Health Check of Lower Tier Centres

1.0 Langold and Carlton-in-Lindrick

- 1.1 Langold is designated as a 'Large Local Centre' in the Core Strategy and Development Policies DPD and Carlton-in-Lindrick is designated as a 'Small Local Centre'.
- 1.2 Both settlements are located within the western portion of Bassetlaw to the north of Worksop. Langold has an estimated population of approximately 2,472, while Carlton-in-Lindrick's population is estimated at 5,623 (as at the time the 2011 Census was completed).
- 1.3 Langold and Carlton-in-Lindrick are functionally linked. The site of the former Firbeck Colliery and Langold Country Park physically separate the two centres.

The Carlton Pharmacy, and surface car parks off Long Lane

- 1.4 The Policy Inset Map for Carlton-in-Lindrick indicates two separate centre boundaries. One designated boundary is focused around the Post Office on the southern end of High Road. Also within the boundary for the centre is the Town Hall, a fish and chip take away outlet, a gift shop, a wedding photographer, and two public houses – the Blue Bell Pub and the Sherwood Ranger. The other centre boundary is situated to the north, along Long Lane; and comprises the library, and doctor's surgery. Other uses within the centre include; a hair salon, convenience store, pizza restaurant, Chinese take away, fish and chip take away, sandwich outlet, and a pharmacy which complements the nearby doctor's surgery.
- 1.5 Notably, no vacant units were identified during the survey completed by Nexus in June 2016.
- 1.6 The units that are located on Long Lane are actually situated off the road and set back behind several surface car parks. By virtue of its location set back from the road means the centre does not provide much in the way of a notable or vibrant centre. The land uses surrounding this centre are generally residential in nature and it appears the centre performs a very local role.
- 1.7 The more southern centre of Carlton-in-Lindrick, which is focused around the High Road, is generally car dominated with on-street parking and slim pedestrian footpaths. It is this centre which is more connected with Langold being on the same 'A' Road.
- 1.8 Langold is a linear centre and has a designated primary frontage as identified on the Policy Inset Map for the centre. The retail units front Doncaster Road. Doncaster Road is the same 'A' Road as the High Road around which Carlton-in-Lindrick is situated (refer above). The quality of the Langold street environment is reasonable with well-kept paved footpaths and street trees.

-
- 1.9 A variety of retail uses are located within the centre including; a Fulton Foods (occupying two units), a Cooplands, the Original Factory Shop, a florist, fresh fruit and vegetable shop, a butcher, pharmacy, and convenience store. With regards to services the centre contains a hairdresser, dentist, post shop, in addition to an Indian restaurant and a public house called the Royal Legion.
- 1.10 Two vacant units were identified within the centre at the time Nexus completed their retail survey in June 2016.
- 1.11 The linear centre provides a tight grain of retail development that produces a cohesive environment that appears vibrant for its small size.

2.0 Misterton

- 2.1 Misterton is identified as a 'Local Service Centre' in the Core Strategy. It is the largest village in the north-eastern part of the District. It comprises key facilities and services such as a; doctors' surgery, supporting pharmacy, post office and convenience store. The village serves the surrounding rural communities.
- 2.2 At the time the 2011 Census was completed, Misterton has a population of 2,140.
- 2.3 The Core Strategy explains that the aspiration for Misterton is to *"maintain its role as the key rural community centre in north eastern Bassetlaw, attracting and maintaining a range of services and facilities to support both its own residents and those of surrounding villages"* (refer page 14 of this document). Further to this, the Spatial Strategy for the District highlights the desire to strengthen the service role of Misterton.
- 2.4 The Local Centre is focused around the junction of the High Street and Station Street. At the time Nexus completed their Retail Survey in mid-July 2016 they identified the following units and facilities located within the Local Centre boundary:
- i. The Misterton Centre – community centre (advice and facilities)
 - ii. Misterton Store – post office
 - iii. Home W Butchers
- 2.5 In the wider area there a number of other local retail/service facilities, including but not limited to:
- i. Red Hart public house
 - ii. Millview Saddler
 - iii. Farmers Fish and Chips
 - iv. Misterton Pizza House
 - v. Salon 12 (hairdressers)
- 2.6 In June 2016 Misterton was designated as a Neighbourhood Plan Area by the District Council, and subsequent to this the Parish Council have commenced production of a Neighbourhood Plan for the village.

3.0 Celtic Point

- 3.1 Celtic Point is located to the north-west of the Worksop Town Centre boundary. The centre is concentrated around the Asda supermarket on Gateford Road. This is a relatively large Asda with six checkouts and four self-serve stations.
- 3.2 In addition to the Asda, Celtic Point comprises; a Poundland, Betfred, a charity shop, Fulton Foods, Domino's Pizza, fish and chip take away, Cooplands and a pharmacy. These retail and leisure providers supplement those within the nearby Worksop Town Centre and serve those residents in the vicinity.
- 3.3 The centre units are set back from Gateford Road with frontages behind a number of surface car parks. In consequence the pedestrian environment is constrained and dominated by cars.

Photos of Celtic Point

The Cooplands and Betfred at Celtic Point

- 3.4 Celtic Point is designated as a 'Large Local Centre' in the Council's settlement hierarchy.

4.0 Prospect Precinct

4.1 As with Celtic Point, Retford Road also acts as a complementary retail destination to the Worksop Town Centre being located to the north-east of the centre. This centre is set back off the road (Gloucester Road) and comprises a supermarket (Sainsbury Local) and supplementary retail/leisure units. It is identified as a 'Large Local Centre' in the Council's settlement hierarchy. The following units were noted during Nexus's Retail Survey in June 2016:

- i. Sainsbury Local (the anchor store for this small centre);
- ii. Innings Public House
- iii. Cooplands
- iv. Pharmacy
- v. Jimmy's Take Ways
- vi. Post Office
- vii. Betfred
- viii. Convenience Store (Martin's)
- ix. Roots Hair Salon

4.2 The centre performs the role of providing for the daily needs of residents in Worksop's north-eastern portion.

4.3 This centre is set behind a large car park, which creates a car dominated environment. In consequence only minimal volumes of pedestrians were observed during Nexus's site visits.

Precinct

5.0 Retford Road

- 5.1 Retford Road is designated as a 'Small Local Centre' in the Core Strategy.
- 5.2 The units are located on the northern side of Retford Road. On the other side of Retford Road are residential dwellings. Several large employers are also located close by. As such, the centre provides for the needs of the neighbouring residential occupiers and employees.
- 5.3 Unlike the other two supporting centres in Worksop, Retford Road does not contain a large anchor food retailer. The impacts of this are evident in the fact that there are a number (approximately two) vacant units in this centre.
- 5.4 The prominent retailers in the centre are convenience providers. These include; a One-Shop, Polish delicatessen, bakery, and snack bar. In addition, there is one barber, one fish and chip take away and an angling supplier.
- 5.5 The street environment of Retford Road is dominated by cars with forecourt parking provided in front of most of the buildings. Furthermore, the undefined pedestrian environment does not create a welcoming centre.

6.0 Welbeck Road

- 6.1 Welbeck Road is classified as a 'Small Local Centre' in the Core Strategy. The centre is located to the south-east of Retford Town Centre and is within the Retford defined development boundary, as shown on the Inset Map for Retford.
- 6.2 The centre is focused around the junction of Welbeck Road with Wharncliffe Road. Wide footpaths and on-street car parks provide a centre that is easily accessible by foot or car.
- 6.3 Within the centre is George's fish and chip take away, a laundrette, beauty salon, pharmacy, Spar, and Co-operative Food.

- 6.4 The Clumber Inn public house sits just outside of the designated centre boundary.
- 6.5 The centre is surrounded by residential development. As such, it serves to provide for the daily needs of the local community.

Introduction

1.1 Research Background & Objectives

To conduct a survey amongst residents in the Bassetlaw District to assess shopping habits for main food and grocery, top-up, non-food shopping and leisure activities.

1.2 Research Methodology

A total of 1,001 telephone interviews were conducted between Monday 18th April 2016 and Friday 29th April 2016. Interviews were conducted using NEMS in-house CATI (Computer Assisted Telephone Interviewing) Unit. Respondents were contacted during the day and in the evening. All respondents were the main shopper in the household, determined using a preliminary filter question.

1.3 Sampling

1.3.1 Survey Area

The survey area was segmented into 10 zones, defined using postcode sectors. The zone details were:

Zone	Postcode Sectors	Number of Interviews
1 - Worksop	S80 1, S80 2, S81 0, S81 7, S81 8, S81 9	100
2 - Harworth / Bircotes	DN11 8, DN11 9	100
3 - Whitwell / Creswell	S80 3, S80 4	100
4 - Anston / Dinnington	S25 1, S25 2, S25 3, S25 4, S25 5	100
5 - Retford	DN22 0, DN22 6, DN22 7, DN22 8, DN22 9	100
6 - Markham / Ollerton	NG22 0, NG22 9	100
7 - Bawtry / Gringley	DN10 4, DN10 5, DN10 6	100
8 - Mansfield fringe	NG20 0, NG20 8, NG20 9, NG21 9	100
9 - Maltby / Bramley fringe	S66 7, S66 8	100
10 - Rossington / Doncaster fringe	DN9 3, DN11 0	101
Total		1,001

1.3.2 Telephone Numbers

All available telephone numbers are used to obtain the sample of interviews. This includes published telephone numbers (land-lines and some mobile numbers) but is supplemented with ex-directory numbers as the demographic profile of this sub-set is different to the demographics of the published numbers sample. Ex-directory numbers are randomly generated using the published numbers as a 'seed'. Business numbers are de-duped and excluded.

We don't screen against the TPS (Telephone Preference Service) database, again because the demographic profile of TPS registered numbers is slightly different to the rest of the population. In addition, there is no legal requirement to screen against TPS registered numbers; market research is not classified as unsolicited sales and marketing.

1.3.3 Sample Profile

It should be noted that as per the survey's requirements, the profile of respondents is that of the main shopper / person responsible for most of the food shopping in the household. As such it will always differ from the demographic profile of all adults within the survey area. With any survey among the main shopper / person responsible for most of the food shopping in the household the profile is typically biased more towards females and older people. The age of the main shopper / person responsible for most of the food shopping in the household is becoming older due to the financial constraints on young people setting up home.

A number of measures are put in place to ensure the sample is representative of the profile of the person responsible for most of the food / shopping in the household.

First of all, interviewing is normally spread over a relatively long period of time, certainly longer than the theoretical minimum time it would take. This allows us time to call back people who weren't in when we made the first phone call. If we only interview people who are at home the first time we call, we over-represent people who stay at home the most; these people tend to be older / less economically active.

We also control the age profile of respondents; this is a two-stage process. First of all, we look at the age profile of the survey area according to the latest Census figures. Using a by-product from additional data we collect from a weekly telephone survey of a representative sample of all adults across the country we know the age profile of the main-shopper in any given area. This information is from data based on in excess of 100,000 interviews and is regularly

updated and is therefore probably the most accurate and up to date information of its kind.

Stratified random sampling helps ensure that the sample is as representative as possible. While the system dials the next random selected number for interviewers, all calls are made by interviewers; no automated call handling systems are used.

1.3.4 Time of Interviewing

Approximately two-thirds of all calls are made outside normal working hours.

1.3.5 Monitoring of Calls

At least 5% of telephone interviews are randomly and remotely monitored by Team Leaders to ensure the interviewing is conducted to the requisite standard. Both the dialogue and on-screen entries are monitored and evaluated. Interviewers are offered re-training should these standards not be met.

1.4 Weightings

To correct the small differences between the sample profile and population profile, the data was weighted. The population is of the main shopper in the household. Weightings have been applied to age bands based on an estimated age profile of main shoppers (see section 1.3.3 for details). The weighted totals differ occasionally from the adjusted population due to rounding error. Details of the age weightings are given in the table below:

Age	Main Shopper Profile (%)	Interviews Achieved	Age Weightings
18-34	19.21%	22	8.0714
35-44	16.83%	76	2.1467
45-54	19.04%	260	0.7097
55-64	19.21%	170	1.0952
65+	25.71%	440	0.5662
(Refused)	n/a	32	1.0000
Total		1,001	

Further weightings were then applied to adjust zone samples to be representative by population. Details of those weightings are given in the table below:

Zone	Population *	Interviews Achieved	Interviews Achieved (Weighted by Age)	Zone Weightings
1	54,525	100	91	2.3634
2	15,059	100	113	0.5274
3	15,532	100	118	0.5205
4	21,550	100	80	1.0595
5	37,396	100	101	1.4671
6	19,084	100	102	0.7375
7	12,572	100	102	0.4889

9	19,592	100	90	0.8564
10	20,560	101	113	0.7162
Total	253,340	1,001

1.5 Statistical Accuracy

As with any data collection where a sample is being drawn to represent a population, there is potentially a difference between the response from the sample and the true situation in the population as a whole. Many steps have been taken to help minimise this difference (e.g. random sample selection, questionnaire construction etc) but there is always potentially a difference between the sample and population – this is known as the standard error.

The standard error can be estimated using statistical calculations based on the sample size, the population size and the level of response measured (as you would expect you can potentially get a larger error in a 50% response than say a 10% response simply because of the magnitude of the numbers).

To help understand the significance of this error, it is normally expressed as a confidence interval for the results. Clearly to have 100% accuracy of the results would require you to sample the entire population. The usual confidence interval used is 95% - this means that you can be confident that in 19 out of 20 instances the actual population behaviour will be within the confidence interval range.

For example, if 50% of a sample of 1,001 answers “Yes” to a question, we can be 95% sure that between 46.9% and 53.1% of the population holds the same opinion (i.e. +/- 3.1%). The following is a guide showing confidence intervals attached to various sample sizes from the study:

%ge Response	95% confidence interval
10%	±1.9%
20%	±2.5%
30%	±2.8%
40%	±3.0%
50%	±3.1%

1.6 Data Tables

Tables are presented in question order with the question number analysed shown at the top of the table. Those questions where the respondent is prompted with a list of possible answers are indicated in the question text with a suffix of [PR].

The sample size for each question and corresponding column criteria is shown at the base of each table. A description of the criteria determining to whom the question applies is shown in italics directly below the question text; if there is no such text evident then the question base is the full study sample. If the tabulated data is weighted (indicated in the header of the tabulations), in addition to the sample base, the weighted base is also shown at the bottom of each table.

Unless indicated otherwise in the footer of the tabulations, all percentages are calculated down the column. Arithmetic rounding to whole numbers may mean that columns of percentages do not sum to exactly 100%. Zero per cent denotes a percentage of less than 0.05%.

Percentages are calculated on the number of respondents and not the number of responses. This means that where more than one answer can be given to a question the sum of percentages may exceed 100%. All such multi-response questions are indicated in the tabulated by a suffix of [MR] on the question text.

Where appropriate to the question, means are shown at the bottom of response tables. These are calculated in one of two ways: if the data is captured to a coded response a weighted mean is calculated and the code weightings are shown as a prefix above the question text; if actual specific values were captured from respondents these individual numbers are used to calculate the mean.

Notes:

- a. Gross floorspace derived from IGD database, Bassetlaw District Council records or Nexus Planning Assessment
- b. Net floorspace derived from IGD database or Bassetlaw District Council records where available or based on Nexus Planning professional judgement (generally assumed to be 70% of gross floorspace for smaller stores where not specifically known)
- c. Proportion of net floorspace derived from typical company split between convenience and comparison floorspace as identified by Verdict UK Food & Grocery Retailers 2014 with the exception of large food superstores (i.e. over 4,000 sq.m net sales area) which are assumed to have approximately 60:40 split in favour of convenience goods and local foodstore which are assumed to have 95% of net sales dedicated to convenience. Aldi and Lidl are assumed to have 80% of net sales dedicated to convenience goods, which correlates with our experience elsewhere
- d. Sales densities relate to the monetary turnover of each square metre of net sales area and are derived for all retailers except Lidl and Aldi from Verdict UK Food & Grocery Retailers 2014, and for Lidl and Aldi from Mintel Retail Rankings 2015.
- e. It has been assumed that all unnamed and local convenience stores within a centre (including B&M, Bargain Booze, Budgens, Costco, Heron Foods, One Stop) are 'trading at equilibrium' (i.e. their 'benchmark' turnover equates to that identified by the survey)
- f. Survey derived performance of stores calculated by adding together 'main' and 'top up' turnover as set out in Table 4
