1 Introduction

- 1.1 This document sets out Bassetlaw District Council's assessment of its current five year supply of housing land, from 1st April 2022 to 31st March 2027. It updates the previous statement produced in October 2021. The calculation is a comparison between the anticipated supply of new homes against the number of new homes that are required to be built within the District.
- 1.2 The assessment includes up-to-date information regarding permissions, commencements, and completions, including contributions from developers on when, and how quickly, sites are likely to come forward.
- 1.3 The National Planning Policy Framework (NPPF; 2021), requires local planning authorities to identify and update annually a supply of specific deliverable sites sufficient to provide five years' worth of housing against their housing requirements. It also requires an additional buffer of 5%, 10% or 20% (depending on the status of the Local Plan and the latest Housing Delivery Test (HDT) results) to ensure choice and competition in the housing market and to provide a realistic prospect of achieving the planned supply.

2 Policy Background

- 2.1 The NPPF expects strategic policy-making authorities to follow the standard method in the PPG¹ (Paragraph: 034 Reference ID: 2a-034-20201216) for assessing local housing need. In terms of housing need, national policy now indicates that there is no requirement to address past under delivery (at the commencement of the plan period) if using the Standard Method. The affordability ratio used to establish the housing requirement takes account of past under delivery. Put simply, the baseline is reset because past under delivery has been taken into account in the calculation of housing need. As such, there is no requirement for the Council to add on the previous cumulative under delivery, as this would lead to double counting.
- 2.2 Due to the current adopted plan being over five years old, under the guidance of the Government's Housing Delivery Test, the annual housing requirement for the previous three years has been significantly reduced for Bassetlaw. This is due to the fact that the Housing Delivery Test calculation assesses housing delivery against 2014 based household projections².
- 2.3 The Council has also seen a significant increase in planning permissions being granted over the past few years and, subsequently, housing delivery. In light of these changes, Bassetlaw is no longer regarded as persistently under-delivering when measured against its housing requirement and has a healthy supply of land to accommodate new homes.

3 Methodology for Calculating the Five-Year Supply

- 3.1 The Housing Supply and Delivery PPG³ now prescribes a set format to the information that must be provided in annual five year land supply position statements. This includes:

¹ <https://www.gov.uk/guidance/housing-and-economic-development-needs-assessments>

² https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/728523/HDT_Measurement_Rule_Book.pdf

³ PPG Paragraph: 014 Reference ID: 68-014-20190722

- For sites with detailed planning permission, details of the numbers of homes under construction and completed each year, with associated commentary;
- For small sites, details of their current planning status and record of completions;
- For sites with outline consent or allocated in adopted plans, information and clear evidence that there will be completions on site within five years;
- Permissions granted for windfall development and how this compares with the windfall allowance (if/where relevant);
- Details of demolitions;
- Total net completions from the plan base date by year; and
- The five-year land supply calculation clearly indicating buffers, shortfalls and the number of years of supply.

Completions from 2010 to 2021

- 3.2 Table 1 below sets out the net annual housing completions from the Bassetlaw Core Strategy base date in 2010. Full details can be found in the Bassetlaw Annual Monitoring Reports for each year⁴.

Monitoring Year	Dwellings Completed
2010/2011	264
2011/2012	303
2012/2013	226
2013/2014	249
2014/2015	241
2015/2016	338
2016/2017	462
2017/2018	551
2018/2019	434
2019/2020	693
2020/2021	775
2021/2022	766

Table 1: Bassetlaw Housing Delivery 2010 to 2022

Windfall sites

- 3.3 The NPPF, 2021 defines windfall as ‘sites not specifically identified in the development plan’. Paragraph 71 of the NPPF, 2021 allows local authorities to make an allowance for windfall sites as part of anticipated supply. However, local authorities may only make an allowance for

⁴ <https://data.bassetlaw.gov.uk/annual-monitoring-reports/>

windfall if they have “compelling evidence that they will provide a reliable source of supply”. In addition to this, any windfall allowance should be realistic having regard to the strategic housing land availability assessment, historic windfall delivery rates and expected future trends.

- 3.4 The PPG guidance on housing and economic land availability assessment states a windfall allowance may be justified in the five-year housing land supply calculations. The Council have taken a precautionary approach in analysing the windfall allowance which follows the approach set out in the Housing Land Supply Position, Housing Trajectory and Windfall Allowance Background Paper, May 2022⁵. This assessment of the five-year housing land supply, however, does not propose to include a windfall allowance as this may create double counting with extant consents that could be built out during this period.

What buffer has been applied to the five year housing requirement?

- 3.5 Whilst past under delivery does not need to be added on to the housing requirement when calculating the five year housing land supply, it does need to be taken into consideration when determining the percentage buffer to be applied.
- 3.6 Paragraph 74 of the NPPF (2021) additionally states that local authorities should identify the following buffers on top of their five-year housing land supply calculations:
- a) 5% to ensure choice and competition in the market for land; or
 - b) 10% where the local planning authority wishes to demonstrate a five-year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or
 - c) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply”.
- 3.7 In order for a LPA to achieve a five-year housing land supply, the minimum level of housing delivery that it must be able to demonstrate is its five-year housing land supply requirement plus a 5% buffer. A 20% buffer is required where delivery against the HDT has fallen below 85% of the housing requirement (Footnote 41 of the NPPF).
- 3.8 The housing delivery test results for 2021 published in January 2022: <https://www.gov.uk/government/collections/housing-delivery-test> indicated that in Bassetlaw delivery was 248% against the target of the last 3 years (2018-2021), and therefore a 5% buffer is appropriate to Bassetlaw for the calculation of the five-year housing land supply.

4 The Council’s Five-Year Housing Requirement

- 4.1 The first step in undertaking the five year land supply assessment is to calculate local housing need using the Standard Method set out in national guidance
- 4.2 The Planning Practice Guidance (PPG) and updates to the NPPF; 2021 advise that “*where strategic policies are more than 5 years old or have been reviewed and found in need of updating, local housing need calculated using the standard method should be used in place of the housing requirement*” (PPG: Housing Supply and Delivery, Paragraph: 003 Reference ID: 68-003-20190722). As the Council’s latest adopted Plan, the 2011 Core Strategy, is more than

⁵ <https://www.bassetlaw.gov.uk/media/6887/housing-land-supply-background-paper-may-2022.pdf>

5 years old, the Council therefore must measure its housing land supply against the area's local housing need calculated using the Standard Method. In addition, in calculating the housing requirement figure, the guidance notes that the current year should be "*used as the starting point from which to calculate growth over that period*" (see Housing and Economic Needs Assessment, Paragraph: 004 Reference ID: 2a-004-20201216). The minimum need calculated using the Standard Method in the 2020/21 statement was 288 dwellings per annum which used 2020 as the base date, and 281 per annum for 2021/22 which used 2021 as the base date. The calculated figure for 2022/2023 using 2022 as the base is 279 dpa. The calculation is shown in Appendix 4.

- 4.3 Table 2 (below) sets out the five-year housing target for Bassetlaw over the period 1 April 2022 to 31 March 2027. This target is based on delivering 279 dpa over the five year period plus a 5% buffer, this equates to 293 dwellings per annum/1465 dwellings over the five year period.

5 Year Housing Requirement (1 April 2022 – 31 March 2027)		
	ANNUAL (dwellings)	5 YEARS
Basic Housing Target	279	1,395
Shortfall	N/A	N/A
5% (NPPF buffer)	13.95	69.75
TOTAL FIVE YEAR HOUSING TARGET	293	1465

Table 2: Bassetlaw Five Year Housing Requirement

5 Housing Land Supply

- 5.1 In order to calculate the current housing land supply it is necessary to determine what land is available and the likelihood of it coming forward during the specified five year period. Annex 2 of the 2021 NPPF provides a comprehensive definition of what constitutes 'deliverable' sites.
- 5.2 'Deliverable: To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:

A) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).

B) Where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.'

What is 'clear evidence' in respect of Category B sites?

- 5.3 In relation to Category B there is no definition of what constitutes 'clear evidence'; however, the PPG: Housing Supply and Delivery (ID: 68-007-20190722) provides examples of what type

of material can be considered as providing clear evidence in support of Category B sites. It states:

“Such evidence, to demonstrate deliverability, may include:

- current planning status – for example, on larger scale sites with outline or hybrid permission how much progress has been made towards approving reserved matters, or whether these link to a planning performance agreement that sets out the timescale for approval of reserved matters applications and discharge of conditions;
- firm progress being made towards the submission of an application – for example, a written agreement between the local planning authority and the site developer(s) which confirms the developers’ delivery intentions and anticipated start and build-out rates;
- firm progress with site assessment work; or
- clear relevant information about site viability, ownership constraints or infrastructure provision, such as successful participation in bids for large-scale infrastructure funding or other similar projects.”

5.4 In accordance with the above definition and the evidence required to demonstrate the deliverability of sites the Council includes the following categories within the housing land supply.

Category of Sites	Description
Major sites (10 or more dwellings) with full or reserved matters consent, or sites with an area of 0.5 hectares or more	Sites comprising ten or more new dwellings or sites with an area of 0.5 hectares or more with full planning consent which are deliverable
Minor sites (9 or fewer dwellings)	Sites of 9 or fewer dwellings with full or outline consent which are deliverable
Major sites (10 or more dwellings or 0.5 hectares or more) with outline planning permission	Sites comprising ten or more new dwellings or 0.5ha or more with outline planning consent where the landowner is in the process of submitting a reserved matters planning application and where development is well advanced on an earlier phase of a large site.
Neighbourhood Plan Allocations without planning permission	Sites allocated for housing in made Neighbourhood Plans where the landowner or developer is in the process of submitting a planning application and has indicated their intention to deliver development within 5 years.

Table 3: Categories and definitions of deliverable housing sites

5.5 While it may be possible to justify the inclusion of other sites at different stages within the planning system within the five-year supply, the Council has only included sites in the above categories where they have been determined to be deliverable. However, it should be noted that if outline planning permissions on Major sites and Neighbourhood Plan Allocations were not included i.e. only taking into consideration sites in category A of the NPPF definition in paragraph 5.2 above, Bassetlaw would still be in a position demonstrate a five year housing land supply.

Delivery assumptions

- 5.6 Engagement with the development industry is an important element of determining whether the identified supply of housing land is deliverable. When preparing updates of this statement, BDC engages with planning agents, developers and landowners to clarify their current position and anticipated timescales for sites coming forward and/or projected build- out and completion rates. This information is added to existing monitoring data, such as previous completion rates, known market interest and data from planning applications, indicating lead-in times for different stages of the planning and delivery processes.
- 5.7 In addition, an assessment of past delivery rates from 2016 to 2020 has been undertaken. This local evidence shows that lead in periods are relatively short in Bassetlaw. On average it takes 27 months from grant of outline permission to first completion, and 20 months from grant of full permission to completion.
- 5.8 Based on the views of representatives from the development industry and local trends, and the assessment of delivery of development in Bassetlaw, the following development lead-in timescales have been identified:

Key Stages	Timescale (months)		
	Outline Application	Reserved Matters	Full Application
Determination of planning application	4	4	4
S106 (signed)	6	-	6
Discharge conditions	3	3	3
Site preparation	-	3	3
Time to first completion	-	4	4
Sub total	13	14	20
TOTAL	27		20

Table 4: Development lead-in times

- 5.9 It is likely to take at least 27 months from an outline permission being granted to the first completions on site, assuming there are no delays in getting all reserved matters granted, conditions discharged and legal agreements complied with (see Table 4). For full planning applications, the timescale is approximately 20 months.
- 5.10 In order to gain an understanding of current housing delivery rates there has been continuous correspondence with developers. Meetings with a range of developers and Registered Providers were held early in October 2020.
- 5.11 During the 2020-2022 Covid Pandemic period housing delivery in Bassetlaw has been high with 775 dwellings delivered in 2020/21 and 766 in 2021/22 significantly higher than in the previous five years. There is no evidence to date to show a significant slow-down in the housing market in the District.

- 5.12 The government has reflected the temporary disruption to local authority planning services and the construction sector from the pandemic national lockdowns in this year's Housing Delivery Test results. For all plan-making authorities the number of homes required within the 2019/20 year has been reduced by a month and within the 2020/21 year by four months in the Housing Delivery Test.
- 5.13 Taking into consideration views of the development industry, historic delivery trends in Bassetlaw, and the economy following the Coronavirus lockdown periods, the lead-in periods have been reviewed and it is not considered necessary to revise them at this point. This will be monitored annually and revised if trends show any change in lead in times.

Build-out rates

- 5.14 Historic build rates in Bassetlaw demonstrate that 30 dwelling completions or more per annum is being achieved on the majority of large sites (sites over 50 dwellings). Sites of this size can have a wide range of delivery rates - ranging from 90 dwellings per annum to 6 dwellings per annum in a small number of cases (See Appendix 3 for details of annual delivery rates from 2016 to 2020).
- 5.15 The local analysis on build-out rates has also been supplemented with national evidence detailed in Lichfields' research 'Start to Finish' February 2020⁶. The analysis compares the size of site to its average annual build-out rate. It shows that larger sites deliver on average more dwellings per year than smaller sites. On sites of 50-99 dwellings the median average delivery is 27 dwellings per annum, whereas sites of 100-499 dwellings delivered a median of 54 dpa. There is significant variation in build-out rates between different sites examined. This, however, is broadly consistent with the views of volume house builders and past delivery trends seen in the District where large scale sites developed by a single volume house builder have an average build-out rate of 30-35 dwellings per annum.
- 5.16 Taking these factors into consideration, the Council has taken a prudent approach in assuming a delivery rate of 30 dwellings per annum on sites over 50 dwellings unless written evidence is provided by an agent or developer. This information is detailed in Appendix 3 Historic build rates shows that smaller sites of 10- 50 dwellings have strong delivery rates, typically delivering within five years once commenced. This has been factored into the delivery rates of sites.
- 5.17 Demolitions and changes of use are deducted from the overall supply. This is typically a low figure in Bassetlaw.

6 Deliverable Supply

- 6.1 Appendices 1 and 2 list all known deliverable sites contributing to BDC's supply of housing land. This information is summarised in Table 5 below, which identifies a deliverable supply of 3,962 dwellings as at 1 April 2022. The total number of dwellings on minor sites (sites of 9 or fewer) is 739 dwellings.

⁶ <https://lichfields.uk/media/5779/start-to-finish-what-factors-affect-the-build-out-rates-of-large-scale-housing-sites.pdf>

Site Category	YEAR 1	YEAR 2	YEAR 3	YEAR 4	YEAR 5	Five Year Total
	2022-2023	2023-2024	2024-2025	2025-2026	2026-2027	
Major Sites with full planning consent	910	773	533	321	119	2656
Major Sites with outline planning consent	30	30	139	193	175	567
Minor sites (9 or fewer)	739					739
Minimum Five Year Supply (Net)						3,962

Table 5: Bassetlaw Five Year Housing Supply by category

7 Conclusions

- 7.1 Table 6 below shows that, inclusive of a 5% buffer (as per the latest HDT result), and based on the Standard Method calculation for local housing need, at 01 April 2022 the Council can demonstrate a housing land supply of **13.5 years**.

A. Setting the baseline of Local Housing Need (LHN) 2014-based projections, over period 2022-2032 Bassetlaw average annual projected household growth	237.2	(53,549-51,177) /10
B. An adjustment to take account of affordability: Bassetlaw median workplace based affordability ratio 2021 ⁷ : 6.81	1.175625	[Local affordability ratio-4]/4] x0.25
C. Minimum annual local housing need figure	279	(adjustment factor+1) x projected household growth
Total Housing requirement over next 5 years LHN requirement (no shortfall as its based at 2022)	1395	279 x 5
E. Plus NPPF 5% buffer	1,465	(in line with NPPF and Housing Delivery Test)
F. Annual requirement over next 5 years	293	
G. Deliverable supply (Projected completions 2022/2023-2026/27)	3,962	
H. 5 year Housing Land Supply	13.5	3,962/293
I. Surplus dwellings	2497	

Table 6: Five year supply as at 1 April 2022

⁷ 2021 Affordability ratio, Table 5c: (published 23 March 2022):
<https://www.ons.gov.uk/peoplepopulationandcommunity/housing/datasets/ratioofhousepricetoworkplacebasedearningslowerquartileandmedian>

- 7.2 The approach taken by the Council is a cautious, and only includes those sites and allocations where development is considered likely to take place within the next five years. It is important to note that the objective is to maintain a minimum of five years' worth of housing supply plus the required buffer on an ongoing basis. The five-year housing land supply is always a snapshot in time based upon the current housing requirement as set by the Government's Standard Methodology.

Average (mean) lead in period						3.6	2										

Appendix 4: Standard Method Calculation

The below details the calculation of the Standard Method figure for Bassetlaw District Council in accordance with the latest PPG (see ID: 2a-004).

Step 1 – Setting the baseline

The districts 2014-based housing projections are:

- 51177 households in 2022
- 53549 households in 2032

Therefore, 2,372 new households are projected in the district during this period. This equates to an average of 237 new households per year.

Step 2 – An adjustment to take account of affordability

The districts 2021 median workplace-based affordability ratio (i.e. the ratio of workplace-based earnings to house prices) published in March 2022 is 6.81. Given this is over 4, the following adjustment is required.

The adjustment factor is calculated using the following formula:

$$\text{Adjustment factor} = \left(\frac{\text{Local affordability ratio} - 4}{4} \right) \times 0.25 + 1$$

The adjustment factor for the district is 1.175625 and the minimum requirement is therefore 279 dwellings.

Step 3 – Capping the level of any increase

The level of increase of the adjustment factor is capped depending on whether or not the Council has adopted a local plan within the last five-years. The Bassetlaw Core Strategy was adopted in December 2011 and therefore is more than five-years old, the potential cap is 40% above the higher of:

- The average household growth for the district calculated in step 1: 237 dpa; or
- The average housing requirement figure set out in the most recently adopted strategic policies (i.e. the 2011 core strategy. The Core Strategy had a housing target of 6,384 over the 18 year period from 2010-2028 or 350 per annum

The housing requirement from the Bassetlaw Core Strategy is the greater figure. Therefore, the potential cap is 350 dpa x 1.4 = 490

The average baseline figure (calculated in Step 1) times the adjustment factor (calculated in Step 2) equals 279 dpa which is below the cap of 490 dpa.

The 40% cap would nominally cap any growth in Bassetlaw to 490 dpa however as Step 2 of the Standard Method only reaches 279 dpa the cap is effectively redundant. The Standard Method figure for Bassetlaw District Council with a 2022 base date is therefore **279 dpa**.
