INTERNAL

SUBJECT. Re EXAMINATION OF THE
BASSETTAW LOCAL PLAN 2020-2038
To whom it may concern,

I, [REDACTED], having
read through your Guidance Note,
received by myself the other day, have found
nothing relating to, LAND NORTH OF TURNER
ROAD WORKSOP. REF 22/00462/FUL
BASSETTAW D.C.

Should this proposal, I.E; the building
of 80 Dwellings with Associated Plans,
become a subject of one of your Hearing
Sessions, I will be prepared to give
my opinion on this proposal.

I will state only my opinion on the
Danger of building of ANYTHING on
this land as it is Polluted Land
which is still producing CH₄ and CO₂ gases.

50 years after it had ceased to be used as a Land-Fill (and TIP) by Worksop District Council and according to various sources I have contacted over the years, will continue to generate these gasses for a further 40-50 years!

I would speak as a Gas Service Engineer with 38 years experience, the last 8-10 years as an Engineer working in the Emergency section of British Gas PLC.

Yours

City and Guilds; Gas Fitting Inter and Final

The Utilization of Gas, City and Guilds.
