrusive on existing housing and has better access to main roads.
950	6	There is no woodlands to destroy when developing this site
950		Yes
950	-	No
950		Option A: Spread between Worksop; Retford and Harworth Bircotes?
950		Concentrated in and around existing sites if we have to have them at all.
950	11	Together with all the other traveller sites.
950		No.
951		Site 35 is unsuitable for development, the existing infrastructure struggles to cope at the moment.
951		Sites 9,30,38,45,90,151,218,371 and 561 offer the most potential.
951		W13
951		195/W8 in it's proposed form.
951		4/W8 option 1 appears best
951	6 7	Yes they should be protected.
951 951		Yes Option A: Spread between Worksop; Retford and Harworth Bircotes?
951	9	In response to the above document I would like to record my opposition to any building on site number 35. This land must be protected as an important amenity for the e
		In particular I wish to strongly object to the development of any additional houses at site 35 for the following reasons. A) A great loss of amenity. It would have a detriment of a structure of the structure of
951	10	visual and physical enjoyment of this rich landscape, which is a mixture of ancient hedgerows, copses and woodland. The rich mosaic of habitants for animal and birds wo something no open space or park could replace – and a very much valued asset, there would be a loss of open walkways and bridleways which many people enjoy – both
951	11	B) Urban sprawl and extension of the town boundary. Current housing already extends to the existing Worksop town boundary. Development of site 35 will extend beyon and Carlton in Lindrick. Additional housing will lead to too much density in an area that has sufficient housing.
951		C) A loss of nature conservation. The effect on Owday and Whipman Woods and Owday Plantation, which is a Site of Importance for Nature Conservation would be catast

0.54		E) Safety Issues. There will be increased danger from traffic. The number of cars would increase dramatically. At present residents and visitors use this land and take their
951	14	they are safe.
951	15	F) More congestion and pollution. At present our local shops are busy and are utilised well by the local community. More housing will most certainly lead to local congesti large supermarkets from this site on foot and this would then lead to increased traffic to and from the town. There will also be extra noise and pollution from the increase
		Targe supermarkets from this site of root and this would then lead to increased tranic to and from the town. There will also be extra hoise and politition from the increase
951	16	G) Loss of agriculture and employment. Currently this land is agricultural and productive and it supports the employment of land workers.
951	17	H) Infrastructure and Services. Increased density of housing and population will put a strain on local infrastructure and resources, for example doctors, dentists and other sewerage will have to be provided and significantly upgraded again leading to destruction of the environment.
952	1	No.
952	2	Site 4 seems to be close to town with the ability to take housing and employment on 1 site rather than several
952	3	Yes
952	4	I would not recommend site 35 for development
952	5	Option A: Spread between Worksop; Retford and Harworth Bircotes?
952	6	Yes
952	7	Together to save on the provision of multiple facilities. i.e. shower/toilet blocks, sewerage and maintenance costs
952	8	NO
953	1	yes
953	2	yes
953	3	4 is the most suitable area
053		• Extension of Town Boundary and Urban Sprawl. The current Gateford Estate already extends to the existing town boundary. Development on Site 35 will, therefore exte
953	4	concern that Worksop will eventually consume Wallingwells and continue to extend all the way to Carlton in Lindrick.
953	5	• Loss of amenity for Children, Residents and Visitors. The proposed site is bordered by Owday Wood/Rough Piece and Owday Plantation, which are sites of importance for present untouched by housing. Development on site 35 will cause significant disturbance to these valuable woodlands. The public footpath/bridleway entering the area for plantation is boarded by beautiful old trees and hedgerows, which are important for local wildlife and for our environment. The bridleway and footpaths are used daily by by visiting recreational users. Development on this site would result in a loss of amenity for local residents and would be detrimental to the entire area. In addition, increating the quality of our environment by increasing noise levels, pollution and danger to pedestrians and cyclists.
953	6	• Loss of Agricultural land. Agricultural land provides employment. Site 35 is productive agricultural land. It is currently being farmed, producing crops including Wheat and
953	7	• Access to Shopping Facilities. Our local shops which are sited off the estate are already busy with traffic and virtually gridlocked at busy times, which is a measure of thei including the proposed new Asda and Tesco supermarkets, are sited closer to the town centre, and are impractical for access on foot from Site 35. This will lead to increas
953	8	• Access to Healthcare Provision. Access to healthcare provision is limited, with Doctors and Dentists being sited on the other side of town. Access on foot from Site 35 is i

Improvements would be needed to upgrade level of service provision due to increased demand.
954		No, I disagree with the categorisation in Criterion 4. Criterion 4 says that this assessment will consider all grade 3 sites as being of the same quality. The problem here is th 3&4, rather than grouping them into 1&2. I can see no good reason for doing this other than it conveniently makes planning permission easier to grant. I think any respons this, will agree it is a troubling, worrying and retrograde decision.
954	2	I think Worksop has seen huge population expansion in recent years. I believe Worksop has correct numbers of housing and employment opportunity - not higher than new development is required. In fact, additional development could quite possibly lead to excessive urban sprawl and the consummation of other smaller, neighbouring townsl
954	3	I strongly object to the proposal to build on site number 35 (Gateford). I am a local resident and know the catastrophic effect this would have locally. I have written a lette Manager Richard Schofield to discuss this in more detail.
954	4	I do not know about the local issues behind any of the other sites shown on the map so I am unable to comment on the suitability of any other site.
954	5	I do not know about the local issues behind any of the other sites shown on the map. However, it seems to me that sites W1 and W12 would be sensible locations for deve
954	6	I do not know about the local issues behind any of the other sites shown on the map. It is not possible for me to make any comment here.
954	7	Building on site 35 would have a detrimental effect on this rich landscape, including interesting wildlife like bats, birds, badgers, squirrels and rabbits.
954	8	Also ancient hedgerows, copses and woodland.
954	9	The rich mosaic of habitats for animals and birds would be lost. This area is irreplaceable, building houses would have a detrimental effect on Owday woods, Whipman wo site of importance for Nature Conservation. The area Gateford Hill Park includes Dog kennel Plantation, which is a 'mature landscaped area'.
954		The public footpath/bridleway entering the area from Montford road and stretching to Owday plantation, boarded by beautiful old trees and hedgerows is important for o bridleway is used by many walkers daily, local and visiting recreational users. The loss of this countryside amenity would be detrimental to the entire area. I consider the w importance as the protected Dog kennel Plantation.
954	11	I have written a letter to the Worksop Policy & Conservation Manager Richard Schofield to discuss this in more detail.
954	12	This land by the canal should be used to enhance recreational tourism in the area, this is an area of natural beauty enjoyed by many people for walking, cycling, sailing and way accordingly.
954	13	Option B: Focused in just one of the above towns?
954	14	REMOVED
954	15	I am not aware of the local issues this question raises, so am unable to comment.
954	16	I am a resident of Gateford, and do not know of any site in Worksop that would be remotely suitable for this purpose.
955	1	We are writing to object to the proposed allocation of land for development north of Retford in the vicinity of Durham Grove, Palmer Road etc We list our objections be
955	2	The lack of organised and effective notification to local people is a major concern. This in terms of both the plans themselves and also they ways in which further informat will be significantly effected by the proposals should they come about. The first official notification of the proposals which we received was a letter 17 January 2012 from J should be raised in writing by 31 January 2012; just under two weeks to look at the proposals and submit objections. According to the documents there have been meetin 2011, yet we were unaware of these taking place. Formal consultation with local residents would appear in this instance to be minimal. Even though these are only proposed planning application in process consultation with local people must be of importance. 955	3	We have lived in the vicinity of park lane for almost 40 years. We feel that a development of the extent proposed would significantly change the character of the establish enveloping of there stated existing residential streets that the character will be unavoidably changed by; increased traffic, increased mass of hard area, loss of green agric feel that the character the the feel of the historic market town, which is so important to the local economy still exist following this deve
955	4	Proposals are so vague in the details provided, yet proportionately the development area is enormous when compared with the existing residential area. In order to fully a believe that issues such as traffic, congestion, access, green space provision, road safety and local and local amenity provision have to be taken into account before even o
955	5	The area around Tiln Lane, particularly in the vicinity of Carr Hill School and also the junctions with Moorgate and Welham Road are already incredibly congested and road
955	6	Likewise, access from the other end of the proposed development area would raise road safety concerns on what is already a very fast and dangerous road leading out of Without firm outline of the proposed access we feel that this site allocation must not be allowed.
955	7	The land proposed for site allocation listed above is currently used as agricultural land. Those fields within this area that are proposed for development are those which ar been left out are those which flood on a regular basis. We would like to object to the current proposed areas not only on the basis of disappearance of good agricultural la
955	8	but also on account of the impact on existing residential properties from the risk of flooding. The land where surface water flows at present will have disappeared under existing residential areas such as park Lane if this area is built up. In addition, what will be the impact on the land that currently floods (and is not proposed for developme reliably predict the movement of water following the changes to the environment?
955	9	As far as we are aware, these plans also sit outside of the current existing development envelope.
955	10	Our last objection has a wider view. Are these residence really required and where has the evidence for all this come from? The numbers proposed are vast and it is difficu quantities of residential properties that have been constructed in recent years and the number of older properties that are on the market.
956	1	I noticed with great concerns the plans for more housing on Bracken Lane and Grove Coach Road. I live on Denison Close and appreciate the need to building housing, alth building takes place.
956	2	The land suggested (at the moment) soaks up run off from the hills behind. Areas nearby have suffered already from floods. Add to this the run off from roofs, drives and drains could not cope. Residents would be up in arms.
956	3	The addition of more traffic in the area would be tremendously increased. At present cars queue up to enter London Road from Grove Coach Road especially at peak time
956	4	We have double parked 4x4s on our road - these are also bus routes.
956	5	In conclusion more houses means more traffic on the roads where we currently live, which are already congested. I therefore am not in favour of the proposed development
957	1	I think that considering we are talking about allocation up to 2028 the number of dwellings allocated to each Rural Service Centre should be approx. that set out in Table 1 meantime.
957	2	I fully agree with this. The village needs to grow in a small way to continue to make it a sustainable community supporting school, shop, public house, churches etc. 12 is a
957	3	Though the school is almost full at the moment it is less than 10 years ago that closure was thought a possibility.
957	4	Whilst the old sewerage system is regarded as needing replacing, Severn Trent agree with this and will carry out improvements when funds allow.
957	5	Parts if sites 236, 237, 239 would be the most suitable as they are already accessible by roads and connected to the services.
957	6	239 would only be suitable up to the round side (i.e. Low Street and Westfield past the Sunn Inn), the rest of the area is very low lying and can flood.
957	7	238 floods badly.
957	8	464 has very limited access and would badly encroach on already developed areas.
957	9	Some consideration should be given to providing housing for the older population who wish to downsize but not leave the village.
957	10	As there is already some very small industrial development on Wood Lane, I suggest an area, somewhere, for minor environmentally friendly business development. This i employment.
957	11	I feel that 36/5 could be used for one/two dwellings. This is an old plaster pit which is in the care of the parish Council. It takes much time and funds to maintain and would houses
957	12	Areas 36/1 and 36/2 should be open for discussion with owners
957	13	Areas 36/3, 36/4, 36/6, 36/7 should be fully protected as the are the village recreational areas.
958	1	I agree with affordable housing in Elkesley, but not off Yew Tree Road
958	2	The drainage system needs updating. The housing already there is inadequate for the sewage system as every time it rains my garden is filled with sewage.
958	3	My views would still be the same as above as 11 houses would make a difference, so I'm sure 33 would.

958	4	Site 248 as they don't seem to have a problem with sewage. Plus it isn't close to the primary school.
958	5	They need to get a bridge in place on the A1 before any building takes place, for extra flow of traffic.
050	1	I disagree. Currently over 76 houses have been committed to in the village. This is a large increase in the size of Gringley and we need to assess the impact of this increase
959	1	effect on the infrastructure of such an increase.
959	2	None - see answer to Q36.
959	3	We need to preserve the medieval street system and access to open spaces to keep the beauty and uniqueness of the village.
959	4	Yes - see answer to Q78
960	1	Strongly disagree. We, as a village, are already committed to over 70 new houses which represents a 25% increase in the size of Gringley.
960	2	None, see above
960	3	The village must be preserved with its open spaces which are rarely found.
960	4	Yes
961	1	We object! To sites for future housing developments.
962	1	I wish to give my views on the fact that the Kilton Forest Golf Course has been identified as a potential site for future development. This area has been given a site allocation
502	1	should be no development of this area for housing or industrial use.
962	2	This whole area is one where if this land is developed there would be a loss of landscape where at the moment the area is depicting natural scenery. This is an extensive ar
962	3	Also, the area is the natural home of animal and plant life and obviously their ecological habitats would suffer if the development was to go ahead.
962	4	Automatically there would be a loss of trees and hedgerows which would be to the detriment of wildlife.
062	-	At the moment, this area provides a visual public amenity and the whole area is pleasant and agreeable. It would be decimated if the proposed development went ahead.
962	5	density and mass of buildings that would greatly alter the appearance of the whole area.
		The Kilton Forest Golf Course provides a much needed facility for the area that is easily accessible to the local people. The golf course is now well established and has had a
962	6	the golf course as we know it was taken away, what message would this be sending out to the people of Worksop who can ill afford the charges of private golf courses. We
		the area, not the opposite.
962	7	This area has included in it several football fields set out within it and a grass bowls area which would also be lost. It is also used by the rambling association, off road cyclis
502		already being taken up and so is at a premium, for example at the Clinton Maltkins site.
962	8	In Worksop we have a very limited amount of green space on this side of the town and once taken up will be lost forever. A price cannot be put on this open space. For the
502		should be left untouched.#
963	1	I agree we need more housing in Retford but only if you can reduce the dreadful unemployment in this area. Easy in/out tenancy agreements for new businesses together
963	2	I consider the best place for new housing to be site nos. 1, 40, 41 and 364.
963	3	If 577 new houses are to be built, we need a new school
963	4	and good roads in and out of the area. Ordsall is good for access into and out of Retford, also being near to the A1 and the M1 for people who travel to work using these ro
505	-	would sense to have all the new houses and the new school in the same area so that the children do not have to go far to school.
963	5	Plot 259 and R2 might be suitable for a new school, doctors surgery and a few local shops which would bring employment possibilities for new housing.
963	6	The town centre is dying and the Council should consider free parking incentives for new shops to move in to the area.
964	1	I am a pensioner and would like to be able to stay in the village with family close by. I would like to live in a flat with others of a similar age group for company.
964	2	I go to the shop for things I need and the bus to Retford.
965	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
965	2	Enough land should be allocated for up to 30 houses to be built in the next couple of years and the rest of the allocated land be built on yearly.
965	3	Allocated block to be utilised first is 281 and 275. Following years, 276 and 452.
965		The village envelope to remain as it is.
965	5	The village needs starter homes to enable the next generation to be able to afford to purchase houses.
965	6	There is a shop and local pub which will benefit from growth, this will also ensure a good bus service is sustained, population growth will also raise opportunities to improv
965	7	Different age groups will also help with families supporting each other.
965	8	There are many thriving groups and clubs in the village which will also benefit from growth.
965	9	I did attend the planning meeting and found it very useful to hear and share views with the local village people.

965	10	Gypsy/Traveller sites should be concentrated together at existing sites as they are based in family groups and seem settled.
966	1	Considering the final SHLAA map of Beckingham I do not support any new site allocation within the actual village itself. Maybe conservation status should be considered for
900	1	Road north. This would help with more careful consideration for future planning.
966	2	If necessary, site 101 could maybe be considered for development to improve an industrial site, now mainly unused it seems.
		I may be cynical but I believe the whole idea for a pub on either site 102 or site 106 was a complete red herring! Pubs are closing at an alarming rate per week at the mom
966	3	planning permission for houses on the two sites and as they are outside the original village envelope the plans breached this (so did the plans for the pub). I do not unders
966		matter. To further protect the density of the village I would like to ask for sites 203 and 105 to have protected status and thus avoid any future development plans.
900	4	
966	5	If the allocation of five houses, already approved next to the village green, could be social housing this would be extremely beneficial for the village school and for people l
966	6	Any proposal for G&T site could be looked at with regard to the field next to the Trent Port pub which the Travellers often use for their horses and garden rubbish
966	7	We have many houses and bungalows for sale in the village at the present time, many being on the market for many months. I do feel we have enough dwellings for the fo
	,	development being necessary.
		I believe that in order to maintain provision of sufficient housing for the development of our community, it is essential to allow for approximately 70 dwellings. This amour
		this plan. This will allow younger people in the village, growing to marriageable age, to settle and raise their families as their parents before them, in Blyth. I am talking low
967		bedroom bungalows or flats, but preferably something that will fit in with the existing dwellings, like semi-detached or town houses. If these were available it would also p
		allowing elderly people in large properties to downsize and make their properties available to older, more established families that need the space. This frees the smaller p
		moving. This will help sustain our shop, post office, school and at least some of our local public houses.
		I strongly advocate sites 266, 369, 589 and 590. In doing so, I declare an interest as I am the owner of one of the sites. This interest has also been declared to the Parish Co
967	2	sites that would allow small developments on a gradual basis, rather than full blown estates springing up all at once. The development could be need driven over the durat
		identified as being needed, then that's all that should be built, but to allow for 70 will give a comfortable and sensible provision.
967	3	It is important to bear in mind that the current central government are keen advocates of promoting sustainable rural living and allowing rural development is one of their
967	4	I completely agree that the open spaces identified on your map should be protected from development.
968	1	No to any more houses until we have better drains, roads and the bridge is built
968	2	No, because the infrastructure is not able to cope.
968	3	None until the biomass has stopped
968		Safety in the village - too many cars, lorries, buses on roads that built for the war. Road safety concerns.
969		Changes I would suggest to the screening methodology criteria are: - existing vacant and derelict land and buildings should be considered
969	2	On Portland Place one home has remained derelict or uninhabited for over 10 years. On Low Lound Road, buildings have been left to the elements and are derelict. Under
		considered for redevelopment.
969	3	Account should be taken of new homes built on Church Way and conversions on Low Lound Road. These have provided at least 6 new dwellings. One house nears complet

Responde	-	Answer
nt	nt	
970	2	The introduction of the SAI&O document states that the amount of new development that could be allocated to the sites in the document far exceeds that required in Bas houses are planned at the former DC site. This is a development of significant size compared to the size of the village. No other Rural Service Centre villages have proposed This development will provide a major share of the Rural Service Centre housing requirements in the plan and further developments in Gringley are not required.
970	3	The effect of the DC site on Gringley is yet to be understood. It will be a densely populated site which will strain the existing village services, cause a major increase in traff traffic on entering and leaving the bypass. Further developments in the centre of the village would make this situation worse.
970	4	Gringley is already subject to major change as a result of the DC site. According to the BDC map another four sites are already committed for new housing. There is no just and 135.
970	5	Overall, Gringley has already provided a disproportionate level of new housing development for Bassetlaw at the DC site. No more housing is required or justified.
970	6	There is no justification for further development of sites 134 and 135 for the reasons discussed above.
970	7	The key facts/findings of the BDC SA I&O para. 10.11 states that if development were to take place, small extensions to the village would be preferred to large extensions o boundary lines. However, sites 134 and 135 both constitute major infilling.
970	8	Both proposed new sites are within the original medieval street structure and are within the conservation area. Developing these sites and providing access would have a
970	9	Gringley has suffered from flooding in the past, particularly on Low Street. Proposed site 135 would adjoin Low Street, where there are no mains surface drains and furthe flooding.
970	10	The two proposed new sites occupy part of the finger of countryside extending into the centre of the village, highly regarded as countryside by occupiers of surrounding put the sites would be deleterious to this important feature.
970	11	The village character of Gringley is based on the existing street system, with a unique situation of pastures, smallholdings and orchards within the village and with continue Development of the two sites would absorb a large proportion of these aspects and would seriously damage the village character, with a loss of green space and associate
970	12	Low Street is a narrow lane with grass verges and banks topped by low walls or hedges. The Gringley Parish Plan states that these features are an integral part of the villag would be destroyed by development of site 135.
970	13	Open spaces within the village are characteristics of Gringley. The open spaces on the map should continue to be protected from future development proposals. Other open be protected.
970	14	New sites should be concentrated around existing sites.
970	15	It would be logical to provide transit and residential pitches together for provision of services.
970		The character and structure of Gringley benefit from open spaces between and around the houses and farms. A finger of countryside extends into the centre of the village by occupiers of surrounding properties and other villagers. The proposed site occupies a significant part of the western end of this feature. Development of the site would for further incursions into this open land.
970	17	The proposed development site adjoins and would lead from Low Street, which is a narrow lane, with no footpaths. Access from the west is via a blind bend with an existir Laycock Avenue. Village traffic and agricultural vehicles use this route for access to Middlebridge Road and the east side of the village, including the Playing Field. This traff site development. Further traffic arising from access to the proposed new site by residents and service providers would be undesirable.
970	18	The proposed development site is within the newly-defined Conservation Area. New housing on this site would be incongruous and intrusive.
970	19	The proposed development includes provision for open space and public gardens. This would not be in-keeping with this part of the village and is not required. Site mainte the village and may not always be achieved.
970	20	The proposed site is well-overlooked and the development plan suggested would adversely affect the amenity of adjacent properties through noise, disturbance and lack of
970	21	The proposed development site includes an area which is not to be developed. This offers little to overcome the effects of the proposals on the village character and the a
971	1	I am writing to express my objection to the proposal for future housing developments in Retford. The proposed sites I specifically wish to object to are sites 7, 46 and 309
971	2	My first objection is to the sheer scale of the development. It is proposed that these sites would create approximately 900 new homes. This would undoubtedly have a gre in quality of life for existing residents.
971	3	New development would completely dominate the area and be completely out of character with the existing properties
971	4	as well as leading to increased noise levels, disturbance and loss of privacy for residents

nt	nt	
977		Development will alter the character of the area. The countryside is a very important part of people's lives and the environment.
977	5	Will be losing beautiful vistas over swathes of extremely pretty countryside which once built on can never be retrieved.
977	6	Loss of thick hedges and trees which are habitat to many species of birds and wildlife
977	7	The land is prone to flooding after heavy rain
977	8	The loss of privacy to many residents which will lead to much unhappiness and resentment in the area
977	q	We feel that brown sites should be used first and foremost and then areas that are not going to affect peoples lives too much e.g. plot 512 on Tiln Lane, plot 6, plot 489, p R7 and 364 and if need be part of No.7. This would avoid too many buildings in one particular area and would not affect peoples lives too much, after all you need happy i
977	10	We hope that you take everyone's views on board and realise what Retford will be losing if these sites are used for building and increasing the population by many thousa market town with very restricted services and that is the way we all wish to stay.
978	1	I agree with all criteria
978	2	Except criterion 6, because development in a 'conserve' area should not be considered as detrimental if it enhances the area. therefore a site scoring 'green' at criterion 7
570	2	'conserve' area.
978	3	No comment
978	4	I believe it would be wrong to allow the residents questionnaire to be the sole factor when taking into consideration when deciding how much housing land is to allocate.
		residents questionnaire is based upon feedback from a small percentage of residents
978	5	ii) It is not a terribly robust way of assessing housing requirements.
978	6	iii) If sites for 11 properties are allocated there is no guarantee that all 11 houses will be built, so is there not an argument for over allocating? This would also create a lev
		prevent escalation of plot prices and aid the development of more affordable housing.
978	7	iv) surely local demand should to be the only factor to be considered? Would it not make more sense to consider how East Markham could be enhanced by new development of the sense to consider how East Markham could be enhanced by new development of the sense to consider how the sense
		of the village or improvements to local facilities.
978		The sites which I believe could benefit from redevelopment are 110 (portal span/concrete barns behind Rose Dene Farm)
978		141 (portal span, concrete barn behind Woodward Farm) and
978		145 (commercial building amongst residential properties on east side of Beckland hill)
978	11	I would favour allocation of circa 20 dwellings across these three sites.
978	12	The above sites are in line with the residents survey feedback which advocates small extensions to the village (which sites 110 and 141 would be). The survey feedback als practical – as opposed to planning – terms, all three sites are. All three not only have existing buildings on them, but are also to varying degrees, eyesores.
978		No comment
978		The open spaces identified for East Markham seen to make perfect sense. I would agree that they should be protected.
978	15	Probably concentrated around existing sites, although the numbers of pitches currently vacant suggests there may not be demand for additional spaces.
979	1	See East Markham Questionnaire
980	1	No. There are more than enough with the 60+ being built on the Detention Centre Site. The Infrastructure of the village will not support these, let alone anymore.
980	2	None
980	3	As above at 76. Lack of facilities and amenities
980	4	All of it in the conservation area
981	1	Sites 537 and 157 are not ideally situated over the railway line from the point of view of easy access. Where the land has previously been quarried the possibility of floodi land, and are growing crops which are much needed by the Nation, as a whole. The farming industry generates both income and employment for local people and should
981		Sites 516 and 156 are closer to the local school and community and could be more suitable especially for families with children for the minimum of 14 houses required by
981	- ≺	Sites 234 and 224 are productive agricultural land, even Grade 3 land should be retained for growing crops. There is a growing demand for food and such fields are vital fo
		from subsidence, as has the North Road, in that area.
981		Whichever growth would provide a better spread from the point of view of access and have sufficient infrastructure. Not in a green belt or using agricultural land.
981	5	Ranskill Village does not have the facilities to cope with any more than the 14 houses required. (See : Response to Question 1, Sites: 516 and 156). Even another 14 properties to cope with any more than the 14 houses required.
		speed limits being in place, they are often exceeded and Road Safety becomes an issue. Also the Village lacks Parking space especially near the Shops/Post Office

981	9	Sites should be concentrated not scattered within the District. One good site, Council maintained and well known to the Travellers would be better for the Gypsy Traveller
981	10	Keep the sites together, because both Gypsies and or Travellers may be members of larger family groups who like to meet up from time to time.
981	11	I do not know of any such land as of now.
981	12	Farmland, in particular, needs protection from building and developments in our country as a whole. Once it is taken for such processes, there is no turning back and the la food, fodder and even as a fuel source, is gone forever.
982	1	Yes
982	2	Option A
982	3	Yes, I agree there should be at least 15 houses
982	4	The best sites for development would be 164/165
982	5	Main Street floods
982	6	Yes. This should be protected
982	7	Existing plot
982	8	Separately
982	9	None
983	1	Yes
983	2	Option A
983	3	Yes I agree there should be at least 11 houses
983	4	462/456
983	5	None
983	6	Protected
983	7	Existing plot
983	8	Separately
983	9	None
984	1	Two, and the houses should be allocated to the young residents in Blyth
984	2	178
984	3	There is a big traffic problem in Blyth
984	4	All open spaces in Blyth should be protected and no gypsy or traveller pitches
985	1	Two, and the houses should be allocated to the young residents in Blyth
985	2	178
985	3	There is a big traffic problem in Blyth
985	4	All open spaces in Blyth should be protected and no gypsy or traveller pitches
986	1	The issue concerning site 512, 37, 533, 7, 46, 309 is the one of Tiln Lane which is currently used as a HGV alternate route to avoid the low bridge at Welham (height restric Chesterfield Canal at Clarborough. It is a narrow single track bridge, which will require widening along with the rest of the road. A relief road will have to be laid down from handle construction traffic. There are safety issues regarding traffic movements to and from site no. 7 and 46/309 using Bigsby Road. The infrastructure around these sites
986	2	Site no. 7 has problems – wet meadows and a water table that means there is a constant run-off into the chesterfield canal. Potential drainage issues.
986	3	Summary. Safety for school children in Tiln Lane.
986	4	Sewerage/ drainage problems
986	5	Current HGV traffic which will increase
986	6	Significant infrastructure costs
987	1	In response to the above document I would like to record my opposition to any building on site no. 35 (near Gateford Hill Nursing Home). This land must be protected as a present and future generations. In particular I wish to strongly object to the development of any additional houses at site 35 for the following reasons:
987	2	a) A great loss of amenity. This is a tremendously rich landscape of ancient hedgerows, copses and woodland, open walkways and bridleways which residents and visitors detrimental effect on existing residents and visitors' visual and physical enjoyment.
987	3	b) Urban Sprawl and extension of the town boundary. The development of site 35 will extend beyond the existing Worksop town boundary and encroach on walling wells sufficient housing and additional housing will lead to far too much density.

lers and easier for the Council.

994	6	If at all together but at existing sites
994	7	I do not know of any land
995	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
995	2	18/30 houses could be built
995	3	Site no. 480 should be developed
995		Site no. 480 should be used for mixed used site
995		Other potential housing sites should not be used as it is greenfield land and would extend the village boundary
995		Open spaces should be protected from development.
995	7	Concentrated in and around existing sites to keep them in the one area being used now
995	8	Transit and residential pitches should be provided together to keep then all in one spot
996	1	I write to you as a relative of an elderly resident of Park Lane, Retford having read to my horror about the housing proposals being debated for that area. My grandmother happily on Park Lane for almost 30 years, is devastated that her beautiful surroundings are potentially going to change significantly. I too, am saddened to think that such turned into a concrete jungle and impact so very negativity on that community.
996	2	My grandmother and our family are not urbanites, we were farmers who came from nearby villages and so when she moved there in the late 80's it was like home from h the added benefit of nearby amenities. We often walk down the garden with her towards the fields to admire the horses, hear the many birds sing and spot the odd heror the wildlife will be horrendous in itself. The peace and tranquillity is striking and gives the residents, often the older generation, such a great quality of life. The area aroun and that is exactly how it should stay.
996	3	I visit Retford at least once a week and note that the increase in traffic around the Spiral Hill area is growing year on year. Let's put a stop to this now and leave this area a
996	4	I know that there will naturally be a lot of opposition to these housing proposals and my grandmother hopes that her wishes, along with those of her neighbours, will be ca Let's keep this part of the Retford open countryside protected for other generations to enjoy rather than cramming in as many properties into a space which really should
997	1	In 2007 several properties suffered serious flood damage, which not only affected the area surrounding Bracken Lane and Grove Coach Road, but also caused severe dama Lane, Clatters Close and Welham Grove. In short, the whole of the Eastern Boundary of Retford. All of these areas have to cope with the natural and at times excessive dra Grove Hills and Leverton hills. The proposed development land would destroy the already inadequate flood plain which currently offers some protection to properties on t infrastructure is not adequate to support any future housing developments.
997	2	Bracken Lane school serving the area is almost full to capacity, Its sports field is water logged many months of the year. Parking of cars whilst parents drop off children is a pavements and roads at peak times and is an accident waiting to happen.
997	3	Currently there is a major problem attempting to access onto London Road via Grove Coach Road and Bracken Lane due to existing traffic volumes. The developments wo greater potential for accidents.
997	4	We are unclear as to the improvements any developer would make to access the sites. It is possible that vehicles could use Cavendish Road, Rutland Road, Bracken Lane a Grove Road when the crossing is closed.
997	5	The above objections have been raised on other occasions when individuals have sought to gain planning consent for some of the sites currently under consideration. We objections will result in a total rejection of any planning approval for these sites.
998	1	When I bought my property, I was advised that this area, which was a field with crops, was a green field site and that it would never be built on. Where I live at the momen always been a good area to bring up children and enjoy quiet evenings in the garden.
998		Should this road tum into a thoroughfare, the potential traffic would make it hazardous for young children and the noise would be intolerable for residents.
998	3	As we live directly next to the children's play area and the golf course, this development will have a major impact on our lives. We would be changing from a property next middle of a housing estate.
998		REMOVED
998	5	The Kilton Forest golf course, also gives much pleasure to many people, for as a municipal course, makes it possible for people to enjoy their chosen sport, as playing at ot expensive. Although I am not a player, I still get pleasure for watching others enjoy their pursuits.
998		So, I really believe that this development would considerable reduce my quality of life.
998		Care also needs to be taken around the ponds as the contain Great Crested Newts, which are a protected Species
999	1	On going flooding problems in the area. In 2007 several properties suffered serious flooding.
999		The present infrastructure is not adequate to cope with future developments.
999		Bracken Lane school serving this area has roads which are almost full to capacity and its Sports field is water logged many months of the year.
999	4	The roads will not accept more vehicles at peak times.

1000	1	In that context, I would wish to comment on some of the sites identified for potential development over the next 15 years. A clear statement within the core strategy for proposals will be supported within the development boundary" (P28 Policy CS3 Retford). I would therefore question why a number of sites identified for potential develo development boundary. The sites local to me (sites refs. 3,370,511,488,489) are all sites located outside of the current development boundary where development would
1000	2	In this context I note that site ref 3 is currently predominantly part of a conservation area, adding particular weight to the desire to avoid development on this site.
1000	3	The countryside surrounding Retford is a valuable asset and key to the quality of life for all those living in the Town and particularly for those in living close proximity to th buy property have been specifically made with this boundary in mind (mine included). Whilst accepting that there is a need to develop further housing in our area this shout that already exists. I would be very disappointed if valuable countryside was to be lost unnecessarily, with priority given to developer's profit.
1000	4	The implication of the council's own strategy is that the target for new housing can be achieved without building outside of the current development boundary. I would st not be weakened through allocating sites for housing outside this boundary in the foreseeable future.
1001	1	The roads would not be suitable for taking additional traffic. Access to London Road is already problematic especially during school run times.
1001	2	Current schooling facilities would be inadequate.
1001	3	Flooding and drainage would be a concern.
1001	4	The location of our home is significant in terms of the peace and tranquillity it gives. The views to the rear of our property are magnificent so to obscure these views woul
1001	5	I (C.E.M. Ford) have a serious health condition which could be adversely affected by the disruption of possible building work.
1002	1	The Development is not appropriate to a Conservation Area. The proposal to build a new estate of houses in the heart of the conservation village, would be against the pr Conservation area in the first place. If the development is compared against the original reasons for granting Conservation status it will be seen to be at odds on all accour
1002	2	The Development is not consistent with the Planning Policy. The Councils plans do not show this area as designated for planning. I understand that it is the Councils plan to preference to area such as Retford, Misterton, Worksop etc. If this is not the case maybe you could give us further guidance on the Councils policy.
1002	3	This land has been refused permission several times in the past. The reasoning behind the objections we cannot see have changed. If they have maybe it could be explaine granting permission were incorrect or unfounded. We are not aware of any change of Planning policy that would warrant such a change of reasoning.
1002		There is not a need for more Public Open Space/Gardens in the village. The Village is not in any need of any new areas of Public Open Space/Gardens for the following real its limited money than support another area requiring upkeep. The land is on a gradient that would render it as unusable. The width of the access rd shown is not shown a would need to be 5m plus a footpath. The necessary longitudinal gradient would be such that the access rd would be in a cutting 4m deep, which would leave precious litt would only add to the reported problem of areas where youths congregate, leading to problems with litter, intimidation, graffiti etc. Another open space would add to Low Dogs.
1002	5	There is no demonstrable need for such a Development in the village. The Village is in no need of any additional housing and in particular of "high quality houses." If there over 60's. This would free up larger houses for families and allow the aging population to remain in Gringley. However this location would be inappropriate due to the grace transmission because on Low Street have remained on the market for well in excess of 18months, supporting the lack of demand/need for more "high quality houses." There is the village that must more than meet any need for Quality houses in Gringley. We understand that these have not been selling well.
1002	6	The Infrastructure would not support this Development. The proposed Development would double the number of houses on Low Street. Low Street retains many of the c "sighted" as being of significance in granting the status of a Conservation area. However a consequence of this is that the roads are not of sufficient width and strength to traffic. Indeed it is often necessary to reverse back up the street if anything larger than a small car is encountered coming in the opposite direction. The road is blocked wh etc. are encountered. The sight lines from any of the existing properties do not meet the highway authority guidelines. Any new access would need to meet these and wo without considerable earthworks that would be completely at odds with the Village Conservation Values.
1002	7	The development would be on totally none porous clay with a high plasticity. This would render such a site as totally unsuitable for soak-always. Any attenuation storage of the development site itself. The amount of disposal of surplus soil from this compounded with that from the access "cutting" and the deep foundations required for the h would result in thousands of tonnes of soil being transported through the narrow weak lanes and up a 1 in 4 hill and through the heart of the village which by its very nature the quantity of surplus soil generated from the existing development would demonstrate the size of this problem. They did not at least have to transport this through the A sweeper would not be able to negotiate Cross hill and Low street and would at best leave a slippery surface on the road. On such a site any surface water would undout floods at least once a year, and has on more than one occasion resulted in the road being closed due to the drains bursting and lifting the asphalt surface and the drain co

1002	8	It is highly unlikely that the foul sewers in low street have the capacity to take any further load, although I do not have the details to support this.
		As a resident of Rose Bank on Low Street, two doors down from the proposed development site, I feel that with Low Street effectively being a single road highway where
1003		volume of traffic that six house would bring, as well as the sight lines exiting the proposed site, Low street would become a dangerous highway, not just to other vehicles,
		footpath.
		Since the development by Miller Homes, and the extra volume of traffic that it has brought to Low Street, not taking into account the many houses that still stand empty,
1003	2	mind with six more large houses, with double garages, using it as their main entrance and exit road. From my experience of living on Low Street, I believe that the infrastru
		but in name it is not a street, but a lane.
1003	2	With much new recent development, not just on the Miller Homes site, there are many houses around the village stood empty, I believe that Gringley cannot cope with m
		felt from the building of 68 new homes.
1003	4	I hope you can appreciate our concerns as we are all for new development, but feel that Gringley has had more then it's fair share in recent times.
1004	1	I am absolutely amazed that you, Bassetlaw Council, are proposing to build 600 dwelling on land the area of Bracken Lane / Grove Coach Road area. As you know well, this
		Planning Team, turned down an application to build at the end of Bracken Lane – if my memory serves me right! What has changed? It is still a flood area.
		Another concern is the added traffic problem. 600 dwellings = 600 vehicles and probably more, 1200 as most homes these days, have two cars! The chaos that this will can
1004	2	have the school traffic to contend with. Sometimes the service bus is unable to keep to its route. Because of parked cars both sides of Rose Avenue. As you will notice I live
4005		London Road, already have long delays as it is, but with X number of extra cars it will be so much worse.
1005		Gringley already is seeing 68 new properties some of which are social housing in accordance with guidelines.
1005	2	There are little facilities in the village and as necessity cars are mostly used to go about one's daily life.
1005	3	When completed there will be a great increase in traffic, Low Street is one of the narrowest roads where two cars cannot pass and obviously six more houses with residen
		the problems that arise already form time to time. The open space for public use would also be a cause for concern to us. It would run the length of our property and be approximately I metre from out windows. Therefore
1005	4	privacy.
1005		As stated the land is in a conservation area and as such we have no objection to the bungalow being updated, the planning of which was obtained 4 years ago.
1005		It would be a pity to see Gringley village desecrated as others have been by allowing building in everyone's back garden.
		I wish to object strongly to the development of any additional houses at site 35 for the following reasons: A) Extension of town boundary and urban sprawl. The current G

1019	6	The pub should be sited in the original place, which was turned down by planning. It makes more sense to keep it further from most houses and nearer the by-pass to at
1019	7	Yes
1020	1	The volume if traffic already using each road means it is busy. Each new house means at least one extra car!! What would keep it safe?
1020	2	The volume of traffic (above) then has to go onto London Road – it already takes a long time to get onto London Road! What will they do?
1020	3	Several years ago a similar development was turned down because of drainage issues, the water flows under Grove Street, under the Market Square and Bridgegate. Has
1020	4	REMOVED
1021	1	The estate would be too far from the main bus service into town.
1021	2	Please consider the distance to the shops, the Health Centre, schools and a church.
1021	3	The few shops in Ordsall are already a safety hazard at peak times with cars -this would be made worse. There is a danger to adults and children on foot.
1021	4	All of these reasons would make people more car reliant (not good for the people and not good for the environment).
1021	5	If there are no new schools in the offing, the present schools could be overcrowded.
1021	6	More houses would be under the flight path of planes landing and taking off from Gamston Aerodrome.
1021	7	The expansion into the green belt would cause problems to the wild life in the area. There is other land (not in the green belt) nearer to Retford not developed, and why modem houses, which would be less expensive, more resourceful and better for the environment?
1021	8	Ordsall Bridge is a bad hazard: Two big vehicles cannot pass on the bridge; this causes a build up of traffic both ways. This would be made worse with more traffic. Traffic over the narrow bridge at Eaton. Cycling over Ordsall Bridge is very dangerous as is trying to push a pram or walk with young children on the very narrow path with traffi lane in Ordsall at the moment. This is a hazard for people cycling to work, school or into town.
1021	9	The current Southern Boundary to Retford is well defined and provides a consistent and appealing entrance to the town and this would be lost by these developments
1021	10	It is important to maintain a distinctive boundary between the urban area and the open agricultural land and the current town limit doers precisely that.
1021		In addition there will be a significant loss of amenity,
1021	12	Which the local infrastructure will not cope with and occupants of the new housing would have to drive a significant distance for shops, schools, doctors and other facilit
1021	13	There are more appropriate areas of land within the existing Retford town boundaries for housing
1021	14	I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.
1022		We have seen the above mentioned document, and are most concerned at the possibility of building houses in the areas marked 3, 370, 488 and 511, with a 'maximum and 511 were rejected for development some years ago after very strong protest by residents in the neighbourhood. Their objections were sustained because of three n substantially changed over the intervening years.
1022		The first, and possibly the most important and fundamental problem is drainage. Inevitably, it would have to be most effective to cope with the run-off from the Grove h flood plain, very wet in winter and often partially under water. The properties at the bottom of Grove Coach Road and St. Helens Road were flooded in recent years, and additional and waste water from the proposed number of new houses. In our view, the inadequacy of the drainage alone is enough to prevent further building in this par
1022	3	The second objection is the increase in traffic that would be generated. This would cause massive inconvenience, and delays, particularly at sensitive points such as junct Grove Coach Road. On Bracken Lane there would be an increased danger to the children going to and from the school.
1022	4	Lastly, if there were an urgent need in Retford for new houses these areas would not be suitable because they lack the necessary infrastructure. For example, Bracken La school would probably be unable to accommodate the children who are likely to move in
1022	5	We attended the meeting in Retford, and heard of the need for positive recommendations, because of the government's requirement. If it is necessary to build 6000 houses in the next few years, we would propose the development of the sites numbered 3 and 27.
1022	6	It is accessible, being adjacent to London Road, and would not aggrade traffic pro 6 ems on Bracken Lane or Grove Coach Road
1022		Some infrastructure is already in place and children would be able to attend either Bracken Lane school or Thrumpton
4022		Such development would put to good use land no longer required by the
1022	8 I	garden businesses
1023	1	I think the two Brownfield sites should be brought back into industrial use. There is already adequate building land to cover the towns needs without encroaching beyon detailed explanations in attached sheet.

nt	nt	
1023	2	I believe that housing development should only be permitted on the smaller sites and that speculative building should only be allowed in circumstances of need and where on small sites is usually to provide upgrade housing for local residents and this benefits first time buyers because cheaper property is released on to the market.
1023		I think employment land should be used only to create employment. This could of course include community projects where some employment is created e.g. Leisure, He previously used as employment land should be allocated to housing. However I do appreciate that housing needs to be available and would therefore advise that house bu should be retained to support any employment land development.
1023	4	On the whole yes open spaces should be retained. An annual review of current open spaces should be made to ensure they are well maintained and being beneficially use derelict should be considered for other purposes which could include housing or community facilities if appropriate.
1023	5	In circumstances where they are no longer used redevelopment can be undertaken but I feel that the immediate local residents should be consulted.
1023	6	Option A: Spread between Worksop; Retford and Harworth Bircotes.
1023	7	Thorny subject. If Gypsies and Travellers are willing to join society and contribute to the benefit of their local community then sites should be made available.
1023	8	It would seem appropriate that temporary sites should be available as part of planning permission for mobile caravan sites.
1023	9	With all the work that the planning department has carried out surely it has identified potential areas.
1023	10	My main concern is the agricultural and meadow land (referred to here after as agricultural land) that you have brought into the plan for consideration. There is already m developable land within Retford without having to consider this agricultural land. Please refer to your list of 'issues that can be considered' to refuse planning consent.
1023	11	With the exception of items ITCBC 1, 6 and 11 an application for planning on any agricultural site would be contrary to the planning policies of the Council. I note you have will be considered on an individual basis. Unless the Council are going to consider 'done deals' I am certain every case will be contested by the general public. The Council defend decisions that go against applicants. Public hearings may be required. Local rate payers do not wish to contribute to these costs. Exclusions of the land at this stage the future. Most agricultural land is registered for the purposes of the 'Single payment subsidies' given where the owner complies with certain regulations relating to farm to convert agricultural land into building land would seriously disturb the environment including the loss of trees and hedgerows, ecological habitats and landscapes and v Agricultural land must be taken out of potential developable land, it is not needed. Don't forget that agriculture is a major industry in rural Bassetlaw. Is it the Councils into industry as they did when they granted permission to develop land previously occupied by manufacturing industries in Retford? Although you have highlighted that there overcome, you have obviously not made any serious attempt to think through the issues. Developers will only carry out the minimum of work to cover issues.
1023	12	If you look at all the agricultural land on the eastern side of the map you will note that there are no roadways suitable to take traffic for a total of approx. 1700 houses. Un Gainsborough area they will have to travel in or through the town to get to Doncaster, Worksop, Sheffield or Newark. Drainage and pollution will be other issues. I apprec contribute to some facilities in the town but will they contribute to new major roads. To travel west the River Idle will have to be bridged as will be the Chesterfield canal.
1023	12	Does the Council have in hand plans to expand the town centre area to accommodate the influx of new residents. Can it provide further parking in the town centre. If it do residents will seek alternative shopping areas frustrated by the lack of parking in the town centre area.
1023	1/1	Retford is Retford. It does not need to expand into green field sites. Retford does not wish to become a larger town and the Council should take note of this. Building shou can be proven that it is for the benefit of the town and that new employment has arisen which require additional housing (see also my comments in sections 2 and 3 follow
1023	15	Areas 512 and 37 providing some 231 houses will no doubt be brought onto either Smeath Lane or Tiln Lane. This is also the only way into town for high vehicles. Congesti Hill is already a problem. There are no main drainage schemes in place. We are in a valley and the lowest area appears between the Idle and the Chesterfield canal. This is go. We already have a flood plain risk. Building in these areas will increase that risk which may also impact on houses already in existence.
1023	16	I have reservations with regard to areas 304,41 and part of 40 and 52 (see section 2 below)
1023		The areas that I consider should be taken out are sites 1, 52, 40, 3, 370, 511, 69, 46, 309, 6, 7, 37, and 512. According to the plans these areas would reduce the availability
1023	18	I believe that the Council should be seeking to bring into town some manufacturing, industrial or commercial business to utilise existing brown field sites. This really should scale house building commences. Sites 259 and R2 are prime examples. The Council should be actively seeking to bring employment into town. If they are not then why sh for housing development. Can the Retford local councillors not stand up and say that we will provide land for housing development but only if we can see a benefit to the employment or additional trade for our local traders.
1023	19	I therefore consider that the areas 259 and R2 together with area 364, part of 52 and part of 40, as appropriate, should be earmarked for employment development with benefit of the town as a whole. These areas should not be used for any other purpose and certainly not solely for housing development. Access to major roads from this a

1023	20	A strategic attempt to develop this area for the benefit of employment should already be part of the local plan. The provision of 290 houses on area 364 as part of the sch houses are required to support the employment development then one or two rows could be considered adjacent to the existing houses areas 41, 52 and 40. Permission s areas unless the developers build factory, industrial or commercial units on sites 259 and R2.
1023	21	A similar situation arises with regard to sites 51 and R7 although this would need to be smaller industrial or commercial units. On your availability assessment plan you ha housing'. I would suggest that this area be restored to housing so that this could be another employment based development with housing. In your availability assessment as developable. It is possible that this could be car parking for the units. I again consider that this area should also be retained for employment development with housing so that housing so that this area be restored to housing so that this could be another employment based development with housing. In your availability assessment as developable. It is possible that this could be car parking for the units. I again consider that this area should also be retained for employment development with housing
1023	22	Suggested Plan to Provide Available Land to Meet Retford's Needs. I believe that the Council should make it clear to the government that Bassetlaw (or Retford) area, main development based on known demand and not based on anticipation or national statistics. If necessary assistance should be sought to market the employment land as par accept that the Council wish to prove to the government that it has identified land for development but it will only allow small parcels of land within the towns boundaries you would care to ask the governments environmentalists to confirm whether or not in their opinion, agricultural land should be taken for housing or employment develop against the use of any Greenfield site. Based on the information available relating to the Councils development plan, I consider that there is adequate land available for ho following areas, subject of course to approval: (TABLE OF SITES AND HOUSING NUMBERS PROVIDED)
1023	23	Your plan does not take into account all land in the town that could be brought into account if really required. There are rumours that Carr Hill school could be developed. the Old Grammar school which could be converted to accommodation without external appearance alteration. There are other windfall sites. I therefore consider that my
1023	24	The above covers a period 2006/21 and is clearly adequate for that period. I understand that reviews are carried out annually to ensure that sufficient land is available for are known to date. Local developers will find suitable small sites to ensure that a steady flow of land becomes available in the future.
1023	25	As far as I can see your overall requirement of 2002 houses by year 2028 is based on statistics. I have not seen any evidence of demand. There are still numerous properties have not been sold or let. It would be advisable not to grant permission of any larger development sites until the empty properties in town have been taken.
1023		Apart from small developments of say up to 20 houses all applications should provide evidence of demand for the houses. To increase Council revenues the Council should been completed but unoccupied after more than one year from completion of the building shell. Possibly a sliding scale stating at 25% of final rateable value rising to 75% s but business premise owners have to pay.
1023	27	My final request. Do not destroy our town and its rural countryside by developing agricultural land.
1024	1	Any proposal of housing at the above should be discouraged and empty properties, brown sites developed, leaving greenbelt and open spaces undeveloped.
1024	2	Worksop should be left as a small town and not turned into Mansfield, Doncaster etc.
1025	1	Having observed the situation in the town of Retford, I note a great deal of activity already in hand on building sites and this in spite of the fact that there appears to be a l empty.
1025	2	Regarding the proposed sites for further development, many if these I imagine have problems with potential flooding,
1025	3	And also access from these new estates would severely affect traffic movement on roads in peak travelling times, particularly the London Road area. There would be a ver from the schools in Bracken Lane and Trumpton Lane and these schools are for the younger age group!
1025	4	Also, would these schools be able to accommodate an influx of new pupils – very doubtful! So where would new appropriate facilities be built?
1025	5	Having said all the above it must be pointed out that there is very little employment in Retford now and with the increased cost of travel, be it public transport or the use of
1026		We oppose the proposed housing development on Kilton Forest Golf Course and the land should remain a leisure activity which is used by young and old male and female workers and day workers and in the summer can be used till late at night, it is a reasonably priced activity and by changing this you would be putting people out of work, a who travel from out of town to use it.
1027	1	I have lived in my bungalow 4 years and are very happy here so I am very upset the land might be used for developing.
1027	2	I use the land for my weekly organised walk with the Bassetlaw walking group I enjoy it and many use the walk to exercise their dogs.
1027		Also the golf course is used by many from early morning until late in the evening in rain, snow, frost, wind.
1027	4	I thought the land to be a greenbelt area and involves many bridle paths. I am sure we have enough houses in Worksop. I hope the development doesn't happen on site nu
1028	1	We have lived here in Dryden Dale for at least 30 years. We did not have a golf course then but now I see young men and old boys and ladies going for a day out golfing on
1028	2	Plus there is a bowling green which my partially sighted son uses, where will he go if it is up for future housing development.
1028	3	There is also the field to the top side of the golf course which people use for a variety of sports or just running around.

1028	4	I don't think that the famous names belonging to golf who come from the area will be very pleased now they have put Worksop Kilton Golf club on the map. I prefer that t trouble that residents and the Council went to, to get a working mans golf club.
1029	1 1	Kilton Forest Golf course is a public amenity and as such should be preserved for future generations, not grabbed up to provide space for houses. If it was the only site avai District then I would have no grounds for objecting.
1029	2	Living as I do, next to the course I have seen it being built and developed over the years and now the trees and bushes and shrubs have grown into maturity. Surely from a replace grass and trees with a housing estate is to increase the carbon footprint at a time when this country is committed to reducing it. It is pleasing to look out over the c is not as pretty as the Augusta National course in Georgia, but I would still be very sorry to see it go.
1030	1	I object to your ill thought through plans for development in and around Retford. As a local Council, you should be representing the wishes of the townspeople, not forcing Retford is an historic market town and we should be preserving its character for future generations to enjoy, and not building more nondescript, poorly designed, houses to landscape where Bridon Wire and the Beehive Works were situated.
1030		I particularly object to your plans to build around Bracken Lane and Grove Coach Road as this area is unsuitable for a number of reasons. Whilst I understand this area is no problems with drainage which would require a massive investment to alleviate. The ground is lower than that surrounding it, so water would need to be collected and pum cope with flood events such as occurred in June 2007.
1030	3	The area already struggles to cope with peak traffic and there is not the space to widen roads or provide roundabouts or large controlled junctions to ease traffic flow. Brac of the 30 mph zone at the West end and Grove Coach lane is also constricted until it reaches the fields. Traffic would start using the lanes to Little Gringley, which currently suitable for widening, but when it becomes Grove Street, nothing can be done due to housing and the canal bridge. To use the proposed access off London Road down the that you would need to compulsory purchase peoples' gardens to allow for a width suitable for two cars to pass. Once you do get off the proposed estates what then? The cope, but head towards town and London Road regularly backs up to the Elms Hotel and that is the start of one long queue to get through town. To go through Ordsall requ over the Idle and the narrow roads leading either direction of this, as well as adding to the traffic from the new Bridon Wire housing estate. I don't see how this infrastructu investment and the demolition of several properties; or are you going to build a big flyover or outer ring road for the town?
1030	4	There are then the wider aspects of services within the town. The Council claims that capacities of facilities such as Schools, Health Care and Leisure provisions will be increand who will pay for them? What steps have been taken to cater for all of the people who may move into the Bridon and Beehive sites up to date? I have not noticed any demands of these two large developments, so why would the Council do anything different in future? Where are these extra people supposed to work once they move to large businesses to bring jobs into the area? If the whole of Bassetlaw, Newark and Sherwood and Mansfield are to have thousands of homes built, then where are the tho come from? If you do have to work against the wishes of residents and further destroy the character of our town, then I suggest you build in the area marked 51 & R7 on the Options Consultation Paper. At least the infrastructure surrounding this area may be able to cope with your plans.
1030	5	If you do have to work against the wishes of residents and further destroy the character of our town, then I suggest you build in the area marked 51&R7 on the Bassetlaw S Consultation Paper. At least the infrastructure surrounding this area may be able to cope with your plans.
1031	1	Building on area well know to flood
1031	2	Inadequate drainage
1031	3	Road access already congested - Emergency services compromised
1031		Bracken Lane Primary School already has outstanding intake appeals
1031		Access around Retford to the Secondary schools very poor from these areas
1031		Within conservation area's
1031		Doctors Surgeries are at opposite side of Retford
1031	I X I	Although we are against ANY future development around Retford due to the lack of job opportunities; leisure facilities; local amenities; keeping the character of a 'Market future build take place on the Northern part of town which have better access facilities to schools, doctors etc. These sites would be Nos 571; 572; 51; 37; 512 & 7
1032	1	I cannot believe this location is even being considered as it is the only Municipal Golf course in the region and provides an alternative to the private courses which are well proportion of the local population.
1032	2	In addition there are large areas of brown field sites within Bassetlaw which would be much better utilised for housing than removing a Greenfield site that is much loved b
1032	3	I also cannot believe the council are considering removing a sporting facility, is this not totally against the current agenda to promote healthy life styles and fight obesity, w what a rubbish message this proposal is sending out.

1033	1	We would like to express are concerns about the letter we received from you. We would like you to put our objection to the council or anyone within their power to STOP Golf Club. We bought our house 8 years ago because it over looks the Golf Course and we would like it to remain that way, my husband plays on the course and he says it something that gives a lot of people a lot of pleasure.
1034	1	Our main concern is that there will be a lot greater traffic generation on Tiln Lane which is already dangerous because of all the Heavy Goods Vehicles that are diverted on Welham. All this extra traffic will only add to the already dangerous condition. All this traffic has to pass Carr Hill School which is already dangerously congested at school a
1034	2	here was a child killed on this road a year or two ago so we feel that to put even more traffic on this road would be criminal
1034	3	Our next concern is the extra demand on an already overworked sewerage system in this area. There is also some localised flooding because of inadequate top water drain
1035	1	If there are any major hazard sites and pipelines, or associated consultation zones, within the Local Development Plan, it would be helpful to indicate to potential devel their presence. The paragraphs in the attached annex could form the basis of a policy statement for inclusion in the plan, which may subsequently avoid the su inappropriate proposal.
1035	2	In addition, we suggest that the proposal map be market to show the location of any major hazard sites. We particularly recommend marking the routes od any major incidents involving damage to buried pipelines occur because third parties are not aware of their presence.
1035	3	HSE will advise you should there be any changes in how HSE provides land use planning advice as a result of recommendation on the integration of societal risk into th made by the Major Incident Investigation Board into the fire and explosions at the Buncefield Oil Storage Depot, HSE's proposals for revised policies to address societal risk into th installations, or other developments in the planning sphere
1036	1	I have no objections, I will be sad to loose the uninterrupted views from my back garden that we have enjoyed for the past 28 years, however, I understand that these new employment for the people of Worksop, which can only be a positive move.
1036	2	I only have one suggestion, and that is, from conversations I have had with people in my area and age group, that there is a shortage of affordable Bungalows in this area f would be a perfect site for such a development.
1037	1	Whilst we support the principle of utilising site assessment criteria to assess the suitability of respective sites for development as the right and proper course of action, it is and its outcomes that is critical to deciding which site should come forward. The setting up of a green, amber and red system to score each criterion should be seen as a gr determining which sites should come for development. A totting up approach of scoring greens ambers and reds is too simplistic and potentially flawed. Paragraph 2.17 of Council's intention to rank the sites, yet the remainder of the paragraph and the following paragraph 2.18 conversely suggest that ranking of sites is in fact what the Counc issues that need to be considered in the interpretation of the 'scoring system' and which mitigate against applying a simple scoring system. I set out examples below:
1037	2	Weighting -Should all nine criteria be given equal weight or are some criteria more fundamental to the site selection? I would suggest for example that criteria 2· compatit important than criteria 4 ·Loss of best and most versatile agricultural land • of particularly as the Council are not generally looking at many 'strategic' scale housing sites of Defra is to be formally consulted on the loss of best and most versatile agricultural land.
1037	3	The consideration of Constraints -The larger the site, and <i>I</i> or the more complex the site in terms of its capacity for mixed use, the greater the prospect of development consignificant constraints cannot be overcome then in many cases the site should not be developed. However there will inevitably be large <i>and or</i> mixed use sites which have resolution, that will result in a site that could deliver major sustainability benefits, being marked down to an amber rating. Other smaller greenfield sites which deliver limit secure a higher green rating
1037	4	Criterion 5. Impacts on Water Source Protection Zones -this criterion potentially generates a conflict in that sites in the major (sustainable) settlements may well be score sustainable locations may score green by virtue of not falling with in an SPZ. Given that housing is not considered as a polluting activity, we would question the merit of inc as it has the potential to downgrade sites on the basis of location within a graduated SPZ despite having negligible impact thereon.
1037	5	In our opinion, there should be an additional 'local infrastructure' category which assesses sites in respect of their ability to support existing community facilities and infrast part of the site allocation. Criterion 3 -delivery of economic development opportunity -is the only criteria which positively scores sites for delivering economic development taken into account when the suitability of a site is being assessed. For example, the ability of a site to support local facilities should be recognised, as should sites which ca community has identified a specific need. For example the opportunity for a major site to deliver a primary school site, or for a smaller rural site to deliver a local play area tangible and material benefits that individual sites can deliver, yet these considerations fall outside the current range of assessment criteria. Our request to the Council is thenefits that a site has to offer and not to be too focused on the traffic light scoring system

1037	6	We have expressed the view in responding to the Core Strategy that we consider that the scale of housing promoted for Harworth-Bircotes for the plan period to 2028 is r marketability of the settlement and long term historically low housing completion rates. The regeneration agenda for the town is acknowledged yet the housing delivery e submitting Core Strategy representations we proposed that the proportion of housing proposed for Harworth-Bircotes be reduced from 22% to 16% and the residual 6% (a and Worksop where annual housing completion rates are four times that achieved at Harworth-Bircotes and these settlements continue to be far more likely to deliver the by placing unrealistic delivery expectations upon Harworth.
1037	7	On behalf of our clients, the Hospital of the Holy and Undivided Trinity, we are promoting housing development of up to 200 dwellings on land to the west of North Road a development of around 25 hectares taking in sites 51j571/572jR6 as illustrated at Figure 5.2 of the consultation document. More detailed supporting comment in respect in the response to Question 12. The residential development site extends to approximately six hectares and sits comfortably adjacent to existing residential areas to the so The presence of a retained HV electricity cable effectively constrains the north western limits of residential development and in this general location a buffer zone of open both proposed residential and employment areas) is proposed. The residential development will be accessed via a new priority junction from North Road in a location that Highway Authority and indicated on the Masterplan accompanying these representations. There is scope for an internal access road to link the proposed housing directly t required and/or expedient. The residential development will deliver a new dedicated length of off-road cycleway linking the full extent of the proposed housing and employ North Road into Retford town centre.
1037	8	The technical studies undertaken to date confirm that the residential site is viable and deliverable. It is a vital part of the overall mixed use scheme not only in terms of pro- terms of its significant contribution to funding the extent of infrastructure that will be necessary to service the substantial extensions to the Trinity Park Industrial Estate. I developer and so will utilise receipts from residential land sales to service and bring forward onward phases of Trinity Park which they administer through their appointed consultation, the respondents were notified of a potential requirement for an new school site to the north of Retford to accommodate children arising from housing devel northern side of the town.
1037	9	In this consultation response, The Hospital of the Holy and Undivided Trinity have Signalled their willingness to assist the Education Authority and have identified a possible site is part owned by the Trinity Hospital and part owned by Bassetlaw District Council.
1037	10	On behalf of our clients, the Hospital of the Holy and Undivided Trinity, we are promoting employment development of up to 19 hectares on land east and west of North F development of around 25 hectares taking in sites 51/571/572/R6 as illustrated at Figure 5.2 of the consultation document. More detailed supporting comment in respect contained in the response to question 12 The illustrative Masterplans accompanying this submission identify the potential to accommodate 81/82/ BB units of varying size coverage in the region of 35,SOOm ² • In addition, provision is made for other economic uses including local scale retail uses which can serve both proposed employment a points of access available to the employment area:-a new gateway roundabout feature at the hub of the site linking both economic development areas east and west of N north western end of the site. These accesses have been discussed and agreed in principle with the Highway Authority along with extension to the 40 mph speed limit. A n employment area and links through to the proposed residential area to the south east. The intervening commercial and open area provides an appropriate buffer between
1037	11	On behalf of our clients, the Hospital of the Holy and Undivided Trinity, we are promoting a mixed use development of up to 200 dwellings on land to the west of North Ro development of around 25 hectares taking in sites 51/571/572/R6 as illustrated at Figure 5.2 of the consultation document. This proposal builds on the successful Trinity P located to the northwest of the town centre in a favourable and accessible location. Over the last two years Trinity Hospital have invested in preliminary technical studies & utility infrastructure and master planning and can draw this together into an initial Site Masterplan which supports this representation. The Masterplan and the range of discussion at this stage yet highlights the capacity in this accessible location to deliver: The Masterplan takes due account of the electric cables to be retained, water and g employment, educational and community/retail facilities in a comprehensive scheme. The access arrangements have been agreed in principle with the Highway Authority, the North Road at a gateway entrance into the town. This highway strategy can be implemented within the highway and on land controlled by the site owners but will req further out of the current town limits again acceptable in principle with the Highway Authority. The Masterplan includes a sustainable range of mixed uses which we consi use yet will not conflict with the role and function of Retford town centre. It is essential that both the housing and employment allocations are confirmed together as the of the service and highway infrastructure necessary to secure the comprehensive development of the esten and the employment opportunities. The proposals are not set in indicative and viable mix of development which upper sub and employment market for development in the short to medium term of the plan period. The I Masterplan is largely as shown on the plan at Figure 5.2 although the residential area is slightly smaller due to the constraint of a retained high voltage cable cutting across identified as

s not deliverable having particular regard to the y expectations are wholly unrealistic. In 6 (around 462 dwellings) reallocated to Retford the 462 housing completions in question, than

1037	12	In recent years, Retford has seen the 1055 of traditional industries and a loss of sites to housing development. At the same time a number of replacement employment sit been constrained by limitation to the B Class uses, and some to the extent of a restriction solely to 81 uses. In some case these limitations have been too restrictive and th opportunities that a more flexible approach to employment land would have delivered. Retford is not in a strong enough position to dictate the composition of its employ accommodate employment opportunities that come along by taking a flexible approach to its employment land portfolio of which the Trinity landholding is arguably its st
1037	13	In locations such as Retford, it is imperative that a very flexible approach to economic development is adopted within PPS4. It is not possible to anticipate the uses that en therefore constraints must not be imposed which prevent sites from accommodating the uses that arise. The policy text should provide for allocated sites to accommodat issue was raised at the hearing into a Core Strategy for a neighbouring Authority recently and, as a consequence, amendments were incorporated to provide for the poter such as Hotels, Health and Fitness, Specialist Care and sui-generis uses such as car dealerships. The suggested policy amendment did not detail specific alternative uses, bu wording of the proposed amendment that could be applied to sites identified within the Bassetlaw Site Allocations DPD
1037	14	This approach is promoted from the outset in respect of the Trinity Hospital landholding on North Road and is reflected in the indicative Masterplan which supports these
1038	1	We do not support the approach to delivering housing numbers in settlements based purely on resident's surveys on the number of new homes they desire to see in their housing distribution targets across the RSC's appear to have been based solely on the findings of the resident's surveys. It would appear that little or no consideration has document: 'Services and Facilities Study' undertaken in September 2009 or the 2011 Infrastructure study for the Core Strategy and Development Plan Management Policie of the RSC, and their respective capacities be taken into consideration, the share or distribution of the suggested 10% of the overall housing growth for Bassetlaw, could w
1038	2	We consider that the housing growth for Walkeringham should be 14 houses as an absolute minimum and that favourable consideration should be given towards addition help deliver additional affordable to meet local needs housing than the 35% aspiration and or other facilities which are required/ desired within the village. The Walkering of the respondents knew of people in need of affordable housing accommodation. Given also that the Core Strategy places Walkeringham in the highest category of targer would appear that there is affordable need in the village which should mitigate towards a flexible (higher) housing target if it can deliver a needed affordable homes in the
1038		On behalf of our land owning client Mr G D Strawson we promote the allocation of part of the site reference 438 which wraps around the primary school, and close to the point within the village and development would broadly 'contained' by surrounding built form. Comprising the Primary School, and the larger Grange Farmstead at the ease to the primary school and the larger Grange Farmstead at the ease to the primary school and the larger Grange Farmstead at the ease to the primary school and the larger Grange Farmstead at the ease to the primary school and the larger Grange Farmstead at the ease to the primary school and the primary school and the larger Grange Farmstead at the ease to the primary school and the primary school and the primary school and the primary school and the primary school at the pri
1038	4	Our client has been approached previously by the school /education authority to ascertain whether they would be willing to dispose of a parcel of land immediately to the footprint. This area is shown on the plan below. Our client was happy in principle to proceed with the transfer yet this did not unfortunately proceed at the time due to the previous land owner. We would confirm however that should part of this site be allocated for housing as broadly proposed in the indicative block plan then the land can b education authority. The school has recently confirmed that they remain very interested in acquiring the land and this will be discussed at a meeting to be attended by reprint early February 2012. The school acquisition of the landholding would facilitate expansion of the school and or its outdoor facilities, requirement which feature very high
1038	5	The Walkeringham village survey also revealed that the highest level of respondents to the questionnaires wished to see a play area within the village. In this regard, the la for a play area and consider that the land immediately to the north of the school playing field ideal for such facilities, as shown on the very indicative plan below. Contribu considered as part of the overall package of proposal for the site. We consider that as part of a small housing development, the play area would be an ideal, secure and ov adjacent to the primary school. Again we propose to discuss this opportunity with the Parish Council at out February meeting.
1039	1	Whilst we support the principle of utilising site assessment criteria to assess the suitability of respective sites for development as the right and proper course of action, it is and its outcomes that is critical to deciding which site should come forward. The setting up of a green, amber and red system for each criteria should be seen as a guide ar which sites should come for development, as a totting up approach of scoring greens, ambers and reds is too simplistic and potentially flawed. 1039	4	Impacts on Water Source Protection Zones -potentially generates a conflict in that sites in the major (sustainable) settlements may well be scored amber or red, whilst site green by virtue of not falling within an SPZ. Given that housing is not considered as a polluting activity, we would question the merit of including this criterion for housing a downgrade sites unnecessarily on the basis of location within a graduated SPZ, whilst in reality having negligible impact thereon.
1039	5	In our opinion, there should be an additional 'local infrastructure' category which assesses sites in respect of their ability to support existing community facilities and infrastructure' category which assesses sites in respect of their ability to support existing community facilities and infrastructure' category which assesses sites for delivering economic development yet there are wider considerations t facilities as part of the site allocation. Criterion 3 is the only criteria which positively scores sites for delivering economic development yet there are wider considerations t suitability of a site is being assessed, such as the ability of a site to support local facilities or alternatively deliver facilities for which the local community has identified a sp a major site to deliver a primary school site, or a smaller rural site to deliver a local play area or school playing field extension are tangible and significant benefits that indiconsideration falls outside the current range of assessment criteria used by BDC.
1039	6	Our request to the Council is to be pragmatic and look critically at all the benefits that a site has too offer and not to be too focused on the traffic light scoring system in the
1039	7	On behalf of our clients, Omnivore Limited we are promoting a modest residential development of up to 30 dwellings on the site of the property and former horticultural side of Welham Road on the north western edge of the Retford Site reference 6.
1039		The allocation of this landholding offers the District Council the opportunity to redraw the Retford Settlement Envelope along a clearly defensible Quitter boundary where demarcated boundary within the property. By pushing the settlement boundary out to the east as far as the canal, a dear physical demarcation is secured and the settlem south side of Welham Road where the canal clearly defines the physical north-west edge of the town
1039		The site owners have previously undertaken flood risk assessment and submitted this to the Council confirming that the site IS NOT at risk of fluvial flooding AND THIS HAS SHLAA. They have also confirmed an alternative option for access from Longholme Road which could secure a higher density of development than the lower density scher Welham Road.
1039	10	The site is located in a highly marketable and accessible area of Retford and on a main bus route into the town centre. This vacant, self contained and available site is well here would follow logical boundaries and have no adverse amenity or visual impact on the immediate surroundings.
1040	1	Destruction of agricultural land. My first concern at the possible development of this area is that this is agricultural land. Even the area which is now a golf course has not present use but will in fact be gaining value in that respect by being more or less fallow for so many years; its only crop being grass. The damage to the area's flora and fa mention the loss of amenities for the people of the town, i.e. the golf course and the countryside walks which are well used.
1040		Traffic. If the area shown was all to be developed there would be an enormous increase in traffic. Access to the area would most likely be concentrated on the Northern s the canal, railway and sewage works dividing it from Retford Road and the A57 bypass. This means that a link to the bypass would not be easy to provide either to the northern s the existing roads. Should industry be developed in this area it would cause an increase of traffic to the A1 with a potential detrimental effect on the village of Blyth.
1040	3	Services - Sewage treatment. Some of this development would of necessity be very close to the Sewage works, which would probably need to be enlarged. The proximity development would not be ideal but especially not to a residential area. The site is, of necessity, low lying and any smells emanating from it rise, especially in warm weath Kilton can be malodorous at times even now; to have houses, shops, schools any closer would not be good. When land was developed for housing near to the Hallcroft se resulted in a great many complaints about the smell. It is a problem which is difficult if not impossible to solve.
1040	4	Water Supply. The water supply could not be supplied by gravity to the higher areas and at the moment I believe that the Kilton and Prospect area have their supply pump arrangement be adequate to cope with development of the proposed area? If not, will it be possible to increase the capacity of the present facility or would it be necessa the amount of land which has to be developed?
1040	5	Finance. Services to the development will be very expensive; is the cost to be met from increased council taxes?
1040	6	The need for housing cannot be denied but consideration must be given to the quality of life for the occupants of both new and existing houses
1041	1	I wish to object to the development of plot 35 my reasons are as follows. Any buildings on this site would be detrimental to the wildlife and flowers of the ancient woods of getting through the trees.
1041	2	The public footpath and bridal way is used by hundreds of people (young and old) each week as a leisure facility and is extensively used by dog walkers, cyclists, horse ride and further afield.

1041	3	This is prime Agricultural land for food production and in turn creates jobs for the area.
1041	4	The line of houses at the moment create the boundary line of Worksop, building on these fields would create an urban sprawl spilling into Carlton-in-Lindrick connecting a
1041	5	The ratio of houses to green fields is just right and maturing nicely, any over development would ruin Gateford which at the moment is a very nice place to live, we all like
1041	6	I have studied the map and see there are other plots that could be developed closer to town and within walking distance of the amenities easing up on road congestion are
1041	7	The road from the R/A would cut through a green area which is supposed to be potentially protected.
1042	1	I am writing to object to proposals for potential sites namely no.4 on the grounds that such huge building site will ruin the green spaces that we have had for generations.
1042		There would be loss of trees and hedgerows and the habitat of various wildlife.
1042	3	The density and mass of buildings will impact greatly on the visual amenities.
1042		Has a thought gone into the extra need for jobs, schools, health care, shops and leisure facilities.
1042	5	Also where will all the traffic to and from the site and future housing be accessed from - not to mention the carbon footprint aspect of it all.
1043	1	In response to your consultation meeting, I wish to make the following comments in respect of the possible development of the above mentioned area of land at Hemmin, when planning consent was granted for the development of Hemmingfield Close, Hemmingfield Rise, and Hemmingfield Way, a condition of planning was that the number infrastructure was therefore carried out as detailed on planning approval, bearing in mind that this planning was granted some 30 years ago, therefore the number of vehi than in present times.
1043	2	Therefore to consider giving access into the proposed site from Hemmingfield Rise, is totally impractical and impossible without causing danger to all road users, and it is we the Highways Planning Department. Should this site be given further consideration I would then point out that on leaving the proposed site, traffic would travel along Herwith no possibility of increasing the width, then turn onto Hemmingfield Crescent, slightly wider but with considerably more traffic, with numerous vehicles parking on the from work, some properties have no alternative but to park on the roadway, already several incidents have taken place, emergency vehicles would find access very difficu Hemmingfield Crescent you have two bends both of which have limited visibility. You would then turn onto Hemmingfield Road, the only road of any width and the only road again owing to road conditions.
1043	3	In adverse weather conditions the bus service has been suspended, with residents having to leave vehicles at home and where possible make journeys on foot, therefore a to congestion.
1043	4	Should the site be given further consideration, I would with respect ask that thought be given to the type of dwellings, Hemmingfield development if primarily bungalows, possibility. With the possibility of alternative access roads being considered, giving easier entry and exit from site, with less disruption for residents. Whilst most roads in of day surely a solution could be found. Additional access roads could be made via Winster Grove/ Grange, onto the Dales development, or new road to link directly onto direct access onto Carlton Road.
1044		The potential housing sites I would prefer to be developed are as follows: Site nos. 6, 27, 70, 488 & 489
1044	2	I have major concerns about the allocation of land south of Ordsall for future housing use, particularly sites numbered 1, 40,41,52,259 & 364, for the i reasons set out belo
1044	3	Road access any additional houses in Ordsall will result in more cars in the area and more traffic on the roads. If existing residential roads in this part of Ordsall are taken, a one-and-a-half to two cars per household. To get into Retford town centre by car, residents of the above sites are likely to use Ordsall High Street, most of which is effecti amount of on-street parking, and then go over Ordsall Bridge onto Goosemoor Lane. Ordsall bridge is narrow, being scarcely wide enough for two cars to pass each other a pedestrians. When buses and lorries cross the bridge there are hold-ups for other traffic, which has to wait until the large vehicles have crossed the bridge. Additional house using this route and would lead to additional congestion in the High Street and at the bridge. Development of the sites in Ordsall would be likely to lead to more traffic the southwards from Retford. The single-width, hump-backed bridge with no pedestrian footpath would be inadequate for significantly increased traffic. Additional traffic through are always a considerable number of parked cars along West Hill Road, as parents are waiting to collect their children from school and a stretch of West I Hill Road is effect the reasons given above, the roads around Ordsall are simply not suitable for a significantly increased number of cars in the area, which would inevitably lead to heavier tr peak times.
1044		The main route into Retford from the south is along the A638 London Road and if houses were built on sites 1, 52 and 40, which are slightly elevated sites, these would be these sites would detract from the character of this side of Retford and would constitute further urban sprawl ; into open countryside
1044		The proposed sites are home to a wide variety of wildlife, including some endangered species. Development would be likely adversely to affect available habitat for variou hawks, kestrels, bats, foxes, hedgehogs and various insects. Development would lead to the loss of some trees and hedgerows which are a valuable habitat for a variety of

1044	6	The sites are used by, for example, walkers, runners, children playing and dog walkers and there are a number of public footpaths over the sites. Visitors to the : area as w countryside which would be lost I if houses were built on the proposed sites. The sites are greenfield agricultural land which has been un-built on since time immemorial a were allowed to take place.
1044	7	For the reasons explained above, it is considered that the proposed sites to the ¹ south of Ordsall are unsuitable for large-scale housing development and that more appropelsewhere In Retford.
1044	8	From the map of Retford in the Bassetlaw Site Allocations Issues and Options Consultations Paper, I am surprised to see that the land bounded by the Water Works, Jubile line (1/70, 1/13 and : 1/72) is designated as Potential Protected Open Space. As this land is entirely surrounded by building and development of one sort or another, it wo residential development than the virgin greenfield sites south of Ordsall. I would estimate that up to about 150 houses could be \cdot built on this site. Future access to this lar available from the end of Silver Street when Jubilee Road was, developed in the late 1930's -there is a gap between the houses on the south side of Jubilee Road which we
1045	1	Areas 3, 370 & 570 are flood zones. This land has flooded in the past which caused untold problems throughout Retford -why would you build on land that floods?
1045	2	Primary School capacity. Bracken Lane Primary School is already running at full capacity where would all the extra children go?
1045	3	Congestion. Grove Coach Road & Bracken Lane are unfit for any extra traffic, the queues to join London Road, regularly go back to Rose Avenue, more houses, mean yet m
1045	4	Inadequate infrastructure. The area just can't take any more traffic
1045	5	Road Safety -London Road/Bracken Lane and London Road/Grove Coach Road junctions
1045	6	More traffic would mean more accidents.
1045	7	Loss of hedgerows - The mature hedges around the above areas are a haven to wildlife., where will they go if the hedges are chopped down
1046	1	Is area 69 common land? If so, are the council allowed to develop common land which is for use by all local residents and is in close proximity to known and very well-used explain whether the areas of proposed development are potential areas identified by the council themselves or whether they have been approached by individual owners In addition, with regards to area 69 which is the area of most concern to ourselves, I am fully aware that the owner of the Hop Pole Public House, recently requested plant site and this was refused; surely this would have created employment, attracted cash-bringing visitors to the Retford area and would undoubtedly have been an attractive should not have had a particularly adverse impact on local wildlife/fauna. Why that was then turned down? Was it that the council range the proposals down in order to 'p
1046	2	Moreover, if area 69 is selected and developed, a further concern is that planning would d then be requested for the fields to the south and east of Habergham Cottage, th wildlife/fauna, loss of green areas of Retford and further loss of privacy to ourselves.
1046	3	Areas 6, 7 and 69 are all within flood zones 2. When we enquired with the Planning Department at Bassetlaw District Council whilst considering our purchase of Haberghar informed that development to the rear or either side of our property would be extremely unlikely ever to be allowed due to the fact that the whole area is on a flood plair disappointment and concern then that planning is being considered for this area; certainly our property has suffered from flood related problems and I am certain that any be likely to do so also. The map on Bassetlaw District Council's own website confirms that the areas 6, 7 and 69 are all within known flood zones.
1046	4	Area 69 land is clay based with heavy water saturation during heavy prolonged rain and/or snow.
1046	5	Area 69 has been empty for many years as a pseudo nature reserve, with the following wildlife seen hunting off the land: Owls (including Barn owls), hawks and foxes. The these nest and would any development on site 69 affect the wildlife? Has any survey been undertaken in relation to wildlife and fauna on the site? Bats are of course, a pr roosting places are on the land under consideration for proposed development. I would suggest that a survey would need to be undertaken prior to developments as it is a recklessly disturb such roosting places. In any case, there is clearly a danger of the destruction of local ecological habitats.
1046	6	As part of area 69 runs along the Chesterfield canal what would the impact on the canal wildlife be? What would also be the impact on the cleanliness of the canal?
1046	7	The land level for area 69 is below road level and runs along the chesterfield canal. Main drainage would require pumping to road level or all houses would require septic t pumping station or 114 tanks have on the environment?
1046	8	The average number of people per house is around 2.3, the average number of cars per house hold is expected to be close to 3. With the possibilities of a total of 458 cars which is a major artery to Gainsborough and beyond, what will be done to easy congestion and make it safe for so many cars, as at present there are two entries to the ro
1046	9	During rush hour the A638 Arlington Way is heavily congested both ways, another 228 cars using the road will cause further congestion and pollution. Furthermore, with a proposed for the Retford area what will be done on entry and egress for traffic using the A638 and A620?
1046	10	On a personal note, Habergham Cottage at present is only partly overlooked by the Hop pole public house some 150 yds. away. This only has a balcony, three upper and lo house Our property has been designed for outdoor living with a swimming pool and hot tub. The build of so many properties would dramatically impact on our privacy and be heavily overlooked with the resultant loss of privacy that would follow.

1046	11	Also as our house is just off due south, so many houses to our south west would affect the amount of light to the property. As previously mentioned, the house already su the field to our south and east, which during bad weather causes surface water to run under our property. At present area 69 is an undeveloped and so surface water run By placing dwellings on the land I would argue it would affect the land drainage from said field which would then force more surface water on to our property. We would any increased water issues with our property would be assessed and put right I am sure there would be other concerns apparent in due course but unfortunately we have proposals a week ago through a local resident; I would just like to point out that at no point have we received any form of notification, or questionnaire and have clearly run I do appreciate that the investigations are at an early stage but I do feel that consultation with residents is vital for them to be reassured and to have their legitimate quest.
1047	1	Question 1 -Screening Methodology -this is very difficult for the 'layman' to understand and comment upon, but I feel that some sites which may be suitable / preferable I reasons e.g. not currently for sale, and yet this is a plan for the next 20 years!
1047	I 2	However, I fully agree with criterion 1 regarding public opinion. This should be given the highest priority and only in exceptional circumstances should development take population
1047	3	Question 9 -The allocation of more housing in the town should be controlled and ~based upon local public support and need, not greed of the developers
1047	4	Question 10 -Development should take place on brown field sites and not green field sites. There is plenty of small in-fill which could take place within the town area of Re the target number of increased housing. For example apartments in the canal side warehouse (Discount Cycles) which would greatly enhance the area and raise few objec Alban's Church site, the building once used as the Working Men's Club and the new privately owned car park opposite the Little Theatre, could all be developed with little enhance the town centre.
1047	5	Moving to the periphery of the Retford area is the Bramcote Lawn school site. This has good local access as well as access to the A 1 and to Retford and would not encroad distance away. The newly built Gamston primary school appears to have room for expansion and the nearby secondary school of Tuxford could be reached with ease as the significant number of properties could be accommodated on this site
1047	6	Question 14 -The open spaces identified should be protected and more should be added to this list, including the agricultural land listed as sites 489, 488, 511, 370 and 3. should definitely NOT be developed for the following reasons
1047	7	No public support -'fundamental'
1047	8	2. Flood risk -this land has flooded frequently over recent years and building on it will merely make this problem worse.
1047	9	Local road access problems -Bracken Lane and Grove Coach Road are already very busy roads with issues regarding parking and exiting out onto London Road and any dev problem worse.
1047	10	Any development on these sites will impact negatively on the local landscape's character. The sites mentioned above are all classed as "conserve" in the Bassetlaw Landsc should not take place (criterion 6).
1047	1 11 1	Under Criterion 8 any development will significantly detract from the existing green infrastructure of this area. These fields with their trees, hedgerows and ditches are a h voles etc. All of this will be lost if development takes place here due to the loss of trees, hedgerows, ecological habitats and landscape
1047	12	Question 121 -If the local people are happy and the Travelling community is happy, then perhaps it is better to concentrate development around existing traveller sites.
1047	13	Question 153 -A few years ago a very tidy and well maintained Traveller site was set up next to the A 1 south of Elkesley at the junction with the Walesby / Ollerton Road. disappeared after a while, but it was in a position which did not seem to create any problems. I hope that you will find my comments and suggestions useful. You will note building on certain suggested sites, I have also made some further suggestions for sites that may be more suitable / appropriate for development.
1048	1	The wildlife in the area including deer, snakes, owls and I have been informed dormice would be adversely affected.
1048	2	The present road structure is insufficient and the increased traffic on Tiln Lane would be unacceptable and a danger to life.
1048	3	The entire character of the area would be destroyed.
1048	4	While I appreciate land needs to be put aside for development I feel that the land to the N W of Retford i.e. plots 51 and 58 would be a better choice as this has better ac
1048	5	This would not destroy character of area as new housing already there, also it includes development land.
1049		I wish to object strongly to the development of any additional houses at site 35 for the following reasons: A) Extension of town boundary and urban sprawl. The current G town boundary. Development on site 35 will, therefore extend beyond the boundary and there is a concern that Worksop will eventually consume Wallingwells and contin Lindrick.
1049	2	B) Loss of amenity for children, residents and visitors. The proposed site is bordered by Owday Wood/Rough Piece and Owday Plantation, which are sites of importance fo present untouched by housing. Development on site 35 will cause significant disturbance to these valuable woodlands.
1049	3	The public footpath/bridleway entering the area from Monford Road and stretching to Owday plantation is bordered by beautiful tree and hedgerows, which are importar The bridleway and footpaths are used daily by many walkers, both from the estate and also by visiting recreational users.

1049	4	Development on this would result in a loss of amenity for local residents and would be detrimental to the entire area.
1049	5	C) Loss of agricultural land. Agricultural land provides employment. Site 35 is productive agricultural land. It is currently being farmed, producing crops including wheat an
1049	6	D) Access to shopping facilities our local shops which are sites off the estate are already busy with traffic and virtually gridlocked at busy times, which is a measure of thei including the proposed new Asda and Tesco supermarkets, are sites closer to the town centre, and are impractical for access on foot from site 35. This will lead to increase
1049	7	E) Access to healthcare provision. Access to healthcare provision is limited, with doctors and dentists being sites on the other side of town. Access on foot from site 35 is in
1049		F) Provision of utilities and services. Development on site 35 will require significant investment in infrastructure to meet the demands of the new housing development, as to the remote location of the site. Improvements would be needed to upgrade level of service provision due to increased demand.
1049	9	The Gateford housing estate at present boasts more than one thousand properties. It works well, is mature and suits the residents and local area well. An extension to this of amenity for local residents and have a detrimental effect which would change the character of the entire area.
1050	1	Yes
1050	2	No
1050	3	Areas 06,07,37,46,69,46,309 and 533 in the Tiln Lane Area
1050	4	Areas 01,40,41,52 and 364 in Ordsall
1050	5	The reason behind the aforementioned is [a] Environmentally the areas 03,370,488,489 and 511 are, in the majority of cases, subject to flooding and spend considerable p
1050	6	The infrastructure for existing drainage, sewage and transport is already at maximum capacity
1050	7	Additional pressure on residents living close to Bracken Lane School during pupils arriving lunchtime and leaving periods. Children's safety must also be a concern with any
1050	8	The ecology in the area will be decimated. There is a significant number of rare birds, wild fowl insects and animals whose habitat will be destroyed and final
1050	g	the vast majority of the land around the Bracken Lane area I believe is on existing flood plains. We all noticed the folly and disastrous consequences of undertaking buildin country in the recent past. As far as I am aware the other areas I have noted will have their own inherent issues, I am sure they will not have the serious effects that apply
1050	10	Please refer to my comments noted in question 10
1050	1 11	Having been a resident in the Bracken Lane area for over thirty years the proposed sites have predominantly been under water. They have been referred to colloquially as illustrates the dangers of allowing development in that area. I am sure other areas previously mentioned would be far more appropriate areas to meet the needs of the lo
1051	1	The method appears flawed as it identifies "infill " sites (i.e. building in gardens) as part of the plan where as these sites are for separate consideration.
1051	2	The amount of housing and employment allocated is in excess of what is needed. There are plenty of vacant properties (domestic and commercial) already in Worksop are Vesuvius/Kilton sites will provide ample employment opportunities
1051	3	Small infill sites (218, 151) or to the edges of existing sites (35) would be preferable. These areas already have the infrastructure in place to cope with a greater number of Shireoaks has not integrated with the existing community and roads still not adopted by the council.
1051	-	W1 is a greenfield site and with alternative brown field sites should not be used.
1051		W13 is next to the canal (green corridor) and development would have to be carefully controlled
1051		W12 has existing infrastructure and transport links.
1051	7	W9 is the best site for mixed use development. It has existing links with A1 via 2 accesses and therefore minimising impact on road links in the town. Other sites would rec
1051	8	All identified open spaces should be protected. in addition the site around Shireoaks marina 153 & 587 should be included in this category.
1051	9	Development should be limited so as to preserve the identity of villages like Shireoaks and Rhodesia and not allow them to be engulfed by Worksop.
1051	10	153/587 is a unique area within the county and possibly with the country and as such it should be preserved and enhanced by the council. The Chesterfield canal provides gateway for tourists. The area needs to present Worksop at its best not deter visitors from the rest of the local area.
1052	1	Fundamentally in agreement
1052	2	However greater emphasis should be placed on the economic and financial vitality of the village so as to support services and facilities.
1052	3	Development should be on sites where space can be provided, so a lesser density and avoid infill and hence intensification of building.
1052	4	Option A
1052	5	14 houses over the period is inadequate, if assuming this is total, not houses per year, 10-15 per year is a more realistic proposal. The feed back also refers to provision o

1052	6	224. it combines proximity to the built environment, low intrusion into countryside, accessibility, space to provide the housing and facilities sought and is available in eithe
1052	7	Sites 157 and 537 are outside the natural boundaries of the village
1052	8	156 and 516 are infill and intensification
1052	9	234 is an extension into open countryside away from existing buildings
1053	1	Option A
1053	2	No I do not agree that land should be allocated for at least nine new houses. I think that development should be restricted to a maximum of nine houses and these should development of the village would spoil its character and put additional strain on the existing somewhat infrastructure.
1053	3	I don't think any of the indicated sites should be developed.
1053	4	There are issues with the infrastructure especially electrical supply and main drains that need to be addressed for existing houses. Noise levels from the A1 are a major nu
1053	5	All existing green spaces - the village green, church green, cricket field and school playing field - should be protected from future development.
1053	6	I think that any new gypsy and traveller sites should be concentrated in and around existing sites because there is adequate space for expansion of these sites. Expanding
1055	0	than creating new sites.
1053	7	Transit and residential pitches should be provided together to minimise cost for tax payers.
1054	1	Yes.
1054	2	Option A: Spread between Worksop; Retford and Haworth Bircotes?
1054	3	Yes we agree that there should be at least 5 new homes in Gamston.
1054	4	Site 410.
1054	5	Yes the school should be protected.
1054	6	Yes his site should be developed before any other as it is a brownfield site.
1055		Yes
1055		Option A: Spread between Worksop; Retford and Harworth Bircotes?
1055		No, we disagree. Gringley has seen enough new housing over the past few years. Many homes are still empty and for sale.
1055		No sites
1055		Yes, we agree.
1055		Existing sites where there are facilities.
1055		Separately as cultures may not mix
1056		Yes
1056		Option A: Spread between Worksop; Retford and Harworth Bircotes?
1056		No, it is a local village for local people.
1056		None of the above sites.
1056		Yes, the village green is very important to the village.
1056 1056		Existing sites Separately
1050		Option A: Spread between Worksop; Retford and Harworth Bircotes?
1057	2	Yes, because six is a reasonable amount over 18 years.
1057		sites 101 and 107
1057	4	This should be protected as a public house.
1057	5	The spinney and village green should be protected.
1057		Option A: Spread between Worksop; Retford and Harworth Bircotes?
1058		No, the village cannot have anymore housing due to the large development at the detention centre site. This development is still not completed.
1058	3	The two sites shown are not suitable for housing due to the conservation restrictions.
1058	4	Too much housing already.
1058	5	The village sports ground needs to be protected from development.
1059		No - the Sutton cum Lound Parish Plan published in 2010 clearly states that there is no support for any form of development within the village boundary
1059		None
1059		We are aware that there are existing planning applications within the village which must already fulfil the requirements for new housing without any further development

nt	nt	
1059	4	Yes
1059	5	Any new traveller sites should be concentrated around existing sites as these are already established
1059	6	These pitches should be kept together on established sites and to respect the travellers culture by keeping them together and not forcing them apart
1059	7	No
1059	8	Option B: Focused in just one of the above towns?
1060	1	On the whole yes, but i think a wider area should be looked at
1060	2	No: half the amount, where is the new employment for locals?
1060	3	30,35&90 these would be best in my opinion,
1060	4	W13 W1 W12 W8
1060	5	195 348
1060	6	Yes, imagine 40 yrs. down the line if it was lost
1060	7	You have highlighted a good deal be aware though that all could change and you need to be able to change with it.
1060	8	No 8 should stay Open space. Too near A60 drainage, local road congested now as previously said Schools medical including hospital Blues and twos. Remove quiet area f
1060	0	would up set the local eco and environmental status.
1060	9	Option A: Spread between Worksop; Retford and Harworth Bircotes?
1060	10	emotive area not in my back yard but a controlled area with correct and adequate policing
1060	11	together as a watching brief is best
1060	12	I don't know the area well enough to comment
1061	1	The attempt to take into account the range of criteria is sound
1001	2	but must, to gain credibility - and avoid waste - be based on realistic economic development estimates for the town. I may have missed it, but didn't see any reference to
1061	2	and Doncaster.
1001	3	Increasing employment in the area should be a basic underpinning. What kind of employment needs very realistic discussion and I would doubt that a major increase of p
1061		the highest priority. If more social and flexible housing is appropriate it would best be developed near as possible to work sites.
1061	4	Site 4/W9 which is as yet undeveloped gives the greatest opportunity for appropriate development of variety of housing and services. As developed below, I think area 35
1061	5	those coloured purple seem appropriate. Wherever possible brown field sites should be considered
1061	6	Site 35 should be retained for single use in conformity with point 2.27 compatibility criteria.
1061	7	All the open spaces should be protected and should be enlarged by a decision to remove area 35 from the major development implied.
		If any is thought appropriate, it should be small-scale and limited to a small amount of similar type housing and density as already exists, and limited to the east of the pro
1061	8	character of the area and would avoid disturbing a major amenity for the town in bridle paths, ancient trees, hedgerows and woodland which are regularly used by ramble
1061	9	In addition, the already high level of housing in the contiguous area already leads to traffic congestion on estate roads and such major arteries as Ashes Park Avenue, crea
1001	5	chair and motor buggy users from the care home.
1061	10	Extension of Area 35 on a massive scale would ruin the kind of Worksop suburb, that the Council tried successfully to create in the new residential area at Gateford as we
1001	10	extension of school, medical and leisure facilities as well as infrastructure.
		The preservation of the important environmental area round Worksop is vital or it will become little more than an extension of the crowded town central region and will
1061	11	residents to live and work there. This applies equally to 4/W9, but the problem is not as intense as in 35 as a planned development could take place, rather than tacking d
		settled community
1061		Option A: Spread between Worksop; Retford and Harworth Bircotes?
1061	13	not familiar with the existing situation. Such sites are necessary but should be chosen with great care.
		I think that location 35 is unsuitable. I am a registered child minder and over the eight years I have been doing so, the children and myself have benefited from the wonder
1062	1	have been able to watch the farmers growing crops and the children have become aware of many area of nature not only on the fields but in the surround woodland.
1062	2	I consider that the wildlife would be disturbed or killed by such developments and I consider the loss of this would be detrimental to entire estate.
1062	3	Also I contemplate as to the provision of new schooling, as gatefold park is already at its max.
1062	4	The traffic would be unbearable and we already have problems accessing gatefold rd. from the estate without a possible 700-1400 more cars leaving at peak times!!
1062	5	Option A: Spread between Worksop; Retford and Harworth Bircotes?
1063	1	I would prefer to see the development more scattered across the district and not focused purely on giant estates.

		I believe open sites are a valuable asset and that development should be avoided on these sites. They provide play space and recreational space. They provide pockets of I
1063	2	can grow creating havens for people with limited or no garden space. I believe this can really enhance the appearance of towns and districts.
1000	2	My main concern regarding the proposals is the effect of increased traffic. In particular site 35 where I currently live. With a potential 700 new houses all potentially with c
1063	3	difficult to leave the estate at peak times. Both exits to the estate (Gateford Rd and Carlton Rd) only have one lane and traffic already backs up.
1002		As a resident of the estate for 11 years we have been in situations before where school spaces have been insufficient and this is likely to recur. The current secondary scho
1063	4	with the proposed scale of development.
1063	5	Option A: Spread between Worksop; Retford and Harworth Bircotes?
1063	6	I don't have particular views on locations but strongly believe that better amenities should be provided for this population.
1064	1	I think that location 35 is unsuitable.
1064	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
1065	1	NO - Shireoaks would be part of an urban sprawl from Worksop.
1065	2	195/W8: Land at Shireoaks Common should not be developed as the open space keeps Shireoaks from being part of the urban sprawl of Worksop.
		1. There would need to develop the infrastructure to cope with the amount of housing proposed. St Luke's Primary School would need to be extended for the number of p
1065	3	and pick-up times is already chaotic and dangerous, a larger school would make it impossible to access our own homes at theses times of day. Access for emergency vehic
		seen a death in the school car park where the emergency services were unable to get quick access.
1065	4	2. The development of the above site would add to the urban sprawl of Worksop and in fact Shireoaks would lose its separate identify and become part of Worksop. The v
1065		3. The employment land would lead to extra lorry journeys around the village and the roads will unable to cope with this.
1065		I would like the council to consider developing the land on the old Vesuvius site.
1065		Option A: Spread between Worksop; Retford and Harworth Bircotes?
1065		Existing sites
1066		My opinion is that location 35 is an unsuitable site for development. If development goes ahead it will be a great loss of a much utilised amenity.
1066	2	The increase in traffic will lead to more congestion and pollution.
1066	-	The density of housing will be too great for the local infrastructure to support which will lead to even more development.
1066 1067		Option A: Spread between Worksop; Retford and Harworth Bircotes? New development and housing is always welcome, however the location of the same needs to be carefully considered.
1067		Sites should be on infill/brownfield sites and certainly not on greenfield sites in and around Shireoaks.
	2	
1067 1067	4	This is an important part of Bassetlaw where people escape to in order to enjoy the countryside. Under no circumstances should any development be built on or near Shireoaks common or near the canal.
1067	-	REMOVED
		As question 3 - Away from areas used for recreation and escapism around Shireoaks. People come from a far to enjoy the canal and adjoining countryside, this alone bring:
1067	6	people.
1067		Mixed used sites should not be used. Commercial sites need to stay close to the A57 but away from greenfield sites.
1067		Open space should always be protected. It provides a free escape from the madness of every day life.
1067		Protect Shireoaks common and the area around the canal.
1067		Option A: Spread between Worksop; Retford and Harworth Bircotes?
1067	11	They should be concentrated in existing sites, no new sites on virgin land should be provided, especially if that land is anywhere near open countryside.
1067		REMOVED
1067		Retford

1075	3	40. 52. 1
1075	4	259 plus r2
1075	5	259
1075	6	I would oppose the development of site 69 as it is already an SSSI having been left to vegetate over a considerable number of years it is low lying and tends to flood also the adjacent land also floods and spreads onto this land.
1075	7	The access and egress is at a point which is dangerous in that it is concealed from both ends of the main road
1075	8	The land itself has numerous species on the endangered list including a prolific number of water voles inhabiting the canal bank area, barn owls that nest in the area and use it as a hunting ground
1075	9	Yes
1075	10	Option A
1075	11	Existing sites
1075	12	Separate
1075	13	No
1076	1	In addition to the employment land shown, the Allocations document should formally recognise the potential contribution of Explore Industrial Park to the local economy by allocating for employment development Planning permission was granted in December 2007 for Phase I of the Explore Industrial Park, which comprised the development of a state-of-the-art pre-cast concrete manufacturing facility and new access road onto the A619. Phase I has been completed and is now operational. This facility manufactures a range of products including walls, floors, columns and beams for construction projects throughout the UK and has already generated 270 jobs. Outline planning permission was then granted in April 2010 for the remaining phases. This allowed the creation of just over 82,000 m2 of floorspace on just over 27 ha of further development plots for a range of mainly B1, B2 and B8 industrial uses. However the Bassetlaw Employment Land Capacity Study (January 2010), which pre-dated the outline permission, assessed the suitability of th site for meeting future employment development needs, and considered the site to be of poor quality and as such the site has not been considered in the Site Allocation Issues & Options Consultation Paper. We challenge the results of this assessment. Firstly the system used to rank the sites as 'good', 'average' and 'poor' quality is very subjective and a small change in score can significantly change a site's ranking. For example Explore Industrial Park (W3) scored a total of 21 and was ranked as 'poor quality', yet Land East of Blyth Road (W9), which score 03 was ranked as 'average quality' and has been allocated as a potential mixed use site in this consultation paper. The study acknowledges at paragraph 7.4 that the rankings and categorisations are purely indicative to provide an estimation of the overall quality of the potential supply or sites. Since January 2010, the situation at Explore Industrial Park has changed and there are now a number of factors which would now raise the score
1076		Since the Employment Land Capacity Study was published, outline planning permission has been granted for the comprehensive development of the site, and as part of this a number of strategic highway improvements are proposed at the following locations: M1 Junction 30, A619/A616/Slayley Lane, A619/Clowne Road/ Church Street, A618/A619, A57/A60/B6024/St Annes Drive and A57/A60/High Grounds Way. The site is accessible to the M1, A1 and A57 – a factor which helped attract Laing O'Rourke to the site – and the site should now score higher in terms of strategic access.
1076	3	completed, included measures to improve access to the site by public transport, including the provision of bus services. Local access to the site has therefore improved and the score should be increased for t criterion.

oved and the score should be increased for this

Reference	number	
Responde		Answer
nt	nt	
1076	4	This criteria only scored 1 out of 5 at the time of the Study, however since this time the masterplan permission has been approved and, as discussed above, this permis which would change this criteria score.
1076	5	The masterplan also includes the provision of dedicated cycle routes within the site and along the site access road. Furthermore, appropriate changing rooms and locker f cycle to the site.
1076	6	It is important to note that the site scored 5 out of 5 for compatibility with neighbouring land.
1076	7	Since the Study was published the Phase 1 Development has been completed and is now operating. The facility now manufactures a range of products including walls, throughout the UK. In respect of contamination, the approved masterplan requires further remediation works across the site which is currently being progressed and is d
1076	8	We challenge the comments on the site's market attractiveness. Alongside the Phase 1 development, the masterplan permission permits the further developmen commercial uses (classes B1, B2 and B8) and 5.3 hectares of land for class B1 office, research and development and class D1 training facilities. Therefore whilst a large p infrastructure, a significant area is permitted for employment uses
1076		The site has already attracted a major inward investor (who chose the site having considered alternatives across a large area of England and Wales) who has already inves clear potential for this to act as a catalyst to attract further investment to the site. As the principle of employment use on the site has been established by the Phase masterplan permission, there is no reason why other companies could not come along and apply for permission to develop areas alongside the completed development for the site principle of the site of the site has been established by the Phase masterplan permission, there is no reason why other companies could not come along and apply for permission to develop areas alongside the completed development for the site principal second second second by the principal second
1076	10	It is therefore considered that this site would now score a lot higher in terms of market attractiveness
1076	11	Taking into account the required public transport improvements as part of the masterplan permission, access to nearby settlements will be significantly improved. This being progressed would result in the site now scoring higher in this criterion.
1076	12	Overall it is considered that the Employment Land Capacity Study is already out-of-date and does not accurately reflect the suitability of Explore Industrial Park (V Allocations DPD should take account of the updated evidence in order to be sound.
1076	13	The Explore Industrial Park has been designed as a high quality industrial park which has the potential to make a significant contribution to the local economy. It should will be undertaken by the Council in order to reach a preferred set of sites for consideration in the second formal round of consultation: the Preferred Options report.
1076		As this further site assessment will be based on nine set criteria, I have set out below how the Explore Industrial Park complies with each criterion to demonstrate t employment site in the Preferred Options report.
1076		Laing O'Rourke has always consulted widely on its proposals for the Explore Industrial Park and maintained relationships with neighbours living in properties close to the directly to neighbours to inform them about key events and to offer personal meetings and site visits as required. A dedicated website was set up and kept up to date wit asked questions and details of public exhibitions.
1076	16	Public consultation sessions were also held to discuss the Phase 1 and masterplan proposals. A range of materials were displayed at the exhibitions which were designed
1076		In terms of local support, at the masterplan consultation sessions, a total of 185 visitors attended the events, and of those who completed the feedback forms, 97% welc also said they would like to see the wider site developed to generate employment.
1076	18	Large parts of the site have been used for employment purposes in the past, namely the Armstrong Quarry and Steetley Colliery. Whilst both of these uses ceased in historically provided employment for hundreds of people. Steetley Colliery in particular was still employing around 500 staff in the early 1980s. Therefore the concept the existing neighbouring land uses. In addition, various assessments have already been undertaken during the Phase 1 and Masterplan proposals to ensure compat example a lighting assessment carried out as part of the masterplan EIA concluded that levels of illuminance at the windows of residential receptors will not be significant assessment was also carried out and this concluded that the noise levels at some of the relatively isolated properties which are closest to it are comparatively low. The E compatible with existing uses.

1076	19	western part of the site, including Armstrong Quarry Lake and the Turquoise Lagoon, and a habitat corridor either side of the realigned Darfoulds Dyke. Other wildlife c the Phase I Ecological Mitigation Areas, the Access Road Ecological Landscaping Area and the railway sidings, which will also act as a wildlife corridor attractive to certain undertaken including the creation of new calcareous grassland, ephemeral and short perennial habitats and new wetland areas including ephemeral pools and scrapes measures are being taken to enhance existing habitats, including the removal of significant areas of regenerating scrub to create a mosaic of grassland and pioneer habitat The Green Infrastructure Framework will be carefully managed, both to protect and enhance the landscape and ecological value of the site, and to ensure public safety. D to enhance existing Green Infrastructure.
1076		There are no constraints to the delivery of this site. A permanent access road has been constructed as part of the Phase I Development. This links the Phase I site with a constructed at the junction of the access road and the A619. Work to provide the required off-site highway improvements and public transport improvements has been into place in accordance with the terms of the outline permission. In respect of remediation, significant investment including public funding has been put into the site to redeveloped by the end of the year. Overall it is considered that the Explore Industrial Park should be allocated for employment development in the Preferred Options redeveloped for new employment uses and provides a significant opportunity for continued business growth and to provide a range of jobs for local residents.
1077	1	This response is a general one relating to the whole district and is made without detailed local knowledge. In our view the people best placed to give a response based on Gypsies and Travellers themselves. As a hard to reach group they should be directly and if necessary informally consulted. An outreach exercise should be undertaken, if the communication is direct and accessible. Circular 1/2006 contains advice about this (paragraphs 27-29) and failure to carry out such an exercise could render the consultati support groups should be able to help with this matter and they should be consulted directly.
1077	2	We can however make the following comments. There can be no simple solution to this issue. Provision close to existing sites would help to ensure that vital family suppo there may be scope for extending exiting sites to cater for family formation into the future. However this is not to gainsay that some Gypsies and Travellers may want to d variety of reasons.
1077	3	Hence it is important that the council puts in place direct and accessible communication with local Gypsies and Travellers, both on RSL and private sites.
1077	4	In the past attempts to mix formal transit provision and transit provision have led to problems in some places. Inasmuch as some of the need for transit provision is due to to ensuring that there is enough space on new sites to accommodate visitors. In the same way existing RSL sites should be examined as to their potential for redesign to a it is fairly clear from around the country that there is usually a need for a separate transit facility to accommodate both peak demands and also for those visiting for work families or who are unable to be accommodated on existing sites. Again this is an issue best consulted on directly with local Gypsies and Travellers.
1077	5	This is an issue which again will helped to be resolved by informal and formal consultation with local Gypsies and Travellers.
1078	1	First of all, in view of al the house building in Retford in the recent past, the number of new houses standing empty and the hundreds of homes currently up for sale, wher present demand or a future demand for extra residencies in this town? It is of great concern to me and to many people I have spoken to, that no information from the Couput through our letter boxes. All the information we have received has been through word of mouth. In this respect, proper consultation should have been held with the r
1078	2	Building in this area on this scale would not only alter and spoil the rural character of the area but the present road infrastructure would be insufficient to cope with all the
1078	3	Tiln Lane is already a very busy road with large lorries avoiding the low bridge at Welham. This, at a time when the school day begins and ends at Carr Hill, makes it quite t children in particular. At present, the junction of Tiln Lane with Moorgate poses considerable danger and would be even more hazardous were there to be any further hou increase. Traffic making its way from a large housing development to join the main Welham Road would have to be via Bigsby Road, Palmer Road, Cornwall Road, Richmon Local residents would have to put up with increased traffic noise, pollution, difficulties in parking and dangers for pedestrians. In fact, their quality of life would be greatly
1078	4	Is it proposed that a bridge would be built over the Chesterfield Canal in order to gain access to the main road near Welham?
1078		There are major implications regarding the runoff of surplus rainwater. Gardens and Richmond and Palmer Roads have often been flooded in the past due to new housing Residents on St Saviours Close have found that after periods of heavy rain, the road becomes like a river now that bungalows have been built on the end of the field. New existing sewerage and drainage systems.
1070	6	The land in this area is also good agricultural land which in the past served local markets. It also supports a wide variety of wildlife, vegetation and trees which the Council
1078		conscious, should be trying to preserve. Furthermore, the proposed areas involve building outside the existing development boundary.

1079		No future development should be permitted which will put any extra traffic onto Tiln Lane (Le. areas 7, 37, 512 & 533) unless something is done to reduce present congest safety issues peak at start and end of every day at Carr Hill School. The most serious problem is the number of heavy goods vehicles using the road. The obvious solution is Lane/Tiln Lane. The lorries can continue to the Al and Retford via the outskirts of Bawtry, as they do when Tiln Lane/Smeath Lane is temporarily closed.
1079	2	The fields at the bottom of Bigsby Road (area 7) have been identified as potential development for a large number of houses. These fields -which we walk regularly -are ve additional drainage works would be required to correct this. The fields are currently planted with osier which helps to reduce water retention but all this osier would have
1080	1	My wife and I are nearing retiring age and would like to down-size and move back to Sutton. We would like there to be a group of homes built, for those who, like us, love affordable property. In retirement we will be intending to make good use of the bus service, the village hall for clubs, the church, the shop and, if it is open, the pub for me could be opened too.
1080	2	We would like to see a further 40 properties (or more) built. This would be a large enough number to allow significant developments in the village's facilities. It would bring opportunities too, surely a good thing in a rural setting.
1080	3	We feel that the village will have a new lease of life breathed into it, if a bank of new houses was to be built. Not only would retired people benefit from energy-efficient, e would make use of all that the village has to offer, but in different ways.
1080	4	We would like to see new businesses started in the village, if appropriate buildings could be found. A country village like Sultan has so much potential and appeal. We live i future, not only for ourselves, but for our village and for future generations.
1080		Relating to Q114: Sites 281, 275, 276 and 452 would appear to offer clear opportunity for building development, without adversely affecting the amenity of the village.
1081	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
1081	2	The village will benefit from having a good number of starter/second homes built, and sooner rather than later. Catering for young couples will indirectly benefit the local families. It will help the local shop and maybe bring back a permanent post office. The pub would promote a sense of community. The village hall and activity groups would
1081	3	I suggest that up to 40 new houses, terraced, semis and detached will bring about desirable lifeblood development, to the benefit of the village.
1081		Areas to see being used, in order of priority: 1) 281; 2) 275); 3) 276; 4) 452.
1081	5	Site 281 is ideal for initial development, having its own safe access.
1081	6	Yes
1082	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
1082	2	A few years ago, I graduated as a show designer. My business is growing and I need somewhere to establish a workshop. I also need to find an affordable home. I would low where my father grew up and where my parents would like to retire to.
1082	3	A shop and a pub will allow me to shop and relax locally. The school is also seen as important.
1082	4	I would like to think that before long I will be employing a small workforce, drawn from the local community.
1082	5	I would like to see about 14 new homes built in Sutton. For there to be starter business units would attract people similar to myself.
1082	6	My brother will shortly graduate in automobile engineering. He is hoping to set up a high tech motor sport business. Like me, he would like to be near his parents and hope future base.
1083	1	Firstly, I wish to object to your overall analysis of Misterton's need and capacity for housing growth. I understand that Misterton is now designated as a Local Service Cent accommodate 2% (156 houses) of the District's housing growth. I am concerned that you consider this growth achievable without the need to allocate further and more a you consider that Misterton already has more than this amount of housing with planning permission, specifically 132 houses at Fox Covert Lane. I note from y representations querying how the required housing growth can be achieved, without further housing allocations. In my view the Fox Covert Lane site is unlikely to be deve that consented planning permission. As such I consider your reliance on this site alone to deliver the requisite housing growth as flawed. The market advice that I am in re Misterton is more likely to be achieved through the development of small sites, where the developer risk is lessened and the release of supply is slower to match wit Misterton requires more small scale and qualitative sites (with local distinctiveness and context), capable of integration into the fabric of the village rather than appearing
1083	2	Secondly, I am alarmed and object most strongly to your further consideration of site 87 and M3, and your conclusion that this can accommodate 190 new homes.

		You should be aware that the residents of Misterton are seeking to refurbish the Victorian Institute in the centre of the village to allow this to be used as a village hall, we
1083	3	to achieve this. As such a new village hall is not likely to be required and neither is a doctors surgery as we have a perfectly suitable one at present with a pharmacy attack
		amount of new housing in Misterton I find your potential acceptance of these sites for housing development as totally incongruous with your own analysis and detriments.
		Furthermore the continued consideration of this site will by your own admission have a prejudicial effect on how you consider the other sites in Misterton.
1083	4	Site 87 and M3 despite their adjacency to the school are remote from the village centre.
1083	5	The development of this site would be totally out of proportion, scale and character with Misterton. In effect this would constitute a suburban extension, which should be
		regeneration areas rather than this Local Service Centre.
1083	6	Site 79 is entirely in my ownership and I have a Cooperation Agreement with the owners of sites 80 and 498 to create an access capable of meeting highway safety standa
		Agreement. The benefit of these sites are:
1083	7	closer to the centre of the village and so can be easily integrated into the existing village fabric,
1083	8	they would provide a discernible edge/boundary to the Misterton at this north west corner,
1083	9	and thereby improve the setting of the 2 listed buildings and specifically include an eastern buffer;
1083	10	they are contained and offer smaller scale development and will enable you to control the overall number of dwellings permitted,
1083 1083	11 12	the site context will dictate a quality design solution, I am investigating how this might be controlled through design coding and they would add to and vary the housing offer in Misterton which will be beneficial overall to the village economy and its aesthetic appeal.
1085	12	If the maximum number of properties is constructed the density seems high for the land area.
1084	2	New development - connected to existing aged infrastructure (roads, sewers and other services)
1084	3	We already find it difficult at peak times with these, especially roads, broadband etc.
1084	4	Single access point for roads will necessitate journeys through the existing estates which are unsuitable for this volume of traffic.
1084	5	Need to ensure no loss of habitat for bats and other species present in the area
1084	6	Against loss of greenfield site especially as it is in such an isolated position and is not shown adjacent other development land.
1084	7	I would suggest land to the west be evaluated as positive development land. This would enable complete new infrastructure with road links directly on to major roads.
1084	8	Against Worksop area being further developed to the level suggested as Retford appears to have more scope, although not shown.
1085	1	This development will encroach on the dividing land between Worksop and other villages and will only contribute to the "urban sprawl" and close the gap between the co
1005	2	The land is well used by the farmer to produce products for the local area such as wheat and oil seed rape and would incur lost jobs to the local area. Building properties in
1085	2	unemployment as building companies use the own staff from further away.
1085	3	The area proposed has several woodlands and they seem to be the only social part of ~ Gateford estate that residents use, as there is nothing been provided by the counc

Responde	1	Answer
nt .	nt	
1086	4	At the moment the site is used for recreation and this valuable asset would be lost, as well detracting from the view across to the Trent valley.
1007		My concerns are for this close knit community, made up of mainly elderly and disabled people, some of whom have lived here for many years. This area is mainly made up
1087	1	neighbourhood overlooking open countryside with an abundance of wildlife which brings pleasure to a lot of people some of which are housebound.
1087	2	The extra housing this development would bring would also bring more traffic, noise pollution and safety issues for both road users and pedestrians.
1087	3	The anxiety some of these proposals are causing to some of the most vulnerable people in our community is very concerning.
		The area of Tiln Lane causes me great concern as it is a very busy road which a lot of high sided HGVs use as the main route to Gainsborough to avoid the Low Bridge at We
1087	4	Tiln Lane. At school times this is a no go area for residents. If you are driving along Tiln Lane and meet an HGV coming the other way with both parents' cars and school bu
		a standstill, so bringing more traffic congestion into the area is total madness.
1087	5	There has already been one child killed on Tiln Lane, please do not make this situation any worse than it already is for both children and the elderly.
1087	6	I think the mixed use sites at 51, R7, 259 and R2 should be used in preference as the road is a main road which would not cause problems for the residents in that area.
1088	1	As a regular visitor to North Wheatley, I would not like to see the village have some of the larger developments that are on offer as I feel it would be detrimental to the vill
1088	2	I would, however, like plot number 236 with adjacent paddock of Whitegates to be considered for a small development.
1088	3	The reason for this is that it would offer a natural extension to the village envelope whilst creating minimal disturbance to other residents, as there would be ample room
1088	3	parking etc, whilst still supporting the village.
1089	1	Option B: Focused in just one of the above towns
1089	2	Broadly yes, this would provide a commensurate increase in the housing within the village, given that ill-considered development took place during the 70's which increase
1089	3	536 This would largely avoid changing the appearance of the village beyond those alterations that have already taken place.
1089	4	No large scale further development should be allowed.
1089	5	For instance those areas shown to the east (275 276 299 482) should not be considered for development as they would destroy the approach from Lound, the only aspect
1085		residents have carefully and expensively retained the rural appearance of their properties.
1089	6	A problem exists in this lowest area of the village with drainage of surface water
1089	7	The only access/exit from this area is via Lound Low Rd (Portland Place is too narrow to take further traffic) and this would place potentially 250-300 extra vehicles onto a
		bends
1089		Yes
1089		Keep them concentrated within existing sites but proper supervision is especially important on mixed sites.
1089	-	They should be concentrated in or around existing sites provided that they are adequately supervised.
1090		No specific comment to make
1090 1090	2 3	We would like to see approximately 100 houses in the village Site 520
1090		Option A
1090	4	Yes I believe you have adopted a professional approach to choosing sites
1091	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
1031	2	I disagree. Presumably its 4 new house over the next 15 or so years. This is just not sustainable. We have a school that struggles for pupil intake. Unless there is further dev
1091	3	move away. I think Sutton could easily absorb another 20 properties
1091	4	I really don't have any preferences. All I would suggest is the sites that offer the least resistance
1091	5	I want to see houses that people can afford to buy. Even starter homes with current requirements for 15% 20% deposits are not affordable. The development I'd prefer are
1091	6	The sites should be left alone
1091	7	Around existing sites. New gypsy sites are always going to be contentious and I feel around existing sites will cause the least animosity
1091	8	Together for the reason given in 121
1091	9	Not aware of any
1092	1	Yes
1092	2	Option A

1094	17	The current road network around the proposed site is made up of 'lanes' and hedgerows. The loss of these would be a tragedy in the local community. These lanes are he looking for a pleasant walk, the running club, dog walkers, families with children on bikes and toys and horse riders. Residents across the town walk up to enjoy the pleasa currently enjoy on their doorstep. The lanes are also used by the local farmers for the transference of their stock. Also the utilities within the area already suffer - water practice at capacity.
1094	18	Further more the areas identified are along the bottom of a natural hill and prone to flooding - which was experienced during the last floods and for which the road has stil
1094	19	New housing within this area would also place pressure on the local junior school - which has already had to extend to meet the demand of the last development on Rutlar are not within easy walking distance of this location.
1095	1	Generally yes
1095	2	IN MY OPINION THE TOWN WOULD BENEFIT FROM A SMALL EXPANSION - AS COVERED BY SITES ALREADY ALLOCATED WITHIN THE EXISTING BOUNDARY. I DO NOT SUPPO EXISTING TOWN BOUNDARY SHOULD BE PRESERVED.
1095	3	ADDITIONAL EMPLOYMENT SHOULD BE CONCENTRATED AROUND THE EXISTING RANDALL WAY WHICH OFFERS LOCATIONS WHICH SHOULD ATTRACT HIGH TECH BUSINES
1095	4	I WOULD PREFER TO SEE ADDITIONAL HOUSING LOCATED OUTSIDE OF RETFORD AND SEE AREA LIKE HARWORTH IN NEED OF MORE REDEVELOPMENT. I COULD SEE THE E COMMUNITY WHICH COULD BE SELF SUSTAINABLE BUT OPERATING AS A SATELLITE TO THE LARGER COMMUNITIES NEARBY.
1095	5	I HAVE PERSONAL KNOWLEDGE OF THE SITES 511, 370 AND 3. I WOULD NOT SUPPORT 511 AND 370 UNDER ANY CIRCUMSTANCES. THE LOCAL ROADS ARE ALREADY DIFFI DROP OFF AND COLLECTION TIMES. THE EXIT OF TRAFFIC ONTO LONDON ROAD IS ALSO CONGESTED AT THESE TIMES. AT OTHER TIMES EXISTING ROADS CAN COPE BUT W
1095	6	511 IS ALSO PRONE TO FLOODING
1095	7	PLOT 3 WOULD NEED AN IMAGINATIVE EXIT DIRECTLY ONTO TO LONDON ROAD AND NOT THROUGH EXISTING ESTATE ROADS.
1095	8	IN MY OPINION NONE OF THESE SITES ARE SUITABLE AS THEY EXPAND THE EXISTING TOWN BOUNDARY WHICH SHOULD BE PRESERVED.
1095	9	Option B
1095	10	Existing locations would prove marginally less contentious
1095	11	Together should prove easier to manage
1096	1	Option A
1096	2	I agree that enough land should be allocated for around 9 new houses.
1096	3	From all the proposed sites, I would most like to see 517 developed. I feel this would help to join the existing housing on Mill Farm to the village
1096	4	I would then also like to see improved pavements along that section of road and the 30mph speed limit zone moved to further outside the village, as currently it is much to
1096		The proposed site 482 is a flood plain. In the past, during heavy rain, the field has flooded and in extreme cases the houses nearest the field have had their gardens and un deep cavity underneath their floorboards to cope with a small amount of flooding. If building were to take place on this site, then the newly built houses are at a very great the field is no longer there to take most of the flood water, more water is going to need to go somewhere and that will mean the existing housing is at a much greater risk
1096	6	The proposed protected open spaces should absolutely be protected. If the village population is to grow, we certainly cannot lose any valuable open space.
1097	1	No
1097	2	Option A
1097	3	No, no more houses in our village
1097	4	No sites above
1097	5	Yes. The play area and football field should be protected
1098	1	Our clients generally agree with the criteria in the Screening Methodology as indicated in the Bassetlaw Site Allocations Issues and Options Consultation Paper November 2

1104	1	British Waterways is aware that Site 93 (land south of Ashdown Way, Misterton) has previously been the subject of planning applications for marina development, most re established a New Marinas Unit to facilitate successful marina developments and we have in place an application process which is designed to help us manage potentially o other facilities from multiple developers in a fair way. The expansion in mooring capacity is generally constrained by factors such as water supply and navigational safety.
1104		Without further information regarding the proposed allocation of Site 93 for a mixed use development centred on a canal-linked marina we are unable to confirm our posi navigation access point is shown. We are also unable to advise if our infrastructure, at this time, is able to accommodate the proposed marina development as no assessm modelling has been provided.
1104	3	This information would also assist us in determining if there are issues relating to ecological matters which we would need to consider. We are aware that water voles hav adjacent to the site and there may be implications for the Chesterfield Canal SSSI (approximately 250m west of the site) in relation to additional boat movements.
1104	4	British Waterways has advised in respect of previous applications for planning permission for marina developments on this site that we have concerns over elements of the developer will need to engage with British Waterways' marina application process to establish if it is possible to agree a Network Access Agreement to connect to our wate a requirement for our consent to provide a bridge over the canal and to address continuation of the towpath. We strongly recommend engagement with British Waterway is able to therefore establish whether such a development in this location is deliverable.
1104	5	Option A
1105	1	No comment to make at this time
1105	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
1105		The figure of five houses has been derived from very limited responses received for local residents. Whilst it gives an indication of how those people that chose to respond (some said more than 5 houses, some said no houses - average was 5 houses). This does not provide an indication of either need for housing or how new housing might be therefore afford little weight to figure
1105	4	There are various sites that have been identified in the village. One of these is the former school on Rectory Land. This presents a unique position in that the built area is r is Listed. Plans are being formulated that will see a conversion or re-use of buildings on site for residential use, with a limited number of new-build dwellings. It is difficult created. Justification for the scheme relates to the urgent need to protect the Listed building. Suggesting an arbitrary limit of 5 units may be inappropriate, although it ma special circumstances
1105	5	Five units may in any case be rather low and prevent any schemes being viable. Site should instead be considered on their individuals merits.
1105		We support the development of site 410 (former Bramcote Lorne School). That is a brownfield site that could be redeveloped appropriately to provide sufficient housing t they may be).
1105	7	Again other site should be considered on their individual merits including whether they constitute greenfield or brownfield development.

1105	8	We support the development of Site 410 in the strongest terms. This is a former school with a prominent Listed building and a range of ancillary buildings on site. As has nearby in Retford, leaving a valuable heritage asset to disuse over a period of time will lead to its deterioration and placement on the Buildings at risk register. The site pr and reuse of existing buildings for residential (and possibly other) uses. There is also scope for a limited amount of appropriate new build development as part of remode development is more linked to protection and enhancement of the heritage assets (the Listed elements and the Conservation Area). Development will not mean wholesa Plan identifies the site a s a potential opportunity, as development will be justified by other means. A number of background studies are in process, with the initial finding acceptable scheme can indeed be promoted on site. The supporting text will need to reflect the potential and need for limited additional new build housing on site. Thes coming weeks. By excluding the site and not allocating it means that a heritage asset will undoubtedly degenerate and be placed at risk.
1106	1	I AGREE IN PRINCIPLE WITH THE SCREENING CRITERIA. I FEEL THAT THE TRANSPORT/ACCESS PRACTICALITIES SHOULD BE GIVEN MORE PRIORITY.
1106	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
1106	3	I AGREE THAT, AS SUGGESTED IN PREVIOUS FEEDBACK, NO MORE THAN 13 HOUSES.
1106		AS ABOVE I THINK 13 PROPERTIES ARE SUFFICIENT, THEREFORE WOULD ONLY WANT THE PROPOSED 5 AFFORDABLE HOUSES.
1106	5	I HAVE LOOKED AT THE POTENTIAL SITES PUT FORWARD, AND WOULD NOT LIKE TO SEE ANY, OTHER THAN 409 DEVELOPED
1106	6	400, 491,409,463,296 ARE ALL ACCESSED OFF HIGH STREET OR CHAPEL LANE, WHICH BOTH EXIT ONTO THE A631. THIS ROAD RISES TO A PEAK JUST AROUND THE HIGH ST FROM THE EAST ONE CANNOT SEE ABOVE THIS PEAK, TRAFFIC APPROACHING FROM THE WEST, UNTIL OPPOSITE THE SUN INN, SIMILARLY THE TRAFFIC APPROACHING FF PULLING OUT FROM HIGH STREET, UNTIL NEAR THE JUNCTION. THE TURN INTO CHAPEL LANE FROM THE WEST IS A LESS THAN 90 DEGREE TURN WITH AN EXISTING HOUS
1106	7	405 SITE IS TOO CLOSE TO THIS PEAK ALSO WITH LITTLE TIME TO REACT TO BUSY EXIT, WHICH ANY LARGE DEVELOPMENT COULD RESULT IN, NOT TO MENTION THE PEAK
1106	<u> </u>	IN MY OPINION DEVELOPMENT OF THE REMAINING 406, 407,477 AND PROBABLY 484, WOULD ALSO PRESENT SIMILAR PROBLEMS. HAVING LIVED IN THE VILLAGE SINCE : MANY YEARS OF WALKING IN THE VILLAGE, USING AND CROSSING ALL THESE JUNCTIONS.
1106	9	COMMENTS ABOUT PRIVATE VEHICLE USE ARE RELEVANT IN THE FACE OF THE FACT THAT THE BUS COMPANY HAS CHOSEN TO TERMINATE THE 27 BUS FOR MAY OF ITS 2 PROVIDING A 'PHONE THE BUS' SERVICE FOR THE MORNING RUN, AND SEVERELY REDUCING THE NUMBER OF BUSES TO BAWTRY, MAKING THE USE OF PRIVATE VEHICLES
1106	10	THE VILLAGE ALREADY SUFFERS FROM A LACK OF OFF STREET PARKING DUE TO INFILL DEVELOPMENT, LACK OF OFF STREET PARKING DUE TO AGE OF A NUMBER OF THE REQUIRED TO PROVIDE 'SUFFICIENT' PARKING FOR NEW HOUSES, OCCUPIERS CANNOT BE MADE TO USE THEM. SERVICE VEHICLES DELIVERING PARCELS, TRADESMEN, AN NEGOTIATING THE RESTRICTED VILLAGE TRAFFIC ROUTES DIFFICULT AT TIMES. DELIVERIES MADE TO THE PROPERTIES ON THE A631 CAN RESTRICT THE VIEW, MAKING TH VILLAGE ROADS TO THE A631 DANGEROUS.
1106	11	I THINK THE EXISTING GREEN SPACES SHOULD BE PROTECTED
1106	12	ALTHOUGH THE SCHOOL GREEN SPACE IS NOT CURRENTLY A PUBLIC GREEN SPACE. WERE THE SCHOOL TO CLOSE I THINK THE REDEVELOPMENT OF THE SITE SHOULD BE I
1107	1	The screening methodology appears to be comprehensive and thorough.
1107	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
1107	3	Yes, land should be allocated for at least four new houses in Sutton. However the resident's survey results as listed in the consultation document does not use the express
1107	4	I agree that land for more than four houses should be provided for over the next 16 years however it is important that the ambiguity of this question is not taken advantage
1107		A more organic and natural growth of housing as and when the opportunity arises should be the only approach.
1107	6	My preference for development would be on sites 536, 275 and 452.
1107 1107	7 8	I would also agree with limited development of sites 276 and 274 (with a reduction in the number of dwellings involved). I am strongly against any building on site 282 and against development at sites 281 and 299.
110/		Affordable housing for local residents should form the basis to any land being made available. Rather than council owned properties being built, schemes allowing the par
1107	. 9	ownership should be investigated and employed.
1107		A limited number of housing projects should be allowed however development on all of these sites would be wrong and development to the potential numbers outlined v
1107		All of the open spaces identified must be protected from all future developments
1107		No new Gypsy sites are required. The Daneshill site is regularly empty and is never close to capacity. Further provision is simply not required.
1107	13	Should any new sites be established they should be concentrated on existing sites. Such projects cause alarm for those households affected locally however the expansion palatable.
1107	14	These pitches should be provided together for reasons already outlined. Such projects cause alarm for those households affected locally however the expansion of existing

as been experienced at the King Edward School presents a unique opportunity for conversion delling of the site. The justification for sale removal of greenfield land. The draft Sites ngs pointing that an appropriate and ese will be discussed with the Council in the

1107		I would also prefer the minimum possible expenditure given to this project.
1107	16	Existing Daneshill site. This is underused and often unoccupied.
1108	1	We are concerned that the wording of Criterion 8 lacks emphasis on habitats and species. Planning Policy Statement 9 advises local authorities to conserve, enhance and a Habitats, with the list of habitats first set out in Section 74 (2) of the CROW Act 2000 and subsequently amended by the UK BAP. The land classification of sites when they reference to UK BAP Habitats when assessing suitability and consider impacts on those Priority Habitats (and the habitats of UK BAP Priority Species) in order to guide a st networks of habitats, a principle of PPS9. It is hoped that by presenting a strongly worded criterion for biodiversity in the screening methodology it will ensure that survey designation and where ecological knowledge is lacking.
1108	2	It is encouraging to note the breadth of open sites across Worksop that are to be protected. It is important to ensure however, that additional Green Infrastructure is creat within the Worksop area. New GI provides real biodiversity benefits. Natural England recommends that local communities should have access to an appropriate mix of green natural green space per 1000 population with the following accessibility criteria: No person should live more than 300 metres from their nearest area of natural green space Reserve should be provided per 1000 population; There should be at least one accessible 20 ha site with 2 km; o There should be one accessible 500 ha site within 10 km. Natural Green Space (SANGS) needs to be provided to mitigate against impacts on the Birklands and Bilhaugh SAC then there are clear guidelines from Natural England ab sites should seek to create the most appropriate UK Biodiversity Action Plan Priority Habitat for the location, in order to help achieve the targets set out in The East Midlar 29); Increasing the number of Green Flag sites in the District is another way of ensuring that high quality sites are provided.
1108	3	We are very concerned about potential residential development of Site 38 due to the following: The adjacent area meets the criteria to be a 'key reptile site' due to it sup lizard, grass snake and a significant population of slow worm; Tranker Wood SINC and Tranker Marsh SINC are in close proximity to the development site and therefore it i from any development proposal; The presence of Nottinghamshire BAP habitats acid grassland, standing water and semi-natural grassland. Residential development will in the site and cats would almost certainly have a detrimental impact on the reptile population. For this reason we are of the opinion that the only form of development acco storage/distribution, food store, hotel and restaurants.
1108	4	Site 14 - This site is adjacent to Sandhill Lake LWS (SINC 2/390) and Chesterfield Canal Shireoaks to Welham LWS (SINC 2/621) and so there could be impacts on the SINC.
1108	5	Site 195/343/W8 - This site is adjacent to Woodsetts Pond Local Nature Reserve and SINC.
1108		Site 35 - This site creates an urban extension towards SINCs 2/113 (Owday Wood), 2/115 (Rough Piece) 5/2318 (Whipman Wood and 5/2127 Nab's Ashes Marsh.
1108		Site 30. Adjacent to Lady Lee Quarry Nature Reserve (SINC)
1108	8	Site 38. Adjacent to SINC 2/121 (Tranker Wood).
1108	9	Local Wildlife Sites and Local Nature Reserves represent important areas of nature conservation value in the county and have a fundamental role to play in meeting overal to the quality of life and the well-being of the community; and in supporting research and education. They should therefore, be sacrosanct and protected from the negative material consideration when assessing the planning application. Policy DM9: B. Biodiversity and Geodiversity states that development proposals will be expected to take or and species' populations and to demonstrate that they will not adversely affect or result in the loss of features of recognised importance, including: Local Wildlife Sites (Site (SINC) Non-statutory designated sites do not receive statutory protection but they do receive policy protection (as "Local Sites") as reflected in Planning Policy Statement a key role to play in helping to meet national biodiversity targets and therefore appropriate consideration should be given to Local Sites when making planning decisions.
1108	10	We welcome the proposed protection of a network of green spaces but it is essential that new areas of Green Infrastructure (GI) are created through new development the should be for creating quality open spaces that provide real biodiversity benefits, sports and playing fields; Creation of green corridors to enhance links to the countryside habitats and the local landscape; proposals must provide targeted and significant Green Infrastructure that maximises biodiversity opportunities and protects and enhance wildlife corridors) and provide significant additional areas of GI to minimise the pressure on those ecological features. The GI provision should aim to buffer existing ecologic connectivity and avoid fragmentation of ecological features. The creation and enhancement of Green Infrastructure through development must contribute to Biodiversity in priority habitats and species. Measures to mitigate any detrimental impact on environmental and built heritage features on and adjacent to the site in line with Core Poplaced on avoidance of damage to Local Wildlife Sites rather than ' measures to mitigate any detrimental impact on environmental impact on environmental
1108	11	Site 46 appears to include part of Longholme Pasture SINC (2/633) and should this be the case then we would not support development that would result in damage to or
1108	12	We also note that Site 7 is considered as 'maybe' suitable for development in the Bassetlaw District Council's Strategic Housing Land Availability Assessment (SHLAA). We awareness about two pairs of barn owls nesting adjacent to the site. These birds use Site 7 as a hunting ground. Barn owl is included on Schedule 1 of the Wildlife and Cou additional protection and cannot be intentionally or recklessly disturbed when nesting. Protected species are a material consideration when determining a planning applic to assess its ecological value and whether there would be a need for further surveys to ensure that protected species are properly considered in the determination of any

nt	nt	
1108	13	We consider Site 69 unsuitable for development. The area consists of rough grassland and is low lying and consequently is prone to flooding. This habitat variation during site is likely to have skylark, reedbunting and meadow pipit nesting on the site, all ground nesting birds of conservation concern. The habitat is also likely to be attractive for Chesterfield Canal adjacent to this area will add to the biodiversity of the area as a whole. A survey of the site would be required to assess its ecological value and whether to ensure that protected species are properly considered in the determination of any planning application. The Natural Environment and Rural Communities (NERC) Act ca (S41) of the Act requires the Secretary of State to publish a list of habitats and species which are of principal importance for the conservation of biodiversity in England. Th Natural England, as required by the Act. The S41 list is used to guide decision-makers such as public bodies, including local and regional authorities, in implementing their of Environment and Rural Communities Act 2006, to have regard to the conservation of biodiversity in England, when carrying out their normal functions. The habitat within Meadow.
1108	14	Site 187 would isolate Whitehouse Plantation (LWS 2/570). Ideally, LWSs should be buffered to minimise edge effects from human encroachment and linked to other area nature conservation value and allow the movement of wildlife along these habitat corridors (see the response to Question 7 for further detail).
1108	15	We do not object to the redevelopment of Harworth Colliery but we wish to take this opportunity to highlight the existing nature conservation value of the site and encountriendly as possible. Surveys have revealed a total of four grass snakes and therefore an appropriate mitigation scheme will need to be devised to ensure there is no negat Under the Wildlife and Countryside Act 1981 (as amended) it is illegal to intentionally kill or injure grass snakes and therefore every reasonable effort should be made to resuggest the following wording may be appropriate; <i>No work will commence until full details have been provided on a reptile translocation scheme including the identification of exclusion fencing that will be required to prevent animals returning or entering the search area and the minimum number of trapping days being carried out. The method Natural England team. The mitigation scheme agreed with Natural England and the Local Planning Authority needs to be carried out to fulfil the discharge of this condition.</i>
1108	16	We note that that in the longer term a minimum number of four and possibly more ponds could be retained in the new development and that ponds will be subject to ma value. Whilst we welcome this, the proposal is likely to result in a net loss of pond habitat and therefore we request that new wildlife friendly ponds are created as comper
1108	17	We would also hope that every effort could be made to maximise the nature conservation value of the built environment. A development proposal of this magnitude shou green/brown roofs within the employment use development as amelioration for habitat loss as well as additional habitat creation. Brownfield habitats (particularly early s resources. There is increasing development pressure on brownfield sites and therefore to ensure sustainability every effort should be made to retain and/or recreate this l also have long-term financial benefits related to insulation and increased water proofing longevity and sustainable water management.
1108	18	Consideration should also be given to the introduction of street lighting and security lighting into what is currently a dark environment and what implications this may have Where lighting is permitted, as may be necessary for public safety, conditions should be imposed to ensure the impact of the lighting on the bats is kept to a minimum. 'The that predicts where light will fall should be used to predict the potential impact and to plan mitigation for bats. Lighting should be directed to where it is needed and light sp access points) should be directly illuminated and lighting should be avoided adjacent to existing or potential bat commuting and foraging areas. If it is considered necessary roosting bats, the lights should be positioned to avoid the sensitive areas.' This can be achieved by the choice of lighting and by using accessories such as hoods, cowls, lou intended area only. Planting can also be used as a barrier or manmade features that are required within the build can be positioned so as to form a barrier.
1108	19	Ideally, we would wish to see as much of the LWS retained within the redeveloped Firbeck Colliery site. If the whole of the LWS requires remediation then clarification would wish to see as much of the LWS retained within the redeveloped Firbeck Colliery site. If the whole of the LWS requires remediation then clarification would be proposed mitigation scheme and whether, for example, material can be translocated to the receptor site. The suggestion of the adjacent 'pit top' acting as a receptor Nottinghamshire County Council (NCC) owns this site and already have a mechanism in place for managing the site as part of the adjacent Langold Country Park and can the management in the long term. However, we would need to be provided with formal confirmation of the council's agreement to this and that sufficient funding and appropriation strategy.
1108	20	The redevelopment of Firbeck Colliery yard will inevitably result in an increased recreational pressure on Langold Country Park by new residents. We encourage Bassetlaw the County Council to discuss the possibility of securing the nearby pit tip as protected Greenspace for the local community (not currently highlighted as potential protected existing nature conservation value and by establishing stronger links with Langold CP it will help to mitigate for the anticipated increase in footfall.

1108	21	Misterton sites 89 , 92 , 93 , 201 and 260 are adjacent to the Chesterfield Canal LWS and there is therefore, potential for negative impacts on water vole. Water vole is now Countryside Act 1981 and the Countryside and Rights of Way Act 2000. It is clearly not the intention of the law to prevent all development, management or maintenance legal protection does require that due attention is paid to the presence of water voles and appropriate actions are taken to avoid committing offences. If it can be demon have been an offence was the 'incidental result of a lawful operation and could not reasonably have been avoided', this constitutes a defence against prosecution under t carrying out of works that intentionally but incidentally commit offences, such as damaging water vole burrows, but requires that reasonable steps are taken to avoid any decide what is 'reasonable' in any set of circumstances, but, clearly, agreement between the appropriate conservation agencies (Natural England and the Environment Ag important. There is, therefore, an obligation on those who maintain waterways to ensure that appropriate systems are in place to minimise damage and that all reasonable bevelopers, or other riparian owners, who wish to maintain, build on or alter areas used by water voles must also ensure that unnecessary damage is avoided and all reason water voles or their burrows. This can best be achieved by undertaking a water vole survey at an appropriate time prior to planning any work and ensuring that appropriate consulted for further details.
1108	22	There should be a criteria-based assessment of Gypsy and traveller sites in order to robustly screen potential sites (as in the SHLAA) to avoid adverse ecological impacts. H survey and proposed mitigation to be submitted with the planning application (i.e. a pre-determination protected species survey). For bats (a species given full protection Regulations 2010 (formerly the Conservation (Natural Habitats & c.) Regulations 1994) the three tests need to be considered. Conditions must be placed on planning con measures are carried out. This should include follow up surveys to assess the effectiveness of the mitigation work. Planning conditions should be used to replace lost bird nest box) and ensure that bat roosting opportunities are maintained.
1108	23	General Comments on Green Infrastructure We note that many responders to the consultation indicated a strong preference for green space within their communities, ty When considering these requests, we would ask that any additional Green Infrastructure (GI) delivers the widest range of benefits. An obligation upon local authorities argreen infrastructure network is made directly in the cross-cutting policy CC8: Green Infrastructure. Specifically, green infrastructure should be planned and managed to de environmental and social benefits, including conserving and enhancing biodiversity and importantly it demands that connected networks of green spaces around new dev planning and design process. Green infrastructure is expected to be multi-functional, delivering amongst other things: improved water and flood risk management; and a through adaptation to, and the mitigation of, associated impacts. Biodiversity is to be protected and enhanced, mitigating for the impacts of new development. Local auth green infrastructure network into spatial development plans. There is now a significant body of evidence which makes the case for investment in green infrastructure. From parks and open spaces to the planting of street trees and the greening of roofs, green infrastructure can contribute significantly to both economic development and to efficiently lifestyles.
1108	24	General Comments on Brownfield Sites We note that many responders to the consultation indicated a strong preference for the redevelopment of brownfield sites rather because impacts on previously undeveloped land will always appear greater. Brownfield habitats however, (particularly early successional sites), can be important biodive development pressure on brownfield sites and therefore to ensure sustainability every effort should be made to retain and/or recreate this habitat within a site. We there policy to assess the suitability of previously developed land as appropriate and sustainable. Assess the biodiversity of the site through a desktop study of wildlife sites (Site Conservation/Local Wildlife Sites) and protected species, followed by an ecological assessment of the site. Open mosaic habitats on previously developed land (formally Biodiversity Action Plan (BAP) Priority Habitat. Policy 29 of the East Midlands Regional Plan (2009) considers 'Priorities for Enhancing the Region's Biodiversity' and states loss of BAP habitats and help achieve UK BAP targets. The present target for the management and restoration of urban and post-industrial sites is 3000 ha by 2015. There applications for previously developed land are considered favourably. We support for proposals for re-use of previously developed land for other types of de significant nature conservation interest. Often previously developed land that has been left for some years will have developed significant biodiversity value. In Planning F Geological Conservation under the paragraph Sites of Biodiversity and Geological Conservation Value the following guidance is provided on previously developed land; " new development makes a major contribution to sustainable development by reducing the amount of countryside and undeveloped land that needs to be used. However biodiversity or geological interest of recognised local importance, local planning authorities, together with developers, should aim to retain this interest or incorporate it is

ow fully protected under the Wildlife & e works in areas used by water voles. However, onstrated that any action that would otherwise r the Act. 1108	25	General comments on the Community Infrastructure Levy This is a new levy that local authorities in England and Wales can choose to charge on new developments in the development by funding infrastructure that the council, local community and neighbourhoods want – for example, new or safer road schemes, park improvements or a ne buildings and charges are based on the size and type of the new development. We consider that biodiversity should be added to the list. New developments often have di biodiversity (e.g., increased traffic, increased disturbance, light pollution, noise pollution). In some instances it could be appropriate to levy a developer contribution to en In RSS8, Policy 28: Priorities for the Region's Biodiversity states 'development and implementation of mechanisms to ensure that development results in no net loss of BAI achieved'. We believe that the council should develop a Community Infrastructure Levy alongside specific Planning Obligation requirements to help fund biodiversity gain in The East Midlands Regional Plan (2009). When the council is considering any potential impact on the Birklands and Bilhaugh SAC and the need to mitigate (through the porset Heathland Joint DPD, whereby developers contribute towards a fund for the heathlands.
1108	26	General Comments on the pSPA The issue has arisen as to whether the substantial population of nightjar and woodlark in the Sherwood Forest area justify its classification the EU Birds Directive, or at least its identification as a potential SPA ("pSPA"). If Sherwood is to be treated as a pSPA, then it is Government policy (in PPS9 paragraph 6) th had already been classified. This would have the result, in the case of planning applications in the vicinity of the pSPA, that the provisions of the Conservation of Habitats a Conservation (Natural Habitats etc.) Regulations 1994) would have to be applied. It is NWT's view that the Sherwood area is at least a pSPA, and we are therefore bound t is for the Council to decide whether or not you agree with NWT's view that the Sherwood Area is to be regarded as a pSPA. If you wish to discuss this particular issues furt Bradley at our Nottingham office.
1109	1	I disagree as there is no call for new houses in the village at this time, there is at the moment a lot of house on the market including new build and no buyers.
1109	2	If things changed I would agree to a small number of houses being built (no more than 11)
1109		No as my views on the Yew Tree Road development would not change, I would oppose it strongly
1109		Only site suitable for development would be parts of site 249
1109	1	If development of sites 246 and 247 were granted there would be so much congested due to lack of proper access that it would become very dangerous especially Yew Tre
1110	1	I do not agree with the criteria in the Screening Methodology for the village of Elkesley.
1110		Option A
1110		Yes, but only for first-time buyers (affordable and 2 bedroom bungalows for senior citizens
1110		Yes, because Yew Tree Road cannot take anymore vehicles and for the safety of young children travelling to the new play area.
1110	5	Site 248 or 249.
1110	6	Para 2.5 (Page 10) Plot no. 247 is not brownfield but greenfield and is also outside of the development boundary. Para. 2.6, "Suitability of the Site", items 2, 4, 5, and 7 are Para. 2.9 (Page 11) Employment - Elkesley has no potential employment at all. Everyone who works will have to use their own transport. Para. 2.11, This is very true about How can Elkesley be classed as a Rural Service Centre? Para. 2.25 - 'A'. Para. 2.29 (Page 14) - 'A'. Para. 2.30 - Not on greenfield when we have brownfield available. Para. 2.
1110	7	Elkesley shouldn't be classed as a Rural Service Centre 1) The pub may be closing; 2)We have no post office; 3)The local shop is only a convenience store and the residents like a communal garden with seats, a bowling green and tennis courts on the greenfield site.
1110	8	Elkesley cannot be classified as a Rural Service Centre. Reasons no post office, the public house could close, the school cannot cope with many pupils, we have no medical Bassetlaw hospital how do they get home? on a very sparse bus service, and there is no employment in Elkesley people would have to commute.
1110	9	Yes.
1110	10	No because of reasons stated above. No more social housing for Yew Tree Road,
1110	11	The site off Yew Tree Road is greenfield not brownfield it is also outside the development boundary. The road leading onto this site cannot cope with any more vehicles as vehicles per day.
1110		248 and 249
1110		No development in Elkesley should even be looked at until the A1 has been sorted out and as you already know new residents would have to commute to their work.
1110		Do you already realise we have 20 social houses on Yew Tree Road? I think this is enough
1111		An allocation of 11 new homes seems reasonable. There has been new build in the village and these properties have not sold
1111		NO
1111		Brownfield sites should be priority in building. Shall clusters of say 6-8 houses are preferable to having an estate.
1111		The infrastructure of the village needs to be considerable improved such as shops, post office and community facilities for all ages.
1112		In answer to all the questions I do not think that anymore houses should be built in Elkesley until the bridge has been completed.
1112	2	Also infrastructure in Elkesley is not up to more housing in its present state i.e. shops, buses, no main gas, main sewage is a problem in parts of the village.
1113	1	I do not believe the village has adequate infrastructure to support new housing.

heir area. The money can be used to support new health centre. It applies to most new direct and indirect impacts on the District's ensure that there is no net loss of biodiversity. 1115	12	Site 28 & W6 would be the best option, part of the site adjoins existing housing and part adjoins an existing employment site, it would appear to be a common sense propo
1115	13	Site 195, 343, and w8 would be unacceptable, it would be detrimental to adjoin sensitive countryside.
1115	14	Surface water from roofs, road, and other paving would discharge into the River Ryton intensifying the existing flooding of the River and the flooding of existing village prop
1115		surface water. (this observation was ignored by Planning at the time of the last development)
1115	15	A development of this size would be detrimental to village activities, facilities and the wellbeing of residents.
1115	16	Additional traffic on Shireoaks Common, Shireoaks Row and Shireoaks Road single carriageway road already congested with traffic movement and parking.
1115	17	Development of this site would be against all the comments and concerns of residents questionnaires completed recently.
1115	18	This development would bring the total new dwelling that almost 900 the village could not support this number, shops would be inadequate, no health services, school wo
1115	10	inadequate roads, drainage and other infrastructure unable to cope.
1115	19	All open space identify should be protected with an every increasing population open space is essential to the wellbeing of people.
1115	20	It is vital that excessive development should not be allowed in Shireoaks and Rhodesia to the detriment of their identity as villages.
1115	21	Question 35 Option A
1115		Question 121 Existing sites should be utilised
1115	23	Question 122 Transit and residential pitches should be provided separately.
1116	1	No
1116	2	Question 10 51 and R7 – good access for transport
1116	3	Question 10 489 (use to extend Bracken Lane School), 488, 511
1116	4	Question 10 370 housing good access site 3 and 27 onto London Road main arterial access into Retford Centre and to the South .
1116	5	Development of the sites listed above would have the advantages of accessing the existing road network without contributing to the current bottleneck at Tiln Lane/ Moor
		Street, Goosemoor Lane, in Ordsall.
1116	6	Plus it would keep the disturbance of development to a minimum.
1116	7	Alternatively I would support development of sites 46, 309, 342, 10, 489, 488, 27, 41 and part of 40 (as this land was under water in 2007)

mber of occasions I have nearly had an

1119	2	When flooding occurs the outlet flows into the Harworth dyke, which flows into the river Torne.
1119	3	When flooding occur after thunderstorm or heavy rain my house and my sons house incurs flooding as in photographs attached.
1119	4	This is due to surface water drains being inadequate
1119		More development in this area would subject us living on Church Walk to more flooding
1119	6	The position of the Church would compromised if houses were built on plot 180
1120	1	The risk of flooding may be high
1120	2	However, more importantly, the marshy grasslands to the immediate south of this site (GI ref 2/977) are important as a home to wildlife including certain bird species and Further, the site in question is not only bordered by one SINC but two as it abuts the Cheste4fifled Canal. The impact of housing on this site and the surrounding lands incl devastating to local wildlife. The ability of developers to overcome flooding may be achievable but the cost to the surrounding eco systems would be too high a price to private environments that encourages and is a home for existing wildlife eco systems would be destroyed. The Council's Green Infrastructure Plan notes that present of Lag ground for snipe and red bank. The environment remains a site suitable for sustaining these species but will not should the site be allowed to be developed for housing.
1120		In particular, back gardens adjacent to a SINC would encourage tipping onto the SINC and the actual development, noise, vibrations, dust etc. would harm the wildlife. Hou to the canal area affecting existing species and biological systems. The comments n the report do not take account of these factors
1120	4	The same report mentioned above comment that the site is suitable as it is within a wider residential area. this is not true. The site is on the edge of town but is to the eas development is to the wets of the canal. On other words, the canal is a firm and defensible boundary and to extend in it this area will cause urban sprawl in to open count appearance of the landscape and harming wildlife to their detriment while encouraging coalescence with neighbouring Welham. The value of the open fields to the local e contribution they make in this area has not considered
1120	5	There are other sites that are less (not bordering SINC sites) as defined on the SHLAA allocation plan and these should be considered in front of site 69. For the above reas important area (site69) for inclusion within the SHLAA housing allocation
1121	1	We are writing to you to confirm our objections to the proposed buildings to be erected across the canal form our house, and one of us will be meeting with you tomorrow 1) the proposed site (site 69) is a haven for wild life. It is a swampy area and as such, supports a wild variety of life. The birds are of many different species, and include her with many other small birds. I have photographic evidence of some of them. There are also deer, a fox, and I believe there is a conservation project to do with water voles
1121		There are times when there is very definitely surface water on the land, and this is, we believe an area that water drains to. There are already problems in that the houses have had to be built up, and have caused considerable distress to certain residents on the original Welham Road. The effect of building more houses on such a flooded are drainage
1121	3	Although a 'view' is not considered to be of nay significance to planners, we accepted an unusually short garden on the understanding that we had the open outlook to co squeezed in by the railway and the canal, and also provides an attractive scene for users of the canal. As the houses would have to be built to, so as to avoid the wet land, building three storey town houses, it would be very likely that we would be 'dwarfed' and in full view of those houses
1121		There are currently MANY new built houses for sale in Retford town. I see no need to build more, although you will no doubt tell us that the directive has come from Gove the houses over the way will be jammed in by the railway, and the canal, what would be the point in building these house, when there are so many objections to them? The empty in Retford, in much more attractive settings
1121	5	The Idle Valley Reserve is one of the great significance nationally. Although Retford isn't strictly part of the Reserve, the birds are clearly spotted alongside the canal and ri area is somewhere in the region of 175, this being second only to Ryland Water.
1121	6	The access to the houses would presumably be near the Hop Pole. This would lead onto a very busy road.
1122	1	Yes land for development of more than 9 houses should be released
1122	2	Site 266 is owned by my client who wish it to be released for development
1122	3	My clients are prepared to deliver up the site as soon as possible if released for development
1122	4	No Response
1123		Mrs Young is concerned that there is a lack of infrastructure to support such large housing developments around Kilton.
1124	1 1	We feel a town the size of Worksop, which has too few facilities the golf course and land surrounding is a viable resource, used by many, young and old alike with Bridle pa alone it should not be built on.
1124	2	Not to mention the loss of the football pitches. Losing yet more open space at a time when the Government are advocating children being more active. Merely having the

		Many of the 'Green Areas' marked on the plans we had were areas including school playing fields and small grassed areas set amongst housing , on which signs state 'NO E
1124	4	can be green areas, the only green being grass on them.
1124	5	We cannot express how strongly we oppose the plans to build on site allocation 4. It is our town and home, Worksop doesn't have much going for it, but this area is one. F
1125	1	The existing store is located to the west of Worksop town centre in a well-established out of centre retail destination and is an integral component of the retail hierarchy of complementary role to the town centre of Worksop and is a key shopping facility which serves the needs of the surrounding area. The store has recently been extended in consumer choice. The store is also a key employer in the local area providing substantial employment opportunities for the local community. The site is in mixed uses acco commercial buildings, a MacDonald's restaurant and a public house is located opposite on Stubbing Lane. The site is well served by public transport with bus stops located transport to the town centre and surrounding residential areas.
1125	2	At the present the SAIAO does not seek to identify any sites for future retail development nor does it recognise and allocate any existing retail sites in the District. The SAIC development can be accommodated with the existing town centre (namely Worksop and Retford) and a number of smaller local centres. These representations are submi allocation of the existing SSL store in Worksop as a sustainable location for future retail development.
1125	. ≺ .	We respectfully request that the Site Allocations DPD is amended to support further retail development at existing out of centre locations such as the existing SSL store, al allocated as a retail location in the emerging Plan (subject to those circumstances where the sequential test and impact tests are met).
1126	1	The 'screening approach' should be renamed to stop the confusion with 'screening opinion'.
1126	2	Not all criteria should be weighted the same and it should be recognised that some judgements are subjective and hence it will be for the decision maker to justify their ap evidence base.
1126	1 3 1	We agree that the methodology criteria set out in section 2 of the Site Allocations Issues and Options paper is suitable to identify sites for allocation for future developmen assessment of site ref: 266 Retford Road, Blyth against the methodology criteria:
1126	4	1) Is the local community supportive of the development of the site? The level of community support is unknown at the present time as no public consultation has been un
1126	5	2) Will development of the site be compatible with existing and / or proposed neighbouring land uses? Green Compatible with existing and/or proposed neighbouring land residential purposes would be compatible with the neighbouring residential land uses particularly to the south
1126	6	3) Will the site help deliver economic development opportunities? Not applicable
1126		4) Will the site result in the loss of best and most versatile agricultural land? Green No Impact on agricultural land The site is currently grassland used only for grazing
1126	8	5) Will the site impact on a water Source Protection Zone? Green Not a Source Protection Zone The site does not fall within such a protection zone.
1126	9	6) Will the site impact negatively on Landscape Character? Green No negative impact on Landscape Character The site is located on the northern boundary of the settleme south.
1126	10	7) Will the development detract from or enhance the existing built character of the settlement or neighbourhood? Green Enhancement to the built character of the settle scheme utilising quality architecture will enhance the northern boundary of the settlement.
1126	1 11 1	8) Will the development detract from or enhance the existing Green Infrastructure of the settlement or neighbourhood? Amber Some loss of green infrastructure Althoug loss of green infrastructure, this site does not represent high quality open or recreational space neither is it considered of high ecological value.
1126	12	9) Are there identified and unresolved constraints to the delivery of the site? Green No identified and unresolved constraints There are no constraints on the site that canr considered and there are no particular issues that would prevent development.
1126	1 1 2 1	The numbers proposed for each settlement do not appear to have been based on a robust evidence base and have relied on what local residents think should be accommon have assessed each of the settlements and suggested a housing requirement based on the percentage population of each service centre against the total population for al housing requirement is set out in Table 2 below. It is therefore considered that in the case of East Markham, land should be allocated for at least 24 new houses. This level commensurate with the size of the settlement and it appears that our client's site could accommodate this number of dwellings.
1126	14	The 2011 Strategic Housing Land Availability Assessment identifies 518 dwellings which are developable in the 6-10 year period of the plan and 91 units in the 11-15 year provided in the 2011 SHLAA for deliverable sites within the first 5 years of the plan for East Markham is 41 units. This is provided on site ref: 196, an edge of settlement broscheme for 41 dwellings on this site under ref: 16/10/00047 is pending the completion of a legal agreement and therefore there is no extant planning permission on this site housing. The delegated target date for this application was 21/12/2010 and no legal agreement has been signed to date. Therefore it is considered that the sites allocated this shortfall for the settlement together with the 24 units as indicated above, therefore totalling 65 units to be provided during the plan period. The Site Allocation Issues Markham as 'Potential Housing' with a total maximum capacity of 660 units. This level of housing clearly goes beyond the supply for the plan period and could not be acco into additional infrastructure and services. Therefore the most suitable, deliverable and achievable sites within the SHLAA need to be selected in order to ensure the succe sequentially preferable sites.

		Although the Core Strategy does make provision for the boundaries of settlements to be changed in order to accommodate site allocations, it is considered that sites with
1126	15	considered favourable to come forward over the plan period should they be suitable for residential development. Only 1 of the 22 sites is located within the existing settle
		summarised below.
1126	16	This site is offices and wasteland and is surrounded by residential development to the north, south and west. To the east is open countryside. The capacity of the site is 8
1120	10	Beckland Hill to the west.
		There is a committed housing site to the south of the site ref: 196, which is the single site identified in the SHLAA as part of the 5 years housing land supply for 41 dwelling
1126	17	this application and so the delivery of the site is uncertain. However, if this site is not delivered it does not prevent the development of site ref: 145 in terms of access for
		The remaining required housing supply for the plan period would need to be allocated outside the settlement boundary. The preferred site for the remaining provision is
1126	18	Street on the northern side of the settlement. The site has a capacity of 47 dwellings and therefore should this site be allocated would ensure compensations for any shor
-	_	sites should these not be deliverable.
1126	19	The site would achieve a suitable access point from High Street and adequate visibility could be achieved along this highway.
1126	20	The site lies outside of the conservation area whilst remaining connected to the wider residential area of the settlement.
1126	21	The owners of the site are known and the site is available for development.
		The above preferred edge of settlement site together with the site located within the settlement (ref: 145) brings the total preferred capacity of future housing supply for
1126	22	11 units required in the Site Allocations paper and the 24 units set out in the table above. However, this higher figure is considered to address the shortfall over the plan p
		delivery of site ref: 196.
1126	23	We are in support of the allocation of those sites identified as suitable and located within the settlement boundary of East Markham.
1126	24	Site ref: 196 is not considered to be guaranteed for delivery given the length of time that has past with no legal agreement signed or decision notice issued. Therefore the
1120		will need to be compensated for during the plan period.
1126	25	Furthermore an assessment of the distribution across the Rural Service Centre settlements has been carried out based on their size and population. It has been assessed t
		for at least 26 new dwellings.
		Therefore a total of 65 (41+24) units should be allocated within the settlement of East Markham. To compensate for the shortfall site ref: 142 is considered to be suitable,
1126		development during the plan period. There are no constraints to developing this site for residential dwellings. The site is located outside the conservation area and adjace
		to be a suitable allocation to deliver the remaining housing required in East Markham. We therefore support the allocation of site ref: 142 and the amendments to the set
1127	1	Yes the criteria are broad ranging.
4427	2	
1127	2	No. It is dubious whether more housing/employment growth would benefit the town as there are so many great shopping areas in Sheffield, Doncaster and Chesterfield w
1127	3	I would prefer housing to be built near sites with the existing infrastructure to support it. E.g. 343, 195 28 26 & 90
1127		Also sites that do not encroach on the surrounding countryside and open spaces which people and wildlife enjoy.
1127	5	The sites 26/28 and 343/195 could also support some employment along with site W6.
		Yes they should. Our open spaces are important for our well-being, whether to look at, spend time in and for the huge amount of dog walkers that would otherwise have
1127		turn generating more traffic that Worksop can ill afford. The few pockets of open spaces provide corridors for wildlife to live and move around. They are welcome areas for the intervention of the state of the stat
		their homes. We do not want our children to be brought up in a concrete environment.
1127	_	Site 35 seems to have been suggested but seems to contravene point 2.6 Sites for Suitability from the Consultation paper. It is adjacent to local wildlife sites (which have
1127	7	after the last round of building), will involve the destruction of valuable hedgerows and a great loss of Biodiversity in the area. It has a poor road network which is already have new homes built.
1127	8	Option A: Spread between Worksop; Retford and Harworth Bircotes?
1127		Existing sites - as per the discussion at the meeting, no new areas are needed.
1127	1	Option A: Spread between Worksop; Retford and Harworth Bircotes?
		No. I believe the number of houses residents have indicated they would like to see in the Future Development Questionnaire (FDQ) survey was for up to 10 new houses (2)
1128	2	most popular response was for no new housing (23%). I would support 10 new houses over the plan period.
1128	3	I would support a small development of 10 houses on site 505 adjacent to the existing row of bungalows with access off Station Road.
1128	4	I would not support development on site 504 as part of this site (adjacent to the old railway line) is old, species rich pasture of merit to the habitats within the village.
		I would not support development on sites 506 and 383 as access is via existing bridleways/footpaths which are in frequent daily use by walkers and riders etc. The increase
1128	5	would be hazardous to existing users.

		with the exception of Criterion 4 which involves the loss of agricultural land to development. We believe all agricultural land should be exempt as far as possible, agricultu
1130		resort; once developed it is lost to food production. At the very least PPS7 should be strictly adhered to, and grade 3 land should be grouped with grades 1 and 2 where every
		subdivision it falls into.
1130	3	We do not believe that any additional housing above that already required is necessary. We are concerned at the number of existing industrial units that are standing em
1130	4	In Rhodesia we would prefer to see site 38 developed as this is a brownfield site with existing access and egress onto Shireoaks Road. This site is the subject of a current p
1150	-	and a residential care home. The care home would also provide some employment.
1130	5	If further development is required in Rhodesia, site 90 should be developed in preference to site 30. It has direct road access onto Tylden Road, leading to Shireoaks Road
1130	6	Traffic from site 30 would have to pass through the existing housing estate and probably past the primary school in order to leave the village.
1130		Site 30 adjoins Lady Lee Nature Reserve and provides a buffer zone between it and the existing housing and should surely be left as a continuous green corridor alongside
		to Manor Lodge.
1130	I X I	If each of the proposed sites (30,38 and 90) were developed for housing this would almost double the size of the village (92.7% increase:- existing houses 411, proposed for
		inadequate infrastructure to support this total.
1130	9	With regard to site no.9, the proposed development extends to the boundary of the grounds of Manor Lodge - a Grade 1 listed building. Manor Lodge is missing from the
1422		consultation documents despite being, as an Elizabethan hunting lodge, the tallest historical building in Worksop.
1130		Site 9 is also highly productive agricultural land which maintains, enhances and preserves the rural setting and public visual amenity of this important landmark.
1130		Bridleway 2 from Haggonfields continues as bridleway 18 from Manor Lodge to Mansfield Road along the western boundary of site 9; footpath 2 crosses site 9. Many peo walkers) value access to the rural aspect of this area and the wildlife living within it, and this proposed development would be detrimental to this amenity and be incompa
1130		
		agricultural. Development of site 9 would also generate serious traffic issues -Mansfield Road, the A60 is congested at present with queuing traffic at peak times extending past the pro-
1130	12	provide major traffic congestion and road safety issues for those using public transport on Mansfield Road.
		Planning department employees have stated that any housing development on this site would require an additional primary school located on the site. This would surely e
1130	13	more.
1130		The development would also result in the loss of privacy to the existing houses on Mansfield Road and those houses on the St. Anne's estate which adjoin site 9.
1130		We would prefer to see sites W1, and W12 developed for employment in the future
1130	16	We were surprised to see W13 proposed for development of any kind, located as it is between the River Ryton and the Canal, regularly seen to have crops standing in wat
1150	16	we were surprised to see wis proposed for development of any kind, located as it is between the kiver kyton and the Canal, regularly seen to have crops standing in wat
1130	17	We have no preferences but would hope that adequate provision is included for protected open spaces both within the housing development part of the mixed use sites a
	17	employment land.
1130		Any open space is a valuable resource to the local community and should be protected as far as possible.
1130		We do not feel able to comment about this without far more information.
1130		Option A: Spread between Worksop; Retford and Harworth Bircotes?
1130		We consider it makes sound financial and economic sense in the present climate to extend and improve existing sites rather than provide new sites.
1130	22	We consider transit and residential pitches should be provided together for financial, economic and logistical reasons.
1434		I don't agree that the criteria sufficiently takes into account community growth and the adverse effects i.e. increase in crime rate thus increasing the insurance premiums
1131		with the communities affected (site 35) has been poor and a greater effort should be made i.e. letters, door to door surveys even if this at the constructors risk. Developm infrastructure where traffic and through traffic already causes in the merging rush hour.
		infrastructure where traffic and through traffic already causes issues in the morning rush hour.
1131	2	I believe that existing inner city land should be developed to regenerate the deprived local areas and not a financial driven decision to grow areas that already have the hi
1131	3	Site gives good potential for direct links to the A1 and would develop east side community providing Schools and Shops would be advantageous to that community.
1131	4	Site 4
1131	-	Site 4 due to its locality to the A1. Mixed use segregated by recreational land.
1131	6	I believe site 35 should be a protected area as we have a responsibility to protect areas of natural beauty and of historical importance.
1131	7	The de Gatefold family were known precede in the area local to site 35 in the time of Edward III.
		The existing infrastructure could not support any development on the west side of the town. The A57 West bound is regularly backing up from the Todwick crossroads we
1131		on the west side of the town would only compound this problem. The rush our traffic on Ashes Park avenue often queues over the brow of the hill down to towards the ro

1131	10	The local shopping precinct is already a problem for parking and traffic since the Asda store opened and this would almost certainly be made worse by a local housing deve
1131	11	Option A: Spread between Worksop; Retford and Harworth Bircotes?
1131	12	REMOVED
1131	13	Separate, allows the residential pitches to build community spirit.
1132	1	I agree with the screening methodology.
1132	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
1132	3	I disagree, I feel that more than 14 properties are required for the needs of the community over the next 16 yrs. I suggest 25.
1132	4	294
1132	5	I have land that I would like considered I will send in the details.
1132	6	I think that the school should have more land.
1132	7	The village hall should have a play area .
1132	8	There should be more housing for first time buyers and young families. There are too many old people in the village we need to balance it out.
1132	9	I think the open spaces identified on the map should be protected, although I think the current recreation area is fine for sports and older children I do not think it is in a go
1132	10	I do not have an informed opinion, I am aware of problems in Gringley on the hill with a traveller family who resided there and realise their culture can cause conflict and fineeds to be addressed.
1132	11	I imagine that providing the Gypsies and travellers with a combination that suits their needs would be best.
1133	1	Yes
1133	2	No – Not above what has already been committed at this stage.
1133	3	If development has to be in Retford we would suggest areas 384/41/40/52/1. Housing in this area would be most suitable because of the direct access to the A1 leading to
1155	5	Newark, Grantham where most residents would shop as Retford's main roads and shopping cannot take any more pressure.
1133	4	Site's 259 & R2 would be best for businesses with close proximity to the A1 & small airport which could be an advantage to attract business into the area, which would be i
1155		housing.
1133	5	Opening up the relief road (completing ring road) needs serious consideration and should have been looked at before planning was given to area around 1/81 as this could
		serious congestion problem already even before all committed housing projects are completed and the emergency services must already be affected by this.
1133		Yes, if any are required for development I would go with 1/21 1/23
1133		B – I think Retford might require services as most have been taken away.
1133		Existing sites
1133	9	Together – to keep communities together.
1134	1	I disagree that land should be allocated for at least 12 new houses. The current infrastructure is inadequate (roads, sewerage/drainage, and public transport) to cope with a
		development.
1134		If there were to be any building it should be limited to 6 dwellings of no more than 2 bedrooms to provide accommodation for 1st time buyers/retirees.
1134	3	The only site which should be considered is 239 and then road frontage development only on Low Street and Retford Road.
1134	4	The other sites have neither suitable/acceptable access nor drainage.
1134	5	Without significant infrastructure investment especially in the drainage system, any development will be problematic because it will overload even more an already inadeq
1134		Yes There is no suitable land available North or South Wheetlay for such development
1134	7	There is no suitable land available North or South Wheatley for such development.
1135		12 new houses is too many. The present infrastructure is not adequate to cope with any new buildings. The roads, sewerage, drainage are already overloaded. The public t
1135		6 new dwellings would be more than enough and these should be bungalows of 2 bedrooms for 1st time buyers or downsizing/retirees.
1135		Only consider site 239 and limit this to road frontage development only i.e. Low St and Retford Rd.
1135	4	All other sites have no suitable access of adequate infrastructure.
1135	5	The infrastructure in Wheatley is already overloaded i.e. drainage, sewerage – we have problems now so just think what would happen. The cost to put this right for develo
		not necessarily successful.
1135	6	Yes yes!
1135	7	No there is no suitable land for such development in North or South Wheatley.

1138	3	Additional vehicles using the estate roads, many of them not suitable for excessive traffic, already a problem on entering London road.
1139	1	I think industrial development should come first for the unemployed. Then more industry & housing for growth of the town, how much I don't know.
1139	2	If it's all going to be used does it matter which is used first.
1139	3	Some leisure facilities would be good mix with employment
1139	4	Open spaces are of great importance in my view and think all sites should be protected.
1139	5	I would like to bring to your attention the land at the back of Alexandra Road as I understand this is a bird sanctuary but is not (according to your map) protected. I would l wonderful array of bird and wildlife in this small piece of land.
1140	1	It is noted that the Council ' is currently assessing the quality and value of open spaces in the District' -is this in addition to the PPG 17 study by K, K & P in March 2010 significant number of open spaces in the District. It supports the District's intention to assess the stock and seeks to be actively involved in the process. Pending completio identified most urban greenspace as ' Potential Protected Open Space' and included significant built development within the identified areas. Whilst such definition material Property would object to this technique remaining at the next stage of the plan. It is generally accepted convention and a practical graphic technique that justified open sp buildings, car parks, service areas and related amenity space. County Property would be willing to assist Bassetlaw in making the appropriate distinction for the relevant si protecting open spaces should recognise the need to secure enduring management and, in the case of play space, appropriate infrastructure e.g. changing rooms.
1140	2	Land at Shireoaks Marina (Site 153) County Property has on going feasibility work to ascertain optimum land use budget. Fresh proposals for development will be produce
1140	3	Greenacre Day Centre 1 Wincroft Hostel, Wingfield Avenue, Prospect Hill, Worksop. These two sites are surplus to County Council requirements. The 'Protected Open Space trees on the site are part of amenity landscape related to the existing buildings and uses. The space is not 'public'. The site features should be considered as part of the des 'protected open space' designation.
1140	4	Holies Street Resource Centre, off Newgate Street, Worksop The only 'space' at this site is private amenity landscape. The 'Protected Open Space' designation is inappropr designation.
1140	5	Lincoln Street, Worksop There is an inconsistency in the designation of 'protected open space' on this site as between the Approved Local Plan 2001 and this Consultation representation.
1140	6	Land at Bracken Lane, Retford County Property has surplus land off Bracken Lane which should be considered as an option for development to east of Retford. It may be a other identified sites (e.g. 4/88 and 4/89)
1141	1	We objected please don't take Kilton Golf Course.
1142	1	The number of dwellings allocated. Should be that set out in table 10.2 to allow villages to grow.
1142	2	I agree enough land should be allocated in Wheatley for at least 12 new houses.
1142	3	Parts of sites 236 and 237 would be most suitable as they are connected to the services and accessible by road already.
1142	4	Site 239 floods as in 2007 this whole field was under water.
1142	5	Site 238 floods as well
1142	6	Site 464 has poor access, would also spoil the character of the village.
1142	7	Infilling between has already spoiled some of the village more would spoil it more.
1143	1	Figures provided in the above document should provide sufficient housing and employment needs for the future.
1143	2	The proposed developments adjacent to the road network and public transport facilities should have a more urgent consideration i.e. numbers 8,9,11,14,26,28,30,35,39,1
1143	3	Sites W1, W12 and W13 These proposals are adjacent to good roads and public transport and therefore should be a major consideration.
1143	4	Mixed usage on sites 39/W10, 28/W6, 195/W8 which are again adjacent to good services should be a major consideration.
1143	5	Open spaces indicated on the plan should be preserved for children to play and members of the public to exercise
1143	6	I would object strongly to the Kilton Forest Golf Course being used for housing development and any development on site 4 & W9.
1143	7	Living adjacent to the above I know how many members of the community enjoy using the public rights of way to exercise dogs and enjoy the openness of the countryside
	_	on 4 & W9 would be detrimental to the area due to:-
1143	8	1.Road access and poor infrastructure.
1143	9	2. Loss of trees and hedgerows.
1143		3. Impact of public visual amenity.
1144	1	Yes

Id like to see this land protected as there is a

		Flooding is one of the things you list as to a reason why you would remove certain areas during your screening process. Areas 511, 370, 489, 488 & 69 are known locally to be
1144	2	of the year they are boggy with surface water and the areas which back onto St Helens & St Stephens flood. During severe weather surface water from the nearby higher grou
		gardens/houses.
1144		No more houses for Retford other than the proposed extra 500.
1144	4	Larger companies need to the attracted to our town to give employment opportunities, over the years employers have been lost (Bridon, Clarks, Jenkins) and nothing of a similar
1144	5	I would prefer to see housing development in areas which have no flood/water problems and more importantly have no access.
1144	6	Sites 51, 40, 52, 1, 37, 41 &27 seem to have none of these problems.
1144	7	I strongly object to areas being included that have known problems with flooding and poor road systems and access – areas such as 69, 511, 370, 488, 489.
1144	8	Employment land is desperately needed and I have no objections to either area being allocated.
1144	9	No preference
1144	10	Your publicity about this consultation needs to be more open and visible.
1144	11	Green areas should be protected.
1144		Option A
1144	13	They should be concentrated in and around existing sites – this makes sense economically
1144	14	Should be together, cheaper to provide.
1145	1	It has come to my attention that North and South Wheatley is to be considered for a further 12 houses. We have a number of friends who live in the village and have always ac
1145	-	planning have been sensitive in allowing developments.
		I am aware of the plots in offer and would like to express my support for no 236 on Top Pasture Lane and to the field at the back of Whitegates, which runs alongside this plot.
1145	2	with water and electricity available. In addition there is plenty of room for parking and private gardens allowing nice individual developments to take place, which would be in
		mean minimal disturbance for any of the local residents and maintain the ambience of the village as a whole.
1146	1	I can confirm that I approve of the twelve houses over the next seventeen years.
1146	2	I would also like to express my preference of small houses for couples and young families and for first refusal to be offered to existing village residents where possible.
1146	3	One particular site, plot no 236 would seem to fit the requirements.
1146	4	I am aware that the adjacent field at the rear of ** and *** ****** of Whitegates Top Pasture Lane could also be utilised alongside this plot which would be ideal for this pro
		would consider my opinion in your decision.
1147		Option A
1147		No. At present 68 new houses are being built, which is enough for the village to absorb.
1147	3	How will water supply/drainage cope? How will extra traffic affect our narrow roads?
1147		Neither
1147		Can we nominate open spaces within the village to be kept that way, even though they are privately owned?
1147	6	Yes
1147	7	Unfortunately I don't know where Gypsy and Traveller sites are, so cannot really give comment.
1147	8	Possibly some together and some separately – would give short term stayers chance to stay near permanent family/friends
1148	1	Yes Ontion A
1148	2 3	Option A No. Miller Homes are building a new development. Time must be given to ascertain the impact on the village.
1148		No. Miller Homes are building a new development. Time must be given to ascertain the impact on the village. None
1148 1148		None
1148		Yes
1148	7	Existing sites as services – schools are established
1148	8	Residential and transit sites provided together for schools and services
1148		None known
		Yes
1149		Option A
1149 1149	2	No. Miller Homes are building a new development. Time must be given to ascertain the impact on the village.
1149	-	None

		With regard to Site 9, it is astonishing that no reference is made on figure 4.1 to the
1153	7	Grade I Listed Manor Lodge, built in the 16th Century. This has important links to Hardwick Hall and Bolsover Castle, as they were all designed by the same architect, Robe
		importance and would be tainted by development in such close proximity.
		Site 9 has been highlighted for the potential 250 houses. The A60 is unable to cope with current volume of traffic and we feel that development to the east of Worksop wi
1153	8	infrastructure.
1154	1	I am very concerned about the proposal to build new housing in various parts of the village of North & South Wheatley.
1154	2	am not against small developments as long as they are in keeping with the village and do not have a detrimental effect on existing villagers.
1154		Ideally planning should give serious consideration to older people wanting to downsize and younger first time buyers, and preference be given to local residents. New hous
1154	3	bedrooms.
1154	4	Consideration should also be given to dog owners and people with children where a garden would be a requirement
1154	5	Off road parking would be an essential requirement
1154	6	I notice that one area for future development is very large and at the end of a road unsuitable for heavy traffic. I hope that if planning is given for this site it does not open
1154	0	housing in future years
1154	7	I hope that a small development with a maximum of 12 properties over a period of up to 20 years would be the maximum considered, and should definitely be low cost
1154	8	Looking at the plan an ideal site would be for about 2 houses on site number 236 and to take in the paddock at the house to it as Whitegates.
1154	9	Another small development of mixed housing say 3 or 4 on site number 239
1155	1	We do not want any buildings being erected, this area flooded, any extra occupation would make things worse.
1155	2	The drainage cannot cope with extra sewage and rainwater. If you go ahead and grant buildings, what is to stop them flooding? Building them higher? Then wager does the
1155	2	already. Having had major flooding in the homes (sewage) and everything ruined, would you build my home again higher up so it would not happen
1156	1	Option A
1156	2	Yes.
1156	3	508. Should be Council houses for rent and not sold to tenants at low prices as has happened to most of the original Council houses in the village
	4	Outline permission on the two sisters site)adjoining 108 and 145) for 45 houses will add a further 60 to 90 cars on the already congested village roads. Many of which are i
1156		carriageway due to roadside parking by residents particularly Farm Lane (at the junction with High Street), Beckland Hill (junction with York Street) and Tuxford Road/Pries
1156	5	The village school will be unable to accommodate the influx from the housing developments without considerable expansion
1156	6	Existing sites
1156	7	Together. One assumes that they prefer to be close to their community
1156	8	Yes
1157	1	We do not agree at least 11 new houses should be allocated in Elkesley.
1157	2	33 houses on this site should not be granted, it would affect the surrounding properties, roads, drains etc.
1157	3	We would prefer to the see development on site 246 of the plan- no other properties would be affected and a continuation of Yew Tree Road would complete that area
1158	1	Small development of 2 bedroom cottages for young couples and people wanting to downsize but remain in the village.
1158 1158	2	First refusal to village residents Developments to be in-keeping with the village character where ever possible
	-	I am aware of plot no 236 is available and with the adjacent paddock on Top Pasture Lane and would like to support this particular site to this end.
1158	4	While I am in agreement for the development of the proposed plans to give planning consent for the proposed development of 12 houses over the next 17 years, I do not a
1159	1	is proposed. I feel that this would spoil the outlook for this beautiful
1159	2	I would be happy for plot 236 along with the small paddock to be considered as a small development.
1133	<u> </u>	I am aware that paddock on Top Pasture Lane is to considered for expanding the village. Having spoken to I understand that his neighbour also has a small paddock to the
1160	1	paddock and would not be oppose to utilising this parcel of land alongside paddock. To this end, I would like to express my wishes for these two paddocks to be considered
		future for development for North and South Wheatley.
1161	1	No we do no need anymore houses because we cant sell the ones what's up for sale now.
1161	2	No it would not because we need the sewage system up dating to take the houses we've got now
1161	3	We also want resurfacing through out the whole village.
1161	4	Until the bridge is open and up running
1161	5	Until we get what appley in question 62, we might consider more houses in Elkesley until then the system cannot cope with anymore

		misses at this junction. Any further increase in traffic flow can only increase the danger.
1164	4	We are aware that you made clear at the recent meeting that Bassetlaw does not have a "green belt". However, the loss of further fields, hedgerows, trees, plants, wildlife
1104	-	area.
1164	5	Gateford Hill House (as it was known) has a long history and lies within a conservation area. Housing being built adjoining its grounds, with the subsequent loss of privacy a
1104		beautiful now nursing home and its surrounding views
1165	1	In my opinion Worksop does not need t ruin the green lands as they are.
1165	2	What's wrong with looking around the houses around which need renovating and sorting out to be brought back to life
		The Gateford built estate has ended up a nightmare. More traffic, more jams, schools overflowing. St Johns school were working from a hut due to overflow of pupils from
1165	3	any of the 3 areas proposed where are the pupils going? Where s the traffic going? All these things and many more need to be thoroughly thought through first. What abo
		understand I am not the only person opposing these areas for housing
1165	4	The Kilton Hill and Blyth Road area which I believe will be a blockage when and if the Tesco build goes ahead which I greatly disagree in the first place. The above road and
		without adding extra agro to the area and people living in the area
1165	5	The ambulances traffic, the hospital, the college, the railway crossing, emergency traffic. What about delivery lorries? And the building works and lorries> Worksop will be
1165	6	We do not need Tesco-leave it where it is, they can build up and put if they need to be that greedy. If they are not satisfied with what they've got, they should move out of
		good sops to shop in
		I oppose the areas stated for building land, since we came to live in Worksop (which I then liked) we are completely boxed in on al 4 sides with 'box' houses and pocket siz
1165	7	overlooked. I oppose the Tesco site. I oppose the building areas. The first consideration which is very much over due is a new covered in and modern bus station.
1166	1	The loss of a large area of prime agricultural land with its associated hedgerows and wildlife habitat.
1166	2	Loss of existing and potential agricultural employment
1166	3	Loss of an area extensively used by multiple groups including dog walkers, walkers, cyclists, horse riders, family groups, bird watchers etc.
1166	4	The crossing of a natural boundary and the subsequent encroachment of Worksop on Carlton in Lindrick.
1166	5	The large increase in the local population and the demand that it would place on already stretched amenities i.e. medical, commercial and social.
1166	6	The increase in the number of cars to the area. exacerbation of the road system which at times struggles to cope with its current use.
1166	7	Concerns over child safety and this increase in traffic volume.
1166	8	The destruction of green areas in order to allow road access to any new development. Even though an assurance to the contrary was given by Richard Schofield at the pub
		We object to your site for future bousing development Kilten Colf Course? We have lived in Lawyood for 20 years also use were told that if the colf course tout to down
1167	1	We object to your site for future housing development Kilton Golf Course'. We have lived in Larwood for 30 years plus, we were told that if the golf course went under the
1167	2	land We have had problems in the area with people letting houses and other problems.
1167		We have had problems in the area with people letting houses and other problems We think they are enough empty houses around Workson, the Council could refurbish and use

1167		We would miss the woods, walks and he view, the green belt area would go. Nottinghamshire is a beautiful county for the number of walks and scenery. We would becom
1168	1	I agree with the criteria
1168	2	The criteria and how its applied provides a good balanced basis on which to discuss and make decisions to proceed to the next steps. I would make the following observati Sutton Cum Lound Proposals.
1168		Public support was mixed, at the consultation meeting, and constructive feedback was made. The support endorsed links to the village open plan, and included the contrib towards sustaining and enabling the expansion of the community facilities and services, which an expanded population will bring about. A larger will help sustain the village especially for young people. More activities, will bring more people together more often, and will lead to more caring and supportive community.
1168	4	Criteria 2 It will be compatible with existing and proposed uses of the land.
1168	5	The village is largely a residential area for people working in Sheffield, Doncaster and Nottingham, as well as in the smaller towns and industrial parts of Retford and Works families will help to sustain the village.
1168	6	The Sutton sites will not detract from views through the village, and will create the potential for new walking routes and increased pedestrian movement around the villag Walking routes to amenities such as the school, church, shop and village hall could be made possible away from the main roads.
1168	7	Criteria 3: Although the developments are for housing, they will deliver economic development opportunities: mixed housing should include starter homes and possibly sh care for the elderly, local work opportunities, especially for part time. Housing maintenance, gardening and home help employment will be in demand, creating local empl activities will be sustained and grow, and new 'third' sector opportunities will be possible with an increased population, such as first responders working alongside ambulan
1168	8	Criteria 4: The main areas for development is not agriculture and is mainly infill between existing development or using land unsuitable for agriculture, this is especially so
1168	9	Criteria 5 I believe there would be no impact on the water resource
1168	10	Criteria 6: Areas for development will not detract from the land character. The site are mainly away from the main access routes into the village. The developments and ac
		view the character looking toward the village and outward towards the open countryside.
1168		Site 281 will complement the existing farmyard conversion, and will not have any negative impact on the character
1168		Criteria 7 the development will enhance the built character of the settlement
1168	13	It will particularly benefit the currently unused sites of 281 and 275
1168	14	Criteria 8 it will not detract from the green infrastructure of Sutton Cum Lound. Accessibility to open spaces and footpaths around the village, would be increased if the are areas will not add to congestion or reduce green space.
1168		I agree with the overall number of houses for development, but I do not agree that the approach will be to expand by 4 houses per year until 2028. The reasons for this is t give consideration to the increased demand for and generating growth of facilities and services, such as schooling, bus service, post office and banking.
		If the expansion is done through 3 or 4 significant developments to 2028, this will ensure viable development of education and services. For example starter homes for 10
1168	1 16	school and school places, of sufficient size to justify and additional class at school, rather than a small growth of four or five into an existing class. These families would mal
		significant sustain those services. The parents of young families would also provide a number of possible to be employed as carers for elderly people. Expansion of sheltere
1100		starter homes, and enable elderly people to down size and stay in the village.
1168 1168	17 18	The development should be in three significant phases not averaged over the years to 2028 at four per year. Phased development will also enable each development to be planned and designed, including making the best use of environmental technology. For example ground sou
1168		Requirements on developers to enhance facilities and provide the necessary mix of housing can be best achieved through larger developments.
1168		All sites are appropriate for development in particular 281 which has previously had buildings on it.
1168		Site 275 which helps create links between previous housing and the school development.
1168	22	I am a former resident of the village, having been born there and lived in Sutton Cum Lound until the mid 1980. I attended the local school, church and was in the clubs suc new housing will bring benefits and a further lease of life to the community.
1168	23	The parish recognises the need for open spaces and references the existing spaces, but there is no references to wanting more. The village is well supported with footpath countryside.
1169	1	Site reference BAS187 would be the better site to use for houses.
1169		We and many others wouldn't buy a house on plot 182 as there is a sewage work too close and it does smell.
1169		Plots 194 and 192 are too close to a fast road unless speed limits are introduced

1172	16	46/309 OFF THE DRIVE PARK LANE Mixture of horse paddocks and some arable fields. Possibility of flooding at the eastern end. Reasonable access off Longholme Road. Im
1172	17	7 OFF BOTTOM OF PALMER ROAD Some arable fields and grass paddocks but mostly rotational willow coppice. Access not great and possibility of flooding in some parts. In Bam Owls (Schedule I protected species) breed close by and hunt over this area, one in my garden and the other pair at an adjacent farm. The willows are a haven for wild warblers and for roosting swallows in the autumn. They also provide cover for foxes, hares and Roe Deer all of which are seen regularly. A recent article on pages I and 3 o January,2012) explains a little more about the importance of this area.
1173	1	Area 511 is considered to be wholly unsuitable and uneconomic for future development. It is situated at the foot of Grove Hill and the field is purely and simply a flood pla field itself but nearby gardens adjacent to the Beck which is round the perimeter of the field is well known and documented. In June 2007 following heavy rain standing wa overwhelmed the Beck which surrounds the field but totally flooded the land occupied by Nos, 9,10,11 12 St Helens Road and also the interior of the bungalow of No 12 St by its occupants whilst extensive refurbishment was carried out over several months. Since June 2007 there have been a number of occasions when similar problems have
1173	2	Not only are there flooding problems there is the important aspect of sewerage capacity covering sewerage collection and disposal. Up to October 2011 when Severn Trer between 10 St Helens Road and 50 Bracken Lane upwards of 60 residents in St Helens Road, Harcourt Place, Grove Coach Road, Rutland Road, Cavendish Road, Five Fields as individual owners for any blockage in that stretch of pipework referred to. The change in responsibility does not alter the responsibility of those residents for maintainir within individual gardens but pipework beyond boundaries until sewerage actually enters the common area referred to and Severn Trent have indicated that the change o burden on those residents. The problem of sewerage disposal is well documented and a notice was served by Bassetlaw District Council on all affected residents on the 8tl drainage flow and which entailed huge expense in the replacement of pitch fibre pipework by modern pipework. Residents are therefore anxious that any development of made by them should the sewerage disposal be put under strain by the carrying of more effluent than at present.
1173	3	Area 511 is surrounded by narrow roads including one unmade access road, namely Bracken Lane and the east end of Grove Coach Road in coping with existing traffic whi Bracken Lane School. The cost of upgrading roads would not only be considerable but there would be a great increase in traffic congestion and would be a safety hazard to the school day. Already the traffic entering London Road from both Bracken Lane and Grove Coach Rd is subject to delay, considerable at peak times, and would be exacer surrounding area 511.
1173		Area 488 is also considered unsuitable. again due to standing water due to heavy rain and the unsuitability of Bracken Lane to carry increased traffic.
1173	5	Area 489 is considered unsuitable in view of its proximity to Bracken Lane School. There would be considerable safety problems were a development to be agreed so close would be put at risk.
1173		Area 370 adjacent to Cavendish Road suffers from similar problems as area 511 as the field and Beck are prone to similar flooding problems.
1174	1	This proposal is a further significant urbanisation of the Retford area. I will not comment on the consequent need for the provision of utilities and the need for the provision water and the outlook from local treatment plants may be significantly affected by urbanisation and other developments upstream and downstream. Adequate communic problems
1174	2	In the PHSR (potential housing site references) there will be many trees and hedgerows. These are likely to have a significant role locally in the conversion of carbon dioxid continuous conversion sequence, tree etc. planting needs to be done well before tree removal. I am not an arborist an so am unable to suggest a timetable or the most su
1174	2	PHSR 511 and 379 and the eastern potion of PHSR 3 are potential areas of flooding and should not be used. Only if the necessary technical action of raising the floods and present level is applied
1174	4	Some areas can significantly increase the rapid run off. This drains beneath the route way in the region adjacent to PHSR 1/29
1174	5	The problematic exits from the Grove Coach and Bracken Lane area and onto London Road. At present there is other congestion and more houses are likely to exacerbate
1174	6	There ought to be a requirement to attenuate the noise from road and railway traffic. Those who live nearby require our support in this weather.
1175		I wish to comment on the possible selection of the above site for new housing (site 7). Agricultural value. During the past 35 years most of this land has been used for food arable crops- wheat, linseed beans rape. Previous to this part of the land was an orchard- historical maps. Part of the western half of the land was under drained 5-20 year may not indicate the land agricultural potential. Soil scientists and hydrologists from ADAS visited the site weekly when the willow was first planted, all stated it was good
1175	1	As you have read, my comments are more questions than solutions. I hope that you will consult with the DEFRA regarding the agricultural value of the land and the remov Commission and Natural England regarding the removal of the willow coppice, with the Environment Agency and the Ryton and Idle Drainage Board regarding surface drai flood risk and with Severn Trent regarding the surface water drainage, sewers and flood risk.
1175	2	Removal of willow coppice. With the willow, after ten years growth prove an impediment to housing development, particularly as part of the land was under drained relat necessary first to remove the willow and then to grow arable crops (say wheat) for several years before and houses are built.

1175	3	Public access. Two north-south public footpaths cross the land. Also, there has been public access for walking to the western most field for perhaps 15-20 years. When ara to be a grassed area is this fields north-west corner. Since the willow was planted, members of the public have each day walked around the four sides of the fields, using the public footpaths been merely tolerated by the landowners, or encouraged by an access agreement of some sort?
1175	4	Wildlife. I have recently observed bats (pipistrelle), pheasants, partridges, montjac deer, roe deer, sparrow hawks, owls and buzzards frequenting the land. In the more rer site
1175	5	Hedgerows and trees. Are any of the hedgerows and/or trees worthy of preservation. The trees near the farmhouse and the tall hedgerows on the eastern half of the site
1175	6	Surface drainage and flood risk. My sketch map (see original submission) shows the steep slopes and the stream on the western half of the land and the steep slope at the Shetlands (a road off Tiln Lane) was developed several years ago, the stream flowed vigorously for many weeks. It flows similarly during heavy rain. I believe that at least s spring-fed) from adjacent existing housing area (and possibly from as far away as Tiln Lane) flows into this stream. Filling in the stream could therefore result in a flood risk farmland. The flood risk on site 7 could be further increased by run-off from the steeply sloping northern end of Bigsby Road, which becomes a stream during heavy rain.
1175	7	Housing density. 716 houses as proposed on site 7 (perhaps 60 acres) is a remarkably low density. A developer would surely demand at least that number if not many mor entire site is developed, and 1200, 1800 or even more houses are built (densities of 20, 30 or more/acre) will the local roads and infrastructure be able to cope, and does F houses in the next four years?
1175	8	Topography. A housing development restricted to the western half of the site would be surrounded on 3 sides by farmland and project 400 meters beyond the town bound whole site would be 700 meters from the exiting town boundary and indeed in Clarborough Parish. Again,
1175	9	Roads. If the western half of the site is developed, the distance along existing public side streets (Bigsby Road or Palmer Road) between the northern edge of the developn will be about 1000 meters . If the whole site is developed, the same distance may be 1500 meters. Surely, shorter access roads fro the site to Welham Road or Smeath Roa
1175	10	If the access is via Bigsby Road, please note that the slope at the northern end of that road has recently meant that the road was dangerous or impassable in snowy weath
1175	11	Sewers given the sloping nature of the site, if sewerage from the new houses was routed to the existing housing development, almost all the site would need pumped sew (particularly given the under drainage work) damage any new sewers on the side. Again, surely new sewers should be constructed from the side towards the nearest main exit the site by gravity
1175	12	Moorgate farm. Development on site 7 could be restricted to the extreme south-western corner where the land is relatively level and problems with loss of agricultural lar trees would be minimal, and there should be no road access, surface drainage and sewerage problems. However, houses in this part of site 7 would be only 200 meters from Moorgate Farm, both of which I understand the Council wants to conserve.
1176	1	Agricultural value. Doing the past 35 years most of this land has been used for food production (cattle rearing and later arable crops, namely wheat, beans etc.). Part of the perhaps 15-20 years ago. The present use for willow coppicing may not indicate the land's agricultural potential
1176	2	Removal of willow coppice. With the willow, after ten years growth prove an impediment to housing development, particularly as part of the land was under drained relat necessary first to remove the willow and then to grow arable crops (say wheat) for several years before and houses are built
1176	3	Public access. Two north-south public footpaths cross the land. Also, there has been public access for walking to the western most field for perhaps 15-20 years. When ara to be a grassed area is this fields north-west corner. Since the willow was planted, members of the public have each day walked around the four sides of the fields, using the public footpaths been merely tolerated by the landowners, or encouraged by an access agreement of some sort?
1176	4	Wildlife. I have recently observed bats (pipistrelle), pheasants, partridges, montjac deer, roe deer, sparrow hawks, owls and buzzards frequenting the land. In the more rer site
1176	5	Hedgerows and trees. Are any of the hedgerows and/or trees worthy of preservation. The trees near the farmhouse and the tall hedgerows on the eastern half of the site
1176	6	Surface drainage and flood risk. My sketch map (see original submission) shows the steep slopes and the stream on the western half of the land and the steep slope at the Shetlands (a road off Tiln Lane) was developed several years ago, the stream flowed vigorously for many weeks. It flows similarly during heavy rain. I believe that at least s spring-fed) from adjacent existing housing area (and possibly from as far away as Tiln Lane) flows into this stream. Filling in the stream could therefore result in a flood risk farmland. 1179	6	I hate to suggest you use farmland but there may be no option. If this is your decision it should be only small areas of 345 and 409
1179	7	the last 40 years Everton has expanded quite fast but it is still a small village. You see it as a Service Centre. Residents complain of poor bus services. Car ownership is a ne facilities. However, we have a church, school, two pubs, a village hall, sports facilities, children's play area and hairdressers. All of these are well used by non villagers.
1179	8	It's a compact conservation village mostly to the north of the A631. There are open spaces - the playing field, the churchyard with its Blue Butterfly project and corner farr envelope has served us well but most infill sites have been built on. Many smaller properties have been extended or replaced. We lack smaller properties suitable for new but mobile reception is poor and so is broadband so it is not ideal for business purposes.
1179	9	Village roads are a problem. There are huge farm vehicles. Some parts of the village lack footways. The junctions off the A631 are tight and often partially blocked by park use of our facilities. These generate traffic problems and any new roads leading into the village between High Street and chapel Lane could only increase the problem espe and the Sun Inn junction difficult if cars are parked in front of the pub. Mattersey Road also presents problems for big vehicles passing each other as it is narrow.
1179	10	farming is part of the village heritage. I believe the farm buildings and other features should be preserved. I might argue with you about your choice of properties to be loc Farmstead was finally developed. We are surrounded by farmland I believe this should be kept if possible as in the future we may become more dependent on home grow Bassetlaw so lets build on this first.
1180	1	We need to be building small homes, what i call 'starter and finishing' homes. That is small homes, detached, semi-detached, linked or whatever appropriate design fo with' or indeed an older person can 'finish with'. These units are really the 'same thing'; they are compact in design, probably two bedroom unit that is easy to look after.
1180	2	In a similar way, I am very concerned about such as huge number of 'traveller sites' proposed across such a small District. I really don't see why so many sites should Council and rate payers especially when things go wrong. We can create these but not the homes I'm suggesting! Why?
1181	1	Un till the existing proposals on the colliery site are up and running it is difficult to imagine what else will be required.
1181	2	plots 184, 185, 188, 190, 193 or 182 These plots are more central
1181	3	H4
1181	4	The town need more facilities a bank
1181	5	A petrol station
1181	6	Investment in the schools

1186	3	However, if the District Council is not able to significantly restrict the development of infill properties on domestic garden land, then land should not be allocated since the applications is likely to be greater than 11
1186	4	Development of part of site 508 would be acceptable subject a significant part of the site being released as open space. This site is currently protected open space withou
1186	1 5	Development of part of the site 142 and or part of site 152 would be acceptable subject to good open space provision, good pedestrian/ cycle access, and adequate off strates these sites would not be acceptable
1186	6	I am strongly opposed to development of site 522, 523, 524, 486, 491 and 526 because of the adverse impact upon the Conservation Area and or important views describ
1186		Sites 108, 112, 150 and 503 have problems related to vehicle access
1186		Sites 143, 150 and 503 would allow development close to A57.
1186	9	I do not think that the village should extend to the edge of the A57 bypass.
1186		In the period since this consultation process started the village store and the butcher shop have closed. This raises the question about the status of the village as a Rural Section 2.5 and the status 2.
1186	11	Site 145 and 146 on the village plan already have full planning permission. There is outline planning permission for more than 40 houses on the former poultry factory site approximately 65 houses are already approved in some form and are likely to be built in the coming years. Any site allocation would be additional to this.
1186		Yes, the open spaces on the map should be protected from future development.
1186	13	Other open spaces to be considered for protection from development land surrounding Pond Corner (near Pond Farm) including the garden at Old Wells Cottage, The Her south of the A57), fields to the east and west of Great Lane south of High Street, fields between Low Street, Mark Lane and the former poultry factory site, Land south of (the extension to the school field and the former recreation ground south of this
1187	1	I wish to register my objections, in the strongest possible terms, to the proposal to develop area 35 for the following reasons. This would b a major development, adjoinin developments. This is obviously NOT a site if proposed "in-fill" development and neither would it be a small "add-on" development.
1187	2	This proposal envisages appropriate multi green field, prime agricultural land within an area of developments which were themselves only completed within the last decar amenity land would have obvious detrimental consequences for the existing community. The loss of this extremely large area of prime agricultural and amenity land MUS of existing and potential agricultural employment in the area. The expanse of such a large area of cultivated greenfield land which comprises area 35 is, beyond argument, community of Gateford, and indeed, beyond.
1187	3	Apart from its importance to food production, it is also a major leisure facility and is very extensively used by dog walkers family walkers, joggers, cyclists, equestrians, No enthusiasts etc.
1187	4	Once granted, permission to develop this extensive parcel of land, would deprive the existing community of Gateford, and beyond, of this greenfield amenity land and wo ancient woodland, established hedgerows, bird and wildlife and leisure opportunities, for all ages, and particularly families. Once developed, this amenity and agricultural future generations deprived of the undoubted benefit of this land, in its agricultural state, affords.
1187	5	The existing Gateford developments are matched by the amenities which are available. Any further development within this area would therefore stretch the available res
1187	6	There is also a natural boundary formed by the existing Gateford developments, and any crossing of this established line, for development purposes, would be to encroac is even visible from across the proposed area 35 fields. This proposed development erodes Carlton's identity as a village, with Worksop's sprawl in this direction resulting conurbation. For instance, at the presentation of the Core Plan, on 25th January at Worksop Town Hall, Richard Schofield told those assembled that there would be no allo Plan and the reason he gave for this was the high level of planning applications currently pending within Carlton. To cross the existing boundary would, it is suggested, enc around the Carlton-in-Lindrick area.
1187	7	The proposed developer, in their extensive published literature, informs us that 700-800 houses are planned for area 35. At the MOST CONSERVATIVE estimate this would people together with at the VERY least 1,000 extra cars to cater for within an area of quite recent development anyway, where amenities have hardly kept pace with the e
1187	8	For instance, medical facilities for Gateford residents involves travel, usually private cars, to the area around Bassetlaw hospital to the east, or to the South of the centre of 1,000 private cars in the Gateford area, just in search of doctors, dentists and opticians would potentially exacerbate the present traffic, access and pollution problems, as further.
1187	9	Likewise, the railway facilities at Worksop and Shireoaks are located at driving distance from Gateford.
1187	10	The nearest shops for area 35 would be even further distanced from the existing Gateford developments, so that almost all journeys from area 35 to the local shops could

nt	nt	
1187	11	The need for these facilities is demonstrated by the amount of cars which regularly enter and exit the car park there at various ties of the day. Another 700-800 families or on these shopping facilities and the car park. And, it has to be remembered, that there is ONLY one vehicular entrance and exit to the shops, involving the already busy Ra Road/Raymoth Lane junction. Many of these extra journeys by private car if area 35 were developed would, of course, be through other built-up areas of the locality.
1187	12	One very interesting fact that surfaced with contact with other Gateford residents during the extremely limited time that this Core Plan has become public knowledge, is justified to work outside of the Worksop area, mostly to the Sheffield are, but some also to Rotherham. This would also seem to be reflected in shopping habits and patterns sat that they meet much of this shopping requirement in Sheffield, Meadowhall and Rotherham/Parkgate areas. This trend could be expected to be repeated in any NEW the size of Gateford as we now know it. And if Gateford is to become a large dormitory area for Sheffield, with the interests of residents away from this area then this, der rejuvenating the town centre of Worksop.
1187	13	At the public meeting, residents were assured by Richard Schofield that those areas which are marked green on the Core Plan were to be kept as such in their entirety. Ho from the roundabout at Ashes Park Avenue/Edison Avenue, then this is clearly NOT going to be true because such an access road would inevitably cut through a sizeable p assured, was sacrosanct.
1187	14	Along with this new access, which would inevitably be required for the 700-800 new houses and ancillary building on area 35, there would be obvious additions to the exis gigantic Gateford. For not only would the increase in private cars, delivery vehicles, utility and services vehicles be added to by emergency vehicles, but the new developm well for the new, sprawling Gateford estate, which as envisaged, would develop all of the land right up to Owday Woods.
1187	15	These increased dangers would, quite naturally, threaten the very young and the very old most. This would be true, of course, for the huge amount of construction traffic over the existing, restrictive roads, should the proposed development be permitted it must also be remembered that the proposed construction traffic, building materials etc. would have to access the area 35 site by one of only two access from Ashes Park Avenue, through existing developments, and also by one of only TWO entry and exit a Avenue and Eddison Avenue.
1187		There has already, we were informed at the 24th January meeting, already been considerable consultation on their plan, stretching back some years. Despite assurances a general feeding was that the Local Authority had NOT been seen to besting itself in respect of public awareness of the plan. Indeed, those interested members of the publi less than a month, some for only a matter of days. It was only via the efforts of individual Gateford residents, and a limited leaflet drop via one local council member, that
1187	17	It is also obvious that the proposed developers of area 35, Lands Improvements Holdings Plc., have been privy to information for a lot longer than Gateford residents have produce a very large, colour prospectus for the development of area 35, and obviously at some cost. This apparently seeks to convince its reader that this commercial orga mind, and indeed, that they are able to improve upon nature, and that this site (or perhaps sight?) will be all the better, both socially and aesthetically, than creation ever course. It is known, for instance, that they have also commissioned on ornithological survey, which is being carried out this week. Individual Gateford residents, of course, development plans for a few weeks, and with a hurried timetable deadline fast approaching, can have no such recourse to such resources.
1187	18	All of the cogent argument appears stacked against the development of area 35. Indeed, it has been suggested that the major reason for the inclusion of such an obviously development within the Core Plan was primarily that there was a developer eager, indeed forcibly pushing for this land to be included within in the Core Plan. So in this lig commercial organisation, landowners/developers, set against the overwhelming wishes of local residents, common sense and decency. It is transparently clear that the de social amenities are driven by the prospect of huge profits rather than their philanthropic or altruistic considerations. Local residents, on the other hand, are concerned ab amenities standard of life for their families and safety issues. It could be argued that the let area 35 be developed would be betrayal of the existing residents of Gateford, a environmental vandalism by the Local Authority.
1187	19	Once this productive agricultural land has been developed I will, of course, be lost as such forever, along with the food and employment that it supplies. The leisure facilitie wildlife and birdlike habitat that it afford will likewise never return. The extra strain on a comparatively recently adopted area would be enormous, where the amenities have increase in population, and the servicing of that population, together with the massive increase in individual journeys on already restricted roads on and off of the existing and social standards enormously. The cross-boundary development towards Carlton-in-Lindrick would adversely affect Worksop, the area of Gateford and Carlton-in-Lindrick would adversely affect Worksop, the area of Gateford and Carlton-in-Lindrick would adversely affect Worksop, the area of Gateford and Carlton-in-Lindrick would adversely affect Worksop.
1188	1	Having only recently moved into our home, 3 Wentworth Close, Ordsall, Retford DN22 7NG, both my wife and I are annoyed to hear of land that may be allocated to hous some five years ago and have been renting it out in that time. We moved in ourselves just before Christmas, and are very impressed with the location. We chose this area course and open countryside, both of which are at the moment a couple of minutes walk from home. We have always liked to walk, and the various footpaths in the area of yet more housing on rural land adjacent to our estate is not very pleasing, as it will make it harder for us to reach open countryside. This may sound selfish, but we also more jobs to pay for them, and we feel that their is insufficient demand for housing at this particular time. For these reasons I would like to tender our objection to the pro- reference 41, 364 and 259.

1189	1 1	Site 370 behind Cavendish road in Retford is a flood plain and has on several times over the past few years resembled a lake (see photo), between this natural SUDS barrie foot deep culvert that belongs to the residents, this culvert on many occasions has been running full to the top and only because of the natural flood plane our houses hav
1189	2	Further down the road where Cavendish road meets Grove Coach road the houses were not so lucky and suffered serious flood damage, the existing drainage system in th and would not cope with any increased flow as the water runs downs the adjacent high plane fields. If this proposed development gets the green light and this natural def be held responsible for any flood damage to our properties, The council? The builders? The former land owners? I would be looking to seek damages from all three parties their actions or their omissions of a duty of care.
1189	3	SUDS has been mentioned as a solution and could be used, but the land would need serious inspection as all the water from the ridge behind the planned development ru natural SUDS drainage so how and why would anyone try to improve on it? Turning the field into a lake would be like SUDS but then where do they build the houses?
1189	4	My comment is about site 370 but site 511 and the bottom section of site 3 must also be taken into consideration.
1189	5	On a different note all 3 of these sites are a natural and long standing habitat for a multitude of wild life including - Tawny owls, a Barn owl reside in a tree 2 doors down make great use of the culvert, a Woodpecker often frequents the tree in our garden along with Squirrels, Ducks and Herons etc.
1189	6	The Primary School located on Bracken Lane is running at full capacity and an increase in the catchment area would seriously overload the system and also the nearest sec
1189	7	On a final note, when we have paved over paradise where will all these extra children play? where will all these extra people enjoy the natural environment and wildlife, w long as targets are achieved and money is made.
1190	1	Council agreed to take guidance from the Village Design Statement (VDS) and the survey of residents carried out by Bassetlaw DC and summarised in the Issues and Option Building Integration and Relationship Guidelines (section H) states: - "It is unlikely that individual developments greater than two or three dwellings could be absorbed into Section I – The Future, The VDS states that "Wheatley will – it is hoped – continue to be a living and developing village"
1190	2	Council firstly discussed housing need and agreed that the village is lacking accommodation for elderly residents who wish to down-size but stay in the village. There is also suitable for first time buyers. Ideally any new properties should therefore be 2-bedroomed starter and retirement homes, with a preference for bungalows.
1190	3	Council agreed with residents in that the village does not need any large 4/5 bed executive type homes and certainly no large developments of properties or estates.
1190	4	Bearing in mind all of the issues, Council agreed (on a majority vote) that a maximum of 6 new properties could be built over and above the natural 'windfall'. Council agai roads and infrastructure could not cope with more than a small number of new properties.
1190	5	Council discussed all the sites identified as "Potential Housing" in the SAIOP and agreed that only sites with good road frontage options should be considered. It was felt th No 239 on the plan with 2 separate access points and frontages onto Low Street and Retford Road would suit.
1190	6	The remainder of site No. 239 and the other sites identified on the plan were deemed by Council to be unsuitable for development.
1191	1	I think that before a decision can be made about Gypsy and Traveller site location in the District more consultation with members of the Travelling community living in the housing needs to take place. There should also be some consultation with members of the settled community living in and around existing sites.
1191	2	New sites should not necessarily be concentrated in and around existing sites but should be considered in new locations around the District in order to give members of th that given to the wider settled community.
1191	3	Following discussions I have had with members of the Travelling community a local authority /housing association run site would be more preferable to a private owned a housing choices similar to general needs housing tenants.
1191	4	"Views are mixed on the extent to which transit pitches can be successfully provided on permanent sites" the Good Practice guide advises and goes onto say that where the provision are available on one site the transit pitches are usually adjacent to the main residential site or at one end of it. Transit sites may present particular management may need to be a resident manager living on a semi-permanent basis on the site.
1191	5	I am not aware of any land that could be considered suitable for Gypsy and Traveller site provision but it may be worth asking this question of existing site owners as they with other land owners.
1192	1	It was resolved that the Council's response to NCC be that whereas there was scope for up to 10 dwellings within the parish envelope, all the sites identified had developr access.
1193	1	We suggest that 'Option 3' should be most suitable site for future employment and housing development.
1193	2	The existing Football pitch could be moved to the rear of the development.
1193	3	Emphasis must be placed upon creating employment rather than building too many new houses. Hence allocating suitable land with facilities is important to attract investion
1193	4	There should be provisions for building schools, Doctor's surgery and shops.
1193	5	Land should be allocated to build Community centre, especially for old people, Children's play area, Internet cafe and youth centre.
1193	6	Traffic congestion and pollution problems must be kept to a minimum.

1194	1	I wish to make comment regarding the above site. I live next to this site and feel that if allowed to be developed this would impact on the wildlife of the area. We have re- well as the more common Rabbits, Pheasants and Partridge. We also have a Barn Owl and Sparrow Hawk regularly use this field for hunting, if developed this would move we should surely be trying to maintain a balance with nature.
1194	2	One of my biggest fears for this proposed development on the NE of Retford is the impact of vehicles onto an already dangerous road, Tiln lane, at school opening and clo at these times with parked cars, large lorries and everyday traffic all trying to get through - more houses would surely create more traffic problems.
1194	3	I believe Retford should be trying to bring in more business with housing located near, this should stop Retford becoming just a commuter town where people leave in a m night. We need people to work in Retford to use the shops and facilities in the town to keep Retford alive. We also need to keep car journeys to a minimum.
1194	4	Finally the more we allow the boundary of Retford to expand the more likely we are to see Clarborough Village become a suburb of Retford.
1195	1	The Ashtons at Reyton Farm would be caught in a pocket between sites, severely curtailing their ability for rotation and 'set-aside'. The Baddeleys at Carlton forest Farm o development, have a large dairy herd as well as arable and currently graze the cattle on much of the proposed development site
1195		Security on the Estate is a major issue at present. In the last two years alone 3 land rovers, 2 quad bikes have been taken; straw supplies set on fire; the wood yard and ma and tools being stolen; lead thefts from the Church and one of the cottages; diesel thefts and a thwarted attempt to rustle sheep last autumn to name a few and the Insur
1195	3	The farmers already have problems with people walking dogs through the crops, (I've caught several myself,) not keeping to 'rights of way" clearly indicated on signposts. woods and strewn cans and bottles -the remains of parties presumably and arson of a hedgerow last autumn. Poaching is a problem for any estate but the littering and du endanger wildlife is an issue and has to be removed by somebody. All this is a continual problem and very expensive to rectify the damage, to police and to safeguard ever everybody is coming here. Most of the dog walkers are very nice and I have got to know them quite well and pass the time of day but there are many people now and one doing
1195	4	As you will appreciate, therefore, everyone here feels that the encroachment into the estate would be too much to sustain and cause its demise
1195	5	You also asked me to put forward some ideas for the sad site on the corner of Kilton Road/Retford Road; the abandoned factory -now rubble. I feel that this site has huge as follows: 2 storey units -some houses, some flats with parking spaces underneath them. A grid system of walkways lined with trees or shrubs accessing the canal side, we lined with some tasteful shops, e.g. grocery store, pub, restaurant, art gallery/gift shop, chemist and hair dresser with small office units/studios above them. Moorings for not like that stretch as it now stands and move through as quickly as possible. However, they would definitely make a point of stopping there if it was pretty and inviting to town too. It would give the residents on the other side of the canal a nice view. All this said, I do realise that redevelopment of the site may entail a clearance of industrial helps'

1201	1	Yes
1201	2	244
1201	3	Site 249 is unsuitable for housing as the noise and pollution from the A1 will adversely affect the quality of life of residents.
		Site 247 is a valued green space in the centre of the village, because of its position and would better serve the village and enhance the community environment if developed into a comn
1201	4	green, with ornamental gardens, seats, allotments, bowling green and the like. This view is reflected by the Parish Council attempts to raise money to buy the site at the recent auction.
		notice of the sale made it impossible for the clerk to arrange the necessary finance in time.
1201	5	Villagers are isolated from amenities and always will be, given poor public transport and rising private transport costs. Therefore it is important to develop such local sites to enhance vill
1202	1	yes
1202	2	244
1203	1	yes
1203	2	244
1204	1	Yes, and these should be affordable homes
1204	2	Yes, 33 houses are too many in one go. Small infill developments would be better.
1204	3	I think all the sites are suitable for development, however:
1204	4	246 is the best option. If this is built on access should be from 247, from Coal Pit Lane.
1204	5	247. Access should be from Coal Pit Lane. This area is also ideal for a community garden/bowling green and as such should not have more than 11 houses surrounding a central green.
1204	6	Site 249. Any houses built there should have a noise reduction scheme included, due to noise from the A1.
1204	7	Yes, as above. A central green/community garden/bowling green on 247.
1204	8	More affordable housing of a mixed nature for 18/30 age group, families and retired people.
1204	9	Yes, and also part of 247. There are no recreational facilities for the elderly and a community garden/bowling green here would be ideal. It would create a central focus point for the villa
1205	1	Whilst I recognise that the Council need to consider further development and that Blyth has been identified for 9 such properties, I am concerned that anymore than this would lead Many people choose to live in Blyth because of the nature of the village not in spite of it.
1205	2	178, 213, 214 would be the better option for development as I feel there are serious safety issues regarding access to Retford Road from the other sites.
1205	3	I also feel those areas of the village are less densely populated.
1205	4	I recognised that the infrastructure has been raised as an issue. I feel this needs highlighting once more as does the liability of the drains to support further development.
1205	5	Yes open spaces should be protected.
1206	1	Screening Methodology – details not given so unable to comment
1206	2	Option B: Harworth
1206	3	Agree
1206	4	Site 178

1214	2	In 1985, When I moved to Retford, I was warned by a family friend, who worked for the Water Board, advised me not to buy a house at the bottom of Bracken lane s the a and drainage issues. That was 25 years ago and the problems still exist.
1214	3	There is only one school in the area and this is running at full capacity, my grandchild cannot even get into the attached nursery, and according to forecasts is likely to rem field floods regularly by the way. There are no play facilities within a 2 mile radius for the children and the school field has become impregnable, fenced off and threatenin shops or civic amenities for teenagers or young adults. We can boast two pubs and a bus shelter.
1214		Bracken Lane turns into a single lane track when it leaves the of the proposed developments but it would be much better to improve this than to send more traffic down t congested to contemplate more traffic passage. Both Bracken Lane (school end) and Grove Coach Road are horrendously busy (I suggest you do a traffic survey to confir the rest of the day and evening. It may be possible to widen Bracken Lane at the cost of peoples gardens and the school grounds but Grove Coach Road would be impossib (less than 5 metres) and an avenue of Cherry trees integral to the footpath. Traffic calming slowing measures have already met with little enthusiasm by the Highways de excessive speeds recorded by residents coming from close to the possible building sites
1214	5	However I do not wish just to express merely negative comments so I have studied your consultation paper and maps and would like to recommend that you consider mo possibility to egress directly onto the main road structures. In fact site 27 could empty London Road (as could Site 3) and Grove Road to & lute the impact of traffic leaving
1214	6	I believe the land rises somewhat on these sites away from in the flood meadows and it would be straight forward to counter flood worries from the very beginning with
1214	7	Equally sewage and water supplies would be laid as state of art solutions with built in development possibilities to cope with planned and future needs.
1214	8	Roads could be creatively planned from a blank canvas and width, safety of old and young would 'It into the plans from the very beginning. I do hope this is of some value
		process
1215	1	Assuming each new house had at least 3 residents, including 1 child of school age, and at least 1 car this would mean: The population of the area growing significantly. 600
1215	2	area where the schools are already over-subscribed. At least 600 additional cars on the local roads. In consequence this would mean: The character of the area will be massively altered
1215	2	Local infrastructure will be seriously strained
1215	4	Traffic levels will hugely increase
1215		A substantial loss of wildlife habitat
1215	6	In addition to the objections to the increase in residents we also raise the issue that there have been on going flood problems in this area. In 2007 several properties suffe cope with excessive drainage from Grove Hills, and the land has always been subject to a flood plain.
1215	7	The area that we live in is currently a quiet, safe neighbourhood which many of us have chosen for our children to grow up in and we have paid a premium to do so. There community enjoy and these would also be lost. Why ruin this area of natural beauty to build yet more houses in Retford when there are already so many new builds that a
1215	8	Not only are there a significant number of new empty properties, there is also a lack of jobs and industry in the area, so where are all the extra people going to be employed
1216	1	This development will encroach on the dividing land between Worksop and Carlton in Lindrick and Wallingwells. This will only further contribute to the 'urban sprawl' and further.
1216	2	The area proposed in productive agricultural land farming wheat and oilseed rape, agricultural land provides employment which will be lost as a result of this developmen
1216	3	The area proposed is bordered by Owday Wood/Rough Piece and Owday Plantation which are sites of importance for nature conservation. The woodland is at present un will cause significant disturbance to these valuable woodlands. The area 'Gateford Hill Park' which includes Dog kennel Plantation is a mature landscaped area.
1216	4	The public footpath/bridleway entering the area from Montford Road and stretching to Owday plantation is boarded by beautiful old trees and hedgerow which are impor environment. This bridleway is used by many walkers daily from the estate and many visiting recreational users.
1216	5	The loss of this countryside amenity would be detrimental to the entire area. This land is of the same importance to us, and the wildlife as Dog kennel Planation.
1216	6	Our 'local' shops which are sites off the estate are already busy. Additional housing will only cause increased pressure on these already busy and dangerous road junctions The main amenities e.g. supermarkets, shops, doctors and dentist are all situated in the town especially when Tesco moves. Access to the town is only practical by car and Congestion in and out of town will only increase therefore as a result of this development.
1216	7	The junction between Ashes Park Avenue and Gateford Road is already dangerous due to heavy traffic levels. The increase in traffic levels on the estate will generally redu
1216	8	This development will require detailed consideration as to the provision of schools and nurseries as we feel our schools are already too or over capacity.
1217	1	We need it leaving as a golf course not for houses people need a place to play golf with friends not for houses. Also as a playing field for football

1218	1	I would like to make comment of the proposed development on Low Street Gringley. I was very dubious at the thought of any more development in Gringley die to the lar
1218	2	However after looking at the proposed site layout that Mr Limit showed me, and saw that a substantial piece of land would be landscaped and donated to the council, ar away at the back of the field, away from the road. I now think that it would be a good idea to develop there, and am writing this letter to show me support for future deve
1218	3	I have lived in this village for 63 years, and seen many people come and go, and have raised objections myself, to some developments, however this proposed developm than many I have seen and good for the future of the village with there being a large landscaped green area to the front for residents in the village to admire.
1218	4	It made me laugh when I spoke to some residents in Beach Close when they said to me "we don't want any building behind us, making a noise and having muck and dus them, you forget you live in a cul-de-sac, directly opposite me! And I had to put up with the building works while Beach Close was being built. It seems its ok for them to anyone else. The term nimby comes to mind.
1219	1	Main Street, Harworth including the crossroads has server flooding after 12 hours of heavy rain and after 20 minutes of thunderstorm rain. I have lived in this flood plathouse and lifted it almost 2 metres to escape the flood water. The reason for this flooding is because the surface water drain is inadequate and the Harworth Dyke which any more water from further housing developments without extensive widening and deepening as far as the River Torne. The flooding has increased in the recent years creating hard standings in gardens for cars. It is vital that future development does not have its water discharging into any drain or culvert which conveys water under N converted to the River Idle –east of Bircotes or to the Willoughby Dyke which flows South West of the A1M and which has the capacity for taking further water.
1219		Regarding further housing development to the North and East of Harworth/Bircotes plots 182,194,187, 191 this area is prime agricultural lane capable of growing brassicas, due to the large fields and underground irrigation and should not be built upon.
1219	3	The Western side of plot 182 is totally unacceptable for housing development due to the close proximity to Harworth Sewage Works has failed to stem the stench.
1219	4	Plots 180 and 204 are site of the ancient settlement of Harworth where foundations still remain. This site should be listed as a site of "special archaeological interest". field in an attractive and pleasant position and building here would have a great impact on public visual amenity.
1219	5	The Western end of the plot 193 is a grass paddock where horse and cattle graze. There is a public right of way running diagonally across this field. To build houses here v public including residents and families with children who regularly walk here and enjoy the flora and fauna of the only grass field with a public right of way across it in Harv
1219	6	Plot 190 is the field which has a spoil heap from the Colliery. For 40 years residents and visitors to the area have has to look at this eye sore. The planning of trees and sh pleasant environment. It would be detrimental to the people of Harworth and Bircotes to lose this ecological habitats and landscapes in favour of house building.
1219	7	With regards to the number of houses required to built, my opinion is that planning permission granted on the West of the village. In the past the majority of the dev Housing to the West would provide a better balance, plots 358, 359,205, 206, 207, 181. The surface water from such a development would drain into the Willoughby Dyk fields and uneconomic to farm with modern machinery making the sites ideal for housing development.
1219	8	Further housing ought to be infilling within the natural boundary of the village plot 184, 185, 186, 188 and the eastern end of 193. All surface from these plots should revealed willage.
1219	9	Plot 192 is poor scrubland and should be considered for house building to make up the number of houses required.
1219	1 10	All the potential protected open space coloured green on the maps should be retained. I believe the land to the south of the village should be used for industrial and no nearest Blyth roundabout should be for storage and distribution and the plots adjacent to the old Glass Bulbs for industry and employment.
1219	11	The land to the north of plot 190 adjacent to Scrooby Road is the site of the Old Brickworks in Harworth I am surprised that this is at the advanced planning stage of plar remember deep ponds where clay had been taken out. In the years between 1940 and 1955 these deep ponds were then filled in with household refuse by Worksop D kilns were buried underneath this rubbish in places up to 20ft deep. I fail to see how this site could be suitable for building works without carrying out a geological survey permission was given. I would not personally live in a house on this site at any price.
1220	1	Question 1 -Screening Methodology -this is very difficult for the 'layman' to understand and comment upon, but I feel that some sites which may be suitable / preferable h reasons e.g. not currently for sale, and yet this is a plan for the next 20 years!
1220	2	However, I fully agree with criterion 1 regarding public opinion. This should be given the highest priority and only in exceptional circumstances should development take p population.
1220	3	Question 9 - The allocation of more housing in the town should be controlled and based upon local public support and need, not greed of the developers.

1241	8	F) Provision of utilities and services. Development on site 35 will require significant investment in infrastructure to meet the demands of the new housing development, as to the remote location of the site. Improvements would be needed to upgrade level of service provision due to increased demand.
1242	1	I wish to object strongly to the development of any houses at site 35 based on the below reasons: The junction between Ashes Park Avenue and Gateford Road is already increase in housing on the estate will make this situation intolerable and dangerous to residents and visitors.
1242	2	Increased traffic levels on the estate generally reducing the quality of our environment, increasing noise levels, pollution and increasing danger to pedestrians and cyclists.
1242	3	The area proposed in productive agricultural land farming wheat and oilseed rape.
1242	4	The area proposed is bordered by Owday Wood/Rough Piece and Owday Plantation which are sites of importance for nature conservation. The woodland is at present unt will cause significant disturbance to these valuable woodlands.
1242	5	The area 'Gateford Hill Park' which includes Dog kennel Plantation is a mature landscaped area.
1242	6	The public footpath/bridleway entering the area from Monford Road and stretching to Owday plantation is bordered by beautiful tree and hedgerows, which are importar
1242	7	This bridleway is used daily by many walkers, both from the estate and also by visiting recreational users. The loss of this countryside would be detrimental to the entire as us, and the wildlife as Dog kennel Plantation.
1242	8	Our local shops which are sited off the estate are already busy with traffic and virtually gridlocked at busy times, especially as one of the shops became an ASDA. Addition these already busy and dangerous junctions leading in and out of the shopping areas.
1242	9	Our local schools (primary, secondary and school based nurseries) are already at capacity.
1243	1	Paragraphs 2:16, 2:17 and 2:18 refer to the suitability and acceptance of sites and although it clearly states that it is not the LPA's intention to rank sites, that is exactly wh with the highest number of "green lights" will be regarded as more desirable.
1243	2	Criterion 1 - Local community involvement will become more important in the future, however we can all cite examples where a Parish Council has been supportive of one of another. Parish Councils, by their volunteer nature, are not as transparent as a District Council and friendships or grievances can play a greater part in decision making a
1243	3	Also community views are prone to change fairly rapidly and if future policies are to rely on a greater level of community involvement then both policies and development we are going to be able to respond to not only local community changes but also to changes in national policy and national guidance. However restrictive these document capable of fairly rapid reappraisal should the need be present.

1243	4	Criterion 2 - In general terms, I agree with this philosophy. However, we should not preclude the possibilities of an innovative form of development that may allow uses p used together. In Holland, for instance, residential sits side by side with industrial in many larger and smaller towns. The secret appears to be an understanding of what be better form of "housekeeping" for the industrial partner.
1243	5	Criterion 3 - I agree with this but as stated elsewhere, allocations for employment have to be turned into actual starts and occupancies. It would be nice to have policies t than the restrictive format that we see presently. Inward investment tends to go to areas that either have financial inducements or policies that start with a presumption NPPF document.
1243	6	Criterion 4 - The best agricultural land should generally be retained for crop production but I am not quite sure about Natural England's Agricultural Land Classification. If t that is acceptable as this classification refers to land and crop production. Natural England, on the other hand, considers land values in a different light and crop productio
1243	7	If we are saving land for crop production then that should be the sole requirement under this criterion. Natural habitat and wildlife are something different and should be
1243	8	Criterion 5 - Given that the majority of Bassetlaw's major settlements are in a Source Protection Zone and the majority of our industrial/commercial development will be s single site will achieve a green light. I sincerely hope this is not a major stumbling block to would be investors. It is right of course that pollution should not happen but te techniques and materials can eliminate these risks. I do not see this criterion as being anything other than unhelpful and unnecessary. There is other legislation (Environn issue and in reality there should not really be a crossover of control from planning legislation to environmental legislation and vice versa.
1243	9	Criterion 6 - Certain important landscape features and areas should be conserved but others should be more open to change particularly when that change brings benefits habitat production.
1243	10	Criterion 7 - This, like others of the criteria, tends to prejudge development. It is a little difficult to understand how any development can be assessed at this stage as being built form of the settlement or neighbourhood. It precludes good design and good layout which is what we are now advised to put at the top of our list. Good design can regarding assimilation of development into an area. When Council houses were first constructed in our villages I am sure these would have been totally out of character w are part and parcel of the village. Design is only one aspect, employment can help to enhance the character of the area but to do this the character needs to be assessed fi become purely dormitories for people working in cities. This has been allowed to happen over the last 10-20 years.
1243	11	The vast majority of character zoning in Bassetlaw would appear to fall within the zone to conserve landscape. It is therefore clear that any development in this area will r would appear to be another simple method to be employed by the LPA to prevent development, a further example of restrictive policies. Therefore, in my view, much mo baseline character assessments of the towns and villages before any judgement can be made.
1243	12	Criterion 8 - I tend to agree with this statement.
1243	13	Criterion 9 - I find myself troubled by this criterion. Firstly, the cost of infrastructure provision usually falls to the developer and as with all on costs to the development (C simply reduces the amount paid to the landowner. If the land value continues to fall due to market price and also additional development costs then the land will not be r pressure on infrastructure and services are the larger sites not the small sites producing 1-5 units, yet under the new proposals all sites will be paying towards these proble
1243	14	I believe also that infrastructure providers e.g. Highways, Severn Trent Water for potable water and in particular sewage pipework etc., sit back and wait for development foot the bill for some of the upgrades that the service provider should have been doing as normal maintenance. All these providers with the exception of Highways are pu answerable to the man in the street but solely to their shareholders. There should be baseline assessments provided and clear evidence of maintenance schedules from a (general public, ratepayers, developers, landowners etc.) can be assured that the sums of money are warranted and not just income for service providers to assist with con
1243	15	Nor do I think that any of these service providers carry out any meaningful assessment to assist the LPA in considering sites rather they lay down a cautionary "no". Recent Nottinghamshire County Council commented on a site allocation that "there may be visibility issues". This site was therefore initially not included as a preferred site altho use site and was very deliverable and in the right location. Nottinghamshire County Council did not investigate this issue, just place something akin to their old "holding of measurements were taken on site and it was shown that there was not any issue with visibility and the LPA are now considering the promotion of this site. A clear indication service providers can be poor at best, lazy in its extreme with little or no regard for the problem it can create. Access constraints can often be mitigated by investigation, t become necessary? I think a much more flexible approach to constraints should be adopted.

1243 1243 1243 1243	16 17 18	I think the whole of the district should receive more both in terms of employment and housing. The basic precept that we have maximum growth targets is not well found based on the RSS document and the Council's own housing register shows a need of 4839 homes for people on their register. Worksop can and should take more, as should expense of the rural district. If there is to be a target set the target should be one that can deliver the number of affordable homes required. In terms of employment group limit. If companies are willing to establish in the area they should be welcomed, rather than be confronted with a document that is somewhat negative and less engaging. Should therefore be flexible to respond to demand. Site No. 45. Site No. 45. Site No. 45. This site adjoins a much larger mixed use and employment site and could form part of a larger mixed use provision.
1243		No comment.
1243	21	The affordable housing requirements in Worksop and Harworth according to the draft supplementary planning document are 15%. Given that these 2 towns together have numbers, it would seem that more affordable housing could be provided within those communities and given that generally those in need of affordable houses are at the majority of this affordable housing should be allocated in those towns where services and facilities are readily available and usable yet the requirement level is 10% less the sites will have the inherent value capable of affording these additional high charges whereas the other areas have smaller sites, higher land value, lower numbers but large increase in affordable homes, it will however set development back and make land owners and developers think twice, but of course this may be the true agendal! In the sites with the possible exception of Retford. The group including Worksop and Harworth have been allocated 4487 dwellings which would produce 673 affordable homes, allocated 2106 and will produce 527 affordable homes and the latter group with Beckingham, Dunham, East Markham etc. have been allocated 406 which will yield 142 af figures have been structured this way to raise the maximum revenue from rural properties by way of commuted sums because rural properties command a greater price. Their reasoning. It would appear unfair that one section of the district is expected to contribute more than any other.
1243	22	No comment.
1243	23	Yes I do. It is the only large town in the affordable housing group that could deliver meaningful sized sites.
1243	24	Sites No. 46 and No. 309. On the north east edge of the town there are several potential housing sites, all of them are in open countryside except this allocation and this is development.
1243	25	Longholme Road swings round right to the edge of this site to an existing access point. It would appear from the layout of Longholme Road that there has always been an this site.
1243	26	The map only shows mixed use sites. I do not feel anything like the necessary consideration has been given to employment creating opportunities in Retford. There seems lose our employment sites and to throw all the eggs into the Randall Way basket which appears to be promoting smaller units rather than larger. However, if this is the ar sites on the A638 on both sides should be retained for employment with care being exercised with the type of employment development sited here.
1243	27	Retford has little by way of social infrastructure. If it is truly to be a sustainable town then effort should be made to ensure the social side and well being of the inhabitant
1243	28	From appraising the map I would suggest that the open spaces identified are not all used nor usable open spaces. There is a large swathe of land to the south of Goosemo space. Part of it is a private football pitch, part of it is nursery growing land and the remainder is agricultural and with the exception of a public footpath over the agricultu
1243		On the opposite side (north east) and abutting the railway there are 2 more other tracks of scrubland, none of them serve a purpose other than a nominal amount of horti possibly for office or business use together with a high level of landscaping and planting could bring opportunities and environmental gain. If the question was to be asked wanted jobs or the retention of scrubland, I am fairly certain of the answer.
1243	30	In line with the general shortfall of houses in the district, any upward movement in numbers provided should be welcomed along with any increase in employment provision should be seen as only one aspect in securing jobs. Harworth due to its close proximity to South Yorkshire could be part of cross district collaboration.
1243	31	Employment only as Harworth could be our major employment area providing jobs for the district, much as the colliery did before its demise.
1243	32	Additional open space and landscaping schemes should be incorporated within ALL new sites, both employment and residential. The existing open spaces would appear to value can be better utilised.
1243		The problems with the existing allocations, particularly on the old Newell Dunfords site, are both location and house type, location because it is remote from the village ce considerable part of this site should have been retained for employment and community use. There are available sites within the village core itself that would lend themse the perimeter of the village.
1243		The site I wish to promote is not on the plan but is located at land to the rear of 27a High Street.
1243	35	This site also could be used as a mixed use site in conjunction with the adjoining retail site.

inded. The housing figures themselves are ould Retford and Harworth but not at the rowth, again there should not be an upper ng. Both housing and employment land levels

nt .	nt	
1243	36	I think the problem with the majority of the potential housing sites on the map is that with the exception of Site No. 107 they are all in open countryside and Site No. 101 open countryside but it is the only site that is brown field and could deliver both housing and commercial and also community development. Site No. 101 also brings othe improvements by way of relocating the existing industrial allocations to the rear of the site and installing highway improvements including a possible pelican crossing over
1243	37	Site No. 107 is a small site already within the village, its sympathetic development would echo the residential development at the north west end of the village adjacent to "rounding off" form of development and could certainly deliver the number of houses the LPA are suggesting may be required. It does not add at present to the characte space, sufficient is provided on the recreation ground opposite. It is an ideal site for providing residential accommodation in line with the traditional format that is preser pressure for the release of greenfield sites for development.
1243	38	Given my answer to Q36 above, I strongly promote Sites No. 101 and No. 107
1243	39	Yes, this is a recent planning permission supported by evidence, therefore its use as a Public House should not only be protected it should be promoted.
1243	40	Sites 6/2, 6/3, 6/4 and 6/7 should all be protected.
1243		There is a further possible site location near to the White Swan Public House. The site is north east of the pub and adjacent to the existing mobile home site. At present i and has a large pond. This site would be suitable for a small number of dwellings set far enough back from the road to have no detrimental impact whatsoever both on the importantly on the setting of the nearby listed building.
1243		If included, the site above could also provide further amenity area.
1243	43	Everton is a village that could support more dwellings, "at least" 13 suggests a minimum, more, arguably, could be both required and accommodated.
1243	44	No, my view would not change. Sites No. 296 and No. 453 are obvious candidates to provide further residential accommodation. These should be seen as providing existi 13+ suggested.
1243	45	Those sites that continue the present form of the village rather than extend into great swathes of open countryside.
1243	46	Certainly the area known as the Metcalfe Recreation Ground should be preserved. This not only has community value but also historical value.
1243	47	On the face of it, 5 new houses in Gamston may appear sufficient. However, if the potential opportunity site (previously Bramcote House School) becomes a mixed use si here.
1243	48	It is difficult to understand why the LPA would wish to allocate the playing fields etc. to the now disused Bramcote House School as open space and then allocate the built opportunity site. If this is truly to be an opportunity site then restrictions such as this open space allocation should not be introduced. Gamston as a village settlement in footpaths and river walks without this huge great expanse of open space. The village is close to and has good service links to Retford and commercial uses which require I designations can only put off prospective purchasers. If the LPA and local community are concerned that the removal of this open space designation will lead to a rash of to prevent this but if another school came along or a research company or hotel chain or whatever, they should be allowed some area of expansion, not limitation.
1243		15 new houses over a proposed plan period up to 2028 is not enough. North Leverton has all the facilities for growth. It has a good primary and infants school, a shop, er recently a police house. This coupled with its good social infrastructure including football teams etc. lends it to further development. This level of development provides a level going to sustain the village and its facilities?
1243	50	Sites No. 200 and No. 262 could go some way to providing good quality housing within the existing village settlement.
1243	51	Sites No. 164 and No. 165 adjoining the newly rebuilt housing site known as Hawthorne Close and Bramble Close forms a natural extension to this part of the site. Both o of development for larger scale
1243	52	I think 14 new houses is an absolute minimum given Ranskill's location on a main road and close to Robin Hood Airport with its anticipated growth. Once again, this level per year. How is this a sustainable level of development? The Post Office has already closed, the pub is up for sale, the garage moved many years ago, all the signs are the needs investment and development to "keep the dream alive".
1243	53	Site No. 156 is best placed to provide housing for the near future for Ranskill. In terms of location, it is already in the built up part of the village, it is close to ALL the socia school etc., it is surrounded on 3 sides by housing and on the fourth side by the rail track thus preventing encroachment outside the village and into open countryside.
1243	54	It is brown field land being the large garden to "High Gables" and is therefore not using up greenfield sites and is in accordance with the wishes declared in the responses
1243	55	The owner of Site No. 156 has informed me that when your document was first published there was an active campaign by certain Parish Councillors to resist further dever This was personal and should play no part in these responses. The Councillor concerned is no longer on the Parish Council.
1243	56	A sensible look at the plan of Ranskill shows Sites No. 157, 224, 234 and 537 as being considered, they are all in open countryside. The only sites within the existing built e and I am given to understand No. 516 already has planning permission for one dwelling. This site should therefore not be considered which only leaves Site No. 156. This number of dwellings the village requires and more. It should therefore be the only site worthy of consideration.

1244	6	Now that the Elkesley can look forward to having a bridge, I think that when/after the bridge gets built the village will become more appealing.
1245	1	I personally would be against building on parkland and playing fields as children and others need areas for sport and recreation. We should be encouraging active lifestyle Olympic year. The town needs to retain its oasis of green amongst the surrounding areas of concrete. A number of these green areas are also prone to flooding, including the allotments at the bottom of Strawberry Road.
1245	2	I am resident in Grove Lane. This area is prone to flooding as the nearby beck takes in water that runs into it from the surrounding hilly countryside. There was extensive f Blackstope Lane and Trent Street in June 2007. My property flooded twice in June 2007, but it does not need the excessive rainfall experienced then to overwhelm the be area. As previously stated, the house flooded twice in 2007 but has almost flooded on four occasions in the last twelve years. I have photographic and camcorder evidence with the house surrounded by water.
1245	3	Too much water runs into the beck and overwhelms both the beck and the culvert's capacity to cope with that volume. Even steadier amounts of rainfall, far less than exp beck is overwhelmed, water breaches the beck and floods the adjacent Grove Lane playing field and then the nearby properties flood.
1245	4	There was mention that if areas at risk of flooding were selected, then flood alleviation measures would need to be undertaken. The Environment Agency paid a consulta alleviation in regard to the beck. Their conclusion was that to take adequate measures to alleviate flooding would be too expensive.
1245	5	Therefore to build on Grove playing field which is the first area to flood once the beck is overwhelmed, would be to condemn those new properties and pre-existing neigh going to rain, and the underlying problem of too much water feeding into the beck has not been addressed. Building properties on Grove playing field would increase the means it will be a case of not if but when and how often these properties (proposed and pre-existing) flood. Building there would increase the frequency and severity of fl responsibility of overseeing the building proposals but any decisions need to be arrived at responsibly. One of my concerns is that the requirement for adequate flood alle inadequately. Builders want to realise the maximum profit they can, cutting costs where they can, and there runs the risk of no or woefully inadequate measures being un are likely to be too expensive. Therefore I hope that the council will be rigorous in ensuring that lip service is not paid to any proposed areas that are at risk of flooding. The overwhelmed with heavy rainfall, building more properties to feed into drains that have difficulty dealing with present demand is another cause for concern. The allotmen also experienced flooding making that an unsuitable site for building.
1245	6	There are also a number of potential building projects around the Bracken Lane and Grove Coach Road area. Again building on areas of grassland thereby increasing the a to add to the amount of rainfall run -off into the beck which ultimately feeds into the culvert on Grove Lane putting the properties close to the culvert at increased risk of
1245	7	In principle I do not oppose the utilisation of the old Co-op dairy site on Grove Lane and the old Avocet site on Blackstope Lane for employment and business usage, but these sites is such that it precludes the use of large motor vehicles.
1245	8	Secondly, that any business that sets up there should not as part of their operations require a heavy usage of water that would overburden an already struggling drainage rainfall.
1245	9	Thirdly, that as these sites are in close proximity to domestic properties that any business locating there does not as part of its operations produce toxic and hazardous wa material into the air.
1245	10	Fourthly. the noise levels produced need to be kept low.
1246	1	The Council's view is that five houses over the timescale of the plan is not unreasonable.
1246	2	The Council's preferred site for development would be the former Bramcote Lorne School but, should this not be available, the Council has no preference between the oth
1247	1	We are a Health Walking Group walking the bridleways, footpaths & farm tracks round the Kilton Forest Golf Club and the fields to the East. Our members have authorised plans to use the area around Kilton [as shown on your map] for development.
1247	2	We currently have a membership of 117, with an average of over 50 attending every Thursday, and between 25 & 30 on Monday evening during the summer. We cater for from Health Professional and various clinics in the area. I would also point out that there is no charge for these walks and that we organise our own funding. The value of H issued about a year ago by the NHS [one of the funders of Walking for Health]. They stated that for every pound invested they made a saving of seven pounds. I am sure the endorsed by Bassetlaw District Council Sports Development Department and the Bassetlaw Sport & Physical Activity Partnership.
1247	3	Apart from our own group, Golfers, Bowlers and Footballers, the amenities in the area are also used by countless members of the public for walking dogs and generally tal proceed, we will be calling a meeting of all users and residents to mount a strong and orchestrated opposition.

1253	1	I can assure the Council that there is a definite need for small developments in the small villages, as we have only built 4 houses in the 52 years I have lived in West Drayton
1253	2	We have main sewerage now only 10% used.
1253	3	Regular bus services to Ollerton, Tuxford and Retford.
1253	4	A new School at Gamston along with a community hall.
1254	1	Most times of the day, Bracken Lane is turned into a single lane carriageway due to vehicles parking whilst taking/fetching children to school. I have been on the local server and due to serve a strength the in guarded. The needle are frequently used this area to be also when you the second due to be also when you this area to be also when you this area to be also when you this area to be also when you the second due
		proceed due to cars parked. The roads are frequently used by most driving schools who use this area to teach their pupils to drive.
1254	2	I am told that flooding here is now a real problem something that which was unheard of when we moved here and no this is not due to global warming/climate change as until recently.
		until recently.
1254	3	Already it is extremely difficult and dangerous for vehicles to exit Bracken Lane onto London Road (particularly from Bracken Lane as drivers also have to contend with veh
		I don't know much about drainage and waste from houses except that surely if you build over an area which has natural drainage, then you will be flooded. Equally, if you l
1254	4	increase systems to cope.
1254	5	Schools? Bracken Lane school (I am told) is nearly full. Social problems? We all know that these problems increase whenever estates are built.
1255	1	I would be happy with small development in the village over the next 17 years.
1255	2	With off road parking and sizable gardens, of a small low cost nature e.g 2/3 bedrooms
1255	3	Plot 236 and the adjacent paddock would be an appropriate location.
1256	1	We would be happy with 12 houses over the next 17 years that are small scale developments but not large scale developments.
1256	2	We are aware plot 236 has been offered and the adjacent paddock of Whitegates and this would be appropriate.
1257	1	I write to inform you in connection with the above village to tell you that I would agree with 12 houses over the next 17 years.
1257	2	I would prefer them to be 3 bedroomed houses with gardens and ample parking off road with room for trees and bushes etc in keeping with the rural environment.
1257	3	I am not in agreement with some of the sites on offer 239 and 237 it would be more of an estate and not in keeping with the village
1257	4	Plot 236 would be appropriate site and Whitegates paddock.

1257	5	The latter plots would be a more favourable size and therefore I would like my comments to be taken into consideration.
1258	1	I am writing to inform you of my opinion for the above village, I am aware there are some large scale development plots offered however, I do not think these are in keepi
1258	2	I have lived in the village for 23 years and I am in agreement with 12 house you propose.
1258	3	In particular plot no.236 with the adjacent paddock of white gates.
1259	1	I have lived in Wheatley for about 15 years and would like to offer my support for plot 236 with the paddock at the back of Whitegates on Top Pasture Lane.
1259		For some of the 12 houses to be added to North and South Wheatley.
1260		Support affordable housing for younger people
1260		Prefer the land available at the end of Top Pasture Lane, eg plot 236 and the adjacent land.
1260		The housing needs to allow for parking off road access as the access road would be narrow, and to include gardens to encourage families with young children and pets.
1260		It would be good for young families to come in, as at the moment the village has for too many pensioners, it would balance us up, and bring in new life to our village schoo
1260		The number of properties should be limited to no more than 20 properties as the access roads would be heavily over loaded.
1261	1	I would like to inform you I fully support your proposals for a further dozen or so dwellings over the next 17 years between the two villages.
1261	2	However, some of the sites put forward for consideration seem particularly large for the amount of houses required and could I fear potentially spoil the outlook and charr discussions with the owner of the local shop who owns other outbuildings adjacent and understand he would like to utilise these barns to develop for local housing of low
1261	3	I feel a number of smaller developments around the village would be more appropriate and in keeping with the character of the village.
1262	1	Rampton have new houses that have been on sale for three years and no buyers have been found or have been on sale for years.
1262	2	Rampton has an old school room for a village hall with no sound proofing and this has caused controversy in the past BDC environmental health have been called out in p are allowed.
1262	3	It has taken the people of Rampton years to get a playing field and play equipment and now BDC prepare to build on this field. The field is owned by Rampton Parish Coun
1262	/ /	As for Public Transport, the last bus anywhere is in 1830 to Retford. If you have not got Transport even a first to the doctors is a long drawn out job. Young people cannot with the high cost of energy and fuel BDC should be looking more at building in towns. Then the people could make use of public transport and facilities that are offered.
1263	1	The areas have always been, and continued to be, subjected to flooding. There is often standing water in the fields and overflow from them and the ditches frequently spill
1263	2	The inevitable increase in traffic would cause problems due to unsuitable narrow lanes, frequently muddy.
1263	3	Planning permission was refused several years ago. The problems then are still on going. So why reconsider? What has changed?
1263	4	I recognise that all householders prefer new homes to be built away from their area and this is so now. However, with me its not just personal wish but a genuine desire th

1266	1	My views are focused on that there should be no further large developments in Shireoaks.
1266	2	1. Is there a need for building more houses in Shireoaks? A large housing development (off Shireoaks Common) which commenced some years ago is still unfinished and ro
1266		2. The traffic situation in Shireoaks is already a problem especially at peak times with poor parking facilities and long queues of traffic at the railway crossing.
1266		3. The village infrastructure cannot support additional developments.
1266		4. The local school is oversubscribed.
1266		5. Existing play/recreational facilities and local amenities in the village are inadequate.
1266		6. The development mentioned at 1 above, is not in keeping with the surrounding area. The Parish Council and many local residents opposed this development and many c design, appearance, layout, density. More developments of this type will result in losing village identity.
1266	8	7. Serious flooding problems occurred in Shireoaks in 2007 following the development off Shireoaks Common. (Despite strong representations being made by residents and and to the Environment Agency that this development (building on a floodplain), if passed, could create flooding.
1266	9	However, I consider that there is a need for an appropriate development at the Shireoaks Marina Site (References 153 and 587). A small development to compliment the n development could include appropriate housing, village car parking facilities, recreational/play area and Visitors Centre.
1267	1	1. Much of the area identified forms part of a flood plain.
1267	2	2. Significant flooding occurred in 2007 and some existing properties on Bracken Lane, Grove Coach and Cavendish Roads were affected.
1267	3	3. The existing School on Bracken would be unable to cope with any significant further pupils numbers, as would inevitably occur if the proposed building was to take pla
1267	4	4. Access from Grove Coach Road and Bracken Lane onto London Road can already be difficult, and potentially dangerous at peak/school times, further development on problem.
1268	1	I am aware of Bassetlaw District Council have proposed a site for new build houses in Gateford, which is right next to woodland, which contains a lot of wildlife. This wildlife species & also Woodpeckers, which are rare these days. The wildlife also use the field that you are planning to build on.
1268	2	The field also has a public bridleway running through it.
1268	3	By building on the proposed site, it will damage the wildlife what we have left. I just want to make you aware of this & I have got RSPB involved on the matter.
1269	1	The area that plans are being put forward to build 230 units, including roads, access and OPEN SPACES!!!!! = well open spaces will no longer be there
1269	2	and has anybody looked at, asked about, thought about deeply or even given any consideration to the dangers for children with the roads NO I shouldn't think you have -
1205	-	works dangerous - they are one of your biggest earners aren't they ????????????????????????????????????
1269	3	Have any of you even considered the amount of noise, the number of people that will be roaming around, the constant mess and filth in the air, in fact you have not thoug have you????????????????????????????????????
1269	4	I am disabled and do not need the aggravation and stress of constant noise, mess and strangers roaming near to my home.
1269	5	As far as the elderly and disabled, and the care companies know the homes that should be built there, are bungalows for the elderly and disabled.
1269	6	Has plumbing and waste management been looked into - has the cost of electricity and gas being piped through been looked into - NOT just for those wanting to make mo mess and the cost of constantly cleaning it up NOW THAT WOULD REALLY BE NEWS !!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
1270	1	General growth of the community
1270	2	When previous proposals were put forward it was confirmed that drainage was a problem in the area and with all those new houses planned this will cause a lot of residen having plumbing problems
1270	3	Bracken Lane is already a very difficult place to manoeuvre with the school traffic. The increase of traffic from houses further down the lane would only add to the chaos t
1270	4	Schools, doctors and medical services already overloaded
1270	5	Loss of agricultural land
1270	6	Depreciation of my current home
1270	7	Possible increase of crime
1270	8	I pay a lot of money in council tax to live in a nice peaceful area and I feel this will be threatened should the area expand to the extent you plan.
1271	1	We refer to the above and strongly object to any proposed development on this land. a) The proposal to build what, in effect, would be an ESTATE of houses on the land in conservation area and would be at odds with the reasons for establishing its status in the first place. The development would not respect the character of the area at all.
1271		b) The recent and ongoing Miller Homes development surely provides way in excess of the quota of new houses that the beautiful village of Gringley is expected to provide is yet unknown and it is not clear that the limited infrastructure of the village will be able to cope with this development anyway.

1271	3	c) Over the last decade or more, planning applications on this plot of land have been refused and the reasoning behind these objections has surely not changed but has be takes place in the village.
1271	1 4 1	d) There is no requirement within the village for any additional public open space / gardens. The playing field, play equipment and tennis court on Finkell Street plus the ptan sufficient recreational space for village residents. Such spaces do inevitably encourage youths to congregate and this would be entirely inappropriate in such close p
1271	5	e) Although I have no expertise in this area, I do believe that the access road shown on the map is not of an acceptable width to accommodate the necessary through traf to the community would be greatly reduced and its value would therefore be negligible. The plan does not show the gradient of the land which would also make this ope
1271	6	f) We would be extremely interested to know what historical settlement features are in evidence on the area coloured blue on the plan? This piece of land borders the pr the home of the land owner submitting the development plan. Far from having any historical features I would surmise the land is to be left undeveloped simply to benefit obviously does not afford all of those residents who would be adversely affected by the development.
1271	7	g) The proposed development would increase substantially the number of houses on Low Street. The features of Low Street which contributed to it being included within not be able to cope with such a development. It is not possible for two cars to pass each other without one having to reverse and use an existing drive way entrance as a and farm vehicles often block the lane completely.
1271	8	h) Low Street would not be able to cope with any surface water runoff from the site notwithstanding any purpose built drainage systems incorporated into the site build. heavy rain as water pours down Cross Hill onto Low Street. The road surface is often being repaired where the flood water lifts the asphalt.
1271	9	i) It is also probably likely that additional houses would overload the current foul sewerage system which is obviously old and emits pungent odours on a frequent basis no
1271		It is likely that the new dwellings will be significantly larger than the existing houses on Low Street and would be out of proportion with their immediate surroundings. Pre the village, within the conservation cartilage, have all resulted in houses being built that are larger than previous buildings and tower over neighbouring houses This has h village and does not reflect the important historic features of Gringley.
1271	11	In summary we ask you to reject this proposal. The development, if permitted, would by virtue of its form, mass and detailing result in an overbearing, dominating impact significantly alter the form of this part of the village and would not preserve or enhance the character or appearance of this part of the conservation area.
1272	1	Owing to the size and nature of the village, I would be in favour of the 12 new houses being provided via a number of smaller sites.
1272	2	I note from the planning for North and South Wheatley in the consultation document that there are a number of possible sites put forward for new housing. Given that we some of the sites shown seem much too large and could erode the special character of our village, particularly if developed for a significant number of houses.
1272	3	I am therefore particularly supportive of site no 236 and consider this to represent a logical small extension to the existing village boundary.
1272	4	I am also aware that the owner of this site has been in discussions with the adjacent owner of 'Whitegates' with a view to joining their two parcels of land. The two parcels hedgerows and largely within the existing building form. If brought forward together, I feel these two sites could provide the opportunity to contribute towards meeting tl village with little impact on the character of the village and minimal disturbance to existing residents. If this site is indeed brought forward as an extended part of site no 2 combined allocation to accommodate some of the settlement's new housing development.
1273	1	Owing to the size and nature of the village, I would be in favour of the 12 new houses being provided via a number of smaller sites.
1273	2	I note from the planning for North and South Wheatley in the consultation document that there are a number of possible sites put forward for new housing. 1274	6	I am also aware that the owner of this site has been in discussions with the adjacent owner of 'Whitegates' with a view to joining their two parcels of land. The two parcels
12/4	0	hedgerows and largely within the existing building form.
1274		If brought forward together, I feel these two sites could provide the opportunity to contribute towards meeting the Council's housing requirements for the village with litt
	,	minimal disturbance to existing residents
1275	1	The current Southern Boundary to Retford is well defined and provides a consistent and appealing entrance to the town and this would be lost by these developments.
1275		It is important to maintain a distinctive boundary between the urban area and the open agricultural land and the current town limit doers precisely that.
1275		There will be a significant loss of amenity
1275	4	The local infrastructure will not cope with and occupants of the new housing would have to drive a significant distance for shops, schools, doctors and other facilities.
1275	5	There are more appropriate areas of land within the existing Retford town boundaries for housing.
1275		I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.
1276	1	I/we have significant concerns about the allocation of land to the south of Ordsall for future housing and mixed use development (site numbers 1, 40, 41, 52, 259 and 364) In order to get from these sites into Retford Town Centre residents are likely to travel along High Street (which is predominantly single width due to existing on-street park The bridge on Goosemoor Lane is narrow and has poor pedestrian facilities. This bridge is not suitable to accommodate a significant number of additional vehicles (or pede sites. Additionally, due to the narrow width of the bridge, vehicles passing in opposite directions often have to stop as there is insufficient room to pass. Additional housing near to the bridge.
1276	2	The development of these sites is likely to result in additional traffic movements through Eaton village (to get to the A638). This village has a single width bridge, limited per through the village is inappropriate for significantly increased traffic flows.
1276	3	Access to the north (onto the A620) is along West Hill Road/Ordsall Road and passes Ordsall Primary School. At the beginning and end of the school day a significant amou
1270		single-file traffic on West Hill Road. Additional housing would lead to greater congestion at peak times
1276	1 1	Access from the proposal sites to the south (to the A1) is along a winding rural road which does not get gritted by Nottinghamshire County Council. For the reasons stated
		suitable for significantly more cars associated with large-scale residential development, or large commercial vehicles associated with mixed uses.
		Visual Impact. Retford currently has a reputation as a small market town and this attracts visitors to the area. The principal route into the town from the south is along Lor
1276		particularly visible from London Road as they are elevated. New housing development on these sites will detrimentally affect the character of this side of Retford (especial
		appearance of 'sprawl' into the open countryside.
1070		Wildlife. The proposed sites are the home to a wide selection of wildlife -including some endangered species. The list includes: Skylarks -breed, feed and live on the sites. N
1276		approximately 50%. The RSPB are very interested in these sites. Lapwings. Finches. Tits. Barn Owl (flight path). Bats -the Bat Conservation Society are very interested in this Stark (associance) visitor). Undershares Hundrada of bass and a wide selection of butterflies, inserts and other birds.
	1 1	Stork (occasional visitor). Hedgehogs. Hundreds of bees and a wide selection of butterflies, insects and other birds.
1276	7	Local Use. The sites are well used by walkers, runners, children and young people playing, dog walkers, the elderly, triathlete; etc. Additionally, people visit from outside the area also designated public featurates across the sites.
		are also designated public footpaths across the sites. Conclusion. For the reasons stated above, it is considered that the proposal sites located to the south of Ordsall are unsuitable for large-scale housing or mixed use develo
1276		accessible sites are located elsewhere in Retford.
		I have already raised several times to local, district and county councillors that the Ashes Park estate road network is unable to cope with the current level of traffic from lo
1277		estate as a cut through from Carlton. Speed limits are not observed and there is not a time of day when the Ashes Park Avenue junction can be approached without a veh
		roundabout or traffic lights is needed immediately, there is no way that the current road infrastructure could handle an additional thousand vehicles from the proposed 70
1277	2	Puddleducks has a waiting list so long, they have been unable to fulfil need during the past three years to my knowledge. Treetops is also full, as is Little Acorns at Shireoa
1277	2	provision for early years settings.
1277	3	Gateford Park, Redlands and Prospect all full. Further school provision is required with room to grow if required.
1277	4	Comprehensive school provision also needs to be assessed as I doubt there are spaces available for such an influx of families.
1277	5	Wider implications of shopping facilities, play areas, youth clubs, health centres, elderly care homes and community centres cannot be forgotten.
1277	6	The affect on nature and wildlife would be catastrophic loosing critical areas of wildlife habitat. Impact of congestion and pollution from any additional traffic would also h remained.
1277	7	Celtic Point shopping complex is on it's maximum capacity at present, the opening of Asda has proved how incapable the current road structure is of handling any addition
1277	8	Teenage provision is at melting point and would only be exacerbated by any development in the area.
1278	1	I believe that this area of town is not suitable for extra development. The roads cannot take the pressure of extra traffic coming in and out of the estate as there are only t
12/0	1	(for example -Bigsby Road-Cornwall Road-Park Lane) were not created for a large amount of traffic. They have very poor visibility.

1278	2	Children in the area have no play areas in this part of town and tend to play out on the street. This would increase the danger to them.
1278	1 2	We already get a large number of heavy goods vehicles due to traffic being diverted down Smeath Lane from Hayton. The traffic near the school on Tiln Lane is already a would add to this with potentially dangerous consequences.
1278	4	This is an attractive part of town with beautiful open aspects onto countryside. That would be lost forever and would be regretted in years to come. We have the canal a of the town. Wildlife would suffer or be wiped out in this area.
1278	5	I don't believe that Retford can sustain these extra developments- we have no hospital, little employment, and little or no leisure facilities. I don't believe that more peop businesses or shops because we have no major shopping facility to bring people in and any extra people moving to live here would be working elsewhere and accessing fa
1278	6	As far as I am aware there is a great percentage of new housing in Retford that has not been purchased. Any new housing development would therefore not be benefittin
1278	7	There are many things that could be done to Retford to improve it and attract employment and businesses- allowing massive housing developments, blighting the look of problems are not among them.
1279	1	As an Ordsall resident, my comments are bias towards comments on development of this area in particular. I take it as read that the wonderful market town feel of Retfo
1279	2	Looking at a map of Retford you would think the town was a nicely grouped typical country town, however Retford is poorly divided into two by the main east coast railw the town. Consider the road and pedestrian links across the railway, for those living in Ordsall getting into Retford town is difficult.
1279	3	For road users the southernmost roust via the Whitehouse's roundabout requires travelling down the old windy Ordsall village roads and over a narrow bridge; at weeken less a single lane carriage way due to the amount of on road parking, All Hallows Street becomes a single lane carriage way when there are cricket matches playing and you cars around a blind bend on the wrong side of the road. Taking the Northwest route means joining the busy Retford Worksop road, a real bottle neck during peak times. negotiate.
1279	4	For pedestrian access the bridge near the leisure centre is good but the other 2 routes are less than ideal with, I believe, many feeling insecure and therefore don't like us improve access between Retford and Ordsall was missed when the Bridon works site was approved for development. With these concerns about access is it wise to consic Ordsall, especially in view of the 2 large developments already committed.
1279	5	I would also note that while getting to Retford town is more difficult that the area map would suggest there is little option as shopping in Ordsall is poor with parking outs
1279	6	More generally, where areas are to be developed it would be nice to see a similar proportion of protected open space as seen in the rest of Retford.
1280	1	We wish to express our concern regarding the potential site which has been identified and is named site allocation number 4. Whilst we appreciate there maybe a require Worksop area we feel it would be more prudent to consider existing derelict sites or empty houses within the area before removing/relocating existing amenities.
1280	2	This site enjoys a wealth of wildlife and thrives as an open space for all the local community to enjoy.
1280	3	The golf course has hardened golfers playing regardless of the weather so we don't understand why money would be spent digging up this well established course just to r cost of moving this will then be passed onto the members/paying public which will only result in the facilities not being used due to an increase in costs.
1280	4	In 2009 we tried to purchase a small area of ground to the front of our property and the application was rejected by the committee on the basis that "the council wished t amenity value and the character it adds to the area". How can the council even consider building on this huge site without acknowledging the impact a large housing estat outlook and open feel of the area for all the local residents.
1280	5	As such a large housing area has been proposed on the very outskirts of the town has any provision been made for additional amenities (doctors, schools, shops, transport children/teenagers. As you will appreciate there are very few facilities available for children/teenagers within the immediate area and the existing infrastructure that is av suggested increase in population.
1281	1	Living as I do on Bigsby Road, I cannot see that a development in this area of Retford (that beyond the end of Bigsby Rd round to The Drive) would help congestion in the t help the flow of traffic around the existing housing estate.
1281	2	Narrow roads and parked resident's cars already interrupt the flow of moving vehicles, including service buses and dustbin lorries, quite considerably.
1281	1 3	Similarly, I don't believe that more development of this side of town would be conducive to furthering employment opportunities within Retford. Employment and industr the railway or within easy reach of the A638 or A1.
1281	4	I know that there is an issue still to be resolved regarding an existing covenant on land off The Drive and I would urge your law department to look into this.
1281	5	Land behind the Welham / Brixworth estate has been proven to be prone to flooding and whilst you say that problems such as these are easily overcome, I would assume development of such a site therefore have a knock-on effect upon the sale price of houses to the public.
1281	6	My proposal would be to expand the existing development on the outskirts of Ordsall which would ease traffic congestion coming through town, having quick access to the

1281	7	Alternatively, a mixed housing and industrial development on the north west edge of Retford, further up the North Road (Galway) estate would seem logical in providing e could again have easy access to the major route out of town north and the A1.
1281	8	A development here would maybe encourage the building of a new primary school that could take children from Hallcroft who are currently transported up to Carr Hill.
1281		Further to this, a short walk across the North Road would enable workers quick access to existing industrial units off Randall Way.
1282	1	All the fields that are included flood on a regular basis. This seems to be not believed by some planners that I have spoken to on the phone. As I run past these fields most means that I am either short sighted or someone has changed the definition of wet! The fields flood because of the Grove hills and if buildings are placed on these fields the will probably be into existing homes. It already happens on a regular basis.
1282	2	The infer structure will simply not be able to cope with increasing number of houses. Grove Coach Road is already a nightmare, roads are very narrow and the schools are
1282	3	Finally the fields in question were subject to planning proposals in the mid 1990's and this was turned down due to massive corruption concerns, arrests and a London judg Nothing has changed since the report 15 years ago so where is the justification in granting permission now. I would urgently request confirmation of this e mail. Myself an information over the set applications. The first person in planning said to my wife in November 2011 that the only applications were opposite the Whitehouse's public hou lady in December 2011 in planning that the only field that was being considered was at the bottom of Grove Coach Road!! Both incorrect.
1283		Access to your plan clearly shows for all traffic to leave by way of Hemmingfield Rise then on to Hemmingfield Crescent. We have a lot of congestion on Hemmingfield Cres get up this small hill in the winter. This is not a bus route so is the last to get gritted.
1283	2	A more direct route to a main road is via Winter Grove/Ambleside Grange onto Carlton Road. If development of this site went ahead would consideration be given to the d Ambleside and half via Hemmingfield e.g. no through roads on site.
1283	3	This land is adjacent to bungalows will consideration be given a shortage of this type in Worksop.
1284	1	The community benefits offered by the proposed development on this site have been promoted over the last few years and have resulted from consultation and discussion aspirations to see various facilities within the village enhanced
1284	2	Since the Core Strategy Examination in 2011, the landowner of the site was approached by Misterton United Junior Football Club which has expanded over the last 2 years a permanent location as the current site is time-limited. After a meeting between the landowner and the Club committee in November 2011, it is now proposed that as pa the site to the east of Misterton Primary and Nursery School (the School) be given over to the Football Club which the delivery of the dwellings will be able to fund. Whilst used for employment, there has been a preference shown by the community for a permanent location for the Football Club.
1284	3	It is further proposed that other sports facilities could be located on that part of the site; multi-disciplinary usage (for example, the provision of a MUGA) would make it po facilities on the site as the site is to be gifted.
1284	4	A further meeting has taken place with Dr. A. J. Brownson of the Misterton Surgery, and he has re-written a letter of support for the development dated 25 January 2012 w
1284	5	A meeting was held on 26 January 2012 with Mrs. Jane Cappleman-Jackson, head of the School. Whilst meetings had taken place with David Herrett, her predecessor, it wa development and to establish how, if anything, the situation had altered at the School and what requirements it had for any funding assistance. Mrs Cappleman-Jackson we the benefits the development could offer Misterton particularly the close proximity of the School, doctor's surgery and pharmacy, community hall, Football Club and housi teams within the Football Club are pupils at the School.
1284	6	Further, Mgrs. Cappleman-Jackson confirmed that the School does have spare capacity to absorb new pupils.
1284	7	The requirements of the School relate mainly to the fabric of the building, for example, whilst a new boiler has been installed, much warm air is escaping through rotting and requirements of the School are to be discussed at the next governor's meeting and these will then be considered as part of the overall relationship to the proposed housing to the School. What was mentioned, was how the swimming pool could be utilised for Misterton as a whole during evenings, weekends and holidays as it is currently only a strengthen the interaction of sports facilities between the School and the community. The benefits of the proposed housing will be social, functional and financial to the will be social.
1284	8	In conclusion, there will be provision of up to 100 high quality dwellings on 10 acres within the overall development which will further comprise: Open space, both formal t sports facilities and informal through landscaping. Relocation of the doctor's surgery and pharmacy. Community Hall.
1285	1	I am in support of site 87 because of what is being offered to the community. The lans to be used for employment is necessary as the site of the former Newell Dunford wo New employment opportunities for Misterton can only be positive.
1285	2	The area to be used for green infrastructure appears to offer several potential uses of which provision of a community centre is important given that Misterton has no such
1285	3	From the medical centre perspective, a relocation to the proposed site would enable enhanced facilities to be offered and I would view such a move positive.

1285	4	The proposal is also to provide up to 150 high quality houses which Misterton is in need of. It is likely that the site will be developed in the future anyway and so perhaps the benefit from the development now rather than not benefit in the future.
1286	1	Such a development would seriously detract from the existing housing on Brixworth Way & Welham Grove by blocking the countryside views these houses currently enjoy That would adversely affect the marketplace £worth of these houses.
1286	2	I also question the effect such a development will have on the wildlife that inhabit the wild grassland under proposal
1286	3	I further question that the area of Site #69 is not needed for a natural water meadow or/ flood alleviation area, being as it is so close to the canal.
1286	4	I further question the detrimental effect such a development would have on the pleasure currently afforded water users (wildlife, boats & fishing) by enclosing the canal o
1287	1	There are already numerous houses for sale or rent.
1287	2	Specifically round Worksop currently, I see properties which appear empty or derelict, why can't arrangements be made to renovate these and make existing residential ar
1287	3	If however, the people who are expected to occupy these houses aren't in Bassetlaw at present, where are they coming from and will they be bringing their jobs with them will have at least one person who is expected to work, where are these 6000 jobs? I can't see that number of vacancies round here at the moment, nor in the foreseeable about the state of the economy. This means that they will be competing with those Bassetlaw people who are already unemployed. In the current economic climate, with transport fares, commuting to the larger towns and cities becomes less of an attractive or affordable proposition.
1287	4	What will be the impact on the infrastructure within the overall community? If say, 75% of the new households have children, say, 2 per family and the others are couples, need access to healthcare, from a service which is under severe pressure as it is. Working on the above assumption, will school places be available for a further 9000 childr policing and for example, how council services and Jobcentre services are available to meet the needs of these extra people. Will Local and Central Government provide m of drastic cuts in the public sector.
1287	5	I think it paramount that old industrial sites are utilised as far as possible for this purpose. Given the decline over recent years, surely there must be suitable land.
1287	6	REMOVED
1288	1	Having been resident at my current address for just over two years I could not fail to notice the fact that the fields in question are waterlogged during the winter months a Bracken Lane school is unusable for this very reason during these periods. Having spoken to residents who were in their properties during 2007 I have ascertained that the their gardens flooded and the garages also in some cases. It was only by good fortune that this occurred when people were at home, rather than at work, and they were a bale out garages before any substantial damage was caused. I understand also that, during 2007 when much of the county experienced problems with flooding, considerable areas of the fields in question and the lane serving Blacks I drainage problems in the area for many years now as I understand it since the previous developments in the area. Water comes down the incline in the land from the word Grove Coach Road and settles in the fields at the bottom of the incline where the proposed development is sited.
1288	2	A side issue to this is the fact that hedgerows would be uprooted which currently support a large variety of flora and fauna and numerous species of birds.
1288	3	As the lane from the bottom of Bracken Lane out to Little Gringley is very twisting and narrow, and also in a poor state of repair, it seems logical that most of the traffic gen the road network via Bracken Lane and Grove Coach Road onto London Road. This can be particularly difficult at times if turning right towards the town centre, as most tra- the only way to achieve this is to turn left and then use the mini roundabout at Whitehouse's to come back towards Retford. This is not without its dangers as traffic appro- expecting this type of manoeuvre and I have seen quite a few near misses and been involved in one myself.
1289	1	My objections are based largely around years of observation. The infra structure around these sites has not seen development over the years and with councils freezing co would be available to make the necessary adaptations to support both the period of any building and the subsequent changes necessary should houses be inhabited or ind effective sanitation and the construction involved to effect this puts a massive strain on any area both in terms of physical burden and the potential disruption to an alrea properties have been built around 26 - 31 years ago

1292	7	The Isle of Axholme & North Notts WLMB also covers the following villages Everton, Misson, Gringley, parts of Misterton, Clayworth, Clarborough, Hayton and West Stock
1293	1	512 and 37 are mainly for agricultural use and provide a clear definition between the urban and rural aspects of Retford – between the well populated section of Tiln Lane
1293	2	In addition, site 37 is not suitable for any development purpose as it is adjacent to a dangerous bend on a very busy road (national speed limit) with large goods vehicles (a 'thundering' past at all times of the day. Any development in this parcel of land would require significant road safety improvements making it of limited commercial viability
1293	3	Sites 6, 7, 46, 69 and 309 are mainly agricultural interspersed with public footpaths providing beautiful scenic and stunning views of open countryside and the canal. Like 5: between the urban town and rural countryside between Retford and Clarborough
1293	4	The volume of houses between all these sites exceeds the total Retford requirement of 577 houses by 700
1293	5	All the above areas will require significant investment in utility services and sites 512 and 37 are not supplied by any mains sewage or gas
1293	6	All the above sites will lie within the catchment area of the Carr-Hill Primary school (site 1/34) which we understand is already oversubscribed and will require significant ca the building extensions are a) permissible (designated Open Space) and b) possible as it appears land-locked anyway
1293	7	There are no other facilities such as shops, community centres etc. within the area of Tiln Lane
1293	8	In summary, therefore, we believe that these sites are neither suitable nor viable for housing or mixed use and should be re-designated as Open spaces for the benefit of b However, we do accept the need for the town to accommodate increasing demand over the next few years and would suggest the following:
1293	9	As a principle. The use of 'Brownfield' sites should be used before use of current un-built/agricultural sites; specifically, those in either current mixed use or residential area Space within which additional housing/mixed use can be further developed. For example, the following sites: a. 10; b. 40 and 52; c. 41 and 364; d. 359 and R2; e. 51 and R7; f. 342 The above sites, if selected, provide a total of 1131 houses - 554 more than required. Finally, are the current 'committed housing' sites numbers of houses included or excluded in the overall plan of requirements for Retford over the period of the plan? If th 'approved' within this commitment and do they equal or exceed the requirement of 577 for Retford. If so, then why look for additional potential sites?
1294	1	Isobel Collins informs me tat she would like to raise her concerns regarding the plan to build 900 houses near to the Community Centre in Ordsall. Isobel Collins believes th too few recreation areas.
1295	1	Any increase in population obviously will lead to an increased workload for EMAS and other emergency & health services. The actual amount will depend on the final plans rural setting, have an impact on our ability to meet the 8 minute (Category A8) response target for life-threatening conditions.
1295	2	The PCT or then CCG commissioners would have to lead the health community-wide review to assess how health and emergency needs are planned and funded.
1295	3	The impact and need for good road infrastructure would have to be considered, as an 8 minute response is a challenge in mainly rural settings due to the geography.
1295	4	EMAS is currently looking at its estates and workforce plans in order to meet current and estimated future activity levels. The estates strategy in particular has longer leaded be involved as soon as the final development locations are agreed, to discuss possible sites for an ambulance station or shared facilities with other health or emergency ser identification of suitable stand-by points.
1295	5	In the wider view of health provision of unplanned care we are also happy to explore different models of delivery of unplanned care, from the 999 response to urgent care, primary care-based emergency staff.
1295	6	In the main online Bassetlaw option feedback section: Q 121, 122 & 123: As a service we have done some work with the Gypsy and Traveller communities, which shows that health outcomes can be very poor. From the awareness I have had through that work, I believe you should consult with those communities to ensure the sites are relevant and then once a shortlist of acceptable sites is agreed consult locally which fit best into the plan. Then the access to local health and other services needs to be designed and

Additionally, due to the narrow width of the bridge, vehicles passing in opposite directions often have to stop as there is insufficient room to pass. Additional housing near to the bridge.
1334	2	The development of these sites is likely to result in additional traffic movements through Eaton village (to get to the A638). This village has a single width bridge, limited per through the village is inappropriate for significantly increased traffic flows.
1334	3	Access to the north (onto the A620) is along West Hill Road/Ordsall Road and passes Ordsall Primary School. At the beginning and end of the school day a significant amou single-file traffic on West Hill Road. Additional housing would lead to greater congestion at peak times
1334	1 4 1	Access from the proposal sites to the south (to the A1) is along a winding rural road which does not get gritted by Nottinghamshire County Council. For the reasons stated suitable for significantly more cars associated with large-scale residential development, or large commercial vehicles associated with mixed uses.
1334	5	Visual Impact. Retford currently has a reputation as a small market town and this attracts visitors to the area. The principal route into the town from the south is along Lor particularly visible from London Road as they are elevated. New housing development on these sites will detrimentally affect the character of this side of Retford (especial appearance of 'sprawl' into the open countryside.
1334	6	Wildlife. The proposed sites are the home to a wide selection of wildlife -including some endangered species. The list includes: Skylarks -breed, feed and live on the sites. N approximately 50%. The RSPB are very interested in these sites. Lapwings. Finches. Tits. Barn Owl (flight path). Bats -the Bat Conservation Society are very interested in thi Stork (occasional visitor). Hedgehogs. Hundreds of bees and a wide selection of butterflies, insects and other birds.
1334		Local Use. The sites are well used by walkers, runners, children and young people playing, dog walkers, the elderly, triathlete; etc. Additionally, people visit from outside th are also designated public footpaths across the sites.
1334		Conclusion. For the reasons stated above, it is considered that the proposal sites located to the south of Ordsall are unsuitable for large-scale housing or mixed use develo accessible sites are located elsewhere in Retford.

1398	6	I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.	
1399		It is important that the relative merits of sites are assessed against the full range of sustainability criteria. PPS3 advises that in identifying sites for housing development locations offering good access to jobs, key services and infrastructure and take into account issues including physical access, land contamination, flood risk, impacts on nat landownership issues. Sites should also be assessed for their suitability, availability and achievability. The two stage approach to site screening appears to imply that sites p suitable for development and that decisions on sites for inclusion in the Preferred Options will be made solely on sites' performance against the 9 stage 2 assessment crite include important assessments undertaken at stage 1 relating to access to services and facilities, site availability and achievability and, for employment sites, attractivenes	
1399	2	Criterion 1 relates to the level of community support for a proposal. Whilst the views of the local community are an important consideration, there is concern that the asso subjective overly. The methodology refers to "strong" community support or "some" community support without giving clear guidance how this will be measured. Local of the most appropriate development solution in planning terms. Care needs to be taken about how the level of community support is used to inform decisions on site alloca document. Consideration of the level of community support cannot be assessed on an individual site by site basis. The Council needs to undertake proper engagement wit available looking at the various development opportunities and their relative merits, recognising the need to identify new employment and housing sites to meet establish	
1399	3	The assessment of sites for inclusion in the Preferred Options Consultation should be undertaken based on a comparative assessment of sites against both the Phase 1 SHI This will provide a robust assessment of the most sustainable development options to meet the Core Strategy's requirements for further housing and employment land provide a subtract of the SHLAA as suitable, achievable and potentially available for development (SHLAA ref 195).	
1399	4	It can be confirmed that Hallam Land Management Limited (HLM) is promoting the site on behalf of the landowners and is committed to bringing the site forward at the erailable.	
1399	5	The ELCS assessed the site as a good quality employment site opportunity (site ref W8). The site was the highest ranked potential site alongside land south of Manton Woo Compared with land to the east of the A57 junction, the study concluded that the land at Shireoaks Common was the better site due to its more even topography, promine urban area of Shireoaks. The study also acknowledged ownership constraints affecting the release of the Gateford Common site and noted that the need to develop land a pressing should these ownership issues continue to stall progress.	
1399		The Promotional Document prepared in support of this response sets out an appraisal of the land at Shireoaks Common and demonstrates that it represents one of the mixed use development of employment and housing land well related to the existing urban form. The site represents a deliverable opportunity capable of early release to employment and housing land supply. The Promotional Document includes an indicative masterplan that demonstrates how the site can be developed to provide a mixed employment land and some 175 residential units. Initial discussions have taken place with Nottinghamshire County Council on potential access arrangements and a new sproundabout is proposed. Further supporting technical studies are in preparation and will be submitted to the Council to demonstrate that the site is not subject to any over constraints that would prevent development.

1399	7	The Core Strategy sets out a requirement for Worksop to provide at least 32% of the district's housing requirement and at least 45% of the employment growth. Amendm following the Examination in Public also provide the flexibility to grant additional planning permissions to address shortfalls in housing and employment land supply. The C Examination in public noted a pressing need in the Worksop area to identify and bring forward additional housing sites. The Issues and Options Consultation Paper shows employment land against the Core Strategy requirement of 48 hectares with only 1.12 hectares built or committed as at April 2011. It is important that the Site Allocation housing provision for Worksop set out in the Core Strategy to ensure that the strategy of urban focus is delivered. It is also important that the Council works to bring forw the Worksop area at the earliest opportunity, in particular to address shortfalls in employment land supply and strengthen the 5 year housing land supply position. Policy flexibility for the Council to grant additional permissions to address housing and employment land shortfalls and help deliver the strategy for Worksop. The land at Shireoz bring forward a mixed use development to provide new employment and housing to help deliver the Council's strategy for Worksop. Given the critical need to deliver add also consider the early release of the site in accordance with Policy CS1.
1399		Site 195/W8 at Shireoaks Common should be allocated in the Allocations DPD as a mixed use development opportunity to provide 13.9 hectares of employment land and consider the potential for the early release of the site to help address current shortfalls in supply. The Promotional Document submitted alongside these representations s a high quality mixed use employment and housing development.
1399		Part of the land at Shireoaks Common (site 195/W8) offers the potential to provide additional employment land to meet strategic requirements set out in the Core Strategi location for employment development due in part to the direct access off the A57. The Promotional Document submitted as part of these representations includes an indi hectares of employment land can be provided as part of a mixed use development proposal.
1399		Site 195/W8 is suitable for allocation for a mixed use development for employment and housing land. It is an unconstrained site well located on the A57. The site is well re for additional employment land is attractive to the market. New housing development as part of the proposals would relate well to the settlement of Shireoaks and would services and facilities available in Worksop. There are no overriding constraints to the development of the site and HLM is keen to bring the site forward for development
1399	11	Development of the land at Shireoaks Common would not affect any existing areas of open space. Development would not affect the St Luke's Primary School site. The inc extension of the school if required. There is also the opportunity to provide for a new access to the school from the new development to address existing access difficultie
1399	12	The Issues and Options Consultation Paper suggests that some 100 dwellings could be redistributed from the Rural Service Centres. It would be appropriate for any remair the Sub-Regional Centre and the most sustainable location for further housing growth in the district.
1399	13	The proposal for this site is an employment led, mixed use development combining; 13.9 hectares of employment land for B2/B8 purposes; 5.85 hectares of residential la hectares for a potential school extension including new access
1399		The rationale for the proposal is the combination of a high quality employment site with the sustainability of the location. The adopted Core Strategy sets out a vision for E the town's role as the district's principal urban centre, with new business locations being established, taking advantage of the town's good connections to the strategic roa provide a range and choice of employment sites, including in Worksop, The Core Strategy proposes to locate 45% of the employment land growth (48 hectares) to Worksop
1399	15	The Bassetlaw Employment Land Study (ELCS) of January 2010 recognises that Bassetlaw District has few obvious advantages over other parts of the region to deliver ecor there is continued demand for medium sized warehousing units along the A1/A57 corridor and scope to attract further development if accessible sites are made available. adequate provision with sufficient developer choice is different parts of the District, suggest a need for Worksop, Retford, Harworth and the A1 corridor.
1399	16	The subject site was considered as part of the ELCS as Site W8 with the report noting that the site is flat, open, with few obvious constraints. It has the potential for a direc attractive location on a highly prominent site. The site scored 28 out of 35 in the study and was noted to be of good quality.
1399	17	In the report's recommendations at paragraph 8.6, it states; "As regards a further 10-15 hectare allocation in this vicinity, two potential sites, south of Worksop (W8) and appraisal process. Whilst both sites would represent extensions into the open countryside, the former site, W8, is considered the better site due to its more even topographic relationship to the urban area of Shireoaks. The need to develop part of this large site would be more pressing should Gateford Common 's progress be further stalled by one the site's high score as a quality employment location (independently assessed in the ELCS), combined with its excellent relationship to the existing urban area, that makes a high quality, mixed use, sustainable development.
1399		The settlement of Shireoaks enjoys easy access to the wide range of services and facilities available in Worksop. Worksop town centre is some 4 kilometres to the south-e connections are available including regular bus and rail services. The half hourly Stagecoach East Midlands Service 7/7a provides connections to Worksop town centre. Shi Worksop and also Sheffield and Lincoln. The Sustrans cycle route also provides largely traffic free connections to Worksop town centre along the Chesterfield Canal.

1399	19	Shireoaks is well located in relation to existing areas of employment at Shireoaks Business Centre and at Gateford Common. Mixed use development of the site will also p opportunities.	
1399	20	Development of the site also provides the opportunity to allow for the expansion of St Luke's Primary School if required to meet needs arising from development in the a with access from Brancliffe Lane, by providing a new access to the school from the new development.	
1399	21	Criterion 1: Is the Local Community Supportive of the Development of the Site? The potential for a mixed use development on the site is set out as one of the options in Ne will review responses to the consultation document and seek to engage with Shireoaks Parish Council and the local community to explain our proposals for the site is shead of the Council's assessment of sites for inclusion in the Preferred Options Document. Responses to any consultation undertaken will be made available to officers. Criterion 2: Will Development of the site be compatible with existing and/or proposed neighbouring land uses? The proposed layout for the site will place the proposed properties and the primary school. The area of employment will be located adjacent to the A57 with an appropriate buffer between the new housing and employment and criterion 3: Will the site help to deliver economic development opportunities? The Core Strategy requires the provision of a further 48 hectares of employment land at V only been 0.16 hectares of employment land developed since 2010 and only 0.96 hectares are committed for employment uses. There is therefore a critical need to brin earliest opportunity to address these shortfalls. The site will deliver some 13.9 hectares of new employment land in a location attractive to business with good connectic	
1399	22		
1399	23		
1399	24	The Employment Land Capacity Study assessed the site and concluded that it was an attractive site for employment development with a willing developer.	
1399	25	Criterion 4: Will the site result in the loss of best and most versatile agricultural land? The Employment Land Capacity Study, January 2010 identifies the site as consisting of	
1399	26	Criterion 5: Will the site impact on a water source Protection Zone? The Water Cycle Study, January 2011 shows the site falling within the less sensitive zone 3 total catchr	
1399	27	Criterion 6: Will the site impact negatively on Landscape Character? The site falls within Policy Zone 08. Shireoaks located within the Magnesian Limestone Ridge landscap Character Assessment places the zone in the 'create' landscape character zone. The Assessment identifies the area as visually significantly interrupted with a very weak function overall. A very weak sense of place combined with moderate visibility results in very low landscape sensitivity for the zone.	
1399	28	The development provides the opportunity to provide a strengthened northern landscape edge in association with the proposed development to soften views of the nortl north. This landscaped edge could provide improved areas for informal recreation.	
1399	29	Criterion 7: Will the development detract from or enhance the existing built character of the settlement or neighbourhood? Development of the site including a new lands enhance the existing built character in the area where the northern edge of Shireoaks presents a relatively prominent feature in views from the north.	
1399	30	Criterion 8: Will the development detract from or enhance the existing Green infrastructure of the settlement or neighbourhood? An existing public footpath runs to the v providing a connection to the wider footpath network to the north of the site. A small footpath runs along the southern site boundary connecting to the A57. Through nev proposed housing and new buffer landscaping along the northern site boundary, there 1s scope to enhance the existing green infrastructure in the area.	
1399	31	Criterion 9: Are there identified and unresolved constraints to the delivery of the site? There are no physical or site ownership constraints that would restrict the developr forward development proposals at the earliest opportunity to help address current shortfalls in employment and housing land supply.	
1399	32	The topography of the site is gently sloping and would not represent a constraint to development. Initial discussions have been held with Nottinghamshire County Count Revisions to the A57/B6041/Woodsetts Lane roundabout are proposed to provide a new access to the site which would incorporate a segregated left turn lane northbol proposed employment area would be provided from this revised roundabout. The revised junction arrangements show the potential to provide a toucan crossing facility investigated further as part of work on a full Transport Assessment for the site. Access for the housing element would be from a separate point of access from Shireoaks	
1399	33	The assessment of the Land at Shireoaks Common shows that it represents a sustainable development opportunity that scores well against the assessment criteria set ou mixed use development opportunity to provide new areas of employment and housing well related to the existing settlement form.	
1399	34	The site and its context have been subject to a number of related landscape character studies emanating from the National, County and Local levels. The Bassetlaw DC Lar recognises the flat topography: views to the north; enclosure to the south and open arable farmland with little evidence of field boundaries. It describes the landscape cor including the A57 and the scrapyard (Fox Covert Dismantlers). It further describes the area as visually significantly interrupted. It has a weak sense of place, which combine very low landscape sensitivity. Landscape actions include creating new hedgerows and enhancing tree cover and landscape planting generally to create increased visual ur woodland will contain and soften built development.

1415		There will be a significant loss of amenity
1415		The local infrastructure will not cope with and occupants of the new housing would have to drive a significant distance for shops, schools, doctors and other facilities.
1415	5	There are more appropriate areas of land within the existing Retford town boundaries for housing.
1415	6	I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.
1416		The current Southern Boundary to Retford is well defined and provides a consistent and appealing entrance to the town and this would be lost by these developments.
1416		It is important to maintain a distinctive boundary between the urban area and the open agricultural land and the current town limit doers precisely that.
1416		There will be a significant loss of amenity
1416		The local infrastructure will not cope with and occupants of the new housing would have to drive a significant distance for shops, schools, doctors and other facilities.

1420	6	I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.
1421	1 1 1	Vehicular access remains an on-going and to date unresolved problem primarily resulting from only 2 existing options, both T junctions onto busy B roads serving commute villages of Carlton-in-Lindrick, Langold and Costhorpe. Both junctions continue to be unfit for purpose given current traffic load between the hours of 8 and 9am leading to
1421	2	Safety hazards including bus stops on both sides of B6041, additional busy T junctions serving further housing estates and a traffic light crossing, all of which prove challeng in excess of 40mph.
1421	2 1	Existing proposals fail to address this realistically stating that any additional use of vehicles will be limited by 'prioritising people not cars' with the study claiming a 7% shift undoubtedly inaccurate with constant traffic congestion at peak times given that this is a critical outbound route for most people who live on the Ashes Park Estates.
1421	4	Current roundabout provision has already resulted in several minor road traffic accidents both related to existing usage and road condition surfaces in addition to poor and
1421	5	The large residential and nursing home for both older people and younger with physical disabilities also requires quick, easy and safe access at all times not only to promot emergency medical treatment.
1421	6	Existing school provision within the estate would undoubtedly require expansion resulting in a further increase of vulnerable pedestrians.
1421	7	Whilst we appreciate it may be easier and cheaper to add to an existing development, we are concerned at the proposed time duration and consequent disruption. Gatefo unpredictable losses of electricity and water supplies despite utilities having prior knowledge of demands suggesting planning agreement did not require any consideration

1446	1	I have received a copy of the preliminary site plan with regard to the above development. My comments are: 1) Gringley already has a major development at Minster View population when the infrastructure of the village is limited.
1446	2	2) An important characteristic of the village is the narrow lanes and grassy verges. Low st is particularly narrow - further development will be detrimental to the lane and d
1446	3	3) This area of land was originally designated as "outside the village envelope". Areas "outwith the envelope" were intended to be protected from development in order to within the village - a unique features of the village.
1446		This area has always been agricultural land.
		4) Despite the recommendations of the local authority with regard to protected areas, a planning application was lodged for development of this land. It appears that beca
1446		officers came to identify areas for future development to meet housing development targets, this land was identified as being suitable. Areas not affected by the planning
		south of Laycock Avenue. The selection process appears to be contrary to the planning policies.
1447	1	The current Southern Boundary to Retford is well defined and provides a consistent and appealing entrance to the town and this would be lost by these developments.
1447	2	It is important to maintain a distinctive boundary between the urban area and the open agricultural land and the current town limit doers precisely that.
1447	3	There will be a significant loss of amenity

1480	4	The local infrastructure will not cope with and occupants of the new housing would have to drive a significant distance for shops, schools, doctors and other facilities.
1480	5	There are more appropriate areas of land within the existing Retford town boundaries for housing.
1480	6	I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.
1481	1	I have recently viewed a proposed development plan of six houses to be built at the rear of the bungalow on Low Street, Gringley. It is my opinion that this is an ideal smal
1481	2	Being situated well away from the roadside and behind an area, designated for landscaping.
1481	3	It would provide a large 'green area' to the front of the site, with the building to the rear being barely visible from the road .
1481	4	The village would suffer no loss of amenity what so ever, as the site is so well hidden. I doubt that 99.9% of residents have ever seen the proposed site.
1481	5	Development here would stop any spreading or enlargement of the village boundary.
1481	6	A village should always have a degree of development in future years, and while I believe a large scale of housing should not be made, this small proposed development lik
1482	1	REMOVED
1483	1	I do not object to houses being built in Elkesley, as long as we do not get too many. 12 at the most.
1483	2	My reason being, 12 more would mean at least 24 more cars, as most houses have two cars.
1483	3	The drains in this village cannot take the waste now. We sometimes get raw sewage in our gardens.
1483	4	Very poorly kept roads. There are a lot of potholes.
1483	5	There is no Post Office or Doctor's surgery. Only one village shop which is very good but could not provide for a lot more.
1483	6	Hopefully OAP bungalows would be nice for Elkesley's residents.
1484	1	General Flood Risk Comments - Both Planning Policy Statement 25 (PPS 25) and the draft National Planning Policy Framework seek to ensure that new development is no climate change. This is achieved by Local Plans applying a sequential, risk-based approach to the location of development so as to avoid flood risk to people and property process for applying the flood risk Sequential Test to site allocations is set out in Figure 4.1 of the PPS 25 Practice Guide (Page 88) and we expect Bassetlaw District Council potential site allocations. If following application of the Sequential Test it is not possible, consistent with wider sustainability objectives, to allocate all development in are may be appropriate to apply the Exception Test. We welcome the opportunity to discuss with Bassetlaw District Council issues concerning application of the flood risk Sec be aware that the governance of flood risk is currently changing as the various parts of the Flood and Water Management Act 2010 are enacted. Under the new ar competent authority for main rivers, such as the River Trent, and for reservoirs. Nottinghamshire County Council has become the Lead Local Flood Authorities (LLFA) for including surface water, groundwater and ordinary watercourses. Nottinghamshire County Council has prepared a Preliminary Flood Risk Assessment which will form Strategy. We advise that you liaise with Andy Wallace, Flood Risk Manager at Nottinghamshire County Council (Tel: 0115 9774590) regarding the new duties and res preparation of the emerging Site Allocations Plan.

1484	6	Site Ref W13 - Allocating this potential site for employment uses may be contrary to Policy DM12 of the adopted Bassetlaw Core Strategy due to the site being located allocation is bounded by the River Ryton to the south and the Chesterfield Canal to the north, with an Ordinary Watercourse flowing from north to south through the m Flood Zone 3 to the south and Flood Zone 1 in the northern area of the site. According to the Bassetlaw Strategic Flood Risk Assessment (SFRA), a Functional Floodplain, which is afforded the highest protection against development. Therefore, only water compatible uses are appropriate on these parts of the site. River Ryton poses a significant risk to a large proportion of the site, as shown in the SFRA. But also, the Ordinary Watercourse poses as a high risk, as the catchment of t the north (SK5754580230) and also there is an overflow weir from the canal. Thus, significant flows could be experienced along this un-modelled watercourse. Drawing N due to surface water runoff in extreme events. This shows a large proportion of the site to be inundated to a depth in excess of 1m. Further adding to the significant flow the River R prior written consent is required for any works within 8 metres from the top of bank. We may wish for the 8 metres strip to be kept free of built development in order essential maintenance and flood risk management work. This should be incorporated into development layouts and taken into account when making assumptions at accommodated on this site.	
1484	7	This potential site allocation is also underlain by a Secondary B Aquifer and lies within a Source Protection Zone 3 for a Public Water Supply. Development of this site sho and environmental assessment.	
1484	8	Site Ref 4 – Land East of Worksop - The southern part of this potential urban extension is located within 250m of Worksop Wastewater Treatment Works (WwTW). We proposing to build and operate an anaerobic digestion facility on or adjacent to the WwTW. Please note that permitted biowaste operations, such as the proposed a exclusion zone to nearby sensitive receptors, such as housing and places of work, as a precaution against the risk of bioaerosols. There may also be odour issues from the with your Environmental Health Officer to discuss the implications of the proposed anaerobic digestion facility on the proposed urban extension. It may be that this iss includes development on the majority of the site.	
1484	9	Site Ref 14 - This potential site allocation is underlain by a Secondary A Aquifer and lies within a Source Protection Zone 3 for a Public Water Supply. Given the former u to cause pollution to the groundwater resource, which will require careful consideration and environmental assessment. There is also a historic landfill within 250m of the groundwater resource which will require careful consideration and environmental assessment. There is also a historic landfill within 250m of the groundwater resource.

1484		Site Ref 195 - Allocating this potential site for housing may be contrary to Policy DM12 of the adopted Bassetlaw Core Strategy due to the site being located within an Watercourse flows from east to west across the site. At the western extreme of the site, there is a modelled flood risk from the River Ryton, backing up along this water require careful consideration and a site-specific hydraulic model of the Ordinary Watercourse will be required. Please note that this potential site allocation does not be River Ryton or the Ordinary Watercourse. Therefore, any development or raising of land levels within the floodplain will need to be compensated for by the lowering of currently outside, but adjacent to, the floodplain. We recommend that there is no additional culverting of the watercourse. If access is required over the watercourse, the also recommend that a green corridor is provided along this watercourse, which offers biodiversity and amenity opportunities, whilst also allowing any emergency a removal of blockages.
1484	25	Site 218 - There are no particular environmental constraints within our remit impacting upon this site.
1484	26	Site Ref 343 - There are no particular environmental constraints within our remit impacting upon this site.
1484		Site Ref 348 - Unfortunately we couldn't locate this potential site allocation on the Worksop plan.
1484		Site Ref 371 - There are no particular environmental constraints within our remit impacting upon this site.
1484	29	Site Ref 374 - Unfortunately we couldn't locate this potential site allocation on the Worksop plan.
1484	30	Site Ref 561 - This potential site allocation is predicted to be isolated in a flood event, known as being a 'dry island', and occupants may be cut off from the surrou consideration will need to be given to whether it is appropriate to allocate this site for housing and if safe access and egress can be provided, including consideration of along the access and egress route to an area completely outside of the floodplain. This site is located immediately adjacent to the River Ryton, which is designated as a consent is required for any works within 8 metres from the top of bank. We may wish for the 8 metres strip to be kept free of built development in order to safegua maintenance and flood risk management work. This should be incorporated into development layouts and taken into account when making assumptions about the amo this site. This potential site allocation is also underlain by a Principal and Secondary Aquifer. Given the former uses on-site, there is potential for development to cause will require careful consideration and environmental assessment.
1484	31	Site Ref 570 - There are no particular environmental constraints within our remit impacting upon this site.
1484	32	Site Ref 1 - There are no particular environmental constraints within our remit impacting upon this site.
1484		Site Ref 3 - This potential site allocation may be at risk of flooding. An un-modelled Ordinary Watercourse flows from south to north through the site. Therefore, flood within a site-specific Flood Risk Assessment. Please note drawing no. 2008s3509-060 from the Bassetlaw Strategic Flood Risk Assessment, which shows that there is sign run-off in extreme events within the western area of the site. The Ordinary Watercourse is just upstream of the Retford Beck, designated as a Main River. Retford Beck I downstream, therefore it is important that any development taking place on this site does not exacerbate downstream flooding. We recommend that surface wat practicably possible, and below Greenfield runoff rates. Please liaise with your own Drainage Engineer for further comment. We recommend that there is no addition required over the watercourse, then a clear span bridge should be utilised. We also recommend that a green corridor is provided along this watercourse, which offers be also allowing any emergency access to the watercourse for maintenance or removal of blockages.
1484	34	Site Ref 6 - Allocating this potential site for housing may be contrary to Policy DM12 of the adopted Bassetlaw Core Strategy due to the site being located within an area Zone 2 from the adjacent Canal and a site-specific Flood Risk Assessment should consider the risk of flooding from the Canal and local sources.
1484	35	Site Ref 7 - Allocating this potential site for housing may be contrary to Policy DM12 of the adopted Bassetlaw Core Strategy due to the site being located within an area Zone 2 from the adjacent Canal and a site-specific Flood Risk Assessment should consider the risk of flooding from the Canal and local sources.
1484	36	Site Ref 10 - This potential site allocation is underlain by a Principal Aquifer and lies within a Source Protection Zone 3 for a Public Water Supply. We hold records of con site from the former use of the land. Development of this site has the potential to cause pollution to the groundwater resource and will require careful consideration and

	no additional culverting of the watercourse. If access is required over the watercourse, then a clear span bridge should be utilised. We also recommend that a green corri offers biodiversity and amenity opportunities, whilst also allowing any emergency access to the watercourse for maintenance or removal of blockages. Also, an a incorporating a green corridor, should be provided.
40	Site Ref 41 - This potential site allocation is located outside the floodplain (Flood Zone 1). However, there are Ordinary Watercourses located around the southern and eas confirm whether this Ordinary Watercourse is under the control of the River Idle and Ryton Internal Drainage Board. The risk of flooding from this source should be care take place within the associated floodplain. We recommend that there is no additional culverting of the watercourse. If access is required over the watercourse, then a recommend that a green corridor is provided along this watercourse, which offers biodiversity and amenity opportunities, whilst also allowing any emergency access to of blockages. Also, an appropriate easement from the watercourse, incorporating a green corridor, should be provided.
41	Site Ref 46 - Allocating this potential site for housing may be contrary to Policy DM12 of the adopted Bassetlaw Core Strategy due to the site being located within an are the site is immediately adjacent to Flood Zone 2 from historic flood events. Unfortunately, we do not hold any detailed flooding information for this site. Therefore, required to consider the issue of flood risk to the site.
42	Site Ref 51 - This potential site allocation is located outside the floodplain (Flood Zone 1). However, there are Ordinary Watercourses abutting the northern and eastern be Watercourses are under the control of the River Idle and Ryton Internal Drainage Board and thus an appropriate easement maintained. The risk of flooding from this s development should take place within the associated floodplain.
43	Site Ref 52 - There are no particular environmental constraints within our remit impacting upon this site.
44	Site Ref 53 - There are no particular environmental constraints within our remit impacting upon this site.
45	Site Ref 58 - There are no particular environmental constraints within our remit impacting upon this site.
46	Site Ref 69 - Allocating this potential site for housing may be contrary to Policy DM12 of the adopted Bassetlaw Core Strategy due to the site being located within an area Zone 2 from the adjacent Canal and a site-specific Flood Risk Assessment should consider the risk of flooding from the Canal and local sources. The site is also located u Ordinary Watercourse flows through the site, which is likely to join to this watercourse via a culvert. This should be investigated in a site-specific Flood Risk Assessment appropriate easement of the watercourse and culvert (if confirmed). Retford Beck has a high level of flood risk associated with it downstream, therefore it is important the does not exacerbate downstream flooding. We recommend that surface water discharge rates be restricted as high as is practicably possible, and below Greenfield runo Engineer for further comment.
	Site Ref 70 - Allocating this potential site for housing may be contrary to Policy DM12 of the adopted Bassetlaw Core Strategy due to the site being located within an are the site is immediately adjacent to Flood Zone 2 from historic flood events. Unfortunately, we do not hold any detailed flooding information for this site. Therefore, required to consider the issue of flood risk to the site. This potential site allocation is also underlain by a Principal Aquifer and lies within a Source Protection Zone 3 for contamination associated with some parts of the site from the former use of the land. Development on this site has the potential to cause pollution to the groundwater re and environmental assessment. The site also lies within 250m of a historic landfill.
48	Site Ref 71 - This potential site allocation is also underlain by a Principal Aquifer and lies within a Source Protection Zone 3 for a Public Water Supply. Given the former use to cause pollution to the groundwater resource and will require careful consideration and environmental assessment.
49	Site Ref 309 - Allocating this potential site for housing may be contrary to Policy DM12 of the adopted Bassetlaw Core Strategy due to the site being located within an are the site is immediately adjacent to Flood Zone 2 from historic flood events. Unfortunately, we do not hold any detailed flooding information for this site. Therefore, required to consider the issue of flood risk to the site.
50	Site Ref 336 - There are no particular environmental constraints within our remit impacting upon this site.
51	Site Ref 342 - Allocating this potential site for housing may be contrary to Policy DM12 of the adopted Bassetlaw Core Strategy due to the site being located within an are Risk Assessment shows that this potential site allocation is affected by flooding from the Retford Beck and the River Idle in a 1 in 1000 year event (Flood Zone 2). The Retfor flows in culvert along the northern boundary of the site. If following investigation into the flood risk issues, this site is to be allocated for housing then the opportunity sh where practically possible, in accordance with Policy DM12 of the adopted Bassetlaw Core Strategy. As the Retford Beck is designated as a Main River it means that our provide the top of bank. We may wish for the 8 metres strip to be kept free of built development in order to safeguard our access to the Retford Beck management work. This should be incorporated into development layouts and taken into account when making assumptions about the amount of housing that can be acc

1484	221	Site Ref 547 - There are no particular environmental constraints within our remit impacting upon this site.
1484	222	Site 4 - This site is also underlain by a Principal and Secondary Aquifer and lies within a Source Protection Zone 3 for a Public Water Supply. There are two groundwater a will need to be considered and protected during any development of this site.
1484		Site Ref 8 - There are no particular environmental constraints within our remit impacting upon this site.
1484	224	Site Ref 9 - This potential site allocation may be at risk of flooding. An un-modelled Ordinary Watercourse is located along the eastern boundary of the site. The risk of flooding It is our understanding that this watercourse enters a culvert at SK5689379036, and re-emerges at SK5707179161. No development should be located on top of the orthogen a culvert survey detailing the location of the culvert should be undertaken. Culverts increase the risk of flooding due to blockage and thus this too shoul Assessment. If following investigation into the flood risk issues, this site is to be allocated for housing then the opportunity should be taken to remove the existing culver with Policy DM12 of the adopted Bassetlaw Core Strategy. We recommend that there is no additional culverting of the watercourse. If access is required over the wat utilised. We also recommend that a green corridor is provided along this watercourse, which offers biodiversity and amenity opportunities, whilst also allowing ar maintenance or removal of blockages. This appears to be lost along the right bank.
1484	225	Site Ref 11 - Allocating this potential site for housing may be contrary to Policy DM12 of the adopted Bassetlaw Core Strategy due to the site being located within an ar River Ryton floodplain. From comparing the proposed site boundary to the Bassetlaw Strategic Flood Risk Assessment, we believe that the northern boundary of the site (Functional Floodplain) event. Please note that this potential site allocation does not benefit from any formal flood defences. Therefore, any development or raising of la compensated for by the lowering of an equivalent area and volume of land that is currently outside, but adjacent to, the floodplain.
1484	226	Subsequent to our representation on the Site Allocations Issues and Options consultation, I've been made aware that potential site 9 in Worksop is adjacent to land the being suitable for holding back floodwater as a way of reducing the risk of flooding to Worksop. Please find attached a copy of a report published in 2008 looking at poter
1404	220	(Drawing Number B1044600/Report/02) indicates the area of potential floodplain storage adjacent to Site Ref 9.
1485	1	The current Southern Boundary to Retford is well defined and provides a consistent and appealing entrance to the town and this would be lost by these developments.
1485		It is important to maintain a distinctive boundary between the urban area and the open agricultural land and the current town limit doers precisely that.
1485		There will be a significant loss of amenity
1485	4	The local infrastructure will not cope with and occupants of the new housing would have to drive a significant distance for shops, schools, doctors and other facilities.
1485	5	There are more appropriate areas of land within the existing Retford town boundaries for housing.
1485	6	I do however support the expansion of industrial land on North Road through sites 51 and R7 as this will help further strengthen the Randall Way employment area.
1486	1	The current Southern Boundary to Retford is well defined and provides a consistent and appealing entrance to the town and this would be lost by these developments.

1543	11	Question 11 The applicant feel that here again flexibility is probably the best approach whereas in the past specific areas or sites needed to be designated . This was as a re	
	11	carried out.	
15/12	12	Today when taking into account the industrial scene, Hi-Tech industries seem to both future, such uses could be located in residential areas. An example of such a location	
1543	12	located in Hallcroft, Retford.	
1543	13	Yes Please refer to Question II above.	
1543	14	The applicants support the Council's philosophy on the provisions of open space. The applicants contend that without protection the areas are vulnerable to change. Having	
10-10		development to be successful as already mentioned, well designed public spaces suitably managed should form part of any development proposal	
1544	1	I do not support the above sites being allocated for any type of development. 1) Both the above sites are outside the original 2010 Planning Boundaries agreed by the Cour	
	_	Government Inspector	
1544	2	Independent Government Inspector, who also in his reply stated Greenfield sites should only be considered as a last resort: Take these out of the plan and you are still left	
4544		the requirement needed	
1544	3	2) Both above sites at present have no access. Any access would involve a major road junction or roundabout to be configured to allow the proposed new traffic	
1544	4	This could only be built at the bottom of the dip with Thievesdale Lane and Blyth Road and traffic coming from town at present cannot be easily seen from the present inte	
1544	4	conducive to more traffic; it is not edged, is very dark due to trees and needs constant attention to drainage and pot holes. It is also an accident black spot area with many	
1544	5	3) Site 4/W9 large copse of trees in the middle and it has been established that many have Protection Orders.	
		During the last month a copse and pond have been removed and filled in. Prior to this there was an active bird population with at least 12 varieties of birds regularly as well	
1544	6	present this has been reduced greatly and would totally disappear with the removal of the copse. This has obviously impacted on the ecology already and to reduce good q	
		will make this worse and destroy the landscape.	
	_	4) In terms of the usage of the land to build up to 3500 houses on the two sites would add to a large housing area and produce what would be only described as an 'Urban'	
1544	7	the population of Worksop	
1544	8	In my opinion would be on the wrong side of Worksop in terms of employment opportunities.	
1544	9	At the same time site 39/W10 is now regarded as a public amenity and any day of the week is busy with adults and children pursuing all sorts of activities from hang gliding	
1544		areas for dog walking. Also major fairs and events are frequently held as well as football facilities.	
1544	10	5) You will also appreciate that there is no infrastructure at present on these Greenfield sites. For sites of this size a major cost factor would be incurred. A major access wo	
1344		encountered locating this to ensure public safety.	
1544		At present time the water supply in the estate next to site 4/W9 has to be flushed frequently to clear the build up of sediment and chlorine.	
1544	-	At the same time the sewerage pumping station at the bottom of Thievesdale Lane is regularly pumped out by tankers because it cannot cope on its own.	
1544	13	Finally the BT unit is not adequate to supply a good quality broadband service and would need major upgrading.	
		6) It would appear that the surface water, sewerage is not adequate to cope as in the past several years mud and water has flowed down the field in the site 4/W9 and floc

1644	1	Notwithstanding the stated intention not to rank sites and the subsequent comments regarding the need to take account of mitigation measures, the application of the criteria all criteria are equal (or all green scores are equal). This should not be the case, as the deliverability of a site will be impacted to a differing degree by each of the criteria. I uses will have a greater potential impact on the development of a site, than whether or not the site results in the loss of best and most versatile agricultural land, particul greenfield sites will be broadly comparable. In these circumstances, It IS considered that the application of a criteria based approach will result in a spurious degree of acc to be undertaken. One of the results of a criteria based approach is reflected in paragraph 2.17 of the Issues and Options Paper, which states that 'there may well be seve in which case it will come down to a matter of judgement as to which are the most suitable, taking particular note of local opinion. It is therefore essential for the scoring provide specific comments on each of the proposed criterion below:
1644	2	While the importance of community engagement, particularly in the context of the emerging "localism" agenda, is recognised, it is considered that this criterion is too sub particular concerns relating to: The definition of the community. This is particularly important for sites within and adjoining Worksop which has no parish/town council; fr and landowners wishing to identify, not only the key issues in a community, but also the key players. Without such an elected body, it is more difficult to identify the com acknowledged that there may be a Residents Association or Action Group (frequently established to oppose the development being promoted) but these tend to be single parties, with legitimate views, being heard
1644	3	The definition of strong community support. On the basis that, say, 75% of the local community support the development does this mean that 75% of those who have eng the local residents? If the latter, how wide a catchment is drawn to determine the extent of the local community? These questions might be regarded as rather extreme b guidance it is very difficult to classify the level of community support, in the manner set out in paragraph 2.25. As discussed with the Council, LIH is intending to undertake Council's consultation process has been completed.
1644	4	At this stage of the process LIH consider that this criterion should be deleted and included at a later date when all involved parties have had an opportunity to consult with each individual scheme.
1644	5	This is an important criterion to be taken into account when assessing a site's suitability for development because of the potential impact of noise, odour, light and/or priv properties. Such considerations will also have an impact upon the deliverability of new housing as prospective purchasers are frequently deterred from living close to un-r that a number of sites which are identified as potential housing or mixed use sites are located either adjacent to or within the vicinity of industrial uses and therefore issue Given the importance of ensuring compatible neighbouring uses for residential development, it is considered that greater weight should be placed on this criterion when allocations. This criterion also needs to be applied when assessing the suitability of sites for a mix of uses as expanded upon in response to Question 5
1644	6	In assessing this criterion, it is important to recognise that job opportunities can and will be provided as part of a development, even if they are not classified as an employ primary school and community facilities, to be provided as part of the residential development, will employ a significant number of people. Furthermore, the construction employment sectors but is frequently not recognised as such because the jobs which it provides are transitory. Even so, comparatively large sites are likely to be developed supply of jobs over this period and therefore making an important contribution to the local economy; a point which was recognised in the Government's Plan for Growth successful construction industry is vital for sustainable growth. It is recognised that jobs in the construction industry are not always taken by local people. In order to addr can be entered into to ensure that local people can have priority access to those jobs associated with the site's construction. Similarly, on-site training schemes for young, therefore requested that in assessing a development's compliance with Criterion 3 all on-site job opportunities are positively assessed.
1644	7	It is considered that this criterion is too narrow. The Agricultural Land Classification system assesses the quality of agricultural land which should be taken into account alo namely those stipulated in paragraph 28 ofPPS7: biodiversity; the quality and character of the landscape; its amenity value or heritage interest; accessibility to infrastructure viable communities; and the protection of natural resources, including soil quality. Although some of these criteria (Landscape Character and Green Infrastructure) are incomest of these considerations are not. It is therefore considered that Criterion 4 should be amended to enable the assessment of a wider range of sustainability criteria wh wording of Criterion 4 to state: How will any adverse effects on the environment be minimised? The scoring of this criterion would then need to be amended to state: No measures can be incorporated some impact and/or some mitigation measures can be incorporated No measures can be incorporated to mitigate impact
1644	8	In view of the importance of water quality, LIH support this criterion

criteria based methodology still assumes that a. For example, compatibility of neighbouring ularly in an area where the competing ccuracy, inappropriate to the selection process veral sites in a settlement with the same 'score', ag process to be adjusted accordingly. We

1644	9	The Bassetlaw Landscape Character Assessment (LCA) indicates a landscape sensitivity varying between low, moderate or high for each of the Landscape Zones within wh cover broad areas that extend beyond the proposed SHLAA site boundaries and therefore the Bassetlaw Lea can only be used as a baseline reference to provide a general for each site. The Bassetlaw LCA does not identify the specific landscape features present on individual sites nor does it set out the relationship between each site and any Therefore we consider that the question 'will the site impact negatively on landscape character' cannot be answered simply by considering in which broad category ('creat site falls. Specific questions should be asked relating to the existing visual containment of the site, its landscape structure, its relationship to the settlement edge and remathere is scope to protect and enhance the existing landscape features with development. For instance Zones ML06 and ML07 are identified as being in the 'conserve' cate, that define Site 35 would ensure that appropriately designed development was very well contained thus significantly limiting the landscape effects on the wider landscape structure landscape where development may have far reaching negative impacts on an open countryside context, with many years needed for any associated new structural plantir the eastern edge of Work sop and development in this location (Site 4) would leapfrog this green edge into open countryside. It is therefore requested that Criterion 6 is r landscape character on a site-by site basis as it currently does not present a balanced assessment of landscape character in erms of development capacity. A site specific development have on Landscape Character? Development will not have significant negative impacts on Character: Development impacts on Landscape Character and can landscape Character and / or any negative impacts cannot be assigned to this question. The suggested rewording for Criterio development have on Landscape Character? Development
1644	10	LIH seeks clarification on how this criterion will be applied to greenfield sites
1644	11	Within this criterion, it should be recognised that the development of greenfield sites can enhance existing Green Infrastructure by improving accessibility to open spaces
1644	12	As noted in paragraph 2.39 of the Consultation Paper, any constraints will have been assessed as part of the SHLAA process. As the wording of this criterion is too broad to assessment for a site's suitability, it is considered that reference needs to be made to the SHLAA's findings. This is particularly important as there could be some constraint indicated on the SHLAA forms, others may be resolvable by the incorporation of negotiated mitigation measures. [In these circumstances, it would be inappropriate to wei if a site's constraints have been resolvable subject to the imposition of conditions, it should be assessed on the same basis as a site with no constraints
1644	13	Access and transport issues are such important considerations when determining a site's suitability for development that, at the very least, they merit a specific reference possible to take account of sustainable transport measures and the likely modal shift which will arise
1644		Yes, Lands Improvement Holdings (LIH) believes that Worksop should be allocated more homes than provided for in the (adopted) Core Strategy. For clarification purpose justification for additional employment land. At the Core Strategy Examination held in May 20 11, it was argued, on behalf of LIH that as Worksop was the District's princip Regional Centre, it should be accommodating 40% of the District's housing requirement rather than the 32% proposed. However, LIH is aware that having examined the emplan's apportionment was justified. He continued by stating, in paragraph 38 of his report, that although "the town could accommodate more growth this would require or Harworth Bircotes" and III his opinion there were insufficient grounds for advocating such a redistribution. In the circumstances described, it is not considered that there is required by the Core Strategy, if the Site Allocations DPD is to remain in general conformity with it. However, there is a separate issue which may necessitate a greater num required; namely, the need to acknowledge that the housing requirement is a minimum figure and to ensure that the requisite number of dwellings is delivered during the paragraph 23 of his report, "Experience would suggest that not all committed sites are likely to come forward for development and (that) this needs to be factored into ar the draft National Planning Policy Framework at paragraph 109, where it is stipulated that in order to boost the supply of housing, local planning authorities should "incluc housing sites all additional allowance of at least 20 per cent to ensure choice and competition in the market for land". The definition of "deliverable" is also pertinent to the stipulates that for sites to be deliverable they should not only be available now but there should be "a realistic prospect that housing will be delivered on the site within fin Bassetlaw, there is one very significant site –Harworth Colliery -which is the subject of an outline planning permission for up 090 residential units and

1644	15	Site 35, the land to the north of Gateford, should be allocated for residential development. In responding to this question and providing the justification for the site's alloc set out within the Issues and Options Consultation Paper has been considered, as follows:
1644	16	As discussed with the Council, LIH will be commencing its community engagement in 2012 which will be informed by the responses received to the consultation on the Iss has engaged Political Developments to inform future community and political consultation, as well as the strategy for community engagement as both the Plan and LIH's p the process to provide any indication of the degree of community support for the site's development. As outlined in response to Question I above, it is requested that this a fair and balanced assessment of competing sites, which are all at different stages of the planning process.
1644	17	L1H does want to take the opportunity provided by the Council to highlight the benefits which the development of the land north of Gateford would be able to offer the lo summarised as: A new primary school; A community hall and meeting room; Scope for the expansion of GP facilities; and, A comprehensive "Green Infrastructure" framew amenity facilities including a Community Allotments area and trim trail all within publicly accessible open space. The range of benefits and the juxtaposition of uses are sho which accompanies this representation; details of which are described in the relevant sections of text below.
1644	18	Yes; the site to the north of Gateford would be developed for residential purposes, with associated services and facilities. It adjoins the residential estate known as Gatefor compatible.
1644	19	A further factor when considering compatibility is that when the existing housing at Gateford was developed, it was approved with no community facilities apart from a tig of the development now being promoted as a housing allocation, it is proposed to provide a community hub incorporating a (site for a) primary school (with scope to prov to use the hall and meeting rooms, as well as the outdoor sports pitches). Space would also be provided to enable a GP 's surgery to be built, if required. This would be prov development, as shown on the masterplan accompanying this submission. This location would enable the new community facilities to be easily accessible to both the new assist the assimilation of the two communities to form a sustainable urban extension
1644		The land north of Gateford is also compatible with the Gateford Conservation Area which covers the western most field within the site being promoted. As can be seen fro proposed that this field, currently used for arable purposes, should be used for informal open space which will enhance and protect the character of the area. This is a key Infrastructure package
1644	21	A further neighbouring use, which has been taken into account in the formulation of the proposals for the land north of Gateford, is the adjoining woodlands which are de the notable flora that their habitats support. To establish the importance and sensitivity of the ecological interest an Ecological Assessment was undertaken by FPCR to inf to minimise any potential impact from the development on these sensitive woodland habitats, the ecological appraisal recommends the following measures which are sho the Green Infrastructure framework: A buffer of green space with a minimum width of 20m between the development and the designated sites. Reinforcement of the bou sites, in the form of additional planting to bolster existing gaps in the boundary hedgerow and the provision of appropriate fencing. Although the existing formal footpaths footpaths have been provided. However, a very comprehensive network of new footpaths and cycleways can be provided by the Green Infrastructure which encompasses
1644	22	The site will generate approximately 650-700 new households. The new residential population will generate new economic opportunities by increasing household spendin number of jobs during the housing development phase and as part of the community facility school
1644	23	In addition, LIH is willing and able to enter into a legal obligation with the Council to enable jobs associated with the construction of the site's development to be made ava applicants. Similarly, on-site training schemes for young unemployed people will be facilitated as part of the development
1644	24	Furthermore, the development of the site will result in an increase to the local population, which will have a beneficial impact on Bassetlaw District's annual Council Tax re
1644		In response to Question 1 above, it has been suggested that this criterion is amended, to address a wider range of sustainability criteria and the means by which any adver minimised. The criteria to be addressed are: biodiversity; the quality and character of the landscape; its amenity value or heritage interest; accessibility to infrastructure, v communities; and the protection of natural resources, including soil quality.
1644	26	Insofar as the agricultural land issue is concerned, the land to the north of Worksop is classified as Grade 3 agricultural land on the Defra plans
1644	27	None of the area to be developed, as shown on the accompanying plan, is within the Water Source Protection Zone, as defined by the Environment Agency. The southern the site is within the Water Source Protection Zone 3; however LIH has already accepted that no development would be appropriate on this part of the site because of its Area and consequently the proposed development will neither be in a Source Protection Zone, nor have an impact on it. This classification is in contrast to the majority of either residential or mixed use development and which are either in Zones 2 or 3.

1644	28	No, as confirmed by reference to the Landscape and Visual Appraisal prepared by FPCR in January 2010; a copy of which has previously been provided to the Council. For e and conclusions are set out below: The landscape character of both the wider and local landscape is contrasting and includes both urban edge uses and influences and ara landscape capacity to accommodate significant yet well planned and appropriate change. The scattering of historic buildings within their landscape setting to the south we Conservation Area, have been assessed as high landscape sensitivity
1644	29	However, it should be noted that Landscape Character, as addressed in the appraisal is not the same as determine which of the Landscape Character Zones the site is with The land north of Gateford is split between Zones ML06 (Carlton in Lindrick) and ML07 (Old Gateford Conservation Area) which are described as having 'moderate' and 'hig 'conserve' for both. Recent residential development has already been undertaken within Zone ML07. Both zones cover a wide area with Zone ML06 extending northwards the southern edge of Carlton-in-Lindrick. The character descriptions identify the zones as having a high percentage of woodland cover (25% for Zone ML06) and acknowlec woodland; "Views are generally limited to within the Policy Zone due to its wooded nature" (Zone ML06) and "Views into the Policy Zone ji-om both the 86041 and Owday slopes away ji-om a central high point and woodland/plantation blocks. Southward views are defined by the urban fringes of Worksop" (Zone ML07).
1644	30	The assessment identifies key landscape actions for Zones ML06 and ML07. These don' I preclude development but instead set out the landscape considerations should de sparsely settled and rural character of the landscape by concentrating new development around the existing adjacent settlements of South Carton, Carlton-in-Lindrick and existing field boundaries. Create woodland to contain and soften built development, preferably in advance new development
1644	31	The Bassetlaw LCA also sets out a series of Actions for conserving the existing landscape features including the setting to Gateford Hall. The FPCR landscape character asse this is easily achievable by utilising and reinforcing the existing landscape structure of the site and wooded periphery within a robust Green Infrastructure to contain the de of Gateford Hall through the provision of a sensitively Designed Community Park to the north. In the case of Site 35 significant existing peripheral woodland already exists In both cases, the site is in a "conserve" Landscape Character Zone and is therefore scored red. However, as stated in response to Question 1 above, it is considered that menhancements should be taken into account as part of the site assessment and site specific reviews undertaken on the landscape effects associated with individual develop character areas.
1644	32	Proposed development north of Gateford (Site 35) would complement and enhance the local built settlement character rounding off the settlement edge in this location. development demonstrate how the Gateford Conservation Area can be buffered and enhanced through provision of appropriate landscaping and how the existing Green I Site to link the settlement edge to the existing Green Infrastructure assets of the surrounding woodland. The development proposals would be contained by the woodland detailed design of the built development and use of materials can be undertaken to reflect the best elements of local built form through preparation of a Design and Access

1644	33	A green infrastructure masterplan for Site 35 prepared by FPCR demonstrates that the existing landscape features on and adjacent to the site can be retained and enhance to protect and enhance the setting of Gateford Conservation Area, with the Community Park offering significant biodiversity and recreational amenity benefits. The Basse identifies existing 'District level green infrastructure features' and makes a number of recommendations which have been taken into account in the formulation of the Gre proposed Green Infrastructure (GI) will extend and link the existing GI features identified adjacent to the site, providing a network of linked green spaces for the new neigi settlement benefits. The green spaces from the adjacent residential estates link into the GI proposed for the site. At the eastern corner of the site new balancing facilities and tree planting and areas of open water for biodiversity benefit. From the eastern corner a broad landscape buffer to the adjacent woodland areas will wrap around the development, providing informal recreational routes with additional trim trail health and fitness opportunities as well as a number of allotments. This buffer will link to th western field within the site. A new Community Park will comprise grassland and new tree planting of parkland character and include informal recreational trails and will conservation Area and Gateford Park. A series of formal play areas are proposed throughout the Green Infrastructure areas proposed on site, and the exact locations of the council. Within the proposed development area existing hedgerows will be retained, supplemented by avenues of formal tree planting, and these will provide green corrid heart of the scheme a new multipurpose community school and playing fields are proposed as a key focal point. The existing rights of way that pass through the site are u development and will be retained within green corridors. These form part of the enhanced landscape setting provided by the wetland area to the east and Community Par
1644	34	This question has been addressed, in the first instance, by reference to the 2010 SHLAA for the land north of Gateford (Site 35).
1644	35	There are three 'constraints' which have been resolved -listed building, conservation area and access -and three which continue to be 'identified' as potential constraints. T turn, the following points are made in justification of their reclassification as resolved constraints. The SHLAA form identifies "An Area of Archaeology". An archaeological been prepared by the University of Leicester Archaeological Services; a copy of which has previously been provided to the Council. This identified two areas within the site Nottinghamshire HER; one a find spot for a Neolithic axe and the other a series of crop marks. Although, it is acknowledged that there is potential for the site to contain an suffered from some plough erosion as a result of the arable use of the fields. The County Archaeologist has considered the report and concurs that plough damage will be of experience elsewhere, it is maintained that lower level archaeology, such as enclosure ditches, may be preserved and will require investigation. Discussions have been l been agreed that when a planning application is prepared, it will be informed by pre-determination work, undertaken In accordance with an agreed methodology statemed be recognised that the desk based assessment is sufficient to inform the allocations process and, consequently, "Archaeology" does not prevent the allocation of the site. development, as the requisite survey work will be undertaken in advance of a planning application's preparation. It is therefore requested that the Archaeology comments state RESOLVED
1644	36	The SHLAA form identifies a "Biological SINC". An ecological assessment of the site was undertaken in September 2011, which considered the potential impact of any dever Plantation, Nab's Ashes March, Nab's Ashes Plantation and Whipman Wood SINC sites, each of which has been designated on the basis of the notable flora that their habit Green Infrastructure; Biodiversity; Open Space and Sports Facilities from the adopted Bassetlaw Local Development Framework (LDF) which states: "Development propose will not adversely affect or result in the loss of features of recognised importance not identified as part of the existing Green Infrastructure network " Although a copy of the been provided to the Council, it is worth reiterating its findings as set out in paragraph 4.13 "The proposals for site design should therefore seek to minimise any potential Woodland habitats. This could involve a combination of the following: Maintenance of a buffer of green space between the development and the designated sites; SINC, Ancient Woodland sites. This could take the form of additional planting to bolster existing gaps in the boundary hedgerow and the provision of tall panel fencing. Ensi publically accessible footpaths is avoided, so that only existing formal footpaths are used. " Following an informal consultation Nottinghamshire County Council's Ecologist they are in general agreement with the recommendations of the ecological assessment. The size of the proposed site provides sufficient capacity to ensure that implemen will ameliorate any potential impacts to the sensitive habitats of the SINCs I Ancient Woodland. It is therefore requested that the Ecology comments section on the SHLAA to the incorporation of appropriate mitigation measures.
1644	37	Flood Risk -The SHLAA form notes that the "Site is identified as being within flood zone I"; the lowest flood risk zone and therefore not a constraint to development. The constraint are standard for any residential development of this size and type and are purely a means of securing a sustainable drainage system. LIH will commission the rest is therefore requested that the Flood Risk comments section on the SHLAA form is amended to state RESOLVED subject to an FRA Overall, it is considered that there are site.

1644	38	In response to Question I above, it has been stated that access and transport issues are such important considerations when determining a site's suitability for developme reference within Criterion 9; in this way it will be possible to take account of sustainable transport measures and the likely modal shift which will arise. WSP has prepared feasibility of the site's development in highways and transportation terms. This has been, undertaken by adopting a robust assessment methodology which has been agree the report and accompanying appendices has been submitted to the Council. WSP has confined that there are no critical transport issues that would prevent the successful subsequent Transport Assessment will fully demonstrate this conclusion, with improvements / mitigation measures proposed as necessary. As the proposals continue WSI to provide additional detail as required.
1644	39	It is not clear why the Council has limited this question to the mixed use sites rather than all of the sites which have been identified as potential development sites on Figu that mixed use sites are to be considered in preference to single use sites, although some of the options put forward for the mixed use sites are for single uses and even w not appear to provide an integrated form of development; as a consequence they are comparable to single use sites within the locality of other uses. In the circumstances considered that all potential development sites should be considered on the same basis.
1644	40	On 6 September 2011, detailed representations were submitted on behalf LIH to the Review of Bassetlaw District Council's Open Space Study. The opportunity presented reiterate that land adjacent to North Gateford access points should not be identified as open space
1644		LIH comments on the implications of the core strategy to the Review of the Open Space Study were: Core Strategy In submitting this representation, due consideration ha formulation of planning policy in respect of Public Open Space. In particular, LIH is aware that Policy DM9 of the Core Strategy, as proposed to be changed, in accordance vere recommendations, covers, inter alia, Green Infrastructure, Open Space and Sports Facilities and states: "Development proposals will be expected to demonstrate that the of open spaces and sports facilities. Exceptions may be made if the open spaces or facilities are identified as surplus to demand in a given location and that alternative pro improved facilities elsewhere would be preferable. "Further, the "protected open space" designations are to be removed from the Proposals Map.
1644	42	The implications of the Inspector's findings In paragraph 63 of his report, the Inspector referred to all of the open spaces and sports facilities within the District being ident stating that: "It is accepted that there is a need to protected open "pace and sports facilities in general terms in the plan. However, the identification of specific areas for p the selection of sites for development as part of the preparation of the SA DPD. This will ensure that appropriate levels of provision for open space and sports facilities are proposed development. "In the circumstances, it was considered inappropriate to undertake the consultation on the sites to be assessed as part of the Review of Bassetla assessment and subsequent selection of the sites to be allocated for development, unless it was subject to a clear caveat that a site's identification for assessment does no Protected Open Space. Exactly the same considerations apply at the Issues and Options stage -decisions cannot be made on the protection of open space in advance of de applied, it is a matter of particular concern to LIH that the land identified for assessment appears to be exactly the same as that which was shaded green on the submitted Open Space" and therefore no regard has been had to the Inspector's clear direction and consequent changes.
1644	43	The additional or displaced growth should be directed to Worksop, the District's principal town, for the reasons given in response to Question 2 above.
1645	1	I can confirm that the above matter was discussed at a Parish Council meeting held 15.02.12 and there are no comments to put forward at this stage of the process, considered with the process of the pro
1646	1	Bassetlaw introduction confirms that settlements specified as development locations were established at the Core Strategy Stage. This includes Rural Service Centres and that residential allocations in Rural Service Centres should be reduced below the modest 10% already identified.
1646	2	Bassetlaw introduction continues the theme referring to the "limited amount of new development <i>required</i> in these areas". Judgements on the amount of development have been the result of public consultation responses as opposed to a formal methodology (?) If correct, the word "required" is misleading. A range of facilities in Rural S from other settlements – school, sports facilities, pubs (x2), bridleways and woods indicating spare capacity.
1646	3	Why are residents of urban areas not asked what the appropriate level of development should be?
1646	4	Confirms that a range of sites submitted to the SHLAA have been disregarded because potential constraints numbered 1-19 cannot be overcome. The existence of Everto "may be suitable" however the effect of prejudicial questions referred to in the covering letter and the utilisation of those questions at Parish Council meeting 5.12.11 by question 70, makes the reader question what has changed in the context of site 296 (and Rural Service Centre allocations in general), between the initial SHLAA screening covering letter that the supporting evidence for promoting sites 296 and 453 as open space is "to be provided."
1646	5	This is unsatisfactory for 3 reasons: a) Without the open space supporting evidence, we as respondents cannot respond within the consultation period which closes 31st Ja
1646	6	b) Without open space supporting evidence, how was the open space judgement reached 5.12.11?
1646		c) Answers to prejudicial questions 67 and 68 could be used to support the open space argument (is this the "supporting evidence" currently awaited?) in which case the from public consultation and reading of Parish Council minutes, will have been manufactured. Not only are questions 67 and 68 prejudicial but the responses for the cons early Feb – almost 2 months after the open space assertion was made at Parish Council by Richard Schofield and publicised on the Parish Council website.

1646	8	RS seeks to validate prejudicial questions 67 and 68 at that meeting by stating that "when residents completed questionnaires outlining their preferred number of new dw not have had in their mind sites with planning permission where development was not visibly apparent". This is not a credible statement and disregards the 2 well-attend site promoters where 12 new units were clearly identifiable. The statement also disregards the withdrawn 2009/10 application on site 296 prior to the current consultatio clearly shown and local consultation occurred through the statutory planning process with virtually no objections from local people. Furthermore, the Corner Farm site ac as "visibly apparent". It is located on the A631/ High Street Corner and comprises a number of 3 storey buildings. Everton is a low turnover, close knit, sociable village with people ask about progress on the site regularly. Our assertion therefore is this: a) The "mean" 13 new unit number cited on page 89 is the number of new units Everton c accept over and above existing permissions. b) Any reduction in that number following the current consultation will be the result of prejudicial questions and availability o
1646	9	Confirms that "The Council will clearly support suitable applications for economic development over the plan period." This stance is welcomed since it clearly rectifies the
1646	10	Confirms methodology to be used for scoring employment sites. 1 and 2 scoring criteria are welcomed. Criteria 3 – is it more acceptable for residents in rural areas to tra that this criteria could be too harshly implemented. There should instead be a new criteria around "ability of the site to provide local employment."
1646	11	Reference to local opinion. Please see previous comments regarding prejudicial questions.
1646	12	Reiteration of Council support for economic development in Rural Service Centres. Good, thank you
1646	13	Level of local support – see previous comments ref: prejudicial questions
1646	14	Independent consultation held by Landowners. We have submitted our consultation responses to you, including raw data and not received acknowledgement
1646		Statement that independent consultation will not outweigh Council consultation processes. In view of what has occurred reference prejudicial questions, we expect this s
1646	16	Yes we agree with this criterion in the context of our own event and the BDC consultation event that occurred at Everton Village Hall November 2011
1646	17	Average of 13 new houses to 2028- Yes – probably plus site 453
1646	18	Small extensions and infill preferred to large extensions- Yes – probably plus site 453
1646		2 and 3 bed units plus bungalows preferred for open market- Yes – although bungalows unlikely in the Conservation area unless posing as cart shed. Shallow stair gradien
1646	20	Brownfield before Greenfield sites- Yes – site 296 is brown field farmyard
1646	21	Infrastructure concerns – school places, lack of post office or shop, lack of sewerage/drainage capacity. – no mention of traffic, congestion or parking issues. We are not as but would consider reed bed if need be. School Places – State education is an internal market. Analysis of the school role will show children from a wide range of settleme instead to Everton. My recollection is that the school did not appear to turn children away (?) but it is assumed that those living in the village of Everton are awarded pref 296 is unlikely to necessitate the use of the car. In short, good historic results plus (historic) longer than average school day have been a winning combination for Everton grammar places at secondary school are known to purchase homes close to river Trent/Lincs (Walkeringham, Beckingham et al) and then "cast back" to Everton Primary for those outside of County (Lincs) are assessed via distance from Gainsborough in addition to exam result if necessary ie: if 2 children sitting the entrance exam, pass, one live Trent/Lincs and there is a limit on places, the child closer to the Trent will have more chance of attaining a place. With more local children accessing, perhaps the school n those in villages with existing primary schools? If county deemed need for school extension, s106 contribution would be relevant. Shop – see later.
1646	22	Allotments desired thro CIL/S106- Yes - allotments could be provided through s106 along Mattersey Rd although it is believed that the Parish Council may have better site: s106 cemetery extension.
1646	23	School Extension desired thro CIL/S106- See above. Not up to us and would depend on cost. What does County say?
1646	24	Additional Play facilities desired thro CIL/S106 - We believe this requirement may have been satisfied through new play park
1646	25	Doctors Surgery desired thro CIL/S106 - Limited opening hours of Gringley surgery indicate that this provision may not be sustainable. Not up to us but likely to be very ex
1646	26	Shop/Post Office desired through CIL/s106 - Yes – happy to look at cross-subsidising farm-shop. Situation with Mattersey Post Office and sustainability unclear.
1646	27	Employment creating jobs required to support new housing development - See criterion 3 below.
1646	28	Affordable First-time buyers homes - Yes – willing to look at 2 beds or retaining some equity in new units. Local Authority Mortgage Support could be applied if available.
1646	29	Sheltered accommodation for the elderly - Difficult. Have contacted McCarthy Stone plus others who have no appetite in rural areas. Issue of revenue support. Willing to gadgetry would suffice if residents willing to consider service charge?

1646	30	At the rear of the document pg138, the Council underlines the importance of consultation by stating: "Where there are a number of sites in an area with similar attributes considerable weight will be given to local views as to which are the most appropriate sites for allocation." The anticipated (and perhaps intended?) result of questions 67 is that rear and acts will be some more critical of sites 200
1646	31	is that respondents will become more critical of sites 296. Yes we agree with this criterion
2010		
1646	32	Theoretically we agree with this criterion however we do not see how it can be implemented since landowners in Rural Service Centres have been prohibited from putting in the process (please see Appendix B). It leaves landowners in Rural Service Centres in something of a catch 22 whereby having been prohibited from putting employmer asked to demonstrate how our residential sites can bring forward economic development opportunities(?) In truth, viewed alongside flaws in the process identified in Appendix been prohibited from service Centres per se. Statements at 2.10 and 2.21 above go a long way in rectifying the situation however please to demonstrate proximity to urban areas and variation proposed therein.
1646	33	Please note that in withdrawn application on site 296, two live/work units were incorporated and can be reinstated in any future application. Please note applicant intent celebrating local heritage on Stonegate Farm, please note refused application on Stonegate Farm for rural diversification and employment data contained in design and ac Stonegate Farm site extends to 15 acres, with time extension, applicants can more comprehensively answer criterion 3 above.
1646	34	Yes we agree with this criterion
1646	35	Site 296/453 is unviable for agricultural production with 296 used as farmyard for many years. BDC have acknowledged this circumstance by altering the red line boundar crew yard to Corner Farm and by definition have acknowledged the obsolescence of the adjacent ground for cattle grazing.
1646	36	Explanation: having accepted the obsolescence of the built farmyard site (including cow sheds) in 2008 via planning approval on 19/07/00032, the red line boundary of the the crew yard to the cow sheds – this was rectified in 2010/11. Since the crew yard was a function of a grassland beef-finishing system with site 296 comprising the grazin ago; Bassetlaw planning has acknowledged the redundant nature of that land use.
1646	37	Yes we agree with this criterion.
1646		Site 296 will not impact on a water source protection zone.
1646	39	No we do not agree with this criterion in the context of Rural Service Centres on the basis that it encourages indulgent or "rose tinted" behaviours.
1646	40	The beef grassland finishing system referred to under criterion 4, having commenced 19 th century, was succeeded by commercial chicken sheds in the early 1960's before dumping ground owing to lack of economies of scaleand yet letter (Appendix A) from BDC Conservation Officer to site owner at 453 states: "there is merit in re orchard space"
1646	41	With this statement the BDC Conservation Officer is yearning for a land use not seen on site 296 since the century before last. Had the 19th century cattle grazers on site beef and required to stick with apple production on the basis that that land use had "spatial merit", the Conservation Officer might have had a stronger foundation on which chicken farmers on site 294 been directed to desist from producing chickens OR beef but required to rely instead on supporting their families with apple production on the basis that that land use had stronger foundation on which to rely instead on supporting their families with apple production on which to make his claim. The fact is that those farmers of yesteryear were not directed to do anything best use of resources and the necessity to do the same is truer today in the context of global agricultural markets, climate change predicted to take swathes of world agric (Oxfordshire Farming Conference 2012) and new house building at its' lowest level since 1920's (CLG data "Laying the Foundations").
1646	42	The late Robert Troop, father of site owners Kate Lucas and Jane Jones, son of chicken farmer Cicely Troop, first contacted Bassetlaw regarding non-viability of site 296 thr site drawn out of the settlement, in the local newspaper, without consultation. The current 2011/12 consultation process is the first time that a formal opportunity has be make the case for agricultural obsolescence and residential development on site 296. The landscape character of yesteryear perpetuating a non-viable use on a site surro major trunk road, is mere whimsy.
1646	//2	Tellingly, the Conservation Officer signs off his letter with the words "Clear as Mud!" intimating that he has been directed to make statements under the guise of conserva Eve Fawcett confirms that BDC Conservation Officer is most helpful and certainly not averse to sympathetic development on site 296. A number of his recommendations have been gratefully received and taken into account prior to our planning consultation event. The balance of power in Bassetlaw Planning is not comprehended. In othe professional service used to inform Planning Policy and Development Control thereafter. At Bassetlaw, Appendix A illustrates that policy and DC influence conservation w
1646	44	The issue at the nub of site 296 function is this: it is obsolete for agriculture and almost no-one can see it.
1646	45	The issue at the nub of site 296 character is this: it is surrounded by a 12ft (height) by 2 ft (width) Hawthorn Hedge on 2 sides aged in excess of 40 years (planted when rou by Everton residents besides 3 unfortunate households facing south on The Willows who overlook a farmyard dumping ground.

1646	46	At present the density, height and maturity of the Hawthorn Hedge means that when viewed north from A631 by pedestrians/cyclists/drivers/vehicular passengers, the or machinery, log piles, building material and sand dumps is provided by the access gate situated within the hedge. The by-passer would need to ensure that they looked into in order to understand the content behind the hedge. We therefore dispute that 294 should be protected as open space on the grounds of amenity and village character or private site beyond the hedge.
1646	47	At present the density, height and maturity of the Hawthorn Hedge means that when viewed east from Chapel Lane by pedestrians/cyclists/drivers/vehicular passengers, t machinery, log piles, building material and sand dumps is provided by the access to site 453 (where planning approval 19/09/00001 granted permission for an access road – clearly not viewed as such in 2009!). The by-passer would need to ensure that they looked into site 294 for the duration of site 453 access width in order to understand dispute that 294 should be protected as open space on the grounds of amenity and village character on the basis that no amenity is offered by this private site beyond the
1646	48	Until 2009 when a 6m x 21m x 21m steel reinforced concrete Dutch barn aged in excess of 30 years was taken down by R.Troop and Son, the passer-by on High Street wou 294. The Dutch Barn was taken down as part of a BDC approved move to a more appropriate site. With full implementation of residential approval 19/07/00032 sight line once again be fettered by boundary walls et al. We therefore dispute that 294 should be protected as open space on the grounds of amenity and village character on the l
1646	49	Furthermore, it is felt that Bassetlaw Planning Dept has misinterpreted the Latham's Village Character Appraisal for Everton. The study clearly evidences the historic village Street area to A631/High Street/Mattersy Road cross roads in the 18th century with Pub, Post Office, Artisan Cottages (Blacksmiths, Butchers), Chapels x 2 all gravitating to of the now-named A631. The interpretation here is that site 294 has not represented the village edge for some considerable time. In 2012, a significant percentage of Evert the A631 – why then manufacture a "rural fringe" along the A631 when the "fringe" rests elsewhere? The settlement boundary to Everton takes in the entirety of residen Lathams report concludes that site 294 appears therefore as a "missing tooth" having no benefit to the character of the conservation area as open space.
1646	50	Yes we agree with this criterion
1646		No we do not agree with this criterion in the context of Rural Service Centres. This is because they are located in rural locations comprising many 1000's acres of open cou etcRequiring green infrastructure beyond kiddie play park, sports field, cricket pitch, bowling green, tennis courts (whatever) is unnecessarily indulgent, represents poor households to enjoy a rural lifestyle/add "fresh blood" to settlements that by nature, have low turnover.
1646		Yes we agree with this criterion.
1646	53	Is new development on the proposed site able to benefit from renewable energy sources
1646	54	This question is not asked in Retford/Worksop/Harworth Bircotes/Carlton in Lindrick or Langold sections. Ie: Local residents in those urban settlements do not have the op should be awarded in the context of their own settlement not achieving adequate site allocations following downgraded housing targets arising from consultation. They a
1646	55	Yes we do agree that enough land should be allocated in Everton for at least 13 new houses.
1646	56	No our view does not change when considering the 9 dwellings commenced at Corner Farm. We understand that the 5 ACIS dwellings will not occur because they have no in bold? Clumsy attempt at manipulation.
1646	57	Preferred site for future development is 296 and 453.
1646	58	Sorry my plan is in black and white. Would not want to see Metcalfe sports field or park go. School should have room to expand if sports field was used more – could pusl
1646	59	Site 296/453 is surrounded by residential development on 3 sides with road on 4 th side. Residential development on site 296/453 will therefore be compatible with neight
1646	60	We feel confident of delivering a sympathetic and attractive gateway to Chapel Lane. Site 296 has the benefit of the Village Character Appraisal, layout designed by Lathar Oliver Scott. We have been out to public consultation on 3 sympathetic layouts with positive results.
1646	61	We are confident that latent comments regarding highways/access can be overcome in the knowledge that site 296 has 3 potential access/egress points. We are in close of to work together to resolve any issues. Comments available on the Parish Council website (minutes of 5.12.11 meeting) refer to congestion on Chapel Lane and High Street described and will forward the results of our own traffic survey. Increasing the number of pedestrians in the village as opposed to those using services from outside the vil considered positively.
1647	1	I would like to object to the proposed application for the development of 900 houses and a travellers site on the outskirts of Retford around the Welham Road/leverton Ro
1647	2	I feel there will be a considerable amount of additional traffic generated due to the extra dwellings
1647	3	Existing homes in the area will lose privacy
1647	4	The development will have a dramatic effect on vegetation and nature.

nt	nt	
1648	1	This development will encroach on the dividing land between Worksop and Carlton in Lindrick and Wallingwells. This will only further contribute to the 'urban sprawl' and further.
1648	2	The area proposed in productive agricultural land farming wheat and oilseed rape, agricultural land provides employment which will be lost as a result of this development
1648	3	The area proposed is bordered by Owday Wood/Rough Piece and Owday Plantation which are sites of importance for nature conservation. The woodland is at present unt will cause significant disturbance to these valuable woodlands. The area 'Gateford Hill Park' which includes Dog kennel Plantation is a mature landscaped area.
1648	4	The public footpath/bridleway entering the area from Montford Road and stretching to Owday plantation is boarded by beautiful old trees and hedgerow which are impor environment. This bridleway is used by many walkers daily from the estate and many visiting recreational users.
1648	5	The loss of this countryside amenity would be detrimental to the entire area. This land is of the same importance to us, and the wildlife as Dog kennel Planation.
1648	6	Our 'local' shops which are sites off the estate are already busy. Additional housing will only cause increased pressure on these already busy and dangerous road junctions The main amenities e.g. supermarkets, shops, doctors and dentist are all situated in the town especially when Tesco moves. Access to the town is only practical by car and Congestion in and out of town will only increase therefore as a result of this development.
1648	7	The junction between Ashes Park Avenue and Gateford Road is already dangerous due to heavy traffic levels. The increase in traffic levels on the estate will generally reduced
1648	8	This development will require detailed consideration as to the provision of schools and nurseries as we feel our schools are already too or over capacity.
1649	1	If possible and appropriate, I would like to leave the planning of the area, including the entrance and exit of course, to your planners or planners of the Council's choice, if
1649	2	I have always thought that the large plot having one entrance and one exit is an ideal plot for a good standard of dwellings, the plot is away from noise and unsightly buildi
1649	3	The people taking this standard of housing causes movement on the housing ladder and benefits the younger seeking their first homes.
1650	1	In Retford, our Clients; land interests extend to site ref 364 and 365. The allocation of site 364 (and part 365) combined with the adjoining site 41 would represent a susta and there is a willingness from both landowners to work together to deliver a comprehensive residential-led development. the allocation of these sires would help to ensu can be achieved, particularly given that our Client considers the Council has over-estimated the housing contribution from existing commitment and 'live' applications. Add to explore an element of employment use on these sites as part of a self-sustaining development opportunity.
1650	2	In respect of Harworth Bircotes, our Client's landholdings to the south of the town are identified within the Council's adopted Core Strategy as the focus for economic deve allocation for employment-led mixed-use development would serve to deliver the "step change" needed in the town. As part of these representations, our Client's site has alongside employment uses to demonstrate the potential for the comprehensive mixed-use development of the entire land parcel bound by Snape Lane, Blyth Road and the meetings with the Council (both Officers and Members) at which a range of options and uses for the site have been discussed, and which would contribute to the "step cha
1650	3	As Evidence Base documents to inform the Council's Local Development Framework, our Client supports the use of these documents as the initial starting point to help inf progressed through the Site Allocations DPD. However, our Client does have some concerns over some of the information contained within the SHLAA, some of which is no status of sites. Furthermore, in calculating the housing requirement for each settlement identified within the SAIO, the Council has made an allowance for sites with extant 2010), as well as those which could shortly benefit from planning permission. Our Client does not consider this approach to be robust, particularly in respect of making an benefit from planning permission as this could be seen to be pre-determining the planning process.
1650		Our Client has concerns over a number of these criteria for the reasons set out below, and in particular the weight to be afforded to each as part of the Stage 2 site identifi
1650		Whilst our Client does not disagree with the inclusion of this criterion forming part of the Stage 2 site identification process, they are nevertheless concerned over the amo be attaching to "community support."
1650	6	Firstly, the Council does not define how "significant" public opinion will be in the context of the other 8 criteria. Is public opinion, for example, considered more significant development, and the impacts on neighbouring land-uses? How can the Council guarantee that those responses which will form the basis of its assessment are actually reparticular town/village, particularly given that in the context of a consultation document such as this the majority of respondents are more likely to object to a site than su proposed that "strong" and "some" will be measured in respect of the green and amber grading? In view of these concerns, our Client considers that the "significance" to more weight than the other factors to be taken into consideration by the Council in its site assessment process.

Responde	-	Answer
nt	nt	
1650	7	This criterion seems to be steered towards employment and mixed-use sites, as opposed to housing sites. This would seem to suggest that housing development would no opportunities. Our Client is concerned that this criterion is far too simplistic in terms of how it is applied to housing sites, and fails to recognise the important role that hous and facilitating economic growth. The grading system as currently proposed would appear to suggest that no housing sites can score higher than "amber" given that hous statement 4: "Planning for Sustainable Growth" as constituting "economic development." In reality however, the delivery of new housing can, depending on the nature a contribution towards economic growth and prosperity. Our Client therefore considers that the grading system should be amended to reflect this by allowing for an assess sites, through which some housing sites would have the potential to score "green" under this criterion.
1650	8	Whilst out Client does not disagree with the inclusion of this criterion, it is nevertheless considered that greater clarity is required to distinguish between housing and emp
1650	9	This is not reflected in the proposed grading system set out in the SAIO, which in its present form simply scores sites depending on the SPZ within which they lie. Our Clien amended to differentiate between housing and employment uses in SPZs 1, 2 and 3 in order to more closely reflect the considerations of the Environment Agency.
1650	10	Our Client considers that the grading system applied to this criterion does not take into account individual site characteristics and their ability to accommodate developme on which Landscape Character Zone (LCZ) they lie within.
1650	11	Furthermore, it is noted that the Bassetlaw Landscape Character Assessment ("BLCA") contains a number of additional LCZ's which are not referenced within the SAIO, an the Council as part of its grading strategy.
1650	12	Consequently our Client considers that the Council should re-visit and amend the grading system for this criterion so that it captures all of the LCZ's contained in the BLCA, take account of individual site characteristics.
1650	13	This appears to be a 'catch-all' criterion which could reasonably include criteria 4 to 8. Our Client therefore considers that this criterion should include the list of constraint 9, or alternatively criteria 4 to 8 could be deleted and captured under criterion 9
1650	14	It is noted by our Client that the list of criteria does not include an assessment of site deliverability, in particular the suitability, achievability and availability of each site. O should be included within the Stage 2 assessment, as follows: G - The site is deliverable during the plan period. A - The site is deliverable during the plan period, subject to deliverable during the plan period.
1650	15	Firstly, there are no references anywhere within the SAIO to those housing sites with extant planning permission (or which will shortly have planning permission) which th calculating the residual housing requirement of each settlement. Instead, it is necessary to refer to the SHLAA to try and identify these sites.
1650	16	Moreover, by accounting for extant (and emerging) permissions in its calculation of residual housing requirements for each settlement, the Council is placing significant re during the plan period, whilst also potentially pre-determining the decision of 'live' applications. Given the poor economic and residential market conditions which have b no certainty when and indeed if these sites will come forward. Furthermore, if planning permissions lapse prior to a material start on-site, there can be no certainty that a granted or even sought by the applicant.
1650	17	Our Client does not consider this to be consistent with Table 4.1 of the Core Strategy given that the identified residual requirement for Retford stands at 1,574 dwellings a that Table 5.1 of the SAIO should instead identify the housing land allocations which are needed in Retford during the plan period, as opposed to the residual requirement minimum of 1,574 dwellings. It is our Client's view that in reality, the required housing land allocations in in Retford are in fact much higher than the 577 dwellings identifi has overestimated the number of dwellings which will come forward from sites with planning permission (as of 31 st March 2010), or which may shortly benefit from plann
1650	18	Given that no details of those sites with extant planning permission, or which are the subject of 'live' planning applications, are provided within the SAIO, we have instead Housing Land Availability Assessment (SHLAA) published in October 2011 (as referenced in footnote 23 of the SAIO). We have reviewed each of those sites in Retford whic establish their current planning status (as of 31 st January 2012). In doing so, our Client considers that the Council has overestimated the contribution of several committed Details of these specific sites are set out in Table 4.1. By deducting a cumulative total of 258 units from the Council's supply of 852 dwellings based on its SHLAA sites, our allocation requirement in Retford during the plan period currently stands at a minimum of 911 dwellings.
1650	19	Whilst our Client supports the overall housing growth proposed in Retford, in response to Question 9 our Client considers it absolutely imperative that the Site Allocations meet the requirement of 911 dwellings over the plan period. Furthermore, the housing target of 2,002 dwellings set out in the Core Strategy is a minimum, with Policy CS at least 1,547 new homes. Accordingly, our Client considers that the Site Allocations DPD should allocate sufficient housing land to at least meet this minimum target duri
1650	20	This site is located furthest south of all potential housing sites in Retford. The site is detached from the existing settlement, with agricultural land lying between the site ar north. The agricultural land to the immediate north of the site is also identified in the SAIO for development (site ref. 52), which it is reasonable to expect would come for

1650		The site is also located within flood zones 2 and 3, whilst there is also a potential area of archaeological interest across part of the site. These constraints should be taken
	21	the net developable area of the site, and potential dwelling capacity
1650		Notwithstanding the above, given the site's significant constraints, our Client does not consider this site to be suitable or achievable for development during the plan peri
	22	through the Site Allocations DPD.
		This site is subject to significant access constraints, which the Council itself acknowledges within its SHLAA. Although the SHLAA does seem to suggest that other access p
1650	23	regarding these is provided, and there are no obvious solutions to overcome this significant development constraint.
1650	24	Furthermore, the site is located within a Conservation Area. This will inform and impact on the capacity of the site, currently identified as 267 dwellings, to the extent that
1650	24	development below 30 dwellings per hectare would be more appropriate. This would ensure that any development is sensitive to its surroundings and protective of local
1650	25	Regardless of these conservation considerations however, our Client considers that the ability to secure access into the site is a considerable constraint for which there is
		Client considers that the site should not be pursued through the Site Allocations DPD. It is distant to key services, areas of employment and facilities in the town.
1650	26	This is the largest of all the potential housing sites in Retford, with an estimated capacity of 716 dwellings. The development of this site would represent a large-scale urb
1650	27	de from its partial location within flood zone 2, there do not appear to be any other identified constraints to its development.
1650	28	Notwithstanding this, our Client considers that there are more preferable, smaller alternatives to the development of this large site in the short to medium term, which w
1050		and infrastructure within that part of Retford.
1650	29	The SHLAA confirms that this site is currently a protected employment site, and thus may be subject to potential contamination issues which would need to be addressed
1050	25	taking place. This could also impact on the viability of the site's redevelopment.
1650	30	Furthermore, part of the site is identified as lying within flood zone 2 which could impact on the net developable area of the site.
		These policy and physical constraints are considered to be significant, and would certainly impact on the delivery of the site in the short to medium term. Our Client const
1650	31	opportunity site, which will require significant investment to undertake remediation works. It is our Client's view that there are sequentially preferable housing sites which
		would negate the need to allocate this site.
4.670		This site is situated immediately adjacent to the southern edge of Retford settlement. However, the site is subject to a number of major development constraints. The fir
1650	32	vehicular access,
1650	33	Whilst the site also falls partly within flood zones 2 and 3, a major constraint which would be very likely to impact on the net developable area of the site.
		The assumption that 90% of the site is developable is therefore considered by our Client to represent a significant over-estimation, and the figure of 143 dwellings does n
1650	34	site's capacity.
1650	35	This site is identified in the SAIO as a mixed-use opportunity site, with the potential to accommodate 166 dwellings. Our Client has a number of concerns regarding this ca
		These concerns relate principally to physical constraints associated with the site's development, namely the presence of power lines across the central part of the site, ar
1650	36 1	corner of the site. Our Client considers that both of these constraints will impact on the net developable area of the site, and that the Council is over-estimating the hous
		capacity based on 30 dwellings per hectare and a net developable area of 80%. Our Client considers that further detailed investigation is needed if this site is to be pursue
		principally focusing on the cost of relocating the high-voltage power lines underground, and the extent of the area of archaeological interest.
		Our Client notes that a large proportion of this site is identified as lying with flood zone . Given that Planning Policy Statement 25 seeks to direct new development to are
1650	37	to be better-placed and sequentially preferable sites available within Retford to meet its housing requirement during the plan period.
1650	38	Together with concerns over accessibility, our Client does not consider that this site should be taken forward through the Site Allocations DPD.
1050	50	This site was previously subject to planning permission for the development of 20 dwellings. However, this planning permission expired in January 2010, and no new plan
		subject to access constraints as identified within the SHLAA, and which has ultimately led to uncertainty over its deliverability. Given that the previous planning permission of the development of 20 dwellings. However, this planning permission expired in sandary 2010, and no new plan

1650	42	The development of this site is subject to access constraints which would require improvements to Bracken Way to facilitate vehicular access. There is no known develope of any willingness to undertake these highway works and bring the site forward. Accordingly, in the absence of significant works and funding to enhance access arrangeme deliverable at this time and thus should not be allocated in the Site Allocations DPD given the availability of alternative, deliverable sites.
1650	43	Our Client's land interests in Retford relate to site ref. 364 and 365 shown of Figure 5.1 of the SAIO. This land also forms part of the wider "Land south of Ordsall" area sho the owners of site ref. 41 support the proposed housing allocation of site ref.'s 364 and 41 which adjoins the site to the east off Ollerton Road. Our Client is working jointly promoting this site for development.
1650	44	The comprehensive development of these two sites would represent a sustainable urban extension to the town, with their allocation offering the potential to make a very Client considers to be a minimum requirement for at least 1,123 dwellings in Retford during the plan period. Not all of Site 365 is considered suitable, but the area to the e available and considered suitable.
1650	45	Details of our Client's site were submitted to the Council's draft Strategic Housing Land Availability Assessment (SHLAA) in October 2011. Within these representations, it v suitable, available and achievable for short-term residential development (0-5 years).
1650	46	The site is suitable for housing as: a) The site is well-related to the existing Retford settlement, and its location lends itself to residential development as a natural extension
1650	47	b) It has the potential to make a significant contribution to housing growth in Retford, delivering a mix of house types as part of a sustainable extension to the town
1650	48	c) Our Client has engaged with the landowner of adjoining site ref. 41, and it is considered that both sites can come forward as part of a single, comprehensive land release vehicular access point into the site, and as with site ref. 364 and parts of site ref. 365 is well-related to the existing urban area
1650	49	d) Secondary vehicular access to the site is available from Sunningdale, and to the south to facilitate pedestrian and cycle access.
1650	50	e) The development of the site would not give cause to any harmful impacts on any sites or built/historic/ecological features of importance.
1650	51	f) Contrary to the findings of the SHLAA, the site is not subject to any archaeological interests and our Client has had an archaeological assessment of the site undertaken.
1650 1650	52 53	 g) Housing would not constitute a 'bad neighbour' use of the site, and would not have a detrimental impact on the residential amenity of neighbouring properties. g) The site is not subject to any major development constraints. Whilst it does lie within Flood Zone 1, this is a standard Environment Agency provision for all larger sites, a
		development.
1650	54	h) It has good links to the town centre, schools and other key services. There is public transport available nearby which we expect could be extended into the site to make
		The site has previously been actively promoted by Barton Willmore on behalf of our Client throughout
1650	55	the preparation of the Council's Core Strategy. This included appearing at the Core Strategy
		Examination. Our Client can confirm that the site is no subject to any legal or ownership issues, and that the site is immediately available for development in the short-term.
1650	56	Our Client can confirm that there is a very reasonable prospect that the site will be developed during the Core Strategy plan period. As such, the achievability of the site is
1650	57	Given the uncertainty that surrounds the deliverability of a number of other potential housing sites identified in the SAIO, our Client considers that the Council should prio site ref. 364 and 365, together with site ref. 41, as part of a single, comprehensive development site. Both sites are sustainably located and well-related to the existing sett infrastructure, and deliverable. The landowners have expressed a strong willingness to work together to bring forward a sustainable development scheme. The allocation of Allocations DPD would make a very significant contribution towards meeting the housing requirement in Retford during the plan period, with the potential to cumulatively their allocation would reduce pressure on housing land release elsewhere in Retford particularly where it has been identified by our Client that a number of other housing due to concerns over their suitability and achievability. Their allocation would also open up the possibility in the longer-term of a sustainable mixed-use development linke planning application for which is currently awaiting determination by the Council (App. Ref. 01/11/00311). Our Client therefore strongly encourages and fully supports the the Council's Site Allocations DPD.
1650	58	Our Client's land is identified on figure 5.3 of the SAIO as forming part of the wider land parcel known as "Land south of Ordsall." This area comprises three sites, namely s the potential to accommodate 95% housing (c. 1,200 houses), and 5% employment land (c. 5 hectares). The 5% employment land would form part of the 20% employmen envisages within Retford. Our Client supports the opportunity for employment uses within this part of Retford to form part of a sustainable, self-supporting extension to the subject of further discussion and consideration, and in particular whether this covers the whole area shown on figure 5.3, or alternatively smaller-scomprehensive scheme comprising site ref.'s 364 and 41. Our Client is willing to engage in further discussions with the Council and the adjoining landowner on this matter Allocations DPD.

nt	nt	
1650	59	As set out in our response to Question 11 above, our Client supports the opportunity to introduce employment uses as part of the residential-led mixed-use development the Council as being required in the plan period, the additional parcel of land to the immediate west of site ref. 364 within our Client's ownership (site ref. 365). Introducir Retford would enhance the sustainability of site ref.'s 364 and 41, and the attractiveness of Retford as a place for people to live and work.
1650	60	To achieve this residual housing requirement, our Client is concerned that the Council is placing a significant over-reliance on residential development at Harworth Colliery potential for 996 new dwellings to be delivered at Harworth Colliery alone during the plan period. However, our Client considers this to be an over-estimation for the reas development was due to start on site in summer 2011. Whilst the site has outlined planning permission, we understand that no development has commenced, and no Res for approval; b) There will be significant lead-in times associated with securing reserved matters approval, discharging the planning conditions and planning obligations, ar that the majority of the site is contaminated). Our Client considers that this could reasonably take in the region of 24 months; c) Assuming a conservative start on-site date Client considers that no more than c. 700 dwellings would be delivered on the site before the end of the Core Strategy plan period on March 31st 2028 (based on 2 developed. Our reserves which could be worked and with the ever increasing cost of fuel there is a possibility that the mining activities could recommence as the profitability of this improve would not be possible in the future. On account of the current and future delays, the expected delivery from this site should be scaled back and monitored closely.
1650	61	In view of the above, and our suggested timescales which we consider to be highly conservative, our Client considers that the housing land allocation requirement in Harw at a minimum of 861 dwellings.2 Consequently, our Client considers that the Site Allocations DPD will need to allocate sufficient land to achieve this increased but minimu
1650	62	Our Client's own land interests in Harworth Bircotes relate to the land south of the town, namely site ref. H4 as shown on figure 6.1 of the SAIO. Whilst our Client consider employment-led opportunity, the potential for some housing on this site was previously identified in our Client's Harworth South Development Strategy Document ("DSD" Inspector, as part of their evidence to the Core Strategy Examination. We append a further copy of this DSD to these representations.
1650	63	The site does not fall into any Conservation Area. There are no known archaeological constraints.
1650	64	IDENTIFIED: The site is large and will be subject to Flood Zone 1 constraints. This is a standard starting point by the Environmental Agency for larger sites.
1650	65	IDENTIFIED: The site benefits from multiple existing access points. However some new roads will need to be created to facilitate development. Liaison with the Highways A potential impact on the A1M junction.
1650	66	Development of the site has some potential limited impact in respect of loss of landscaping. This can be mitigated by the comprehensive design of the wider site with strue of land available to develop a prestigious comprehensive sustainable scheme.
1650	67	The site lies adjacent to Harworth Bircotes where the Council is proposing a step change in respect of both employment and housing growth. The site has the ability to cor comprehensive master planned approach. It also lies adjacent to Harworth Colliery where planning permission has been granted for its redevelopment over a 15-20 year p residential development.
1650	68	The majority of the site is owned by a single landowner. The landowner appeared at the Core Strategy Examination and is promoting the site. Several meetings have been development.
1650	69	The site is large and mostly greenfield. There are no overwhelming regeneration or contamination issues known that would affect the market attractiveness of the site.
1650	70	Given it is a large site, various studies and infrastructure costs will need to be addressed as part of the wider scheme. These are not uncommon for a large site and are not
1650	71	The site is mainly greenfield. The initial concept masterplan and development strategy suggests circa 12 hectares of land can be provided for residential development deliv would be delivered at around 50 dwellings per year based on two house builders on site. As the site is available now, construction could commence in 2013 if the Council e release of land.
1650	72	The site is achievable. It has a willing landowner and it aligns with other policies which seek to deliver growth at Harworth Bircotes. It is only held now by the lack of an allo
1650	73	Expected start date- 2013.
1650	74	Our assessment has demonstrated that our Client's land south of Harworth Colliery is suitable, available and achievable for residential development, integrating new home Accordingly, residential development is considered to represent an important component of the mix of uses which should be acceptable on our Client's site as part of an e inform the comprehensive development of the site. A residential element would help improve the viability of this predominantly employment-led site and, in the right loca high quality residential for uses associated with the B1/B2 development.
1650	75	Our Client's landholdings in Harworth Bircotes are identified on figure 6.1 (map) of the SAIO (site ref. H4) for employment use, extending to an area of c. 69 hectares. The published in January 2010 identified this site as one of the most preferable locations to accommodate significant employment growth in Harworth Bircotes, and Bassetlaw

1650	76	The site's significant potential has now been identified within the Council's adopted Core Strategy, within which Policy CS1 identifies Harworth Bircotes as the "main reger expectation that it will accommodate at least 35% of new employment land. Policy CS4 (part (B)) of the Core Strategy identifies the land south of Harworth Bircotes as the development in Harworth Bircotes, benefiting from its proximity to the strategic road network (A1(M)) and Robin Hood Airport. The area is also well-served by public tran sustainability.
1650	77	The medium to long-term development of the entire land parcel bound by Snape Lane, Blyth Road and the A614 Bawtry Road, the majority of which is in the single owners mix of new employment opportunities to the town and District as a whole, comprising a mix of B1, B2 and B8 uses. The quality of the environment to the south of the site quality housing to compliment this new investment as part of a comprehensive sustainable development, should the Council be unable to identify enough deliverable hou
1650	78	The potential development options for our Client's site are set out in Section 7 of the appended Harworth South DSD. However, the benefits of the site can be summarised existing and proposed employment land; b) It is situated to the south of the town offering the potential to provide good connectivity to the heart of Harworth Bircotes, an of the town; c) It is not subject to any environmental designations; d) It is surrounded on all sides by development or roads, and thus is well contained; e) It is situated in c offering excellent strategic transport links, and a commercially attractive location for inward investment; f) It is well-served by existing public transport given its proximity bus services; g) It has the capacity to accommodate a wide range of business uses at various scales as defined in PPS4, and redress of the balance of employment provisior Harworth Colliery site and thus can offer a complimentary and supporting role to the type of development which is proposed there.
1650	79	With regards to other potential employment sites in Harworth Bircotes, it is noted that figure 6.1 (map) of the SAIO identifies a further potential employment allocation to namely site. ref H6 which extends to 21 hectares. Unlike our Client's site, this site is remote and detached from the existing built-up area of the town to the north. Its development allocation to a site ref. H4 to integrate employment opportunities with existing and consented residential development, nor represent a natural extension to the town.
1650	80	Notwithstanding this, should the Council ultimately seek to allocate site ref. H6 for employment use(s), then our Client strongly considers that site ref. H4 should be alloca is deliverable, and by virtue of its location would represent a sustainable extension to the existing urban area (and that of the consented new development at the former H
1650	81	As set out in our response to questions 17 and 18, our Client has ownership of the large area of land to the south of Harworth Bircotes (site ref. H4). The appended Harwo which can be accommodated on this site, and the significant economic and social benefits which it would generate not only in Harworth Bircotes, but Bassetlaw as a whole significant potential for mixed-use development, comprising B1, B2 and B8 employment uses, leisure uses, and housing. The Council's Core Strategy identifies the need for Policy CS4 (part (B)) identifies the land to the south of Harworth Bircotes as the focus for economic development in the town. The benefits of the site are considerable, as 18 (Section 7.0). Not only will its development create significant new job opportunities by attracting inward investment to the District, but it will also ensure that these job people living outside the town in view of the site's excellent strategic linkages, something which our Client regards as key to realising a "step change" in Harworth Bircotes and fully supports the allocation of site ref. H4 for mixed-use development in the Council's Site Allocations DPD.
1650	82	In the absence of an up-to-date Open Space Audit and Need Assessment, our Client considers that existing open space in Retford and Harworth Bircotes should be protect at this time, particularly given the availability of other deliverable sites for residential development. National planning policy set out in PPG17 seeks to protect and retain o important contribution which these make to residential amenity, and leisure and recreational activities.
1650	83	Our Client considers that the Council should be seeking to protect and enhance existing open spaces, and where possible encourage the creation of new formal and/or inf development sites for leisure and/or recreational use. Our Client's landholdings south of Harworth Bircotes for example offer the potential for the creation of some new o mixed-use development of the site. The same applies at Ordsall and to sites 364 and 365.
1651	1	Our Client has serious concerns in relation to the Site Assessment Criteria that is to be used in identifying sites for the preferred options stage under Stage Two of the Site The first of these concerns relates to Criterion 1, which asks whether the local community is supportive of the development of the site. Whilst our Client recognises that a National Planning Policy Framework (NPPF) is to involve local communities in decisions that affect the areas they live in, this paragraph seems to suggest that public opinic deciding between sites and that local support for or against a site will be the deciding factor. Is the Council suggesting that this criterion will be weighted in some way to r opinion in identifying sites? If so, this is not made clear within the SAIO text. Our Client would disagree that local opinion is a more important factor than say, environmen suggestion that this criterion should be "a significant factor in the decision-making process". As part of this, we note that responses received to this consultation will not n opinion as it is considered on the location of new development is more liked to solicit negative responses from the vocal minority than a rounded responses from the wide recommended that responses from the local community to the SAIO should be treated with caution and this criterion should have no more importance than other factors

Responde	Comme	Answer
nt	nt	
1651		This criteria seeks to grade sites in the basis of how they assist in the delivery of the Council's economic objectives. This criterion appears to suggest that the development the delivery of economic development opportunities. Whilst our Client agrees that housing in itself is not defined as 'economic development' under Planning Policy Stater Growth' (PPS4), it should be recognised that housing is often needed to support the delivery of economic development elsewhere. Furthermore housing itself generates ju area. It is important for the Council to recognise and acknowledge that the larger the housing site, the larger the benefits that come with it. Our client has an in-house too benefits increase in accordance with the size of the site: a) Direct FTE Construction Employment; b) Direct FTE Construction Employment c) Indirect/Induced FTE Employmency; e) Potential Retail Employment f) Potential Leisure Employment and g) LPA Revenue (Council Tax Receipt and New Homes Bonus Payment). Our Client feels that it for the development of housing only as 'amber' in the scoring system as each site is different and some housing sites will assist in the delivery of economic development council developments build consid the existing nature of the site and the type of development proposed in scoring sites under Criterion 3. It should reflect a qualitative assessment rather than just purely just true and balanced score.
1651	3	Our Client disagrees with the scoring outcomes in relation to Groundwater Source Protection Zones (SPZs).
1651	4	Whilst this paragraph recognises that housing is not viewed as a polluting activity and that the proposed use of a site will be taken into consideration in the scoring of a site not reflect this and merely seek to score sites depending on the SPZ they fall within. Our Client recommends that the grading system is altered to recognise the type of development in SPZs 2 or 3. A - Employment development in SPZs 2 or 3 or housing development in SPZ1. R - Employment development in SPZ1.
1651	5	Our Client notes that this criterion draws heavily on the Bassetlaw Landscape Character Assessment (BLCA) of August 2009. It is considered that the scoring system is too s the BLCA. The scoring system is based on which Landscape Character Zone (LCZ) sites fall within, with sites in a 'create' LCZ scoring 'green', those in a 'restore or reinforce' 'conserve' LCZ scoring 'red'. Our Client notes that there are many more LCZs defined in the BLCA. How does the Council propose to deal with sites that are within the 'con
1651	6	In addition, the scoring system does not take account of the capacity of sites to accommodate development, taking into account such factors as tree cover and topography determine the score in relation to this criterion rather than blind reliance on the BLCA. Furthermore, the BLCA notes that in the 'conserve' LCZ for example, landscape act distinctive features and features in good condition" but does not specifically prevent development from occurring in these areas. Our Client considers that factors such as the scoring of sites in relation to this criterion.
1651	7	The scoring also needs to take in to account opportunities to enhance landscape conservation where new defensible boundaries can be created through landscaped buffe
1651	8	Our Client notes that the residual housing requirement for Harworth Bircotes in the remaining plan period 2010-2028 is 499 dwellings (Core Strategy residual requirement dwellings). Our Client has some concerns in relation to the committed dwellings listed in the SHLAA, particularly site 189 (Harworth Colliery). This issue is discussed below requirement and five-year supply.
1651	9	This site already has planning permission for up to 996 dwellings (Reference 01/09/00052). The SHLAA states that 161 of these dwellings will be delivered within five years 141 dwellings comprise Phase 1 of the proposed development. In addition, no reserved matters application has yet been submitted to the Council for Phase 1, such that the Notwithstanding the extant permission, the applicant and Council have both indicated that the Colliery might be brought back into use at a later date subject to viability, we the 996 dwellings. Even if Phase 1 is implemented, the prospect of a further 855 dwellings being sited adjacent to the Colliery if it does reopen, would appear unlikely. If Pl construction is more likely to begin between 2018-2020 on the basis of a reserved matters application being submitted in 2012. Using the Council's own calculations of 50 developers on site, Phase 2 would take between 11 and 17 years to complete, taking the delivery of dwellings well beyond the plan period and impacting on the number of requirement during the current plan period.
1651	10	On the basis of the above, there is a significant risk that Harworth Bircotes could seriously underperform against its housing requirement should too much reliance be plac reason, our Client recommends that the Site Allocations DPD should include sufficient sites to ensure that there is enough land in the pipeline to fulfil the housing requirer Taking the above into account, our Client believes that in order to maintain the flexibility of the Site Allocations DPD, 855 dwellings (the uncertain phase 2 Colliery contribu requirement, such that the Council needs to find sufficient land for 1,354 dwellings (499 + 855) in Harworth Bircotes. This adjusts the five-year requirement to 376 dwellin
1651	11	The committed number of dwellings in the SHLAA total 306, which is 70 dwellings short of the adjusted five-year supply total. However, our Client is concerned that sites Land at the Piggeries, Scrooby Road), which together make up a contribution of 121 dwellings towards the requirement, predominantly comprise apartments and townho in Harworth. As a consequence, it is unlikely that these dwellings will be delivered in the first five years of the plan. Therefore, our Client believes that the five year supply years supply, confirming the need to identify additional deliverable sites within the Site Allocations DPD

1651	12	We made clear the Core Strategy EiP that our Client believes that Harworth Bircotes could be allocated a greater proportion of housing. It is noted that 35% of employmer whereas housing growth is just 22% of the overall requirement. In order to support that growth and provide a local, sustainable workforce, the level of housing growth co employment growth. On this basis, our Client recommends that at least 22% of housing growth be directed to Harworth Bircotes.
1651	14	Our Client believes that their site at Tickhill Road (Site 182) is a deliverable and sustainable housing site and should be allocated for residential development in the Site Allo out the reasons why this site should be allocated, including an assessment of the deliverability of the Site, as well as the benefits the development of the site can bring to H
1651	14	Here, our Client reiterates the comments made above in relation to the deliverability of phase 2 of the Colliery site within the plan period and its impact on the residual re-
1651	15	This Site is located within the settlement of Harworth, east of Tickhill Road. It is classed as 'developable' within the SHLAA for approximately 45 dwellings. The SHLAA state (single, narrow track), access to the site will need to be taken from Styrrup Road. Whilst the SHLAA also states that there are no highways objections in principle to this, su noted that the proposed access point would be in very close proximity to Church Walk, such that access for 45 dwellings from this point may not be achievable.
1651		Notwithstanding this, the SHLAA notes that there is an agreement with the adjacent landowner to provide access to the site from Styrrup Road, which confirms that the si is unclear whether this is a formal or informal agreement. If it is the latter, our Client suggests that there is no certainty that the access land will not form a ransom strip to agreement fall through. In this way, the site cannot be considered to be available as described in paragraph 39 of the SHLAA Practice Guidance (CLG, 2007).
1651	17	The SHLAA appears to have taken flood risk into account and bases the dwelling quantity on 90% of the total site area at 30 dwellings per hectare ([1.68ha / 0.9] x 30 = 45.
1651	18	However, the SHLAA also states that the "the design of any scheme on the site would have to be sensitive to the Listed Buildings nearby". These include the Church of All Barn to the south. In particular, Syringa House and Barn are in very close proximity to the site boundary such that sufficient space will need to be provided in this area to provide furthermore, the character of the immediate area (including the listed buildings), is predominantly low density detached or semi-detached properties. Taken together wit suggest that the site could only yield approximately 30 dwellings.
1651	19	For the reasons set out above, our Client does not believe that this site is suitable for housing development at the present time due to access/highways considerations and development. On this basis, the site cannot make a contribution to the five year land supply for Bassetlaw and is only likely to contribute a maximum of 30 dwellings in year constraints be overcome.
1651	20	Site 187 is a large site to the east of Bircotes, which is classed as developable in the SHLAA for approximately 791 dwellings in years 6-10 of the plan period. However, we r dwelling numbers within the SHLAA document (791) and those shown on the potential sites map for Harworth Bircotes (841). This discrepancy of 50 dwellings should be c
1651	21	Our Client is concerned that there are factors that haven't been fully taken into consideration in the assessment of this site, such as the impact of the development of the
1651		The site is an irregular shape and extends into the countryside to the east of Bircotes. The southern part of the site in particular has limited defensible boundaries, such the further extension into the countryside in future. Whilst the open land around Harworth Bircotes is not designated as Green Belt land, we note that the settlement of Ba north east. Our Client considers that it is important that a distinct gap between these two settlements remains.
1651	23	In addition, the site is highly visible from the A638, A614 and Scrooby Road with White House Plantation presenting a natural eastern boundary to the settlement, illust Our Client considers that the development of this site would erode the countryside character of this edge of Harworth Bircotes and suggests that this site, if developed, White House Plantation. This would also give rise to access problems as it would seem unlikely that a large number of dwellings could be served from Essex Road.
1651	24	If highways considerations can be resolved, our Client believes that this site (as reduced) is only capable of accommodating a maximum of 350 dwellings.
1651	25	In addition, our Client disagrees that the Site could be completed within 3 years of its allocation. Due to the access constraint, it is unlikely that this site will be developed be developed be developed be completed within 3 years of its allocation. Due to the access constraint, it is unlikely that this site will be developed be developed be developed be developed be developed be developed be completed within 3 years of its allocation planning permission and discharging conditions, which for a large site such as this work commences on site. Therefore it is unlikely that houses will begin to be delivered on this site before 10 years after the adoption of the Site Allocations DPD, should the site before 10 years after the adoption of the Site Allocations DPD, should the site before 10 years after the adoption of the Site Allocations DPD, should the site before 10 years after the adoption of the Site Allocations DPD, should the site before 10 years after the adoption of the Site Allocations DPD, should the site before 10 years after the adoption of the Site Allocations DPD, should the site before 10 years after the adoption of the Site Allocations DPD, should the site before 10 years after the adoption of the Site Allocations DPD, should the site before 10 years after the adoption of the Site Allocations DPD, should the site before 10 years after the adoption of the Site Allocations DPD, should the site before 10 years after the adoption of the Site Allocations DPD, should the site before 10 years after the adoption of the Site Allocations DPD, should the site before 10 years after the site before 10 years after the adoption of the Site Allocations DPD, should the site before 10 years after the site before 10 years after the adoption of the Site Allocations DPD, should the site before 10 years after
1651	26	This site is classed as developable in the SHLAA for 70 dwellings based on 90% of the total site area (2.59ha). However, we note that approximately 50% of the site is cover possible to determine how much of this site can be developed without adverse impact on trees and ecology. The capacity of the site is also impacted by the electricity sub
1651	27	Furthermore, the SHLAA states that the future use of the site is unknown (information from the landowner), such that the site cannot be considered available for developr
1651	28	As a result, our Client believes that the suggested capacity of 70 dwellings is too high when taking capacity constraints into account. Our Client suggests that 50% net deve dwelling capacity of 39 dwellings based on 30 dwellings per hectare

1651	29	This site, which is described as north of Scrooby Road is actually south of that road to the east of the settlement of Harworth Bircotes. It is assessed in the SHLAA as being Site 187, the site presents as open countryside with Droversdale Wood forming an important visual as well as ecological function. For this reason, our Client considers tha should not be allocated, particularly as there are other, less sensitive sites capable of providing a sufficient number of dwellings to meet the overall requirement for Harw
1651	30	Our Client's land at Tickhill Road, Harworth Bircotes is identified as Site 182 in the SAIO. The maximum potential capacity listed for this site on Figure 6.1 of the SAIO is 7 the Report provides an assessment of the sustainability and delivery of Site 182.
1651	31	The site is located on the northern edge of Harworth Bircotes, approximately half a mile to the north of the shops on Scrooby Road and is therefore within walking distand there. It is roughly equidistant from the towns of Worksop, Retford (both Bassetlaw) and Doncaster being around 8-10 miles from each by car/public transport. The A1/A approximately 10 minutes drive to the south. Bus stops serving Doncaster and Retford (Route 29) are within 5 minutes walking distance
1651	20	The site is also within easy access of a number of schools within Harworth Bircotes as well as doctor's surgeries and dental practices. There are also a range of employmer settlement of Harworth Bircotes.
1651	33	There are few constraints associated with the site, being largely flat and having no landscape features of intrinsic value within it
1651	34	The site is classified as Grade 3 agricultural land on the Agricultural Land Classification maps. It is noted that the majority of land adjoining the settlement of Harworth Bir there are not any other sites of lower agricultural value than this site.
1651	35	The site is within Groundwater Source Protection Zone 3. As the proposed use is housing, a non-polluting use, it is considered that this does not represent a constraint to
1651	36	The site is within a 'create' Landscape Character Zone in the BLCA such that the site would score 'green' against the SAIO methodology.
1651	37	Further work is being carried out in respect of archaeology and highways but nothing is expected that would affect the principle of development.
1651	38	The site is suitable for housing development as: a) It offers a suitable location for development, being located in close proximity to existing services
1651	39	b) It would contribute to the creation of sustainable mixed communities through the potential to provide an appropriate mix and type of housing on the site
1651		c) There are a number of potential access routes to the site from Tickhill Road, Baulk Lane and Meadow Way
1651		d) The identified constraints can be adequately dealt with
1651		e) The development of the site would have no impact on any designated conservation areas or listed buildings
1651	43	f) The development of the site would not present any adverse conditions which would be experienced by prospective residents.
1651		The site is available for residential development as there are no legal or ownership problems. The site is controlled by our Client, who has expressed an intention to devel appropriate opportunity
1651	45	The site is controlled by our Client who has undertaken a thorough assessment of the marketability and economic viability of the development of the site, including an ass with the development of the site.
1651	46	The Tiln Lane site is considered to be achievable for residential development as there is a reasonable prospect that the site can be developed now or at any point in the pl appropriate phasing strategy.
1651	4/	The Tickhill Road site therefore represents a deliverable housing site under the terms of PPS3 and the SHLAA Practice Guidance as it offers a suitable location for housing on a reasonable prospect that housing can be delivered on the site within the next five years, through to the latter stages of the plan period
1651	1 48 1	As we have already referred to earlier, larger housing sites such as Site 182 can deliver a greater package of significant benefits compared to smaller sites. It also has the landscaped buffer zone to protect the adjacent areas and a generous amount of public open space.
1651	49	For these reasons, our Client recommends the allocation of Site 182 in the Site Allocations DPD as it is a sustainable and deliverable site with few constraints to overcome area.
1652	1	My clients do not wish to pass comment upon the process itself but merely wish to record that their above site remains available for future housing development. The site part of the site has previously been included within the Defined Settlement Envelope for Retford under the recently expired Local Plan. My clients are prepared to sell the therefore available.
1652	2	You will be aware a planning application has been submitted on part of BAS0027 which is viewed as a positive indication of demand for the land and development on the
1652	3	The ability to link the part of the site now currently under application to the remainder of BAS0027 is seen as a positive feature for forward planning and ensuring future or record this as a response at this stage of the process and in support of the promotion of the above named site.

1653	1	H E Brinkley Settlement, along with one other landowner, control approximately 5.6 hectares of land located to the north of the Chesterfield Canal and south of As Council's assessment of the site within its Strategic Housing Land Availability Assessment confirms the site is suitable for development. The size and location of the site a development, including the potential for a mixed use development including canal related, employment generating, residential and open space/recreational uses in a centre of Misterton and its existing facilities and services.
1653	2	Development on the site could be phased, responding both to local housing needs and other opportunities, e.g. employment generation through canal related and learns early phases of development would not limit options on the remaining part of the site, within a framework appropriate to the site's long term potential and responses to the specific questions posed by the consultation document are provided below. These further highlight the advantages offered by the above land to meet community.
1653	3	The criterion may be of some assistance but should not be used to the exclusion of all other considerations and evidence. Any evidence drawn upon in making assess available. In respect of Criterion 1 'Is the local community supportive of the development of the site?', it is important that conclusions are drawn only from represent example, only seven responses were received from Misterton to the Council's 'Residents' Survey' issued in February 2011. The consultation document states that Mi responses were from different houses, this gives a response rate of only 0.7%, and so is unlikely to representative.
1653	4	Land to the north of the Chesterfield Canal and south of Ashdown Way (SHLAA Site 93) offers a unique opportunity within Misterton to secure significant community ber site's position alongside the canal offers the potential for both recreational enhancements (with improved access to the canal corridor) and employment-generating uses restaurant). Residential development could compliment such uses, making use of the attractive setting of the canal and retained open spaces.
1653	5	The Core Strategy acknowledges that additional housing land may be required within the plan period if existing planning permissions are not built out. The SHLAA assess The actual number of dwellings that would be appropriate for the site could be adjusted to be compatible with any other uses proposed for the site and housing needs. T two existing vehicular access points, means it offers flexibility to accommodate both small scale housing development (for example infill on land to the south of Meado scale development across the wider site (for example making use of access from Ashdown Way in addition to Meadow Drive). Land not required as part of development a open space/recreational purposes and/or agriculture. As part of any development, the site could potentially accommodate additional allotments, for which there is a know
1653	6	SHLAA Site 93 (see comments in response to Question 30 above).
1653	7	SHLAA Site 93. This site offers the potential for an attractive, high quality, mixed use development incorporating employment-generating, canal-linked (potential to incl recreational/leisure uses alongside new housing, well integrated with the existing urban form of Misterton but sensitive to its rural character and setting, including that of
1653	8	Access to the canal, acknowledged within the consultation document by residents as being a 'key local asset' could be enhanced. Assessments undertaken by the developed without detriment to the safety or operation of the local road network.
1653	9	The site offers good links to existing walking and cycling routes with easy access to existing services and facilities within the settlement.
1653	10	Development on the site could be phased. A masterplanned approach would ensure early phases of development would not limit options on the remaining part of the site's long term potential and needs of Misterton and the local community. See also comments in response to Question 30 and 31 above.
1653	11	Appendix B of the consultation document lists 'the background studies or reports thathave been used to support this Site Allocations DPD'. No open space study is list using what evidence) the sites suggested for allocation as 'Protected Open Space' have been identified. Prior to the completion and publication of an appropriate, appropriate to consult on the potential protection of any land as 'Protected Open Space'. The identification of a selected number of sites at this time could confuse and issues following the publication of the appropriate, evidence-based Open Space assessment. Any responses supporting the identification of land as 'Protected Open Space be set aside.
1653	12	Notwithstanding, the lack of identified evidence base in the consultation document, we are aware that the Council was undertaking a review of its Open Space Study in la undertaken in response to the promise made during the Public Examination into the draft Core Strategy and Development Management Policies DPD in Summer 2011. T 'Open Space 2008', the PPG17 Open Space Study and the Playing Pitch Strategy). The consultation undertaken as part of that review was limited to the methodology of Space 2008'. That would not appear to allow appropriate and necessary opportunity for the results to be 're-fed' into the assessments that were then carried out by earlier phases of the study. At the time of preparing this response the 'Review of the Open Space Study 2011' was not available on the Council's website. We are not av has been no opportunity to review and comment upon any conclusions it may have made.

1653	13	Through the comments we made to the Council in September 2011 on the Review of the Open Space Study, you will be aware that we objected to the inclusion of Site 33 Green' (it was unclear if this was meant to refer to 'Natural Greenspace'). The land so identified is agricultural land. Public rights of way to this agricultural land are lim through it. It was also unclear on what basis or criteria the area had been identified as Natural Green[space]. The identified area did not include all open land betwo Misterton. Most of that open land is agricultural with limited variation in character. It is unclear why some agricultural land was included whereas adjacent land of included. Any recommendations arising from a study based an assessment of sites, the identification and definition of which is flawed will itself be flawed.
1653	14	There is no requirement to protect the land identified as SHLAA Site 93 / Open Space Site 33/9 as 'Protected Open Space'. Any control that may be required over any pr achieved through the application of existing policy and guidance, including the adopted Bassetlaw Core Strategy and Development Management Policies DPD.
1653	15	Furthermore, the area of land suggested to be identified as Protected Open Space does not accurately reflect existing development boundaries and includes land that ha associated development. These matters have previously been raised with the Council, including within submissions to the Bassetlaw Core Strategy and Development Mana
1653	16	The area suggested for protection includes land to the rear of 5, 7 and 9 Ashdown Way, Misterton that has planning permission for residential use and associated de implemented. Relevant planning permissions include: • 1/33/97/1 – Land at rear of 9 Ashdown Way, Misterton – extend garden – approved 18th February 1997; • 33/01 Misterton - Change of use of agricultural land to domestic garden – approved 14th August 2001; • 33/03/00006 – Land south of Ashdown Way, Misterton – Erect 12 resi approved 9th June 2003; • 33/05/00042 – 9 Ashdown Way, Misterton - Erect single storey rear extension, first floor extension, front porch extension and carry out interview dwelling – approved 15th November 2005; • 33/08/00013 - 9 Ashdown Way, Misterton - Erect single storey rear extension, first floor extension, first floor extension, first floor extension, front porch extension,
1654	1	Our clients control approximately 17.75ha of land fronting Shireoaks Road and Sandy Lane, formerly occupied by brickworks and company playing fields. On 1 December 2 an outline planning application for a comprehensive mixed use regeneration scheme on the site comprising office, industrial and warehouse units, food store, petrol filling pitches. The proposed mix comprises a 5,500m2 foodstore with petrol filling station, 3,090m2 of hybrid office and light industrial units, 20,980m2 of industrial and warehouse, with associated parking and servicing. The resolution to grant is subject to satisfactory completion of a 5106 agreement which we understand to be well advanced. the consultation document are provided below. These further highlight the advantages offered by the above land to meet the long term needs and aspirations of the com be allocated more housing and/or employment growth, above that already required (especially if it would deliver additional benefits to the town)? If so, please give an inc development that you would like to see (e.g. numbers of houses).
1654	2	Worksop is a town in severe need of regeneration and economic growth. Policy 7 of the East Midlands Regional Plan (still in force at the time of writing), in particular strengthened by providing new jobs, housing, services and facilities in and around its urban area. Clearly, if additional development delivered additional benefits to the to considered as appropriate.
1654	3	As the main settlement in the district, with existing connectivity and infrastructure it makes perfect sense to direct significant growth to the Sub-Regional Centre as a prior the significant employment opportunities identified through the resolution to grant planning permission at the former Vesuvius works, there remains an opportunity to c development over a wider site as part of a genuinely mixed use, sustainable allocation. It would not be unreasonable to suggest that an additional 500 dwellings co sufficient, suitable site cannot be found, and if local people wish to reduce the burden on local services.
1654	4	Alongside the significant employment opportunities identified through the resolution to grant planning permission at the former Vesuvius works, there remains an opport residential development over a wider site as part of a genuinely mixed use, sustainable allocation
1654	5	Section 3 of the Worksop Questionnaire Feedback notes that the vast majority of respondents wanted to see brown field land prioritised for redevelopment, with 47. sites. The vast majority of respondent also said that there were specific sites they would like to see redeveloped, with the Vesuvius works being included. In this regard, included for consultation as a potential mixed use allocation comprising employment. commercial and residential opportunities.
1654	6	Significant employment opportunities have been identified through the resolution to grant planning permission at the former Vesuvius works, there remains an opportur mixed use, sustainable allocation.
1654	7	Section 3 of the Worksop Questionnaire Feedback notes that the vast majority of respondents wanted to see brownfield land prioritised for redevelopment, with 47.3 sites. 1654	8	The mixed use sites identified on the potential sites map are all Greenfield sites. Section 3 of the Worksop Questionnaire Feedback notes that the vast majority of respond prioritised for redevelopment (in accordance with national and Core Strategy Policy), with 47.3% supporting the redevelopment of existing sites. The vast majority of respond they would like to see redeveloped, with the Vesuvius works being included
1654	9	On 1 December 2011, Bassetlaw Council resolved to approve an outline planning application for a comprehensive mixed use regeneration scheme comprising office, indus filling station, a football stadium and five-a-side pitches, on 17.75ha of land fronting Shireoaks Road and Sandy Lane, formerly occupied by brickworks
1654	10	It is unfathomable, and a serious omission, that in the light of this resolution to grant, the former Vesuvius site and is hinterland have not been identified for consultation regeneration opportunity comprising both employment, commercial and residential opportunities. We fail to see how the consultation can be considered as a meaningfus such a significant scheme and opportunity has not been put to the community despite being identified by them through the initial consultation process and having a resource the Issues and Options consultation to be fundamentally flawed.
1654	11	The Council is currently assessing the quality and value of open spaces in the District. The views of the local community will be important when determining whether a site the open spaces identified on the map should be protected from any future development proposals? "not, please provide further explanation. The revised open space a objective quantitative measures, such as the number of households within realistic walking, cycling and driving catchments and the number of people to whom a facili those facilities of high quality, or of particular value to a local community, should be protected. Because the Potential Sites Map shows generic 'Potential Protected Ope might be protected. Until the revised open space assessment has been completed it is not possible to comment on which sites should be protected in an informed way space and sports and recreational facilities that are of high quality, or of particular value to a local authoriti
1654		In resolving to grant planning permission on the Vesuvius site, Bassetlaw Council has already assessed in great detail, the suitability, sustainability and availability of the la it has already been through a detailed assessment methodology and has been found suitable. The local community should now be given the opportunity to com accommodate a range of uses, including residential development as part of a genuine mixed use site. This is essential given the questionnaire feedback from Worksop re We look forward to future input to the Site Allocations process and acknowledgment and identification of the site's potential in due course through allocation in the adop you and, in due course, the Inspector, will consider these points and look forward to adoption of this DPD (duly amended) in due course.
1655	1	We act for Continuity Promotions Ltd in the matter of land and buildings at Blackstope Lane, Retford. The extent and location of the site is outlined in red on the attached ownership, parts of which will be involved in future development proposals.
1655	2	As you are no doubt aware, detailed and on going discussions have already taken place with your colleague, ****** ******, as part of the SHLAA process. Indeed, a furthe February 2012 with representatives of the Council, the Environment Agency, Seem Trent and various technical/professional consultants on behalf of the owner. This is inte use, interpretation and validity of the available flood risk data. In particular, our clients and their advisers, will seek to demonstrate that the site is not at flood risk and tha development is inappropriate.
1655	3	Given the modest scale of development envisaged and the very specific circumstances which are attached to it, we do not feel that it would be appropriate to respond in f addressed the directly relevant questions as set out below: Question 10: Our clients would prefer single use housing to attach to the site and dispute claims that the site is
1655	4	Question 15: Our clients confirm that the site can be made available for development. They also confirm that commercial use has proven unviable and tenants almost imp unpopular with nearby residents who have expressed a preference for residential development. Additionally, residential traffic will find it easier to negotiate the difficult v
1656	1	The site at the former Dormer Tools site, Shireoaks Road has been assessed in terms of other potential housing allocations within the Issues and Options Paper and it is con number of other sites. The allocation of this site will: Remove an employment site which is no longer suitable or marketable for employment generating uses; Locate re part greenfield site and located within the settlement boundary; Locate residential development within a sustainable location close to public transport networks and facilities; Deliver much needed housing to meet the required distribution for the settlement _set out in the adopted Core Strategy.
1656	2	We agree that the methodology criteria set out in section 2 of the Site Allocations Issues and Options paper is suitable to identify sites for allocation for future development
1656		The 'screening approach' should be renamed to stop the confusion with 'screening opinion'. Not all criteria should be weighted the same and it should be recognised that will be for the decision maker to justify their approach by reference to the appropriate evidence base. The following table provides an assessment of site ref: 38 methodology criteria:
1656	4	1) Green. There is strong community support for the development of the site for the proposed use. This has been proven through the public consultation that has 69/11/00012. The Parish Council did not consider it to be a future employment site.

1656	1 5	2) Green. Development is compatible with existing and proposed uses. Employment uses are located to the south of the site but these can be adequately screened dwellings. Other surrounding land uses include residential dwellings and woodlands. Residents of neighbouring area welcome the proposal. There will also be less impact of the south of the site but these can be adequately screened and uses include residential dwellings and woodlands. Residents of neighbouring area welcome the proposal. There will also be less impact of the south of the site but the second se
1656	6	3) Green. Development will lead to the delivery of economic development opportunities. The redevelopment of the site will lead to employment opportunities both du living1care home elements of the site. The site has been continuously marketed but all assessments by experienced commercial surveyors with local knowledge consider
1656	7	4) Green. No Impact on agricultural land. The site is a previously developed site located within the settlement boundary and its development will not impact on any agricu
1656	8	5) Green. Not in a Source Protection Zone. Furthermore housing is generally considered by the Environment Agency as a polluting activity where as some employment use
1656		6) Green. Site is in a 'create' landscape character zone.
1656	10	7) Development of the site is likely to enhance the existing built form. The site has previously been developed for a factory use. This has been demolished, but the hard site for housing incorporating an area of open space will enhance the visual appearance of the site and contribute to the character of the area.
1656	11	8) Green. Development is likely to enhance the existing green infrastructure. The redevelopment of this site for housing including the provision of an area of public infrastructure and provide opportunities for local wildlife to integrate with the site from the woodlands to the north and east of the site.
1656	12	9) Green. The site has no existing constraints.
1656	13	The total housing growth target has been adjusted within the Adopted Core Strategy (2011) to account for the amount of housing development that has already taken following the Core Strategy examination. The housing target for the plan period for Worksop is now 2464 units (2006-2028) which gives an annual target of 112 unit remaining plan period is 1193 (2010-2028) (Adopted Core Strategy Table 4.1). Paragraph 4.2 of the Site Allocations Issues and Options Consultation Paper also sets out th (including Shireoaks and Rhodesia) taking account of past completions, deliverable sites identified in the SHLAA and commencements giving a residual requirement of Availability Assessment identifies 2545 dwellings which are developable in the 6-10 year period of the plan, 1307 units in the 11-15 year period and 2532 in years 16+. T ref: 4 an urban extension to the north east of Worksop which has a potential maximum capacity of 3000 dwellings. The figures provided in the 2011 SHLAA for deliverable 328 units. This is substantially less than the required 560 to meet the 5 year supply for Worksop. In fact this represents just over 3 years supply of land for the District serious shortfall of available land within Worksop given its prime focus for growth in the District. This shortfall will need to be compensated for within the later periods o growth will need to be accommodated to meet the 5 year supply during the whole of the plan period. It also suggests the current sites identified in the first 5 years in the across the District required by the Core Strategy.
1656	14	While the Core Strategy suggests sustainable urban extensions, it is considered that some of this requirement could be met in the shorter term by the release of the sit Road (ref: 38) which is in accordance with the emerging Core Strategy including Policy DM7 which accepts not all employment land is suitable for new employment uses strongly suggests that this is not a site that should be continued to be protected for employment use. The allocation of sustainable sites located within the settlement should be favoured for development.
1656	15	The Site Allocation Issues and Options paper identifies 32 sites in Worksop as 'Potential Housing' with a total maximum capacity of 6253 units. 3 of these sites are iden potential opportunity site. This level of housing clearly goes beyond the supply for the plan period and could not be accommodated without significant investmen Therefore the most suitable, deliverable and achievable sites within the SHLAA need to be selected in order to ensure the successful delivery of housing requirement within the SHLAA need to be selected in order to ensure the successful delivery of housing and employmen sites. On consideration of each of the potential site allocations in order to determine the most suitable and achievable sites to deliver the housing requirement within the sites are either; considered not suitable for housing and should be considered for other more suitable uses; can't be delivered during the plan period; or there are seque boundary to deliver the required housing supply.
1656	16	Although the Core Strategy does make provision for the boundaries of settlements to be changed in order to accommodate site allocations, it is considered that site considered favourable to come forward over the plan period. Support is given for the allocation of those sites located within the settlement boundary. The majority of w sites would be allocations of less than 10 dwellings which is against best practice guidance. However, their location within the settlement boundary and providing small in 567, 568, 569 and 570 providing a total of 18 dwellings.
1656	17	Site Ref: 38 and 21128 -Dormer Tools -Potential Housing and Potential Protected Open Space. The development of these two sites for housing is supported as a pref currently a parcel of vacant land located within the settlement boundary of Worksop to the north west of Worksop town centre and to the east of the village of Shireoa more sustainable and deliverable sites within Worksop. It is important that the whole area is developed comprehensively as this provides the best opportunity to secu development so that the new open space adds to rather than detracts from the attractiveness of the development as a whole. Such an approach will allow for the dev environment to the north and east.

1656	18	An outline planning application has been submitted (ref: 69/11 /00012) for up to a maximum of 80 dwellings and 72 residential care home/senior living units. (A copy of enclosed on CD).
1656	19	The former factory units have been cleared and a land contamination survey has been carried out which concludes the site is satisfactory for residential development.
1656	20	The development proposal will deliver much needed housing which will be in keeping with the surrounding residential character of the area to the north west. The appl and developing housing on the site will enhance the overall quality of the environment and provide a compatible land use.
1656	21	It is considered that when employment sites are no longer required for employment purposes and demand is no longer present for the re-use of poorer quality and unsuit for more appropriate uses such as housing rather than stagnating the site.
1656	22	The Viability Assessment and the marketing information carried out as part of this application demonstrates the lack of demand for the application site for employme providing new employment uses compared to providing housing on the site. It is therefore considered that the site should be released for housing development in accor DM7 and the emerging National Planning Policy Framework.
1656	23	Site Ref: 60 and 70. Both of these smaller capacity sites are considered to have other preferred uses for either business or retail which are more suitable for the location a
1656	24	Site Ref: 348 and 374. The redevelopment of these sites is supported given their locations. However, the delivery of both of these sites is uncertain as set out in the SH would be futile.
1656	25	Site Ref: 4. Mixed use site see below.
1656	26	Site Ref: 8. The site is located on the edge of the settlement boundary to the north of Worksop, but would connect to existing residential development to the south and south of the site off Winster Grove which could reduce the potential capacity of the site given that this is taken through a small existing housing estate.
1656	27	Site Ref: 9. Access would need to be provided from Birchfield Drive and Westwood Drive as well as from Mansfield Road.
1656	28	Listed Building and Conservation Area would need to be considered.
1656	29	Site Ref: 14. Would require demolition of existing dwelling which land owner has bought in order to facilitate access of greater than 5 dwellings.
1656	30	Site Ref: 28. Mixed use site see below.
1656	31	Site Ref: 153. Potential opportunity site. Previously developed Brownfield site outside the settlement boundary. Agree with suggestion of limited housing, restaurant/public
1656	32	Site Ref: 561. The majority of this site actually lies within the settlement boundary of Shireoaks. Development of housing in this location could be supported provided th the site can be adequately addressed.
1656	33	Site Ref: 566. Allocation of less than 10 so not in accordance with national guidance
1656	34	Site located on the edge of settlement boundary, but given capacity would be small infill within an existing residential area, this could be supported.
1656	35	Site Ref: 587: Potential Opportunity site. Previously developed Brownfield site outside the settlement boundary. Agree with limited housing to connect to site ref: 153. Overlooking the Chesterfield Canal and marina.
1656	36	The above preferred edge of settlement sites which consist of brownfield land give a total of 233 units. Added to those located within the settlement at 98 units brings t supply for Worksop to 331 units. This figure is well below the 1517 units required in the Site Allocations paper. Therefore, greenfield sites will need to be released in order Strategy.
1656	37	It is agreed that the redevelopment of an existing site such as Dormer Tools should be allowed to come forward for development as soon as possible as all these edge of s The Council should however, take serious consideration of likely completion rates on each site. Our experience would suggest that higher level of completions to meet th by bringing forward a selection of sites of various sizes and locations. Given the present undersupply of sites in Worksop to meet the Core Strategy, considerable weight sh
1656	38	Site ref: W1 – Land South of A57. This site is grade 3 agricultural land and the availability of this land is currently unknown.
1656	39	However, the site is in close proximity to the A57 and is therefore commercially attractive. It is certainly preferable in market terms to site ref: 38.
1656	40	Site Ref: W6 – Land at Gateford Common This site forms part of the mixed use site at Gateford Road and Claylands Avenue. The site is currently in agricultural use and lie east and employment uses to the south.
1656	41	The site is in close proximity to the A57 and has been identified as commercially attractive.
1656	42	The delivery of this site depends on facilitating adequate access.
1656	43	Site Ref: W8 – Land at Shireoaks Common. This site is also a potential mixed use site located on the edge of the village of Shireoaks. The land is bound on the eastern western corner has been identified as lying within flood zone 2.
1656	44	There are potential issues relating to access off the A57 which would need to be addressed.
1656	45	Prominent location along this transport corridor makes this site commercially all active as an employment site.

The site lies adjacent to a Conservation Area wit
1656	54	The redevelopment of this site would require major junction and highways infrastructure and the current uses of the site may prevent the whole of the site being develop use.
1656	55	A number of options are presented in the Site Allocations document and the preferred option of this urban extension to Worksop is Option 3 providing a small mixed use
1020	55	and 44% employment land (27ha). This would provide the much needed housing for Worksop and is realistic within the plan period.
1656	56	The full capacity of the site is considered to be too large to attract a single developer and would need to be phased over the plan period, which cannot be guaranteed.
1656	57	Option 1 would extend beyond the plan period and given the requirement to maintain open space it would be preferable to see a small area of this site developed in co
1050	57	sites within the settlement boundary.
1656	58	Site Ref: 28 – Gateford Common. The use of this site for a mix of housing and employment would be preferred given the neighbouring employment uses to the south of
		and boundary treatment.
1656	59	The residential element would connect well to the existing residential development to the east and employment uses would be preferred to the south.
1656	60	Site Ref: 2/128 – This representation seeks to object to the protection of open space ref: 2/128 located to the south of the former Dormer Tools site, Shireoaks Road currently pending outline planning application ref: 69/11/00012, public consultation with the local residents and Parish Council was carried out. Feedback from this consultation any future proposal for the site was dismissed due to the lack of demand for such a facility in Rhodesia and no interest from an end user. As a result the scheme so a space within the centre of the site and additional landscaping throughout.
1656	61	Rhodesia already has a playing field which the Parish Council look after and they would not be looking for any further provision for them to maintain.
1656	62	By isolating this part of the site this unused green space will remain poorly integrated with any future housing development and as such represents a missed opportunity in
1656	63	Site Accessibility: Busy roads – The majority of Shireoaks population would have to travel along busy roads to reach this site.
1656	64	Restrictive entrances – The site is within a derelict area and presently difficult to access
1656	65	Isolated locations – The site is presently isolated from existing residential locations by the derelict land surrounding it.
1656	66	Insufficient paths into and across the space – There are no public footpaths to the site.
1656	67	Other barriers identified – The site is wholly within a private estate therefore no public access
1656	68	Safety and security: Secure boundaries – The site has no secure boundaries.
1656	69	Safety surface – The site has no safety surface.
1656	70	CCTV – The site has no CCTV
1656	71	Located within the residential area or adjacent to its border – The site is not presently located in or adjacent to a residential area.
1656	72	Overlooked throughout – The site is not overlooked at all.
1656	73	Additional criteria: Site quality – The site is of poor quality.
1656	74	Context of the site in relation to other open space – The site relates poorly to the natural woodland beyond the derelict site.
1656		Structural and landscape benefits – The site has no landscape or structural benefits.
1656	76	Ecological benefits – the site is not designated.
1656	77	Educational benefits – the site has no educational benefits
1656	78	Social inclusion and health benefits – the site has no Social inclusion and health benefits

Responde	-	Answer
nt	nt	
1656	79	Cultural heritage benefits – the site has no cultural benefits
1656	80	Amenity benefit and sense of place – the site has no amenity benefit
1656	81	Economic benefits – the site has no economic benefits
1656		When assessed against the Council's own assessment criteria with respect to value, the site scores poorly, particularly against the accessibility criteria and the additional c lack of overlooking and poor site quality due to lack of maintenance. It is therefore considered that this parcel of land should be removed from the area of potential prot is not considered to form a usable open space function.
1657	1	The site has previously been assessed as part of the Council's SHLAA exercise and identified as being suitable for housing under reference BAS0236.
1657	2	Owing to its limited size, the Council's final SHLAA concluded that the site should be brought forward as part of the adjacent, much larger, site to the east (site reference: I adjacent site (BAS0237) is far too large given the limited number of new dwellings earmarked for the village by way of the Issues and Options Consultation Paper. Instead, his neighbour immediately to the west, to jointly promote an extended version of his site (still to be referred to as site reference BAS0236) for consideration as one of the and South Wheatley in the subsequent consultation stages of the Site Allocations DPD.
1657		I can confirm that I am jointly instructed by both landowners and therefore the fact that the proposed allocation is in 2 separate ownerships should not be considered a fa If allocated, both landowners will make the combined site immediately available for development.
1657	4	Site BAS0236 is currently in agricultural use. The land immediately adjacent to the west is (as is confirmed in the Council's final SHLAA) in 'wider residential use' comprising owner of 'Whitegates' as additional amenity land and cut twice a year.
1657	5	Access for maintenance is presently provided through Site BAS0236 and therefore there is further logic in both sites being combined for development in that should site BA paddock land to the rear of 'Whitegates' would effectively be landlocked.
1657	1 6 1	Both parcels of land immediately adjoin the existing village boundary. The western and northern boundaries to both are particularly strong, being defined by mature tree provide a long term defensible limit to the settlement.
1657	7	The paddock also benefits from a continuous hedgerow along its eastern boundary. Any small scale housing development would seek to integrate as much of this as possi
1657	8	Access would be provided directly off Top Pasture Lane. Visibility can be provided in both directions in accordance with the requirements of Manual for Streets.
1657	9	For the most part, the Council's suggested 'Screening Methodology' is supported and considered to provide a sound and logical basis upon which to select the final sites to
1657	10	Our only concern relates to the potential application of Criterion 1. In our experience, new housing development is very rarely 'supported' by the local community; particu greenfield land – something which the Council recognises[1] must occur if the District's future housing and employment land requirements are to be met. Clearly, the Loca important part in the modern planning system; however the Council must ensure that account is taken of local views only where these are based on valid planning ground
1657	1 11	In the above connection, it will fall on the Council in subsequent consultation stages of the Site Allocations DPD to explain how (and on what basis) the views of the local co choice of some sites over others.
1657	12	Such is the importance of creating and protecting sustainable rural communities in what is a predominantly rural District, it is considered essential that rural housing is deli envisaged in the Core Strategy, particularly if additional facilities, infrastructure improvements and affordable/local housing is to be provided where the need arises. Accor from the Rural Service Centres and towards Worksop, Retford and Harworth Bircotes (or alternatively focussed in just one of these towns) is not supported.
1657	13	We are strongly of the view that at least 12 new houses should be allocated for the villages of North and South Wheatley collectively and therefore fully support the level of the Consultation Paper.
1657		The village benefits from a number of local services and facilities which require long term support from the local community. The village is extremely proud of its Post Offi one of the local residents when faced with closure.
1657	15	Creating and safeguarding sustainable rural communities are considered to be of paramount importance. Such objectives can only realistically be achieved through a limit growth, the village could simply stagnate with dire consequences for many of the local facilities and residents.
1657	16	12 new houses over the next Plan period – i.e. up to 2028 represents less than 1 new house per year and therefore such a level cannot be considered too high.
1657	1 1/ 1	It is understood that some local residents have expressed a wish to see additional facilities, infrastructure improvements etc. However, it must be acknowledged that the only deliver such through new housing allocated in the Village. As recognised in the Consultation Paper, such facilities are unlikely to be provided if no development takes

nt	nt	
1657	18	Our preferred housing allocation is Site BAS0236 as extended by the immediately adjoining paddock to the west. For the avoidance of any doubt, please find enclosed local proposed allocation edged red. It is considered that a meaningful level of new housing development could be easily accommodated on this combined site with little if any setting – i.e. it is not affected by the Conservation Area boundary which extends beyond the settlement limits to the west and to the south as a means of preserving the set these directions. The suitability of the site is further endorsed when applying the nine criteria comprising the Council's 'Screening Methodology' below:
1657	19	Criteria 1. The landowners have informally consulted members of the village community to gauge local reaction to the two sites being joined for development purposes. T support the site for small-scale housing development and I understand some will have written direct to the Council confirming the same. In the above connection, there is community being supportive of the development of the site.
1657	20	Criteria 2. The site(s) will be collectively developed to contribute towards meeting the Council's requirement for at least 12 new houses for the village. The site immediate and wider domestic curtilages to the north and west and will therefore be compatible with existing/neighbouring land uses.
1657	21	Criterion 3. Assisting in meeting the Council's housing target of 12 new dwellings will help to support and safeguard existing local services and facilities, in particular the Po Such facilities are vital to the future of sustainable rural communities, but also provide local employment opportunities to all ages.
1657	22	Criterion 4.By combining with non-agricultural land to the west, rather than the larger agricultural field to the east, the allocation of the site subject of these representatio agricultural land being needlessly lost to development.
1657	23	Criterion 5.The site will not impact on a source protection zone.
1657	24	Criterion 6. The combined site is extremely well contained by existing mature tree and hedgerow planting along its north and western boundaries and relates more logicall than to the countryside beyond (also Criterion 7).
1657	25	The eastern boundary of the paddock to the rear of Whitegates is also particularly strong and it is envisaged that it will for the most part be retained in any residential layo
1657	26	Whilst the eastern boundary of the original site BAS0236 is no longer present (it having been removed as part of more modern agricultural practices), there is the opportur with a new native hedgerow species which can only serve to enhance the landscape character.
1657	27	The allocation of this site together with other smaller sites to contribute towards the minimum 12 new dwellings avoids the need to release some of the larger agricultural submitted, if developed would have a much greater impact on the landscape character of the area.
1657	28	Criterion 7. There is sufficient width to the land to enable the siting of up to 2 dwellings fronting Top Pasture Lane, thereby preserving the character of development along for a new private driveway to serve a number of dwellings on land to the rear.
1657	29	The site falls outside of the Conservation Area boundary defined for the village and is therefore free of some of the conservation and heritage constraints that at least one subject to. The take up of site BAS0236 in favour of a site which falls within the Conservation Area, i.e. one which contributes to the setting of the village, is considered to than detracting from the existing built character of the settlement.
1657	30	Criterion 8. The retention of existing hedgerows and the reinstatement of an historical field boundary along the entire eastern length of site BAS0236 will serve to enhance settlement by the introduction of native habitats which will offer important ecological and biodiversity benefits.
1657	31	Criterion 9. The SHLAA identifies that the western half of the site is identified as an area of archaeological interest. In this connection, it is expected that an archaeological be in place prior to the commencement of any development should the site ultimately be allocated for housing.
1657	32	Any proposed development on the site will need to ensure that the surface water runoff rate does not exceed the existing greenfield run-off rate.
1657	33	There is sufficient room to accommodate a 2m x 43m visibility splay to provide a satisfactory means of access to serve the site direct off Top Pasture Lane.
1657	34	Those sites shown on the map as potential Protected Open Space designations are considered to contribute to the quality and value of open spaces in the Village and there development pressure is supported.
1657	35	I would be obliged if these matters could be given thorough consideration in your further preparation of the Site Allocations DPD and confirm that I wish to continue to be opportunity to advocate the relevant representations through the Examination in Public procedure if necessary.
1658	1	Representations The two parcels of land are owned by two willing landowners and comprise agricultural land that abuts the settlement boundary to the east of Retford extends to approximately 6.3ha and the land to the south of Grove Coach Road extends to approximately 3.6ha. Both sites are being promoted together as part of a co developed individually. Whilst my client has not until now promoted either site themselves, Chesterton Humber's have, on the landowners' behalf, previously put forwa SHLAA process (site references 370 and 51). Copies of the Council's SHLAA Assessments are enclosed with this letter for ease of reference.
1658	2	The SHLAA identifies the site to the north of Grove Coach Road (SHLAA site ref: 511) as being suitable for housing development and suggests this could accommodate 1 (6.57ha) at a density of 30 dwellings per hectare. The assessment considers there to be no known constraints which would prevent the site from being suitable for requirements can be met.

nt	nt	
1658	3	The SHLAA identifies the site to the south of Grove Coach Road (SHLAA site ref: 370) as potentially suitable for housing development, which could accommodate 96 dwel at a density of 30 dwellings per hectare. However, this is subject to the identified constraints being addressed, which include issues regarding highways and drainage. SHLAA by the Council should not preclude the allocation of the land for housing as these issues can and would be resolved during the detailed planning application stage. in turn below.
1658	4	Highways. The Council identified that Grove Coach Road would require significant improvement in its width to provide adequate access and footways so that site ref 370 suggest that a section 106 or CIL contribution is likely to be sought to enable mitigation of the traffic implications. Similarly, Bracken Lane would need to be improved so comments made by the Council in this regard state that there is no objection in principle. Accordingly, the issues identified for both sites would not affect the deliverabili within the detailed planning application via section 106 or CIL contributions and appropriate highway design.
1658		Flood risk and drainage. Both sites are identified as being within Flood Zone 1 and therefore comprise land that does not have a risk of river or sea flooding. However, Flood Risk Assessment (FRA) would be required at the detailed planning application stage to evaluate surface water drainage and provide any mitigation, if required. We should be applied by the local planning authority to demonstrate there are no reasonably available sites in areas with a lower probability of flooding that would be appro proposed. In this respect, preference should be given to locating most vulnerable development, i.e. residential uses, in Flood Zone 1. Accordingly, the allocation of my cli use and would be sequentially more preferable over other potential housing sites put forward in the Site Allocations Issues and Options consultation document that are particularly for the sequential of the preferable over other potential housing sites put forward in the Site Allocations Issues and Options consultation document that are particle.
1658	6	In addition, the land to the south of Grove Coach Road is also identified as having 'possible drainage problems' however no other detail is expressed within the SHLAA fo evaluated as part of the FRA and an appropriate sustainable urban drainage system incorporated into the design of the proposal to ensure green run-off rates are mainta site. With regard to the above information, the issues concerning flood risk and drainage can be dealt with by means of an appropriately designed layout including the drainage techniques. It is therefore respectfully submitted that my client's land should be identified as preferred housing allocations for Retford within the Site Allo constraints that would prevent the suitability and deliverability of the development.
1658	7	We support the criteria in the Screening Methodology.
1658	8	However, it is considered that criterion I, which refers to whether the local community is supportive of the development of the site, should be further defined. T fundamental consideration in the site allocation process, in line with the new Localism Act 2011. However, the Council should be more explicit within the main text of the number of people in support/against the development of the site but also the appropriateness of the opinion within the planning context. A recent study by the Natio of respondents oppose new homes being built in their local area. In this respect, the Council need to be made aware of the rational planning reasons that provide the mathematic development of a site.
1658	9	Retford is identified as a Core Service Centre within the Bassetlaw Core Strategy (to be adopted on 22 December 2011) with a number of facilities and services. requirement of at least 26% for Retford. This therefore allows for more growth above and beyond the minimum target set for Retford. Accordingly, additional hour requirement are and should be allowed to ensure there is sufficient housing land within Retford to support its growth as a Core Service Centre. This would also impressed for core with any change in circumstances throughout the plan period and thereby making the DPD sound.
1658	10	We would prefer site 370 and site 511 to be developed for housing in the future. The following is a brief assessment of the land when set against the criteria the Council will then be put forward within the Preferred Options Report. However, criterion 1 has not been addressed within this letter of representation as the public opinion wil current and forthcoming public consultation process.
1658	11	The allocation of both sites for housing would provide a logical extension to the existing residential area to the east of Retford which it already abuts. Any proposed reside safeguard the residential amenity of the neighbouring properties through appropriate contextual design. The proposed housing allocation would therefore be compatib Accordingly, the Council should classify both sites as having a 'green light' as the development would clearly be compatible with existing and proposed uses.
1658		Although the sites are not being promoted for an overt economic use, the allocation of housing at the sites will indirectly enable economic growth through the investment will create construction jobs and appropriate housing types within a popular residential area ensuring that Retford continues to be a vibrant and attractive place to live a both sites as having a 'green light' as the _development would lead to the delivery of economic development opportunities.
1658	13	The urban boundary of Retford is surrounded by Grade 2 and 3 agricultural land. To the east of Retford, where the sites fall within, the land is identified as Grade 3 agri classify both sites as having an 'amber light' because the development will only impact on grade 3 agricultural land.
1658	14	The allocation of the land for housing would not impact on any groundwater sources as residential development would not be considered to be a polluting activity. In groundwater source protection zone identified by the Environment Agency.
1658	15	It is important to note that this land including the immediate surrounding area is the only part of Retford that is not covered by a groundwater source protection zone.

1658	16	The Bassetlaw Landscape Character Assessment (2009) identifies the sites as falling within Policy Zone 04: Clarborough of the Mid-Nottinghamshire Farmlands county policy zone is to conserve. Policy Zone 04 recognises the landform within this area as being strongly undulating that descends steeply in the west towards the Chesterf relatively open to surrounding landscape and wooded skylines from higher ground, becoming more restricted by topography and scattered woodlands in lower lying part land adjacent to the existing built form of Retford with little visual screening to segregate the two and therefore any additional development adjacent to this area wou context. Subsequently, the open rural character of the policy zone landscape would be conserved by concentrating new development on the edge of the settlement. The enhance the existing Green Infrastructure as described in the response to criterion 8 and, alongside an appropriate landscaping scheme, would therefore seek to conserved with this policy zone. Accordingly, the Council should classify both sites as having an 'amber light' because the development would be seen within the existing or mediate and enhance the landscape features as much as possible.
1658	17	The development would seek to conserve and/or enhance the existing built character of the settlement or neighbourhood through careful consideration of the exis development as part of a detailed planning application, following the allocation of the sites. Accordingly, the Council should classify both sites as having a 'green light' be enhance the existing built form.
1658	18	The Green Infrastructure Study (May 2010) identified the area to the east of Retford as the most prominent and strategic area of deficiency, particularly relating to c infrastructure network. The document continues to highlight that the connectivity needs of the area can be addressed by upgrading footpaths, promoting new rece settlements, and encouraging hedgerow management in order to enhance wildlife migration routes and overall biodiversity levels. Both sites are on the edge of the therefore fall within this area of deficiency. The allocation of the sites for housing could therefore help to alleviate this deficiency (within the design of the scheme submi following allocation) through the enhancement of existing footpaths and recreational routes to promote greater integration of the new development along the urban fri to the east and Gamston and Eaton Woods to the south east. Accordingly, the Council should classify both sites as having a 'green light' because the development of Infrastructure.
1658	19	As detailed above, the constraints identified by the Council within the SHLAA can be resolved through appropriate mitigation and would not affect the suitability or the de Accordingly, the Council should classify both sites as having an 'amber light' because the sites have some constraints, which can be resolved.
1658	20	We would not support the redevelopment of the sites which fall within Flood Zone 2 for residential purposes as there are considered to be sequentially more preferable Retford that fall within Flood Zone 1.
1658	21	We support 'Option B' and suggest that any additional growth should be focused in Retford.
1659	1	My client owns the majority of the land edged red on the attached plan comprising land and buildings on the west side of West Carr Road, Retford. It is acknowledged th use, however my client's business is looking into the feasibility of relocating, I note a number of other sites comprising part of the same wider employment designation have a rearlier SHLAA exercise -namely site references 25, 71, 132 and 133. For ease of reference, the site subject of this representation is shown edged red on an extract of the C
1659	2	It is noted that sites 132 and 133 have automatically been discounted as part of the SHLAA exercise owing to the existing employment use designation. The SHLAA Assessi of both sites is unknown and this may have had a bearing on the Council's approach to deliverability and therefore overall suitability.
1659	3	Site 71 has been considered 'potentially suitable' as part of the SHLAA exercise and there is no mention of the same protected employment site policy constraint as notwithstanding the fact that all four sites fall within the same designation as confirmed by reference to the Local Plan Proposals Map. When considering the principle of within the context of PPS3 (using land efficiently being a key consideration in planning for housing), Inspector J Woodcock concluded 'there is nothing in the eviden development on the grounds of safeguarding employment land'. In the above connection, site 71 has of course now been identified as a potential housing site in the Sit Paper.
1659	4	Similarly, the SHLAA Assessment for site 25 also concludes that this site may be suitable for housing notwithstanding surrounding employment uses – however, as some for some housing development on the site. Again, there is no reference to conflict with the protected employment site policy as was the case for sites 132 and 133.
1659	5	You will see from the attached plan that the site my client wishes to promote effectively consolidates the northern half of the existing employment site, enabling this and retaining the southern half to continue to provide local employment opportunities in addition to the number of other protected employment sites serving Retford. My c the inclusion of this site for housing in conjunction with sites 25 and 71 within the context of the emerging SA DPD.
1659	6	Within the context of all the above, my client would support the development of site 71 for housing, in conjunction with his own site 25, as part of a more comprehensive

1660	2	The site has previously been promoted by the longstanding local landowners, Messrs J and M Pepper in response to the Council's 'call for sites' and has been identified as the Council's original and subsequent 'final' Strategic Housing Land Availability Assessment (SHLAA) assessments under site reference 39. The site has also previously been Capacity Study (ELCS) as being suitable and achievable under site reference W1O.
1660	3	For the most part, the Council's suggested 'Screening Methodology' is supported and considered to provide a sound and logical basis upon which to select the final sites to
1660	4	Our only concern relates to the potential application of <i>Criterion 1</i> . In our experience, new development is very rarely 'supported' by the local community; particularly whe -something which the Council recognises] must occur if the District's future housing and employment land requirements are to be met. Clearly, the Localism Agenda will pl modern planning system; however the Council must ensure that account is taken of local views only where these are based on valid planning grounds. In the above connect consultation stages of the Site Allocations DPD to explain how (and on what basis) the views of the local community have been used to assist in the choice of some sites ov
1660	5	Overall levels of housing and employment growth across the District have of course already been set following the Council's recent adoption of the Core Strategy. The C housing requirement for approximately 1,386 dwellings and a residual employment requirement of 46.88 hectares and this level was generally supported by ourselves DPD. As the primary town within Bassetlaw and as the sole Principal Urban Area, it is right that Worksop is the focus for major housing and employment growth.
1660	6	However, it is equally important that additional growth over and above this level is not unnecessarily channelled towards Worksop (or indeed, towards any of the Dis expense of limited but nevertheless worthwhile development in some of the District's smaller Rural Service Centres which will depend on such to sustain important loc much needed impetus for the delivery of affordable housing as and where the need arises.
1660	7	Housing figures are never an exact science; however it is expected that Neighbourhood Plans (and the 'minimum' requirement set in the Core Strategy) could provid growth was required in Worksop at some future point to deliver specific and significant local benefits.
1660	8	The Council advocates allocating more employment land than is identified to be required in the ELCS in order to provide choice and flexibility (and ultimately delivery) of jound the allocation of new employment sites, consideration should be given as to the likely delivery of new individual employment sites within the Plan period and if and h proposed mixed-use sites.
1660	9	Our preferred housing site is Land West of Blyth Road, Worksop identified on the map and in the Council's final SHLAA as 'site reference 39' which is promoted as a m reference W10'. Please refer to detailed response to Question 5 for further information.
1660	10	Our preferred employment site is Land West of Blyth Road, Worksop identified on the map and in the Council's Employment Land Capacity Study as 'site reference W1O' in combination with 'site reference 39'. Please refer to detailed response to Question 5 for further information.
1660	11	Our preferred mixed-use site is Land West of Blyth Road, Worksop identified on the map as 'site reference 39/W1O'. The Council's final SHLAA concludes that the site existing built form of Worksop and there are no known constraints which would prevent it from being developed.
1660	12	The original SHLAA expressed some concern regarding the compatibility of the proposed residential use with the existing employment use to the north. However, as a lallayed and the final SHLAA concludes that the proposed uses could easily be accommodated on the site. This site (and a proposed housing/employment split) is all consultation document and briefly described in paragraph 4.12 of the same document.
1660	13	This permission extends the dynamic curtilage of the existing employment site to the northwest. This also coincides with the western boundary of the proposed mixed land being considered as one which ought to comprise one of the Council's preferred extensions to the development boundary. Such logic is not at all presently convey somewhat short of the existing employment site. In this connection, it would be helpful if the map could be extended to show the adjacent existing employment site document.
1660	14	The reference to the consequence of planning permission 59/11/00005 on the residual requirements for employment land in Worksop is queried as the application site ar hectares as suggested).
1660	15	Figure 4.6 shows a potential split between housing and employment of which 70% is housing (around 270 houses) and 30% is employment land (5.5 hectares). However, with the Council previously expressed a willingness and commitment to deliver 300 houses on this site at a rate of 30 dwellings per year.
1660		Whilst a consequence of this would be a slightly smaller area proposed for employment purposes, the type of employment land to be delivered on the site is expected t suited to small indigenous companies closely aligned to and associated with the existing Distribution Centre who have been a hugely important local employer in t warehouse development previously tabled.
1660	17	The split shown in Figure 4.6 appears to be broadly based on an illustrative masterplan previously prepared by Taylor Wimpey UK Limited's architect for discussion pur been further refined and is now formally submitted in support of the promotion of site 39/W10 as a mixed use site as part of the enclosed Advocacy Document prepare provides a brief summary of these representations, but also provides a more detailed commentary of the various factors which have influenced the overall design an including reference to an updated masterplan and landscape strategy.

nt	nt	
1660	18	Criteria 1: In the absence of any feedback yet generated by way of this consultation document, it is not considered appropriate to apply the traffic light system for Crite Limited has not yet held its own independent consultation with local communities to gauge support for the development of the site, this is something they have succ prepared to approach the design and layout of the site in a suitably flexible manner so as to be able to be receptive to any comments or suggestions which may be for the
1660	19	Criteria 2: The residential element of the mixed-use allocation will be directed to the south of the site closest to the existing residential area forming the current limit portion of this area of land is already in residential use comprising a detached house and extensive domestic curtilage known locally as 'Thievesdale House'.
1660	20	As mentioned previously, earlier concerns raised in the original SHLAA with regard to the compatibility between the proposed residential use and the existing emplo addressed owing to the employment element of the mixed-use allocation serving as buffer development between the existing Distribution Centre development and the p
1660	1 21	Criterion 3: The site is promoted as a mixed-use allocation and will therefore clearly help to deliver economic development opportunities. The employment element of th comprise good quality office and start-up premises closely aligned to and associated with the existing Distribution Centre.
1660	22	The existing Distribution Centre is committed to sustainable growth and has been approached by several of its B8 tenants for ancillary office space which the site present confident from the number and variety of enquiries received over the last 12 months that it could secure office-based tenants on the site had it had such premises to of situation whereby existing tenants will not commit in such a way that the Distribution Centre could secure finance to build additional premises. The residential element of enable the Distribution Centre to construct appropriately sized new office premises without reliance on bank intervention. In the above connection there is a redevelopment allied and/or associated with the adjoining existing warehouse operation, as well as start-up business premises drawing investment in from surrounding ar and responding to the needs of those companies already benefitting from the existing warehouse facilities who have expressed an appetite for onward investment and sur
1660	23	The housing element of the mixed-use allocation will assist in meeting the above objectives by providing the financial impetus as a consequence of the implementation the issue of delivery of job-creating development is of paramount importance to the District, Taylor Wimpey UK Limited are happy for the delivery of a meaningful prequired prior to the implementation of the Phase II residential development, thereby ensuring delivery of job-creating development within the Plan period as forecast a the potential for the site to deliver economic development opportunities and should therefore be afforded a 'green light' when assessed against <i>Criterion</i> 3.
1660	24	It is considered that this site differs materially from those employment allocations which are promoted on a purely speculative basis and those existing good quality emplo and mixed-use allocations will inevitably result in the loss of a good quality economic development site either in whole or in part.
1660		Criterion 4: Reference to Natural England's Agricultural Land Classification map confirms that the majority of agricultural land to the north and east of Work sop is classed
1660	26	Indeed, all but two sites presently identified in the consultation document as potentially suitable for a housing or mixed-used allocation appear to fall within the same agr perform no better (or worse) than others.
1660	27	Sites 9 and 30 however appear to be classed as Grade 2 land and therefore ought to be considered less suitable -i.e. a red light for the purpose of this criterion.
1660	28	Paragraph 2.32 of the consultation document confirms that information is not available to differentiate between Grades 3a and 3b in Bassetlaw and therefore the Cour will consider all Grade 3 sites as being of the same quality unless evidence to make this distinction is provided. In this connection, Taylor Wimpey UK Limited intends to agricultural land to seek to clarify whether it falls more specifically into Grade 3a or Grade 3b.
1660		On this basis, the site should be afforded an 'amber light' when assessed against Criterion 4, as will no doubt all other sites that have been put forward as part of this cons
1660	30	<i>Criterion</i> 5: Paragraph 2.34 confirms that the majority of Bassetlaw's major settlements are in a Source Protection Zone. It is perhaps not surprising that all of the sites ide to be affected by the catchment to the source protection zone. Paragraph 2.35 confirms that housing is not generally considered by the Environment Agency as a polluting such as industrial developments, present as higher risk. It further clarifies that the closer to an extraction point (Source Protection Zone I), the greater the risk of contamin the development does not affect water quality. The site we promote [39/W10], like all of the other sites identified in the consultation document as 'potential' employment Source Protection Zone 3. However, neither the residential nor employment elements are considered to comprise polluting activities. Moreover, there are no sites which the Source Protection Zone. The only site which appears to fall within Source Protection Zone 2 -i.e. closer to the extraction point -is the mixed-use site reference 28/W6. others identified) should be afforded an 'amber light' when assessed against Criterion 5, whilst recognising that the proposed uses would not be considered to be a polluting other site identified) should be afforded an 'amber light' when assessed against Criterion 5, whilst recognising that the proposed uses would not be considered to be a polluting other site identified is the proposed uses would not be considered to be a polluting activities.
1660	31	Criterion 6: The site is identified in the Bassetlaw Landscape Character Assessment within Landscape Character Policy Zone S PZ 37 - Hodsock Estate lands with Plantations assesses the condition of the landscape in this area to be very poor with only moderate sensitivity. The overall assessment records the landscape character as 'create' -i.e. appropriately designed schemes that could introduce new or enhanced landscape character features. Accordingly, the site should be afforded a 'green light' when assesse

1661		Misson: 383 - No objection on highway grounds subject to it being demonstrated any new access could provide sufficient visibility splays when considering the narrow foot
1661	1 10 1	N Leverton: 586 - No objection in principle subject to adequate access design in accordance with Notts CC standards. A footway should be constructed across this site from proposals in order to provide a safe place for pedestrians to wait before crossing the road.
1661	11	N & S Wheatley: 236 - Top Pasture Lane is adopted in part. The adopted section of road can accommodate 2-way traffic flows, has street lighting and has a footway on the section the lane is unsuitable to serve additional residential development unless significant highway improvements occur to bring it up to an adoptable standard. It would a adopted section of Top Pasture Lane. On this basis, there is scope for residential development on this site, subject to the development conforming to this Authority's Highy splays etc.
1661	12	Retford: 336 - No objections in principle, but subject to adequate access off Bolham Lane being provided at design stage to Notts CC requirements.
1661	-	Retford: 342 - No objections in principle, but subject to adequate access being provided at design stage to Notts CC requirements.
1661	14	Retford: 364 - There is no obvious suitable access to this site without removing existing houses. Notwithstanding this, if access could be achieved, a loop road arrangement West Hill Road made at two points. Off site highway works would be required subject to the agreed findings of a transport assessment. This site is not so well linked with the to the north and east of the town. A Travel Plan will be required.
1661	1 15 1	Worksop: 23 - There appears to be an existing factory building on the site. The existing vehicular access to the rear of the property via Boundary Row is substandard, and is increase in vehicle movements. Considering the existing/previous use of the site, limited residential development is likely to be acceptable.
1661	16	Worksop: 151 - The Highway Authority has concerns with regard to residential development in this location. The site is in a location where the A57 would cause severance sustainability and having the potential to lead to pedestrian and cyclist safety issues due to the need to cross the road. Furthermore, there is no safe pedestrian route to action area. These issues would need to be addressed if the site were to be developed for housing. No direct access to the A57 will be permitted.
1661	17	Worksop: 371 - The Highway Authority has concerns with regard to residential development in this location. The site is in a location where the A57 would cause severance sustainability and having the potential to lead to pedestrian and cyclist safety issues due to the need to cross the road. These issues would need to be addressed if the site
1661	1 12 1	Walkeringham: 286 - There is a narrow footway to the north of the site which is substandard and provides little protection to pedestrians. Unless this could be improved th village centre. Improvements would probably require a narrowing down of the carriageway, which would require further detailed assessment. Such narrowing may not be
1661		Walkeringham: 353 - There may be problems in achieving adequate and safe access visibility splays. This would need to be assessed once speed readings are taken to dete Also there is a narrow footway to the north of the site which is substandard and provides little protection to pedestrians. Unless this could be improved then this site does 286 above). Therefore the delivery of housing on this site may be difficult to achieve.
1661	20	Walkeringham: 366 - No objections in principle but footway provision would be required along the site frontage and possible improvements made to the existing footway
1662	1	Yes - but it was felt that some areas were better publicized.
1662	2	Option A: Spread between Worksop; Retford and Harworth Bircotes?
1662	3	Circumstances have changed in the village since the previous consultation and taking into consideration the recent loss of the village post office and the possible loss of the auction; the Parish Council disagree with the above question. Members are also questioning whether Elkesley can still be classed as a Rural Service Centre.
1662	4	No, the Parish Council's view would not change, a development of 33 houses on this site is too many.
1662	5	The Council would also like to have the Ridge and Furrow area of the field protected from any development.
1662	6	If the village had to have further development then the Parish Council would like to see part of the Yew Tree site (247) developed.
1662	7	The Parish Council agree with the comments already submitted in the previous consultation and would add the following issues: The existing sewage mains has insufficient
1662	8	There are already a number of houses currently for sale in the village which have been for sale for some considerable time. The pending planning application for a biomass prospective buyers off moving into the village.
1662	9	The village has now lost the post office and possibly the public house.
1662	10	The Parish Council would like all the identified open spaces to be protected from any future development proposals.
1662	11	We would also like any heritage asset sites protecting, and if possible the Robin Hood Way and Crookford Waters.
1662	12	Any new sites should be around existing sites.
1662	13	Separately due to the fact they are different communities.
1663	1	If sites 24 and 44 are to be developed there will need to upgrade the road.

1663	3	It would seem logical to look at the wider picture at least in Planning Principal.
1664	1	Whilst all criteria in the screening methodology set out in paragraphs 2.22-2.43 of the Site Allocations DPD are relevant considerations in the assessment of sites for reside important considerations are omitted.
1664		The screening criteria pay little regard to the location of a site relative to existing services and facilities and the need to build sustainable communities. PPS3 is clear that Le their strategy for the planned location of new housing development should take into account the contribution to be made to cutting carbon emissions from focusing new contractions and the strategy for the planned location of new housing development should take into account the contribution to be made to cutting carbon emissions from focusing new contracted to the planned location of new housing development should take into account the contribution to be made to cutting carbon emissions from focusing new contracted to the planned location of the private car. The proximity to existing local community facilities, infrastructure and services is a further factor.
1664	3	A further matter which the screening criteria fail to address relates to highways and in particular whether a site can be accessed in a safe manner, without harm to the ope this is an important consideration which should be taken into account when assessing the suitability of a site for residential development. It is therefore considered that ac introduced to incorporate these points.
1664	4	Policy CS4 of the adopted Bassetlaw Core Strategy states that Harworth and Bircotes will meet <u>at least</u> 22% of the District's housing requirements during the plan period 20 dwellings. Harworth is identified by Policy CS1 of the Core Strategy as being the District's 'Main Regeneration Settlement' and is also identified to accommodate 35% of the during the plan period. In light of this position, it is Persimmon Homes' view that the identified housing figure for the settlement should be considered as a minimum figur should seek to achieve greater numbers in order create a truly sustainable community, whereby the employees of the jobs created through the employment allocations had accommodation close to their place of work. Where a sustainable and deliverable site for housing comes forward which accords with the screening criteria set out in the Si regeneration, it should be considered favourably, even if it would result in excess of 1,560 dwellings being delivered during the plan period.
1664		Persimmon Homes (Yorkshire) is promoting 8 hectares of land at Bawtry Road, Harworth as an allocation for residential development. This forms part of site BAS0194 as in Consultation. A separate, detailed submission has been prepared to support the promotion of this site and forms part of these representations. This accompanying docum immediately available and could accommodate up to 190 new dwellings.
1664	6	It has already been identified by the 2011 Bassetlaw SHLAA as being both suitable and achievable for residential development. Persimmon's experience in developing and and 2008 also indicates that there is market demand for further housing in this area and therefore the site is fully deliverable in the short term.
1664	7	This accompanying assessment has demonstrated that there are no technical constraints to the development of the site. It can also be considered favourably against all the in the Site Allocations DPD Consultation, as well as other material planning considerations.
1664	8	The site can safely accommodate vehicular access without harm to the local highway network and given its proximity to public transport and local services and amenities, i sustainable residential extension to meet part of the future housing needs of Harworth.
1664		Finally, the development of the site would also generate considerable financial benefits to the local community, which is a further important material consideration. This is approximate £18m construction of the site, up to £750,000 of new expenditure per annum in the local economy generated by the residents of the development, as well as £300,000 per year in increased Council Tax receipts.
1664	10	It is noted much of the land identified for employment led mixed use development relates to the former Colliery site. It is acknowledged that this represents an important the potential to deliver considerable regeneration benefits for the area. The delivery of the site in the short term has to be questioned in the current economic climate. In prevent other sites coming forward in the short term such as land to the north of Bawtry Road (BAS0194) which is immediately deliverable and would also bring with it imp
1664	11	At this stage Persimmon Homes has not carried out a formal public consultation of their proposals for the site, however prior to any planning application they would carry neighbouring residents and key local stakeholders. This would ensure that local opinion and knowledge was taken into account, where possible in formulating the proposa to demonstrate clear support for Persimmon's proposals, it should be noted that there was very limited local opposition to the adjoining Buckingham Court scheme application they housing in this part of Harworth.
1664	12	Although outside of the presently defined development limits of Harworth and Bircotes, the site is not allocated for any alternative use in the saved policies of adopted Ba proposed allocations for the site in the emerging LDF, beyond its consideration as a potential residential allocation. Policy CS4 of the recently adopted LDF Core Strategy d houses) of the district's housing requirement between 2010-2028 will be delivered in Harworth and Bircotes. The policy goes on to acknowledge that part of this requirement.
1664		The proposed development of this site is also entirely compatible with surrounding land uses. The site forms a natural extension of the existing housing development to the effectively be considered to be an extension of the Buckingham Court housing development completed in 2008. Furthermore, there are no other existing or proposed land make it unsuitable for residential development.
1664	14	It is not proposed at this stage that the development of the site would include an element of employment or economic development use, as it is not considered to be an a neighbouring residential properties. It is considered that future employment sites should be directed to the south of the built up area in accordance with the findings of the adopted Core Strategy and the proposed allocations set out in the draft Site Allocations DPD.

1664	15	Whilst not delivering site specific economic development, it would nonetheless help deliver economic growth to Harworth and the surrounding area, in line with its status identified regeneration settlement.
1664	16	Section 70 of the Town and Country Planning Act 1990 (as amended by the Localism Act) confirms that financial benefits arising from development are a material consider development has an estimated total construction cost of around £18 million and this level of direct private investment could generate around 124 person-years of constru Equivalent [FTE] construction jobs a year, or 25 annual temporary construction jobs based on the assumption that it will take 5 years to develop the site
1664		Once the housing is occupied, a number of indirect jobs will be supported in and around Harworth as a result of the increased expenditure patterns resulting from the new residents could bring in approximately £750,000 per annum to the local economy, which could support around 5 jobs in the retail, leisure and service sectors. This would h retailers.
1664	1 1 2	Bassetlaw could also benefit from the New Homes Bonus Scheme, which for a housing development of this size, could generate up to £1.3 million, to be spent at the Coun spent at the County Council's discretion. Once occupied the development would also generate in the region of £320,000 annually in Council Tax receipts for Bassetlaw Dist
1664	19	In addition to the financial and employment benefits, the development would deliver high quality family housing of a type and in a location which could attract future resid may otherwise not choose to live in Harworth's existing housing stock.
1664	20	As identified in the accompanying Initial Landscape Appraisal contained at Appendix 3 , the soils on the site are relatively sandy, classified as Grade 3 agricultural land unde albeit no distinction is made as to whether the soils are Grade 3a or 3b. It should be noted that there is no lesser quality agricultural land available for development in Har
1664	21	The proposal site along with the whole of Harworth and Bircotes and a wide ranging area beyond falls within Source Protection Zone 3 (Zone 3 being the least sensitive of a not considered by the Environment Agency to be an impediment to residential development which is generally a low polluting land use.
1664	22	An assessment of landscape character is contained at Appendix 3 . This demonstrates that the site lies within Forest Sandlands of the Idle Valley Lowlands Character Area. landscape formed on a low glacial plateau. It is a mixed landscape of open fields with long distance views of a flat skyline where blocks of fairly regular edged deciduous ar of the skyline. The headgear of the colliery is also noted as a dominant feature on the skyline. The assessment goes on to conclude that due to its location next to the roac housing, the character of the site is mainly defined by its land use and setting on the edge of the built up area of Harworth, rather than an integral part of the overall rural the development would not harm the local landscape character.
1664	23	Importantly, the proposal site is located within a 'Create' policy area as defined by the Bassetlaw Landscape Character Assessment. This is identified as the least sensitive a acknowledging that in such locations, there is the potential for appropriately designed schemes to introduce new, or enhanced landscape features.
1664	24	As discussed within the assessment against Criterion 2, the site forms a natural extension both northwards and eastwards of the existing settlement boundary, and would form to the south and west, particularly the adjoining Buckingham Court development. The A631 would provide a natural and defensible future boundary of the settlement built up area and the more rural landscape beyond. 3.18 The accompanying Landscape Impact Assessment, discussed under Criterion 8 below, sets out how the site offers diversity enhancements to the boundary of the site, helping the integration between the built form and the rural and agricultural landscape.
1664	25	There are no landscape designations on the site. Whilst Swinnow Wood is located to the north east of the site off the A631, and is identified as 'replanted ancient woodlan Woodland and Trees, this would not be adversely affected. 3.20 As the accompanying Landscape Impact Assessment demonstrates, the proposed residential development improve green infrastructure within this part of Harworth, as well as access to it. The opportunity to provide new hedgerows and buffer planting set back against a potent the A631 would improve visual amenity and contribute to the wider bio-diversity of the area. It is considered that an increased belt of planting along the A631 would, in co improved wildlife corridor, linking Swinnow Wood to the areas to the west of the site. 3.21 The Landscape Impact Assessment also concludes that that the location and jux surrounding land uses, means that the loss of this site an open area will be less significant than were the site in the middle of an open landscape.
1664	26	The 2011 Bassetlaw Strategic Housing Land Availability Assessment (SHLAA) concludes that there are no significant constraints to the successful delivery of this site for ho
1664	27	Whilst the site (amongst others in the area) was identified as having potential for archaeological remains, this is not considered to be a significant constraint. An initial arc on the site and this is attached at Appendix 4 . This concludes that there is no evidence of nationally important archaeological remains on the site or within 500m that wou development.
1664	28	It is noted that the 2011 SHLAA also raised queries about the market demand for new housing development in Harworth and Bircotes, thereby questioning the deliverabili short term. Such a view is however wholly contrary to Persimmon's own experience in marketing the Buckingham Court development, when the houses were sold at the letter from Persimmon's Sales Manager, (Appendix 5) explains, their experience of selling properties on the adjacent site is such that there was and still is demand for addi for 3 and 4 bedroom properties.

1664	29	Subject to a detailed ground investigation, all assessments carried out by Persimmon Homes to date indicate that there would be no barrier to the viable delivery of the so affordable housing, as well as making a contribution to help alleviate the known deficiency in school place provision in the area, and any other directly related and require
1664	30	The suitability of the site in terms of providing safe vehicular access, as well as the capacity of the local road network to accommodate the additional traffic generated by is by Persimmon's traffic engineers. This has included discussions with Nottinghamshire County Council Highways Department. This assessment is contained at Appendix 6 site, taking account of all necessary junction design requirements could be achieved off Bawtry Road, with the potential for a secondary access for pedestrians, cyclists and Court. This highway solution is considered to be a significant advantage for this site as it avoids the need to provide access into the site directly from the A631, or indeed traffic through an existing residential estate road. Such a solution can not be easily achieved by a number of other green field sites in Harworth being considered for residential for residential estate road.
1664	31	This assessment also demonstrates that the additional traffic generated would not have a detrimental affect upon the free flow of traffic on the local highway network, ev
1664	32	PPS3 is clear that Local Development Documents in setting out their strategy for the planned location of new housing development should take into account the contribut from focusing new development in locations with good public transport accessibility and/or by means other than the private car. The proximity to existing local communit further factor. PPG13 also emphasises that walking is the most important mode of travel at the local level and offers the greatest potential to replace short car trips, par
1664	33	In this case and as the Sustainability Plan at Appendix 1 demonstrates, the site benefits from excellent public transport links, as well as being located within close walking
1664	34	In terms of public transport provision, bus stops are located immediately adjacent to the site, along the eastern side of Bawtry Road, whilst further stops are located appro Bus services from these stops provide regular access to Blyth, Bawtry, Worksop and Doncaster, as well as to Robin Hood Airport, thereby providing access to the employm provided by these centres, as well as opportunities for onward travel to more distant locations
1664	35	With regard to access to local services and amenities, the Sustainability Plan demonstrates that within a 500m radius of the site are recreational facilities, as well as a rang including a hot food takeaway and a public house. Within 1km of the site are a variety of schools (both primary and secondary), a leisure centre, further recreation ground Park Industrial Estate, as well as the main local shopping and service centre on Scrooby Road, containing a supermarket, health centre, library and a variety of shops and se hairdressers and further takeaways. All of these facilities are well within an accepted walking distance of the site and therefore it can be safely concluded that the site full of its proximity to local services, public transport and the potential for the site to integrate as part of a wider mixed and sustainable community. 3.32 The clear sustainabilit emerging central government planning policy in the form of the National Planning Policy Framework, which goes as far as saying that there should be a presumption in fav
1665	1	I wish to object strongly to the development of any additional houses at site 35 for the following reasons: A) Extension of town boundary and urban sprawl. The current Ga town boundary. Development on site 35 will, therefore extend beyond the boundary and there is a concern that Worksop will eventually consume Wallingwells and contin Lindrick.
1665	2	B) Loss of amenity for children, residents and visitors. The proposed site is bordered by Owday Wood/Rough Piece and Owday Plantation, which are sites of importance for present untouched by housing. Development on site 35 will cause significant disturbance to these valuable woodlands.
1665	3	The public footpath/bridleway entering the area from Monford Road and stretching to Owday plantation is bordered by beautiful tree and hedgerows, which are importar The bridleway and footpaths are used daily by many walkers, both from the estate and also by visiting recreational users.
1665	4	Development on this would result in a loss of amenity for local residents and would be detrimental to the entire area. In addition, increased traffic levels on the estate wo increasing noise levels, pollution and danger to pedestrians and cyclists.
1665	5	C) Loss of agricultural land. Agricultural land provides employment. Site 35 is productive agricultural land. It is currently being farmed, producing crops including wheat and
1665	6	D) Access to shopping facilities our local shops which are sites off the estate are already busy with traffic and virtually gridlocked at busy times, which is a measure of thei including the proposed new Asda and Tesco supermarkets, are sites closer to the town centre, and are impractical for access on foot from site 35. This will lead to increase
1665		E) Access to healthcare provision. Access to healthcare provision is limited, with doctors and dentists being sites on the other side of town. Access on foot from site 35 is in to doctors and dentists being sites on the other side of town. Access on foot from site 35 is in the doctors and dentists being sites on the other side of town. Access on foot from site 35 is in the doctors and dentists when required are currently at full capacity. with the increased population of Worksop you cannot see a doctor under 3 weeks unless it is an emerged
1665	I X I	F) Provision of utilities and services. Development on site 35 will require significant investment in infrastructure to meet the demands of the new housing development, as to the remote location of the site. Improvements would be needed to upgrade level of service provision due to increased demand.

1666	1	The same housing policy goal is echoed within the draft National Planning Policy Framework I (NPPF) (July 2011) at paragraph 107. It is acknowledged that it would expansion that in effect alters the character of the settlement. However, it is considered that within Cuckney there are a number of sites capable of coming forward f character of the settlement. Welbeck - welcomes the opportunity for an allocation of at least 11 new houses.
1666	2	Welbeck controls the three potential housing allocations identified on the Cuckney Proposal Map (page78) and has participated in the early stages of plan preparation with development on each site, namely sites 303, 398 and 399. Welbeck welcomes the identification of these sites as future housing allocations. The deliverability of the sites is
1666	3	Site Ref. 303 (Land South of Creswell Road) - The site is readily available for redevelopment. The site comprises former allotment gardens, bounded to the south west by no meaningful purpose for agriculture and the site is well situated within the built-up framework of Cuckney representing a suitable 'infill' development opportunity. Th access in accordance with Manual for Streets 2. This parcel of land extends to 0.249 hectares (ha) as shown on Plan CU167.I-dev-plan-2008 and could deliver 8 dwellings a There are no site constraints that would preclude the submission of a planning application and the delivery of the site within five years.
1666	4	Site Ref. 398 (Land off Norton Lane) -The site is readily available for development. The site comprises partly vacant land and arable farm land. The Agricultural Land Classifi confirms that that development of this site would not result in the loss of the best and most versatile agricultural land (i.e. grades 1, 2 and/or 3a.
1666	5	The site is currently served by an existing access off Norton Lane and there is considered to be no physical constraints preventing the site from coming forward.
1666	6	The site is well related to the existing built character of the settlement. Having regard to the Bassetlaw District Council Landscape Character Assessment, it is considered th impact negatively on the existing landscape character. This parcel of land extends to 0.62 ha as shown on Plan PFI8500.01 and could deliver 19 dwellings at a density of 30 would preclude the submission of a planning application and the delivery of the site within five years.
1666	7	Site Ref. 399 (Land North of Budby Road (A616)) - The site is readily available for development. The site comprises arable farm land. The Agricultural Land Classification inf that that development of this site would not result in the loss of the best and most versatile agricultural land (i.e. grades 1, 2 and/or 3a).
1666		Having regard to the Bassetlaw District Council Landscape Character that the site is well contained and would not impact, negatively on the existing landscape character. T on Plan PF/8500.02 and could deliver 36 dwellings at a density of 30 dph. There are no site constraints that would preclude the submission of a planning application and th
1666	9	It is acknowledged that it would not be realistic to envisage a scale of village expansion that in effect alters the character of the settlement. However, it is considered that of sites capable of coming forward for development without altering the existing character of the settlement. Welbeck welcomes the opportunity for an allocation of at least the settlement.
1666	10	Welbeck controls two of the potential housing allocation identified by the Nether Langwith Proposals Map (Page 109), namely sites 256 and 252. Welbeck has participa with a view to promoting these sites for residential development. Welbeck welcomes the identification of these sites as future housing allocations. The deliverability of the
1666	11	Site Ref. 256 (Land South of French Terrance, Nether Langwith) - The site is readily 3 available for development. Land South of French Terrance is surrounded by e represents a suitable infill development opportunity. Having regard to the Bassetlaw District Council Landscape Character Assessment development on this site would n landscape. This parcel of land extends to 1.35 ha as shown on Plan n1167.2-dev-plan-2008 and could deliver 40 dwellings at a density of 30 dph. There are no site constra planning application and the delivery of the site within five years.
1666	12	Site Ref. 252 (Land South of Main Road, Nether Langwith) - The site is readily available for development. The site is located on the south side of the settlement and is of considered that this site is well related to the existing built form of the existing settlement and that development of the site would not serve to impact adversely on the land extends to 0.338 ha as shown on Plan nl167.I-dev-plan-2008 and could deliver 10 dwellings at a density of 30 dph. There are no site constraints that would preclude the delivery of the site within five years.
1666	13	Welbeck acknowledges that the adopted Core Strategy establishes the level and distribution for new development for the identified Plan Period and that this is no longer in it is considered that within the draft consultation document little weight or consideration has been given to the proposed redevelopment of the Welbeck Colliery site at M purposes. The Council will be aware that in November 2010 a public consultation, event organised by Framptons on behalf of 'Meden Vale - the Future', was carried out. T public exhibitions, sought to gather local opinions on the future of Welbeck Colliery. 'Meden Vale - the Future' is a charity which was registered in July 2006. Their prime of consideration in the future of the Colliery with landowners, public bodies and the local community following the closure of the mine. The public consultation demonstrate the local community (some 81%) who expressed a preference for the site to be redeveloped for some form of employment generation with a view to jobs being created to closure of the Colliery. A number of meetings have taken place between Officers of Bassetlaw and Mansfield District Councils, the County as Minerals Authority, the site of to consider future options for the site. In addition, Welbeck has received a number of enquiries concerning the possibility of energy recovery uses on the site.

1666	14	On the 7" June 2011 officers at Bassetlaw District Council presented to the Cabinet Committee a report titled 'Welbeck Colliery Regeneration'. The purpose of which potential redevelopment options relating to the site The Cabinet Committee resolved that: The principle of the redevelopment of the Welbeck Colliery site for employ be authorised to discuss the potential redevelopment options relating to the site The Cabinet Committee resolved that: The principle of the redevelopment of the Welbeck Colliery site for employ be authorised to discuss the potential redevelopment options relating to the site of the site of the former Welbeck Colliery and adjacent land with all interested parties. The aim of that secures the maximum economic, social and amenity benefit. The outcome of the discussions should be reported back to a future Cabinet Meeting.
1666	15	Welbeck considers that it would be appropriate for paragraph 2.10 of the consultation draft Issues and Options document to include reference to these considerations simply states: 'The Council will, clearly, support suitable applications for economic development in other areas over the plan period. '
1666	16	It is considered that Welbeck Colliery warrants an allocation within the emerging Site Allocations development plan document (DPD). The format of the consultation dra and titled 'Welbeck Colliery' could easily be added to contain a site specific redevelopment policy, a justification, and a site location plan.
1666	17	Welbeck welcomes the opportunity for further discussions to take place between themselves, their agents and both Bassetlaw and Mansfield District Council on the source of new employment opportunities Given the level of support expressed by both Bassetlaw and Mansfield District Council for the redevelopment of Welbeck should to be identified within the emerging Site Allocation DPD as a site for employment. The allocation of Welbeck Colliery would therefore provide the policy basis to employment uses and reinforce the Council's commitment of support.
1667	1	Natural England are not in a position to comment on the level of growth for each settlement or the development of specific sites however we would like the following adv
1667	2	Sustainable communities: Natural England recognise that significant levels of development will put increased pressure on the natural environment however we also realise provides to invest in the environment and deliver substantial benefits for people, places and nature. Natural England believe if new development is carefully planned, desi possible to meet the environmental, social and economic needs of our present and future communities.
1667	3	It is vital that the right of kind of development is delivered in the right place. Options should be pursued that primarily protect but also seek to enhance and improve the c recreational amenity and as a resource for biodiversity.
1667	4	Natural England also believes a key consideration to achieve truly sustainable development should be the location of development in relation to current transport infrastructure into the design that encourages the use of more sustainable modes of transport. In order to encourage modal shift to more sustainable options and effective, integrated public transport system and a network of improved attractive pedestrian and cycle routes should be incorporated into the design linking this site proposals should try to deliver cycle routes and a separate access for cyclists and pedestrians encouraging residents to travel by a sustainable mode. It is recommended th prepared by Nottinghamshire County Council is consulted at an early stage to add the greatest value.
1667	5	We note the Council is currently assessing the value and quality of open spaces in the District. A crucial step will be to gather a robust evidence base to inform the DPD. W exercise is carried out to identify all existing green spaces and corridors to produce a plan for multi-functional green infrastructure (GI) as part of the growth. The GI mappi private assets, with and without public access in both urban and rural locations.
1667	6	We recommend that where existing areas of open space are identified as being of poor quality that consideration is given to measures that could be implemented to impr green space to the overall strategic GI network before the land is allocated for development.
1667	7	This GI plan is necessary in order to inform the design of development to the highest possible standards, and to provide multi-functional green space, including green trans biodiversity benefits and opportunities for people to interact with and utilise green space. The GI framework should aim to protect the green space network minimise any effects and maximising opportunities for gain. However we acknowledge there may be exceptions and where open space is lost we consider there should be enhancement ensure that there is no let loss of biodiversity in accordance with the principles of PPS9.
1667	8	Applications for development should include a plan for the design, delivery and maintenance of GI, to recognised Access to Natural Green Space Targets (ANGST). Efforts s countryside or existing areas of open space to create an enhanced network of greenspace
1667	9	Consideration of the likely impacts from this development on breeding nightjar and woodlark within the Sherwood Forest area: Natural England has issued a revised Advic and around the Sherwood Forest area dealing with plans and applications with potential to affect land which may or may not in the future become a potential Special Prot updated in view of the decision by the Secretary of State to refuse the Rufford Energy Recovery Facility application, following a Public Inquiry.
1667	10	It remains our view that there is currently no pSPA in Sherwood and therefore the Conservation of Habitats and Species Regulations 2010 and statutory policy governing p possibility that it might occur in the future and this is presently been considered as part of a UK wide Review of the SPA Series being led by Government. We recognise that classification of an SPA in the Sherwood area places a difficulty on Local Planning Authorities with regard to how they should consider land allocations and policies in forwar planning consent. How local authorities choose to confront this issue is a matter for them, however Natural England would advocate a 'risk based approach' or similar be a proofing for decision-taking until such a time that it is clear whether or not the statutory policies concerning potential SPAs apply to an area of Sherwood Forest. The Secret 'risk based approach'.

1667	11	A copy of the revised Advice Note is enclosed for your consideration. Natural England suggest that as part of a risk-based approach to forward planning and decision-makin accompanied by an additional and robust assessment of the likely impacts arising from the proposals on breeding nightjar and woodlark in the Sherwood Forest area. The ensure the information provided is sufficient for you to assess the likelihood of potential impacts arising from development on the breeding nightjar and woodlark popular indirect and cumulative impacts which may include, but may not be limited to, the following: Disturbance to breeding birds from people, their pets, noise, traffic and/or and damage to breeding and/or feeding habitat; bird mortality arising from domestic pets and/or predatory mammals and birds; bird mortality arising from road traffic and/or enrichment of breeding habitats.
1667	1 12 1	As part of a risk-based approach, we would also suggest your Authority consider the use of appropriate mitigation and/or avoidance measures to reduce the likelihood of affect breeding nightjar and woodlark populations occurring.
1668	1	Harworth Estates broadly support the screening methodology outlined within Section 2 of the document.
1668	2	The criteria includes an approach which includes a number of key areas being considered, including landscape, built form and community support. In general terms we do do consider that an additional or amended criteria should be added which relates to "does the allocation of the site help to deliver the aims and objectives set out in the C Given that one of the fundamental tests of soundness in PPS12 relates to the compatibility of DPDs with national policy and overarching policy documents, it is felt that th this document should be considered on this basis in addition to the criteria set out.
1668	3	Furthermore, specific reference and consideration to the emerging Planning Policy context, at a national and (consequentially) regional level should be taken into consider new National Planning Policy Framework (NPPF) will be formally published before the end of March 2012 (and likely sooner) which clearly will have implications as to the the NPPF will superseded and replace all current PPS and PPG, this will form the basis of planning policy at a national level. Hence, in order for the DPD to be considered so national policy, the document should pay due regard to the likely content of the NPPF. In addition, should the final published version of the NPPF make specific alterations later consultation version of the DPD. Given the likely publication of this document, which is unlikely to involve any fundamental changes to the principles surrounding eco Council should take due attention to this document as part of its considerations in drawing up its Preferred Options (and subsequent Submissions Version) for the Site Allo
1668	4	In respect of Criteria 1, which relates to community support, Harworth Estates suggest that it needs to be clear how sites with 'no comments' from the community wo would suggest no objections to the proposals. In respect of Harworth Estates site at Harworth Colliery (Reference BAS0190), we make the following comments in respect of
1668	5	Criteria 1 – Consultation has previously been undertaken by Spawforths and Harworth Estates in respect of the redevelopment of the wider colliery site, which now has pla housing, employment and retail development. Through the consultation with the community it was apparent that the community were largely supportive of the redevelop regeneration benefits the redevelopment of a key site such as this, with the scale of development proposed would bring to the settlement. There were also very few object during the consideration of the planning application.
1668	6	Criteria 2 – The site (Reference BAS0190) is sustainably located, adjacent to the settlement of Harworth Bircotes and as such is within extremely close proximity of lo employment opportunities. The wider colliery site, located to the north, south and east of site reference BAS0190 already has the benefit of planning permission employment and retail) for which site preparation is underway. It is therefore considered that the redevelopment of site reference BAS0190 with housing would b neighbouring land uses. Furthermore, it could accommodate suitable mitigation, if and where required, to mitigate against any necessary noise sources from the adjacent benefit of planning permission on the wider colliery site. Harworth Estates consider that the site (Reference BAS0190) presents a logical and sustainable approach to a whilst also facilitating the regeneration of former colliery land adjacent to the centre of the only Main Regeneration Settlement in the District. Harworth Estates therefor for housing.
1668	7	Criteria 3 – Whilst Criteria 3 is directed towards employment development and the site (Reference BAS0190) is identified for housing, it would provide indirect benefits the settlement which in turn will help aid its regeneration. These include employment opportunities (temporary construction) and encouragement of inward investment to
1668	8	Criteria 6 – The area is identified as very poor landscape condition and low sensitivity therefore having a low landscape character in the Landscape Character Assessment Furthermore, given the site's (Reference BAS0190) location within a built up area of Harworth Bircotes, close to industrial uses, a colliery site (with planning permission for employment) and the centre of Harworth Bircotes, it is not considered that the development would have any significant impact on landscape character. It is however cons which are located on the periphery of the settlement will have a more significant and detrimental impact on landscape character and the setting of Harworth, given the their relationship to the wider countryside.

1668	9	Harworth Bircotes is a mining town that is in need of regeneration. The settlement is identified as the only Main Regeneration Settlement in Bassetlaw's Core Strategy. Fu December 2011) states that the housing identified for Harworth Bircotes are minimum requirements. However, in line with the Core Strategy, new development in Harwo settlement, delivering an improved range and quality of housing, contribute to achieving a popular and busy town centre, and with strong connections with the existing to Redevelopment of the colliery site as already approved will kick start regeneration, but further development and growth is required to further encourage inward investme in the nature of the settlement. It is however essential that this growth is in sustainable locations that also bring regeneration benefits to the settlement.
1668	10	Further development in the settlement needs to be sustainable and accord with local, regional and national planning policy and guidance and therefore needs to be located particular, PPS1 (Delivering Sustainable Development) and PPS3 (Housing) state that housing and economic development need to be located in the most appropriate locat and are in sustainable locations. Paragraph 36 of PPS3 states in support of its objective for creating mixed and sustainable communities, the government's policy is to ensulocations which offer a range of community facilities and with good access to jobs, key services and infrastructure. Paragraph 69 of PPS3 sets out the criteria LPAs should h planning applications, which includes achieving high quality and a mix of housing; the suitability of a site for housing, including its environmental sustainability; effective ar development is in line with housing objectives, reflecting the need and demand for housing.
1668	11	The most sustainable locations are those closest to the centre of Harworth, such as the colliery site (Reference BAS0190). The development of this site for housing would so the wider colliery site, the regeneration of the centre of Harworth as well as underpin existing services and facilities, whilst also encouraging new ones to Harworth. The future employment opportunities in the town and public transport links. It has the ability to provide a mix of quality housing and make effective and efficient use of the for that site reference BAS0190 would provide an appropriate expansion of Harworth Bircotes and support the growth and regeneration of land to the south of the main street Road. Development of this site would also be in line with local, regional and national policy and guidance and local housing objectives. Harworth Estates strongly support the south of the south of the support the south of the south strongly support the strongly support the south strongly support the strongly support strongly support the strongly support strongly support strongly support the strongly support stron
1668	12	Some of the more peripheral sites around Harworth are considered less suitable to accommodate the growth of Harworth, given the incursion into the open countryside t their distance from the centre of the settlement, its services, facilities, employment opportunities and public transport links. These are considered to be less sustainable o compared to for example, the Harworth Colliery site (Reference BAS0190).
1668	13	Should the land to the south of Harworth Bircotes currently identified for employment, become a confirmed allocation for development, Harworth Estates do not think th would be of benefit to the settlement of Harworth Bircotes. This is due to the sites locations detached from the centre of Harworth and its services and facilities, which we development and future growth of Harworth Bircotes. It is also not considered that a mix of development, other than employment, in this location would capture the regeneration of the settlement and would not be of benefit to the settlement.
1669	1	Prior to the deadline date of 31 Jan 2012 we have attached a revised indicative land use plan produced by Sanderson Associates. The only change is that the numbers on t white background to match the key.
1669	2	However, we w would also like to stress that the Gateford area has delivered in the region of 3000 housing units over the last 20 years, equating to a delivery rate of circa area is the key future housing delivery area as it has been in recent times and gatefold should be identified as the 'principal delivery location' in Worksop and Bassetlaw. T housing (circa a third) that is being directed to the town within the context of the District.
1670	1	It is considered that there should be some opportunity for new housing development within the settlement of Gamston, however given the character of the settlemen limited. The 2011 Strategic Housing Land Availability Study identifies 4 sites that are developable for housing in years 6-10 of the plan period. Based on a density of 30 d dwellings. It is considered that this level of housing in the settlement could not be accommodated without investment into additional infrastructure and services. O development limits, Site Ref 577 and this has a capacity to accommodate 7 dwellings. A site providing this capacity would seem to be sufficient land for futu Notwithstanding any allocations made through the Site Allocations DPD, there will be opportunities for windfall development within Gamston over the plan period on infil
1670	2	The SHLAA assessment concludes that this site may be suitable for development but there are a number of constraints to development. The development of the site has p proximity of the site to two Listed Buildings, its location within a Conservation Area and the location of the site within an identified area of archaeological interest.
1670	3	The assessment also envisages that potentially there are highway constraints in terms of visibility onto the main A638. The speed limit along this stretch of road is 40mph to be achieved for the site to be suitable for residential development.
1670	4	Although the site is located in Flood Zone 1, it is greenfield and the Environment Agency would require that the current greenfield run-off is retained through the inclusion (SUDS) as part of any future development.

Furthermore, the Core Strategy (Adopted worth is to contribute to a step change in the town and surrounding communities. ment and regeneration to drive the step change

1670	5	Although the SHLAA assessment concludes that the site is within the wider residential area and as such is suitable for residential development, it is currently outside the Core Strategy does make provision for the boundary settlements to be changed in order to accommodate site allocations, it is also considered that the settlement bore event to ensure that small windfall sites are able to come forward over the plan period to supplement the housing requirement of the settlement.
1670	6	This site is adjacent to Site 412 and has the same constraints regarding its suitability for housing development. However, it is considered that given that it is considerably la impacts of developing this site would be significantly greater. The SHLAA assessment states that 21 dwellings could be achieved on this site at a density of 30 dwellings per the site. This is considered optimistic given the sites Conservation Area status and proximity to the identified Listed Buildings. Notwithstanding this, the development of the number of houses within the settlement (18%) and it is considered that this could not be supported by the current level of services and community facilities within the settlement (18%) and it is considered that this could not be supported by the current level of services and community facilities within the settlement (18%) and it is considered that this could not be supported by the current level of services and community facilities within the settlement (18%) and it is considered that this could not be supported by the current level of services and community facilities within the settlement (18%) and it is considered that this could not be supported by the current level of services and community facilities within the settlement (18%) and it is considered that this could not be supported by the current level of services and community facilities within the settlement (18%) and it is considered that this could not be supported by the current level of services and community facilities within the settlement (18%) and it is considered that this could not be supported by the current level of services and community facilities within the settlement (18%) and it is considered that this could not be supported by the current level of services and community facilities within the settlement (18%) and it is considered that this could not be supported by the current level of services and community facilities within the settlement (18%) and it is considered that this could not be supported by the current leve
1670		This site is located to the west of St Peter's Church a Grade II Listed Building, and church yard. It also falls within the Conservation Area, although is currently outside the s assessment concludes that the site may be suitable for housing but identifies a number of constraints that will restrict the amount of development achievable on significant improvements to the access arrangements in order to accommodate 5 dwellings on the site. The site is considered to offer some limited potential for resi constraints can be overcome.
1670	8	The main constraint to developing this site for housing development is the substandard access; however the Council in the SHLAA assessment of the site consider that this access with an adjacent parallel route.
1670		Although the site is within a Conservation Area this is true of the whole settlement and as such any new housing development would be expected to achieve high a principle to this site being allocated for housing development; however it is considered that the number proposed for the site would represent a density not in keepi dwellings would be more appropriate for the site.
1670	10	Although the settlement development boundaries were consulted on as part of the Core Strategy, it is considered that these have been drawn so tightly as to preclude particularly in those parts of Gamston that have previously been within the established settlement boundary. It is considered that Rectory Lane forms a natural boundar considered as such. The boundary proposed in the Core Strategy proposals maps is considered to be artificial and does not follow any natural features at ground level. R the settlement would provide flexibility to the village envelope to allow for limited infill development where appropriate.
1670	11	It is of concern that my client was told by the Planning Officer at the village consultation event prior to Christmas that legally the Council had no option but to draw th Strategy Proposals Maps as a result of the re-designation of garden land as greenfield land. This is clearly incorrect, since although Government Guidance encourages ahead of greenfield sites, there is nothing in either legislation or government policy that proscribes development on greenfield sites. It is our opinion that the redrawing o Council is a policy decision by them to restrict development on garden land by removing it from the settlement envelope. The historic boundary of the settlement of C Local Planning Authority should judge on individual merit any application proposal for development that comes before it utilising the Development Management Policies a
1670	12	Gamston has Conservation Area status and as such due regard should be had to its character. It is evident that the settlement has evolved organically with development o the last two or three hundred years. The Core Strategy settlement boundary has been drawn so tightly around the settlement that in order to accommodate additional de this will require the Council to identify allocations of less than 10, contrary to guidance on allocating housing sites. However, given the conservation status of the village th response than identifying large scale development at the edge of the settlement.
1670		Our client is seeking the re-designation of part of his garden land that is proposed as protected open space as a housing allocation for one dwelling. The site has previo past for residential development and as such is considered to be an appropriate site. Figure 1 below highlights the changes that our client would wish to see to the F representing that part of the proposed open space that should be allocated for housing development.
1670	14	The Council's PPG17 Open Space Study (March 2010) was undertaken by Knight, Kavanagh and Page and provides the evidence base for the Local Development Framework is assessed by the Study, and this is the recreational ground located off the Great North Road which scores highly in terms of its overall quality and value. No assessment i open space identified as Potential Protected Open Space in the Site Allocations Issues and Options Paper. Quality and value are defined in the Study as being fundame quality but if inaccessible it is of little value, whereas poor quality open space if it provides the only open space in an area can be of great value. The Study uses the follow space is measured: • Well maintained; • Litter free; • No dog fouling; • Attractive place; • No vandalism.
1670	1 15	If three or more criteria are present the space is considered to be good quality, two or more is reasonable and where no more than one criteria is present the quality is de methodology the potential open space identified in the centre of Gamston would comply with all of these criteria and in particular my client's garden land, which is include

1670	16	The Study assesses value on two sets of criteria: a) Site visit assessment data b) Other data and information. The value criteria used for the Open Space assessments carrie summarised below: Site Accessibility - Areas were judged good, reasonable or poor according the following barriers: • Busy roads • Restrictive entrances • Isolated location space • Other barriers identified Safety and Security - • Secure boundaries (including internal separation between different areas) • Safety surface • CCTV • Located within border • Overlooked throughout.
1670	17	In addition to the above criteria, the Bassetlaw assessments also considered the following criteria to further assess value: • Site quality • Context of site in relation to othe benefits • Ecological benefits eg site designation LNR or SSSI • Educational benefits • Social inclusion and health benefits • Cultural and heritage benefits eg historic site or place • Economic benefits
1670		There are concerns that some of the land that falls within the area Ref: 22/3 in the consultation document is not considered to fall into one of the identified typologies area of Protected Open Space includes part of our client's garden, identified by the Land Registry as Plot OS156 (See Appendix 1). This parcel of land does not serve any o is it private land, but it is completely inaccessible and there are no public views of this site or overlooking from any surrounding properties (see photographs below of the second serve).
1670	19	When assessed against the Council's own assessment criteria with respect to value, the site score poorly, particularly against the accessibility criteria and the additional cr client's ownership scores reasonably on Safety and Security but purely on the basis that it is a private garden and as such the boundaries are secure and it is within a reside parcel of land should be removed from the area of potential protected greenspace identified as 22/3 since it is not considered to form any open space function.
1670	20	This representation has been submitted on behalf of Mr J Roberts of Idle House, Rectory Lane, Gamston. As a resident of Gamston our client supports limited small scale and this is considered appropriate given the size of the settlement. However, it is considered that the revised settlement boundary as set out in the Core Strategy Proposa the provision of infill development over the plan period. The settlement boundary for Gamston has been altered along the western boundary and rather than utilise Rector envelope, the boundary cuts into the heart of the village. It is considered that this has been changed for purely policy reasons.
1670	21	Having assessed the methodology for the Council's Open Space Assessment, it is considered that the quality of the space is good, although this is based purely on the fact Mr Roberts. In terms of the value of the open space, utilising the Council's own methodology, the site offers very little value as open space due to its inaccessibility, the la from private properties. We therefore object to the extent of the potential area of open space (Ref 22/3) and consider that land that forms part of our client's garden lanc
1670	22	Although limited housing development is supported within the settlement of Gamston in order to retain the vitality and viability of the village, some of the larger sites put would require the settlement boundary of the settlement to be extended beyond its historic envelope are not supported.
1670	23	Given the Conservation Area status of Gamston the allocation of housing sites of less than 10 dwellings would be supported since this is more appropriate to the character within the old historic settlement envelope. We request that the parcel of land that forms part of the garden land of our client is not included as protected open space but for a single dwelling.
1670	24	Our client acknowledges that the settlement development limits, excepting any allocated sites that may come forward, have been consulted on at the Core Strategy stage of the settlement has been dictated by policy reasons and does not reflect the historic boundary.
1671	1	Savills acts for Anglian Water Group Ltd in relation to its landholdings at Ordsall Road, Retford. Our client's site at Ordsall Road, Retford comprises the East Retford Rugby and an existing access onto this road. We believe that part of this site should be allocated for housing as it will secure the long term future of Retford Rugby Club. The site dwellings. This site is shown on the attached plan. The detail of this proposal is explained in our answer to Question 14 below.
1671	2	This site is referenced in the Site Allocations Issues and Options as 1/62 and is designated as "Potential Protected Open Space". The details of the site are set out in the PP (March 2010). It states in Section 7 under club summary: "East Retford RFC The Club shares its ground ownership with Anglian Water (AW), owning just over half of the lan However, there are plans to adjust the land ownership and layout of the three pitches to better utilise the land available and meet current and future capacity issues. The contains a bar area/small kitchen and three changing rooms with a smaller room for referees. The changing rooms and showers are thought to be of poor quarter of the smaller room for referees.
1671	3	As stated above, our client is the landlord for the Rugby Club and has been in discussions with the Rugby Club over establishing their long term security of tenure on the si according to a recent survey carried out on behalf of our client and is in need of replacement. These proposals would involve the relocation of the existing Rugby clubhous Planning permission was granted in 2009 for a replacement clubhouse building by Bassetlaw District Council (ref: 01/09/00199) but this has not been implemented due to discussions there has been contact with Bassetlaw Council over accommodating affordable housing on the front of the site to assist in securing the long term future of the

1671	4	We attach a plan showing the area of land that is available for development in order to assist in bringing forward this development. It is crucial that the "Potential Protect the front of the site is removed in order to allow development to occur on this frontage land. In turn, this would allow the future of the Rugby Club to be secured through remainder of the land. This would then secure the long term future of the club and present it with the opportunity to access grant funding which is currently unavailable t Allocation of this site for affordable housing would meet a need of the town as identified in the recent residents" survey that has been carried out by Bassetlaw. This show that there was a need for affordable housing in Retford.
1671	5	Based on the site area that is proposed approximately 25 dwellings could be accommodated on the site. This could provide a mix of house types to meet the varying dem need to be allocated for affordable housing as there is no longer an "exception" policy in the adopted Core Strategy which allows for affordable housing proposals beyone site is allocated this would give more certainty to the potential development and the likelihood of improvements to the Rugby Club. Attached to this representation is a " their commitment to developing the site and discussions they have had with affordable housing providers. In conclusion this proposal would provide a number of benefit long term future of the Rugby Club; - allowing the Rugby Club to access grant funding due to improved security of tenure; - Providing much needed affordable housing for

1672	5	249
1672	6	121, 122 and 123 original site A1 turnover to Retford.
1673	1	Our clients generally agree with the criteria in the Screening Methodology as indicated in the Bassetlaw Site Allocations Issues and Options Consultation Paper N
1673	2	Option A: Spread between Worksop, Retford and Harworth Bircotes? Option B: Focused in just one of the above towns? In short, our client does not agree with the prem Centres of the Adopted Bassetlaw Core Strategy and Development Management Policies DPD identifies up to 10% (a residual requirement of 599 houses) of the D delivered in the Rural Service Centres, through existing permissions and allocations in the Site Allocations DPD for the plan-period 2010-2028. The reduction in the over position within the Core Strategy on the basis of a residents' survey (the contents/ questions within the survey, and the percentage of respondents being unknown
1673	3	The Core Strategy document remains the primary document in the plan-led system, and was subject to scrutiny, public consultation and an Inspectors Report. It is my cl is loaded, and does not bear up to scrutiny when assessed against the adopted position as set out in the Core Strategy.
1673	4	As previously stated when our client made representations to the Draft SHLAA and to the Core Strategy and Development Management Policies – Issues and evidence of a severe shortage of affordable housing in rural communities which is not only creating hardship and social injustice, but also undermines the Governation income and occupation; and to meet the needs of key workers such as teachers, health workers and others to live close to their work. On the other hand planning polic in order to protect the countryside, reduced car journeys to urban centres and concentrate new housing near urban services. One of the Key facts as identified within t no affordable housing units provided within Elkesley within the last five years. This fact is reminiscent of the lack of affordability of rural housing within our communities the future stagnation of our larger villages. This is surely a situation that needs to be resolved in the short to medium term, and seems to be an approach supported by the
1673	5	The Settlement Classification as set out in the Bassetlaw Core Strategy states that Rural Service Centres are rural settlements that offer a range of services and facilities, a them suitable locations for limited rural growth. The Core Strategy hierarchy has clearly emerged from detailed analysis of the sustainability criteria of each settlen services and facilities. Having assessed the Bassetlaw District Council Services and Facilities Study - one of the suite of background studies to support the develop it is clear that the settlement of Elkesley is well-served by a village school, employment sites, a village shop and a reasonable Monday – Saturday public transport service Worksop and Retford. Elkesley is therefore a sustainable settlement within the District of Bassetlaw, that has a wide range of services and facilities, and which is well-placed development.
1673	6	The headline figure of 223 new dwellings to be allocated within the remaining plan period 2012-2028 would allow for approximately 0.7 dwellings per year across District. This level of development stagnation with these larger villages such as Elkesley (mid-2005 population of 875 persons: Nottinghamshire CC/ ONS) would rural communities, with the resultant lack of support for the local schools, services and employment sites.

1673	7	Our client requires some clarification to this question. The text at paragraph 10.43 of the Consultation Paper states, in the first bullet point, that On average (mean) 11 n to 2028; however the Question asks Do you agree that enough land should be allocated in Elkesley for at least 11 new houses The differing phrasing of the words is real confusion. If our client takes it that there is only to be sufficient land allocated for 11 new dwellings in Elkesley in the plan-period from 2012-2028 i.e. 0.7 dwellings per lif our client takes it that there is to be sufficient land allocated for 11 dwellings (with a maximum of?) within the plan-period, then this is something to const
1673	8	As advised, the client made representations at the draft SHLAA and Core Strategy and Development Management Issues and Options consultation events as to the like come forward to the identified sites. However, it is anticipated that some of the potential land budget of the identified sites could accommodate sports pitches, all order to support any new housing development.
1673	9	Our client notes that the proposed outline planning application for a maximum of 33 dwellings off Yew Tree Close, Elkesley was refused under the Delegated Powers January 2012. This application was refused for reason of its prematurity to the adoption of the Site Allocations DPD.
1673	10	As stated at Question 1 of this consultation response, our client wishes to see the following identified sites developed in the plan-period up to 2028: In terms of Site Bassetlaw District LDF Final Strategic Housing Land Availability Assessment Volume 2 for Elkesley Sites October 2011, it was identified that this site was Superiod up to 2028.
1673	111	In terms of Site Number 248 – Coalpit Lane, Elkesley – the Bassetlaw District LDF Final Strategic Housing Land Availability Assessment Volume 2 for Elkesley this site was Suitable, Available and Achievable in the Plan-Period up to 2028.
1673	12	In terms of Site Number 249 – Coalpit Lane, Elkesley – the Bassetlaw District LDF Final Strategic Housing Land Availability Assessment Volume 2 for Elkesley this site was Suitable, Available and Achievable in the Plan-Period up to 2028.
1673	13	Our client has not identified any further issues that have not already been raised by way of this consultation response or the views expressed by the residents' questionna
1673	14	Any audit of the quality and quantity of formal and informal public open space should be subjected to a detailed analysis of the existing stock within the District, asso Natural England, Sport England, CABE, together with provisions contained in PPG17: Planning for Open Space, Sport and Recreation. Without this empirical evidence, spaces identified on the map should be protected from any future development proposals, and on what policy basis. In general, however, our client would be willing to er to extend their school sports pitches into their Site 246.
1674	1	In most respects the proposed criteria are supported. However, whilst due ^j consideration is given to landscape and nature conservation interests it is not clear that the sa
1674	2	In this context Criterion 7 (existing built character) is supported but it is considered that its range should be expanded to specifically consider the impact upon heritage ass present the cultural heritage dimension is not explicitly stated in this criterion, but nonetheless it is clearly a significant consideration having regard to the Vision and Strat Assessment under this aspect will require some careful judgement, e.g. allocation of a site containing an important but vacant Listed Building may assist in achieving a nec be clear that redevelopment would not be appropriate. Equally considerable damage to the significance of heritage assets can be caused by ill-considered development w important that the assessment of heritage issues is not limited as to whether a site is part of a heritage asset, but that it also takes account of any such assets in the surrou could be harmed by development on the site in question -e.g. intrusion into a designed view.
1674	3	National Trust has no particular comments to express on the vast majority of employment sites suggested for the Worksop area, or indeed about the overall level of provision of the second se
1674	4	However, the Trust does have several concerns about site W1 -Manton Wood. The site is a large one and at its closest is just 500 metres from the Grade I Registered Histo Clumber Park also contains some 30 Listed Buildings and part is a SSSL Clumber is of course also a major open space enjoyed by around 1 million visitors each year -many f from further afield who utilise a range of local facilities and benefit the economy of the area. Although the Nathaniel Lichfield Report refers to site W1 itself being a Specia reference in its assessments and comments to the proximity of Clumber Park and its significances.
1674		The Trust's concerns are exacerbated by lack of clarity about the scale and type of employment development that might take place on site W1. The report at various place business park, office use, mixed use and leisure uses (hotel and pub/restaurant). It is therefore very unclear what the opportunity is that is being identified here and how i of Worksop, regenerate and promote the retail core and revitalise the Chesterfield Canal Corridor.
1674	6	It appears to the Trust that office and leisure uses in particular would directly undermine the aspirations for the built up area of Worksop.
1674	7	Notwithstanding its 'brownfield' credentials this is an out of centre location and dependence upon road transport for people and goods does not make it the most sustaina the Core Strategy.
1674	8	There is also conflicting advice about the size of the site that might come forward the relevant background report referring to an employment area of 15-20 hectares, the hectares – clearly there is a substantial difference between the two in terms of the opportunities to respect the significances of neighbouring properties and provide envir

nt	nt	
1674	I G	It is therefore considered that if nonetheless the decision is taken that the site, or part of it, should be allocated, then it will be essential that: 1) It is for a clear and specifi aspirations for the centre of Worksop – in particular the site is considered to be unsuitable for leisure uses, including in the context of both the Core Strategy and national
1674		2) The size of the overall development area needs to be limited so that adequate ¹ , mitigation can be achieved – it is suggested that it should not exceed 15 hectares and ¹ should be secured to ensure that the remainder of the site is not built on at a later date but is subject to appropriate environmental improvements in accord with both its designation and the nearby heritage assets at Clumber Park; and
1674	1 11	3) The matters referred to at 2) above should also be addressed through the preparation of a Development Brief, or Masterplan, for the site if it should be allocated. This include specific advice on matters such as building locations and heights, external materials, structural planting, hard surfacing and lighting.
1675	1	Langtree Group Plc. broadly support the screening methodology outlined within Section 2 of the document and with respect to the identification of Employment sites.
1675	2	In terms of the assessment of the quality of potential sites, this refers to the scoring mechanism adopted within the Employment Land Capacity Study (ELCS). The scree criteria, against which a "traffic light" appraisal approach will be taken, the sites with more "green lights" from each of the criteria being considered most desirable to allo includes a number of key areas being considered, including landscape, built form and community support. In general terms we do not object to this criteria set out h amended criteria should be added which relates to "does the allocation of the site help to deliver the aims and objectives set out in the Core Strategy and in Nat fundamental tests of soundness in PPS12 relates to the compatibility of DPDs with national policy and overarching policy documents, it is felt that the assessment of the s be considered on this basis in addition to the criteria set out.
1675		The Core Strategy, informed by the evidence base prepared on behalf of and submitted by the Council, has established a requirement for new employment provision Strategy identifies that new and retained employment provision should be essentially centred on the three largest settlements of Worksop, Retford and Harworth-B therefore, priority for new employment allocations should be given to suitable, sustainable sites within and adjoining these key settlements.
1675	4	In the current Issues and Options document, the indication is that the three sites being currently considered for employment, including Langtree Group Plc.'s site a maximum development of 56 hectares. At this stage however it is unclear as to the actual development potential of the other two sites in question and therefore what a these sites. In respect of the W1 site, an indicative masterplan has been submitted (copy attached) which indicates a potential development solution for the site. In our we that the remaining alternative sites can deliver the land indicated on the figure 4.1 for employment purposes. Regardless of this assessment however, it is also evider cannot be accommodated, even in a best case maximum scenario, on two sites alone, unless these are to be the sites references W1 and W12 (notwithstanding the poter
1675		In our view the Council should seek to allocate sufficient land to ensure that the requirement for Worksop can be reasonably achieved, and that planning for a higher undermine the aims and objectives of the plan. Given the continuing difficulties in the economy and the need to seek to attract inward investment into the area, this development opportunity and investment choice would be a sensible approach to adopt in this location.
1675	6	Planning Policy Statement 4: Planning for Sustainable Economic Growth (PPS4) (2009) sets out the Government's approach to economic development and as such how Lo positively" for such types of development. Policy EC1 of PPS 4 states that LPAs should base planning for such development on robust evidence in the form of economic as existing and proposed employment allocations against the provisions of the PPS. Policy EC2 indicates that, planning for sustainable growth, LPAs should, among other con reflect the different location requirements of particular businesses in in relation to access and proximity to markets.
1675	7	Langtree Group Plc. considers that a significant amount of employment land should be provided within or adjacent to the Sub-Regional Centre of Worksop, though th aspects of the Core Strategy in order to be considered sound. In this respect however, the policy does indicates that "at least" 45% of the employment land provisio respect, an allocation above the 48 hectares suggested would not be contrary to the Core Strategy and would not undermine the overall strategy. It is considered that th opportunities within the A57 corridor, with its significant investment opportunities and location close to the A1 should be taken where possible and the site W1 is clearly a
1675	8	Given the importance identified within the ELCS to the A57 corridor as an employment investment opportunity, it is considered that restricting such opportunities purely hectare target would be unjustified and would undermine the overall economic ambitions of the district.
1675	9	Langtree Group Plc. owns the site at the Manton Plantation, which is identified as reference W1 within the Issues and Options document. In this respect, Langtree Group support the allocation of this site within the LDF including submissions to the Core Strategy (now adopted) and an indicative masterplan/advocacy document to indicate employment uses.
1675	10	As identified above, sites should be prioritised in and adjacent to the main settlements and therefore a site such as Manton, in close proximity to the sub-regional centre in favour of an allocation for employment.
1675	11	In the interim, Langtree Group Plc. are satisfied that the site is contained within the document and is being considered as a potential site for employment allocation.

1675	12	We would also refer and reinforce the conclusions and comments made with respect to this site in the ECLS which states the following: • A further allocation of employme at Manton Wood would be necessary to support the A57 corridor; • The A57 corridor is "generally considered to be key to Bassetlaw's economic future"; • The site (refer potential employment sites (28 out of 35 maximum); • Site is considered excellent in terms of strategic access, local road access, compatibility of adjoining uses and marke
1675	13	Langtree Group Plc. have significant experience in developing, operating and managing a variety of employment sites across the region and the north of England/Midla weight to the potential delivery of the site for employment uses, given that its delivery would not necessarily be dependent on third-party commercial developers. In this landowners but developers and employment space operators of proven experience and track record including in relative proximity to this area.
1675		As can be seen from the indicative masterplan submitted, there would be no assumption in such an allocation that the existing plantation would be promoted for specific be retained and managed in the future. In this respect the proposed development of the site would not unduly impact on the surrounding landscape and the current s Local Wildlife site. In this respect, Ecological Assessments and appropriate habitat mitigation and/or relocation would be proposed where necessary and ensure that this in
1675	15	The retention of the surrounding woodland would also, in addition, provide an existing natural screen to the development of the site and prevent the visual impact immediate area of the site.
1675	16 1	Langtree Group Plc. considers that the site in question would score highly on the nine criteria identified within the screening methodology and in most cases would reas score in this regard. We have considered this impact in more detail in the attached table figure 1. Langtree Group Plc. therefore strongly support the allocation of site V current suggestions within the ELCS indicate that this location is likely to be attractive in particular to the storage and distribution market, consider that the allocat employment uses within the B uses classes, subject to the usual development management policies and other material considerations.
1675	17	We consider that the Council should make specific reference and consideration to the emerging Planning Policy context, at a national and (consequentially) regional lev National Planning Policy Framework (NPPF) will be formally published before the end of March 2012 (and likely sooner) which clearly will have implications as to the soun NPPF will superseded and replace all current PPS and PPG, this will form the basis of planning policy at a national level. Hence, in order for the DPD to be considered sound policy, the document should pay due regard to the likely content of the NPPF. In addition, should the final published version of the NPPF make specific alterations thes consultation version of the DPD. At this stage, the NPPF makes a number of policy statements with specific regard to the development of employment generating land development all types, planning for prosperity which assumes that the planning system to deliver the jobs (and therefore businesses to provide such jobs) to ensure a sust
1675	18	With respect to sustainable economic growth, the Government's objectives include to "plan proactively to meet the development needs of business and support an economic also indicates that "Policies should be flexible enough to accommodate requirements not anticipated in the plan and to allow a rapid response to changes in economic clearly support a proactive approach to planning for economic development and ensuring that potential business investment in an area is not unduly constrained by inf with reference to our earlier statements regarding the amount of employment land, this supports an approach which allows greater flexibility and an ability to encour increasingly favourable market conditions.
1675	19 1	Given the likely publication of this document, which is unlikely to involve any fundamental changes to the principles surrounding economic development, we consider that document as part of its considerations in drawing up its Preferred Options (and subsequent Submissions Version) for the Site Allocations DPD.
1676	1	The 'screening approach' should be renamed to stop the confusion with 'screening opinion'. Not all criteria should be weighted the same and it should be recognised that will be for the decision maker to justify their approach by reference to the appropriate evidence base.
1676	2	We agree that the methodology criteria set out in section 2 of the Site Allocations Issues and Options paper is suitable to identify sites for allocation for future development
1676	3	The following table provides an assessment of site ref: 266 Retford Road, Blyth against the methodology criteria:
1676	4	1) The level of community support is unknown at the present time as no public consultation has been undertaken. DLP did try and consult with the Parish Council but the that the most appropriate course of action would be to submit a planning application to the local planning authority.
1676	5	2) Green. Compatible with existing and/or proposed neighbouring land uses: The allocation of this site for residential purposes would be compatible with the neighbouring
1676	6	4) Green. No Impact on agricultural land: The site is derelict open land and will not result in the loss of high quality agricultural land.
1676		5) Green. Not a Source Protection Zone: The site does not fall within such a protection zone
1676		6) Green. No negative impact on Landscape Character: The site is located on the eastern boundary of the settlement and is away from the south western boundary of having a sensitive landscape character in the Landscape Settlement Study.
1676	9	7) Green. Enhancement to the built character of the settlement: Development of a small scale housing scheme utilising quality architecture will enhance the eastern bout through the site will be retained thereby keeping the existing linkages with other parts of the settlement.

1676	10	8) Amber. Some loss of green infrastructure: Although development of the site will result in some loss of green infrastructure within the settlement, this site does not re neither is it of high ecological value.
1676	11	9) Green. No identified and unresolved constraints: There are no constraints on the site that cannot be resolved. Highways and noise in particular have been considered prevent development.
1676	12	Overall the site is considered to score highly as a potential housing allocation. Those issues that have been identified can be overcome and it is considered that the site is s
1676	13	The adopted Core Strategy sets out an overall housing requirement for the Rural Service Centres of 770 dwellings, 10% of the housing requirement of the District. Th Centres over the plan period is 328 dwellings, however based on local consultation the Council have only proposed to allocate 222 dwellings. The proposed numbers of all does not always reflect the size of that development and it is considered that there are opportunities to allocate sufficient sites to meet with the Core Strategy residua period.
1676	14	Given the rural nature of the District, it is considered important that the housing requirements of the rural settlements is catered for and this can best be met by allocating settlements. The numbers proposed for each settlement do not appear to have been based on a robust evidence base and have relied on what local residents think should settlement. DLP have assessed each of the settlements and suggested a housing requirement based on the percentage population of each service centre against the total proposed for each settlements.
1676	15	It is therefore considered that in the case of Blyth, which is the second largest rural service centre in the District, land should be allocated for at least 26 new houses. number of pubs and hotels, a Co-op food store and other services. This level of housing development is considered to be commensurate with the size of the settlement sites, including our client's that could accommodate this number of dwellings. Even if it transpires following further detailed examination of the constraints and market site on Retford Road would support less than 10 dwellings, the settlement boundary should be revised in order to allocate such sites.
1676	16	Site Ref: 178. The SHLAA assessment considers that this site is suitable for development, however it has identified that the site has a high chance of archaeological rema also adjacent to the Blyth Conservation area and therefore any residential development would need to be sensitively designed to take account of this.
1676	17	There is extant outline permission on the site for a single dwelling which expires in May 2012.
1676	18	The SHLAA assessment considers that the site could accommodate 20 dwellings based on development of 90% of the site at 30 dwellings to the hectare. This is conside Conservation Area and its edge of settlement location. A lower density development would be more appropriate and would be more in line with the number of houses re in Rural Service Centres.
1676	19	Site Ref 213. The main constraint to the development of this site are the electricity pylons that cross the site, although the SHLAA assessment concludes that if these car site would be suitable for housing. However, this could prove costly and challenge the viability of any future development.
1676	20	The site is also within the historic core of the settlement with a medium to high chance of archaeological remains on the site. Development of this site would represent a assessment based on a density of 30dph, this would represent 104 dwellings. Blyth is a Rural Service Centre and the guidance in Core Strategy Policy CS8 is that future devolate a scale appropriate to the current size and role of that settlement. The site has an extant permission on it for a cemetery which would provide potential for the exist this would be a more appropriate use of the site.
1676	21	Site Ref: 214. This site is to the east of Site Ref 213 on the A634 and has similar issues to Site 213, although it has been assessed as only having a low to medium chance of has been granted by the Local Planning Authority for use of the land as an extension to the cemetery.
1676	22	This site is significantly larger than Site Ref: 213 and according to the SHLAA assessment could accommodate 189 dwellings, however as also stated there would be insuffi this location. It is therefore considered that the site as a potential allocation is of an inappropriate scale for a housing allocation in Blyth.
1676	23	The development of both sites would also potentially have an impact on the landscape character given their proximity on the south western boundary of the village. The by Bassetlaw District Council assesses the landscape character in this location as very good quality and high sensitivity and should be conserved. Development in this detrimental impact on the landscape character.
1676	24	Site Ref: 369. This site is located to the north side of Retford Road and garden land associated with the existing dwelling. Although the SHLAA assessment does not potential flooding, although it is Flood Zone 1. It is noted however that there are a number of trees on the northern boundary of the site and the potential impact on thes to be allocated for housing. There would also need to be sufficient separation between any future development and the existing houses on Retford Road to ensure the amenity. This together with the concerns regarding the trees, would reduce the number of dwellings that could be accommodated on the site and as such the Council's overly ambitious.
1676	25	Site Ref: 589. This site is adjacent to site 369 and access would have to be through that site. The existing house on the site would require demolition in order to achieve same constraints on this site as identified in relation to site 369. The Council consider that the site could accommodate 6 dwellings, however in our view it is con accommodate 2 dwellings but would provide a more comprehensive scheme if linked to the adjacent site.

1676	26	Site Ref: 482. There are a number of constraints on this site identified in the SHLAA that make it an unsuitable site for a housing allocation. The overriding constraint is that high risk of flooding. It is not considered that this site should be allocated for housing development.
1676	27	Site Ref: 517. This site would represent a significant extension to Blyth and as identified in the SHLAA assessment, it would require highways improvements to accomm could potentially be allocated for. Notwithstanding the comments from the Conservation Officer regarding the quality of the design to take account of the Listed Buildir does not relate well to the rest of the settlement being divorced from it by the A1 to the west of the site. An allocation of this size would be of an inappropriate scale wi particularly when there are other sites that could accommodate the housing requirements of Blyth during the plan period.
1676	28	Site Ref: 590. The SHLAA assessment considers that this site may be suitable for development, although consideration would need to given to any future scheme due to th
1676	29	The site is also again divorced from the main settlement by the A1 and as such it is considered that there are more suitable sites within the settlement identified through t housing allocations.
1676	30	In summary, it is considered that of the sites identified in the Issues and Options Consultation document as potential allocations in Blyth, Sites 178, 266 and 369 are mos requirements of the strategy.
1676	31	The site in the ownership of our client has been incorrectly assessed in the SHLAA as a protected employment site. This is incorrect. The site is a vacant greenfield site or designation. The assessment that the site may be available is incorrect since it is available. Therefore based on the rest of the SHLAA assessment, the site is considered to be
1676		The owners have undertaken a masterplan of the site to demonstrate the level and type of development that could be achieved on the site. Two alternative layouts h scheme with detached houses set in larger gardens. The sketch layout demonstrates how a landscaping buffer and appropriate acoustic screening could be accommodated the A1. The alternative layout accommodates 19 detached and semi-detached dwellings on the site and again provides a landscape buffer. These two layouts are contained
1676	33	The applicant has sought advice regarding whether there is sufficient room to provide an adopted highway link from the A634 Retford Road. DLP Transportation has co footway can be achieved in accordance with the 6Cs Design Guide. This advice letter is contained in Appendix 2. The existing public footpath across the site has been inco can therefore be retained.
1676	34	Wilkins Hammond, Chartered Surveyors have prepared a Market Research Report with respect to the site and conclude that given the need to provide a landscape buff portion of the site and conclude that on balance a small scheme of large family houses is likely to suit the site best in terms of both the environment, land take and market
1676	35	A noise assessment has been undertaken and the preliminary findings are that although the site falls within Category C, the noise can be mitigated through the use of acou of the dwellings. It is therefore not considered that this is a constraint to development.
1676	36	Although there appears to be nothing of ecological significance as the site comprises mostly of grass it is considered appropriate at some future point to undertake an eco application. The site does not have any statutory designation and the SHLAA does not identify ecology as a constraint to the site. The photographs below illustrate the natu
1676	37	The areas identified in Blyth for open space are appropriate for the settlement. This particular issue does not directly impact on our client's land since it is not identified as
1676	38	This representation has been submitted by DLP Planning Ltd on behalf of UC Holdings Ltd who is the landowner of Site Ref: 266 identified in the Issues and Options Cons the site coming forward as a housing allocation and has included two potential housing layouts that this site could accommodate.
1676	39	It has also been confirmed by DLP Transportation that the site could accommodate a road of an adoptable standard with adequate visibility splays onto Retford Road. The the inclusion of landscape buffers and acoustic screening.
1676	40	There are no major concerns that would preclude development of the site. It has been highlighted that the site is not an employment site as stated in the SHLAA and there The masterplan for 5 houses is considered to be most appropriate and is of a scale commensurate with the size of Blyth and the function that it serves. Although a num housing allocations, not all of these are suitable for the reasons identified. Allocation of the site for housing is supported and the settlement boundary should be amended
1677	1	Focused on Harworth Bircotes.
1677	2	Yes if the adopted core strategy can significantly restrict the development of 'infill' properties on domestic garden land. It would be better to develop a small group of prop location than to continue to suffer the loss of existing gardens and open spaces that were once common and that are part of the village character. However, if the District (development of 'infill' properties on domestic garden land, then land should not be allocated since the number of successful 'infill' dwelling applications is likely to be great

1677	3	Development of part of site 508 would be acceptable subject a significant part of the site being released as public open space. The site is currently protected open space b
1677	4	Development of part of site 142 and/or part of site 152 would be acceptable subject to good open space provision, good pedestrian/cycle access, and adequate off-street sites would not be acceptable
1677	5	I am strongly opposed to development of sites 522, 523, 524, 486, 491 and 526 because of the adverse impact upon the Conservation Area and/or important views descri
1677	6	Sites 108, 112, 150 and 503 have problems related to vehicle access.
1677	7	Sites 143, 150 and 503 would allow development close to the A57 and I do not think that the village should extend to the edge of the A57 bypass.
1677	8	In the period since this consultation process started the village store and the butchers shop have closed. This raises questions about the status of the village as a Rural Ser
1677	9	Sites 145 and 146 on the village plan already have full planning permission. There is outline planning permission for more than 40 houses on the former poultry factory sit approximately 65 houses are already approved in some form and are likely to be built in the coming years. Any site allocation would be additional to this.
1677	10	Yes, the open spaces on the map should be protected from future development.
1677	11	Other open spaces to be considered for protection from development are a) land surrounding Pond Corner (near Pond Farm) including the garden at Old Well Cottage;
1677		b) the Heritage Orchard (east of Top Cart Gaps and south of the A57);
1677		c) fields to the east and west of Great Lane south of High Street;
1677		d) fields between Low Street, Mark Lane and the former poultry factory site;
1677	15	e) land south of the village school and north of High Street (the extension to the school field and the former recreation ground south of this
1678	1	We are developing an interest in a site in Retford and write to propose its allocation for redevelopment purposes in Site Allocations DPD. The site is the Former King Edwa the town. As you will already be aware, this site as remained vacant for approximately 4 years at the time of writing and it continues to be actively marketed for redevelop options are being considered, and we would therefore wish to draw this site to your attention for redevelopment purposes generally, rather than for a specific end use at Framework consists of the Core Strategy, to which Proposals Maps are appended, and within which it is explicitly stated that additional allocations will be sought through
1678		Retford is identified as a Core Service Area in the Core Strategy and Site Allocations Issues and Options Draft. A Core Service Centre is the focus for levels of housing, empl support the identification of Retford as a sustainable place for additional economic, housing and town centre development of an appropriate scale. Notwithstanding this, Spaces of the Retford Site Allocations Issues and Options Consultation (Figure 5.1, Page 38) identifies predominantly housing sites (either committed or potential) and are there is one large Potential Mixed Use Site and a Potential Opportunity Site. Neither of these latter two areas are located centrally in the urban area, or in close proximity consideration in the context of a number of commercial uses. Our view is that the Former King Edward School premise on London Road is a centrally located site within the requirements. It seems illogical therefore at this juncture not to seek its allocation for a future use which would benefit residents of the town and comply / contribute tow Strategy and Site Allocations Issues and Options Draft as the focus for growth.
1678	3	We of course accept that the buildings on the site are Listed, and thus a heritage asset. Whilst this is clearly a potential constraint to its redevelopment, we believe that a consultation with Conservation Officers alongside the various stages of the Site Allocations Issues and Options DPD to ensure its sensitive redevelopment. It is certainly no with the setting of the heritage asset.
1678	1 4	In particular, we note that Policy CS3 of the Core Strategy specifically identifies that retail development outside the town centre will be allocated through the Site Allocated ideally located to contribute to this need, subject to suitable design and due regard to the heritage asset. I would however stress that, as above, a variety of redevelopment outside the town centre will be allocated through the Site Allocated this representation should not be interpreted solely as a request for a retail allocation. This is simply just one of the avenues which is being explored, and an issue which we stress that and the stress that and the stress that are above. Site Allocations Issues and Options Consultation Draft.
1679	1	Happy with the approach and results for H&B'S.
1679	2	Whole community was given the opportunity to comment on the future development of our Town and yes, we are supportive of the outcomes.
1680	1	Well there's no time I find it very difficult to see what the requirement of extra housing is because I can't sell what's built and Bassetlaw Council has put in for 120 odd how work? What the town's short of is not housing it's industry.
1680	2	I have no objection to the develop of building on there as long as it goes in the right way. I mean that Palmer Road was always designated for opening up for building on la
1680	3	I strongly object to accessing it through Durham Grove because when I bought my land to build off the system was the guy owned the land and another guy were his build options in Palmer Road of plots for sale and there were seven plots in Durham Grove.
1680	4	Now I chose Durham Grove because it was a cul-de-sac and it cost me more it was dearer to go in Durham Grove than it was to go in Palmer Road.
1680	5	I've no objections to sites 7, 37, 46, 309 and 512 but it's not been gone about the right way in my opinion
1680	6	Tiln Lane carries all the heavy traffic. I would have no objections if they got the bypass done. The Welham bypass, because it would take all those heavy lorries off Tiln La

1680	7	One of my big beliefs is that the land is for the living, that's one of my best beliefs. But, there is another thing I won't be here to witness it, that if ever there is another wa Because we are using all farmland for building land. And I lived through the last war so I know what I am talking about. We used to go in farmers field and pinch a carrot
1680	8	Well I'm talking about land down the bottom of Palmer Road, again. Unless provision, if permission is given you are going to have the same problems there with sewerage Longholme Road it wouldn't flow up, it doesn't flow uphill.
1680	9	Well I think there should be some areas should be protected. I wouldn't agree on every one, but you've got to have an overall balance.
1680	10	I am mainly concerned with that bit down the bottom of Durham Grove. That's the bit I am mainly concerned with. I don't think it can be stopped from building on it, but heresy. I have been told that the developer in question put in for provision for Palmer Road to be opened up and it got turned down last year or the year before.
1680	11	The bungalow down Durham Grove that the developers bought had a covenant on it. Whether is still in force or not I don't know. The last bungalow on the left going do
1680	12	No, I don't think so. I am only concerned with the opening up of Durham Grove, if it is opened up and it gets permission, I shall be looking for compensation. And everybe
1681	1	Ownership is shown as the Douglas Rupert Clark Estate which I do not believe to be correct, I understand my neighbours the Sticks own half this land and I do not believe
1681	2	I would also like to inform you that residents on the Drive have covenants preventing building on 309.
1681	3	How are you to overcome access issues from the Drive which is private and owned by the residents?
1681	4	You also refer to land being overgrown when in fact there are crops growing.
1682	1	English Heritage promotes a wide definition of the historic environment which includes not only those areas and buildings with statutory designated protection but also th as well as the landscape and townscape components of the historic environment. This wide definition should be considered when assessing potential sites. From our initia contain, or are adjacent to a number of designated and non-designated heritage assets including listed buildings, conservation areas, registered park and gardens and arch importance and extent of below ground archaeology is often unknown, although information in the Nottinghamshire Historic Environment Record (HER) will indicate area further assessment is required before decisions or allocations are made. In relation to specific site allocations, it is not our intention to fully detail all the potential impacts however we reserve the right to make further representations to any subsequent proposals that might adversely affect nationally designated sites, including their setting, taken in consideration when preparing the next iteration of this document. Most of the sites contained within this document have little information on how they might be their full impact. Many also fail to identify the full extent of designated heritage assets that exist within and surrounding the site, which might act as constraints on allocat the preferred sites include development criteria to guide future proposals, which in some cases should include reference to the historic environment. There is a danger of establishing the principle of development without guidance on the issues that need to be addressed at the planning application stage. In addition, the possible cumulative one location could cause significant harm to the historic landscape/townscape and should be fully considered. We also encourage you to continue involvement of heritage Council and your in house Conservation Team as part of this consultation process.
1682	2	The site allocations screening methodology as set out in Chapter 2 cites the use of SHLAA criteria for housing and ELCS assessment criteria for employment sites. Heritage environment have been considered under these and it is noted that where constraints are considered by the Council to be able to be overcome, sites have been brought f
1682	3	We are concerned that there is to be no further analysis of the historic environment in identifying sites for the preferred options stage and as suggested in our letter of 10 to include a further criterion in relation to the historic environment at stage two. This argument is supported by our site specific comments, as set out below, whereby the designated and non-designated assets and the cumulative impacts of multiple allocations. Lack of further consideration for the historic environment at stage two. This argument is supported by our site specific comments, as set out below, whereby the designated and non-designated assets and the cumulative impacts of multiple allocations. Lack of further consideration for the historic environment as part of the second such issues are not adequately taken forward.
1682	4	Where mitigation measures are to be proposed for sites taken forward, these should be made clear as part of any further consultation exercise, is order to assess how app
1682		Site 9 is in close proximity to Manor Lodge (grade I listed building). We have previously raised concerns with regard to this site as part of the consultation process for the S held on site. At this time it was agreed that the setting of the Lodge would be a key issue and that any concerns would be addressed in terms of landscaping, design and la out to its full capacity, as well as incorporating a landscape buffer zone, layout taking into account key views of the Lodge and maintaining the character of the land on ap expect this advice to be taken forward and reflected as part of the preferred site allocations and a design brief for the site to be produced as part of this allocation. 1682	6	In addition, the allocation of site 30 for housing may also have issues related to setting of this asset and as such we would request a similar approach for this site as well. T archaeology within site 30 which should be taken into account.
1682	7	Site 4& W9 is a large site which may have wider implications in terms of setting of assets including Osberton Park. It would be preferable for the smaller scale options to be impacts on the wider historic environment being properly assessed and taken forward as part of a brief for the site. There is also potential for non-designated archaeology
1682	8	Site W12 may have similar impacts upon the setting of Osberton Park which will need to be considered.
1682	9	Site 35 is directly adjacent to Old Gateford conservation area and as such may have an impact upon the setting of this and the other designated assets within this area. It is identified as poorly screened and incongruent with the special character of the area within the adopted character appraisal and as such this allocation will need to be care the same. In addition there is also the potential for non-designated archaeology. Similarly sites 26 and 28 & W6 may also have an impact upon this area and the latter site
1682	10	Sites 23, 60 and 75 are within the conservation area and site 75 is also adjacent to two grade II listed buildings.
1682	11	Site W1 is a large site which is located near to Clumber Park (grade I Registered Park and Garden) and as such there may be issues with the setting of this which will need d that warehousing type units typically associated with an employment allocation may be of such a scale that would harm the setting of Clumber Park.
1682	12	Development of site 153 and 585 should take into account the setting of the grade II listed Church of St Luke.
1682	13	Site 27 and part of site 3 are situated within a conservation area and are adjacent to other heritage assets, including the Whitehouses Inn (grade II listed building). It is und these sites, contained within the 2009 Appraisal Document. These should be referred to and expanded upon as necessary if the allocations are to be taken forward.
1682	14	Sites 24, 37, 44, 51, 512 and R7 have the potential for non-designated archaeology which should be taken into account.
1682	15	We would raise concern with sites 180, 193, 204 and 232 as these all have the potential to adversely affect the setting of the Church of All Saints (grade II listed).
1682	16	Sites 180 and 193 have the greatest potential impact as they are directly adjacent to the Church and its grounds. Sites 187, 191 and H4 may contain non-designated archae account if these sites are taken forward.
1682	17	We note that there are large areas of land with proposed employment allocations adjacent to Serlby Park (including the grade I listed Serlby Hall). The setting of Serlby Par sites are taken forward. The building out of large 'shed' type buildings which is now commonplace with employment land may have an impact and as such needs to be care
1682	18	Site 520 includes the grade II listed North House Farmhouse and barns and as such may affect the setting of this.
1682	19	Site 385, 174 and 176 all have the potential for non-designated archaeology.
1682	20	In 2009 Tuxford conservation area was designated as a conservation area 'at risk' and this was subsequently identified as a Priority Heritage at Risk site in 2011. As part of Heritage has supported, with grant funding, the current Partnership Scheme in Tuxford in order to tackle some of the issues within this area, including targeting key buildir
1682	21	As a local service centre, the allocation of land for housing within Tuxford is inevitable and, indeed, is required to support the on going regeneration of the town and its his concerned as there are a number of proposed site allocations which would adversely affect the conservation area and its setting, as well as impacting upon other heritage cumulative impact of these) would be a significant set back in terms of the impact upon the historic environment and may affect efforts to address Tuxford's 'at risk' status
1682	22	Specifically the following sites are of particular concern: Sites 126 and 235 comprise of areas of historic farmland (associated in part with the grade II listed farmhouse at 9 conservation area boundary. This area, at present, forms a distinctive landscape setting to the Town contributing to its significance.
1682	23	Site 126 contains ridge and furrow as a nondesignated archaeological feature. The loss of this through the allocation of these sites would have an adverse impact on the ch
1682	24	Site 518 is also within the conservation area boundary and the development of this site for up to 9 dwellings may also have an adverse affect.
1682	25	Sites 493 and 127 are within the conservation area. Land to the south of Lincoln Road has been largely developed in the latter part of the 20th century, however to the nor undeveloped and rural in nature and as such we consider that the development of these sites would have an adverse affect. This can also be said for site 117 which, althou area boundary, development of this site, for similar reasons would diminish the rural setting of this part of Tuxford and may lead to future development pressure within th
1682	26	Sites 492, 495, 114, 119, 124 and 130 are all situated within the conservation area boundary and due to the topography of the area form an important view point out of th grade II listed windmill and grade II listed 'The Mount.'
1682	27	Large scale development within this area has potential to harm the open and rural character of this part of the conservation area as well as the setting of these listed build
1682	28	In addition, there is potential for non-designated archaeology at sites 492, 495 and 114.
1682	29	Site 123 has the potential to affect the setting of 4-12 Ollerton Road as grade II listed buildings. In addition, this site also falls within the conservation area.

1682		We consider that site 122 and 490 as well as site 121 offer the least impact on the historic environment within Tuxford.
1682	31	Sites 93, 201, 80 and 79 all contain ridge and furrow as a landscape feature worthy of protection.
1682		In addition sites 79 and 80 are adjacent to 3 & 3A Debdhill Road and 8 Church Street (grade II) and there may be an issue upon the setting of these assets.
1682		Sites 101 and 496 both have the potential to contain non-designated archaeology.
1000	34	Site 178 is situated adjacent to the conservation area boundary and opposite Blyth Priory SM and a number of listed buildings – including the grade I listed Church. Therefo
1682	54	designated assets. In addition the site has the potential for archaeology.
1682	35	Site 590 is adjacent to grade II listed Mill Farm and site 213 is adjacent to Spital House (grade II) and as such there may be issues around the setting of these assets.
1682	36	Sites 478 and 541 are likely to have an adverse impact upon the setting of the Church of St Peter (grade I) and The Old Vicarage (grade II) as well impacting upon the histori
1002	50	Extensive views of the Church are gauged from Main Street and as such the development of this land also impact upon its wider setting.
1682	37	The development of land for housing at site 161 will also have an impact upon the setting of the grade II listed pigeoncote at Blyth House.
1682	38	We consider that sites 398 and 399 are within the setting of a number of designated heritage assets, including the church of St Mary (grade I) Cuckney Motte and Bailey Ca
1002	30	Ulvers (grade II) and as such development here is likely to have an adverse impact upon these.
1682	39	We have no comments to make in relation to any of the proposed open space allocations within Dunham on Trent.
1682	40	Sites 141,143, 145, 152, 486,491,508, 522, 523, 525, and 526 are all within, or adjacent to the designated conservation area and as such the allocation of these may have a
		to be considered.
1682	41	In addition, site 152 may have an impact on the setting of Pond Farmhouse, pigeoncote, stables and barns (grade II) and site 525 is directly opposite East Markham Primary
		upon the setting of this.
1682		We have no comments to make in relation to any of the proposed allocations in Elkesley.
1682		Site 401 has potential for non-designated archaeology.
1682	44	Site 407 may have an impact upon the setting of Pear Tree Farm (grade II), Hall farmhouse (grade II) and North and Rose Cottages (both grade II).
1692	45	We would raise concern with the allocation of site 534 in relation to the impact on the setting of the grade I listed Church of St Peter and in the context of the conservatior
1682	45	and its character may be irreversibly altered in the allocation and development of this site for 5 dwellings as part of meeting the necessary Highways Regulations.
		With regard to site 410 (former Bramcote Lorne School), this is a grade II listed Building within the conservation area. We would be supportive of the allocation of this as a
1682		this building back into long term use and thus secure its future. Any development of the site would need to be sensitive in recognition of the designated assets and their se
1002		beneficial to produce a brief for the site as part of this allocation.
1682		Site 134 may have an impact upon the wider setting of The Homestead (grade II) as it is adjacent to historic farmland which contains ridge and furrow.
1682		Site 424 may affect the setting of Mattersey House (grade II), Church Hall (grade II) and Church hall Cottages (grade II).
1682		Sites 505 and 506 may have an impact upon the setting of the Vicarage (grade II).
1682		Site 540 may affect the setting of Langwith Lodge (grade II) and site 257 may affect the setting of Langwith House (grade II).
1682		We would raise concern that the allocation of site 501 would adversely affect the setting of the grade I listed Church of St Martin as the proposed allocated directly adjoins
1682		In addition the allocation of site 262 may affect the setting of the grade II listed Yew Tree Farm and the listed farm buildings.
1682		Site 239 may affect the setting of the grade II listed barn and pigeoncote at Westmoor Farm.
1682	54	We have no comments to make in relation to any of the proposed allocations within Rampton.
1682	55	There may be potential archaeology at site 224.
1682	56	The allocation of site 461 for housing may affect the setting of the grade II* listed Church of St Peter and Saint Paul.
1682	57	In addition there are proposed allocations (numbers 458 and 459) which are adjacent to a number of listed farmsteads – development of such sites will need to ensure tha
1002	57	is not compromised.
1682	58	We would raise concern that the allocation of site 281 has the potential to affect the setting of the grade I listed Church of St Bartholomew.
1682	59	We would raise concerns with the allocation of sites 368, 442 and 438 as they all contain ridge and furrow. This is an historic landscape feature that is being lost and it shou
		estimated that since the Second World War around 80% of ridge and furrow, which is such a distinctive feature of the Midlands landscape, has been lost.
1682	60	Site 286 has the potential to affect the setting of the grade I listed church of St Mary Magdalene, and the grade II Listed the Old Vicarage and grade II Listed Manor House.
1683	1	Further to your consultations within the village I can confirm that the Parish Council does not support any development within the village
1683		Consequently does not support any of the sites identified by Bassetlaw District Council as potential Development sites
1683	3	No development within Sutton also arose from the Sutton's Parish Plan consultation and the Parish Council is committed to delivering this plan to the best of its endeavour
1684	1	I can confirm that the Parish Council of Hayton have no issues to raise with the Sites Allocation Documents.

1685		Gringley on the Hill Parish Council are of the opinion that no potential development land, shown as BAS0134 and BAS135 on the Gringley plan should be included within th
	1	that the Miller Homes development is complete.
1685	2	As you are aware of this development on the former detention centre site consists of 68 homes which may have a significant impact on the village infrastructure and lifest
1085	2	the effects should be monitored over the next 5 to 10 years before additional land is earmarked.
1686	1	RESOLVED that the Parish Council support the previous consultation of residents via the Parish Plan of 2006 and the Ranskill Future Development Questionnaires that no fu
1000	-	village envelope.
1686	2	However, it was also agreed that any future planning applications for building within the village envelope would be considered on their individual merits.
1686	3	None of the sites as they are all outside the village envelope which has recently been re-drawn presumably to protect the land outside of the envelope.
1686	4	The Parish Council is concerned that extra development would seriously damage the infrastructure of the village.
1686	5	The drainage system has constant problems
1686		Parking problems
1686	7	The Primary school is full to capacity
1686	8	Too many villages are losing their identity and councillors do not wish this to happen in Ranskill.
1686	9	Whilst the Parish Council is keen to protect its Open Spaces we should point out that on the east side of Site 39/6 the Parish Council has planning permission to build a Contract the level is head is heart available for this representation of the vector of the second
		that the land is kept available for this purpose in the years ahead.
1687	1	I have attached our assessment, using the best available information, of the sites we serve. As identified there are no absolute constraints to development in terms of wate
		infrastructure upgrades. These are identified as amber on the attached assessment There is the capacity of resource to serve the proposed growth for sites: 1, 7, 87, 91, 92, 110, 112, 114, 117, 127, 130, 134, 143, 151, 152, 156, 161, 165, 174, 184, 191, 20
1687	2	247, 249, 251, 258, 281, 282, 294, 295, 296, 303, 343, 282, 345, 347, 349, 353, 364, 398, 399, 407, 408, 423, 460, 462, 468, 481, 493, 496, 497, 505, 508, 511, 512, 516, 51
1007	2	and 572.
1687	3	There is capacity of supply networks to serve the proposed growth for sites: 114, 134, 143, 161, 232, 244, 281, 296, 303, 282, 345, 347, 349, 398, 407, 408, 493, 496, 497,
1007		Sites where infrastructure and/or treatment upgrades required to serve the proposed growth or diversion of assets may be required: 1, 7, 87, 91, 92, 110, 112, 117, 127, 1
1687	4	213, 214, 218, 219, 237, 251, 246, 247, 249, 258, 282, 294, 295, 343, 282, 353, 364, 399, 423, 460, 462, 468, 481, 505, 508, 512, 517, 522, 523, 536, 571 and 572.
1688	1	Further to your discussions with Janet last week, please accept this email as the formal withdrawal of the representations submitted on behalf of The Trustees of GMT Folj
1000	-	land to the East of Worksop. The Estate have asked us to confirm to you that the site (Kilton) is no longer available for any potential development.
1688	2	The comments in respect to Sturton le Steeple should however still be considered as submitted.
1688	3	The Estate asked us to withdraw all our submissions in their entirety and this also covers this area to I'm afraid.
1688	4	Option B Worksop
1688	5	Yes, given the sites available in the village it is supported that at least 11 dwellings should be allocated. Sites 454,455,456,457,460 and 461 demonstrate this potential.
1688		454,455,456,457,460,000
1688	7	Yes
1689	1	At this early stage of the process where so many sites are under consideration it is difficult for us to assess the impact of proposed development on the existing waste wate
		proposals become clearer and sites are better defined we will be happy to provide an assessment of the development areas and identify any capacity issues.
1689	2	As an observation however, apart from large developments we rarely expect significant problems with accepting additional foul sewage flows from new development prov
		sustainable manner.
1689	3	Similarly with water supply, although sufficient resources are available in the area, local reinforcements are likely to be needed but the extent can only be determined by n
		site basis. Although the Bassatlaw area is comprehensively severed by Severe Trent Water for severage Severe Trent only partially severs the area for water supply, and for the area
1689	4	Although the Bassetlaw area is comprehensively covered by Severn Trent Water for sewerage Severn Trent only partially covers the area for water supply, and for the area consult with Anglian Water
		consult with Anglian Water.
1689	5	As your plan progresses we will be happy to plan the provision of the necessary infrastructure with other organisations such as the Environment Agency to ensure that a consistence to contact us if you need a further explanation at this stage.
		not hesitate to contact us if you need a further explanation at this stage.
